Lancaster Farming

VOL. 25 No. 22 Lancaster Farming, Saturday, March 29, 1980 $7.00 Per Year

At last: agreement on security fund

BY CURT HARLER

CAMP HILL — Legislators, farm organizations, dairy cooperatives, the Pennsylvania Agriculture Department and others met Wednesday morning in a show of harmony for SB 1287.

That measure would establish a Milk Security Fund for Pennsylvania dairymen.

There were some notes of discord despite the careful orchestration of the meeting.

But it is doubtful the protesters will survive the overwhelming support generally offered by those at the meeting.

The second reading of SB 1287, the Security Fund Measure, was completed by week's end. It is sponsored by Senators Patrick J. Stapleton, the Indiana County Democrat; and Frank J. O'Connell, the Luzerne County Republican.

Stapleton, head of the senate agriculture committee, made it clear he would entertain no motions to ammend the bill as presented by his committee, except technical ammendments.

O'Connell, who said he has experienced no opposition to the measure, said he hoped to see the measure ready for the governor's signature by the end of summer.

Stapleton said the bill should move as soon as the Senate returns from its recess for the primary elections.

Noah W. Wenger, Lancaster County Representative on the House Ag Committee, said later he foresees no problems with the measure's moving smoothly through the House.

The bill will amend Article V of the Pennsylvania Milk Marketing Law to protect dairymen against default, chronic late payment, or underpayment.

Among other provisions, SB 1287 calls for establishment of a milk security fund paid fully by the state's milk dealers at the rate of one cent per hundred pounds milk, to the amount of $4 million.

Shown with her admirers, owners and sellers is Lime-Hollow Elevation Jessie who sold recently in Lancaster for $116,000.

Jessie bidding stops at $116,000

BY PAT KAUFFMAN

LANCASTER — While the auctioneer proclaimed her one of the great cows of her breed and admonished that Washington spends more than his asking price of $17,000 in a minute, the bidding was over.

All bids were in and done at $116,000 on Lime-Hollow Elevation Jessie.

When the gavel hit, its sound underscored the emergence of a new era in the Holstein world. For Jessie's future is now wrapped up completely in embryo transplant.

See related stories on pages A38, C28 and D8.

What pushed Jessie's price so high? Who can afford to pay that kind of a price? These were the questions heard everywhere people learned of the purchase. M. Robert Young, a general partner in Jessie Partners, the purchasers, explained.

"Jessie is a sixth generation cow to carry the excellent rating in mammary. There are only two or three other cows in the U.S. with this distinction. More importantly, Jessie is the

Vote due April 25

Lehigh Valley farmers eye reorganization

BY VIVIAN PAUL
Staff Correspondent

ALLENTOWN — A major financial reorgization, which would include the sale and dissolution of Lehigh Valley Cooperative Farmers, has been propsed by the management and board of directors of the dairy.

The plan is intended to relieve the Co-op of its $20 million debt and fulfil its obligation to preferred shareholders.

In a prepared statement to members, the board and management said, "We have worked diligently to find a way to make your Cooperative financially sound and viable and to meet the needs of its producer-members.

"After years of effort, it is our conclusion that these problems can not be solved within this organization. Therefore we recommend selling all of the assets and business of Lehigh Valley Cooperative Farmers and dissolving it."

The plan centers around the creation of two new business entities. The first, to be known as Lehigh Valley Farmers, would be strictly a bargaining cooperative, owning no plants, property, or equipment.

It would have the same directors as the Lehigh Valley Cooperative Farmers. Present shippers would be asked to become members by purchasing one share of common stock for $10.

A second business, Atlantic Processing, Inc., also will be formed.

According to the statement issued by the Dairy, "The new organization will assume all of the debts of Lehigh Valley Cooperative Farmers which amounts to nearly $20 million and pay cash to Lehigh Valley Cooperative

Lancaster holds 'super' Holstein tour

BY DICK ANGLESTEIN

MARTINSBURG — A reunion and reports on the use of super ovulation to speed up the offspring population of top producers were highlights of the Lancaster County Holstein Tour to Bedford and Blair Counties on Thursday.

The reunion took place during the first stop on the tour at MarCove Farms, near the small rural village of Martinsburg in Blair County.

Back together briefly again were Dunwood Chief Carmel, who has had a top production exceeding 28,000 pounds and tour member Alvin Stoltzfus, of Oxford, Chester County, whose father sold the excellent-rated Holstein a year ago.

"She brought the top price of $71,000 last March at the Dunwood dispersal sale," Stoltzfus recalled.

The sale was the largest of its type last year in Pennsylvania, bringing an average of $5,435 for more than 100 head.

"She's a top member of one of the best Holstein families with 19 head averaging over 20,000 pounds," Stoltzfus said as he ran his hand over the familiar black and white flank.

Carmel has received two super ovulations since coming to Blair County,

Judge says move grain bin

Lebanon Co. farmer seeks Twp. understanding

BY SHEILA MILLER

CAMPBELLTOWN — Farmers should be aware of ordinances and beware of sellers before signing on the dotted line," said South Londonderry Township Supervisor Raymond Shullippy concerning the Harvey and Nora Krall grain bin case.

His statement comes after learning about a civil action court decision finalized on March 17 in the court of G. Thomas Gates, Common Pleas Judge in Lebanon County. The case involved the zoning hearing board of the township and the Kralls.

The history of the court case began in 1976 when Harvey and Nora Krall, owners of a 170 acre corn and soybean farm near Campbelltown contracted with a local builder to construct a grain drying bin on their property.

According to Krall, the contractor and his salesman informed them that a building permit would not be needed to put up the metal structure. "He said he had put up several of these bins and never got any permits for anyone else."

Trusting in the integrity of the Lebanon County builder, Krall bought the grain bin and construction proceeded in November of that year.

Easily in view from Route 322, the 27 foot high gray metal bin was completed without anyone coming to inform them that they were violating any rules and regulations, said Krall. During the time the bin was being erected, however, Krall was hospitalized for ten days as the result of a serious fall.

Roughly two months after the bin had been finished, Krall said he received a notice of violation from the zoning board telling him he needed a permit to construct the bin. He went to apply for the permit, but it was denied because the Zoning Enforcement Officer Ed Small said he had not complied with the zoning ordinance.

The grain bin was erected forty feet six inches from the township's Hinkle Road.

PACMA Fowl

PACMA-FACTS

The following market is supplied by PACMA-FACTS, a direct marketing organization affiliated with the Pennsylvania Farmers' Association. Participating poultrymen are members of PACMA, which employs a fowl marketing agent, The Farmers' Agricultural Cooperative Trading Society (FACT) - to sell members' fowl. PACMA works directly with the PFA poultrymen in the program.

Farm point prices prevailing for fowl to be marketed by members during the week of March 31 were 11 plant, 10½ plant, 8 farm.

DEKALB

Two Ways To Improve Your Profit Picture

XL & DK

Two layers with distinctly different characteristics... From two separate research programs.

You don't have to buy from two different companies to get the two top layers on the market.

The XL shows excellent production under many management conditions. The DK responds best to finely tuned, close management.

DEKALB Layers are bred to possess the economic traits most applicable to your operation. You do have a choice... The high productivity XL or the high efficiency DK.

HUBBARD WHITE MT. BROILERS

Probing your dairy farm for better profits.

J Shephard Wolff, of Valley Acres Farm, RD #1, Newville, Pa., reviews forage sampling operation with Penn Pro Gene Schlosnagle while (inset) Mike Thomas, Supervisor of Quality Control, analyzes another forage sample in Pennfield's in-house laboratory

As the nutritional content of your cows' forage goes, so goes your milk yield .. and its profitability. That's why this forage sampling is vital to your farm. It catches the changes in nutritional content from one of your crops to another ... from one of your fields to another ... even from one set of weather conditions to another. In short, it spots any nutritional over- or under-balance ... so you can do something about it.

This forage sampling is a vital part of the Pennfield Computerized Total Ration Service. And here's how it works: **1.** We collect samples of your forage. **2.** Then we evaluate the quality of your forages. We determine the total digestible nutrients. The fiber content. The protein content. The amount of carbohydrates. **3.** The computer quickly spots any nutrients lacking in the forage. For your milking cows. And for your dry cows. It immediately points out the overfeeding of nutrients. Underfeeding, too. Both, of course, may be different at different times of the year. And the printout will tell you what you need. And when. **4.** Your Penn Pro Professional advises you on the quantity and type of nutrients that should be added, to balance your total feeding program to your cows' nutritional requirements. **5.** The result can be increased milk production at the lowest possible feed cost

The Pennfield Computer Total Ration Service could bring on your greatest growth act. In your milk yield. And your profits.

Try the Pennfield Computerized Total Ration Service. There's no cost or obligation for this unique service to your dairy operation. Just phone us right now. Today. At Pennfield Feeds. Local calls: Lancaster 299-2561, Red Lion 244-4511. In 717 and 215 areas dial toll-free 800-732-0467. Pennfield Feeds, Rohrerstown Road, Lancaster, PA 17604.

Penn Pro is a total feed program from Pennfield Feeds.

THE OLD FARMER'S ALMANAC

MARCH 31-APRIL 6, 1980

Glowery and showery

Grass fire danger now General Douglas MacArthur died April 5, 1964 Full moon March 31 Average length of days for the week, 12 hours, 52 minutes Passover April 1, and Easter April 6

Frogs' eggs can be seen now Reputation is oft got without merit, and lost without deserving

Ask the Old Farmer I have heard that yellowjackets never make their home in the same place twice But I have had a nest of them three years in a row in the back of my woodshed How can I get rid of them when they return this year? C T, Boone, N C

Give it both barrels of a ten-gauge shotgun loaded with duck charges and then go visiting for about a week

Home Hints Hot nails won t crack plaster

OLD FARMER'S WEATHER FORECASTS

New England: Sleet, snow in mountains, then cloudy and cold with showers, flurries north, weekend is rainy and cold

Greater New York-New Jersey: Partly sunny and cold starts the week, followed by clearing and mild, week's end cool, bringing showers

Middle Atlantic Coastal: Beginning of week is rainy and cold, then partly sunny and cold, with flurries sunny and seasonal for weekend

Piedmont & Southeast Coastal Cold wave starts the week, then clear and very warm, possible rain, through weekend

Peoria Cattle

Thursday, March 27
Report supplied by USDA

Trading continued slow on steers and heifers again this week. Slaughter steers closed at the middle of the week mostly 1.00, instances 1.50 lower than Wednesday a week ago. Slaughter heifers fully .50 to 1.00 lower. Cows and bulls 1.00 lower. Receipts totaled about 2500 this week, 2818 a week ago, and 3527 a year ago. The failure of the beef trade to show any turnaround in activity forced prices lower again this week despite the continued reduction in market cattle receipts.

SLAUGHTER STEERS: Few loads mixed choice and prime 3-4 1100-1225 lbs. 65.00-66.00 Monday, not tested on Wednesday. Choice 2-4 1000-1300 lbs. 64.00-66.00 Wednesday, mostly 64.50-66.50 Monday, about half load 67.00. Mixed Good and Choice 2-4 950-1200 lbs. 62.50-64.00. Good 60.00-63.00. Some mixed good and choice 2 1300-1575 lb. Holsteins 59.25-59.50, few standard and good 58.00.

SLAUGHTER HEIFERS: Choice, few prime 2-4 875-1050 lbs. 63.00-65.75, mostly 63.50-65.50. Few mixed choice and prime 3-5 1000-1050 lbs. 62.00-62.50. Mixed good and choice 2-4 850-1000 lbs. 62.00-63.50. Good 800-1000 lbs. 58.00-62.00.

COWS: Utility and commercial 1-3 46.00-49.50, few utility 1-2 50.00-51.00. Few commerical 4-5 39.00-43.00. Cutter 1-2 43.00-47.00.

BULLS: Yield Grade 1-2 1100-1700 lbs. 52.00-60.00, mostly 56.00-58.00.

Lancaster Farming says...

Here's the security we need

All parties to Pennsylania's proposed Milk Security Fund were front and center Wednesday to show support for SB 1287.

That bill will establish a $4 million fund, paid solely by milk handlers. While it includes provisions for a Co-op Fund, that probably will be ignored by co-ops who have made it plain they want nothing to do with security funds.

It includes the intent of the legislators to accelerate payment by handlers to the farmer. We applaud this inclusion and hope to see action taken on the prompt payment provision as soon as the fund gets off the ground.

Another important feature is that the title to milk changes at the farm—or as soon as the milk is transferred from farmer to buyer. This means milk shipped across state lines will be covered and farmers no longer have to sweat payment for milk which ended up at a dairy not covered by Pennsylvania law.

The fund will be established at the rate of one cent per hundredweight milk purchased, less exclusions for government purchases.

Pennsylvania Farmers' Association gave strong opposition to the penny rate, saying its members want a fund built at two cents. The statement soured an otherwise harmonious session Wednesday.

We would hope PFA's members or dairy committee would adjust policy soon on this single point. All other parties involved made compromises.

Even should PFA not make this change the bill probably will pass as written. PFA members should take their representatives off the hook so they do not loose face and appear boorish on Capital Hill and in ag circles.

It is a bit ironic that the dairy co-ops had so much to say about SB 1287 when none of them will be participating in the fund it establishes.

The Milk Dealers deserve a nod for their stiff but fair opposition to many points of the bill. The fires forged a stronger program.

The bill has the support of both Democrats and Republicans. Senators Patrick Stapleton, Frank O'Connell, and their staffs deserve credit for shaping the bill and gathering support.

Such sentiment in both the upper and lower house should streamline the bill's course to the Governor's desk. The backing of Agriculture Secretary Penrose Hallowell should assure the Governor's signiture comes easily.

Fenton Murphy, chairman of the cooperatives for a milk security fund, said the effort "is a milestone in agricultural history, because it represents so much cooperation over so long a period of time." That it does.

After three years, dairymen will have the security they need.

We need Saturday mail

The Carter administration is considering elimination of Saturday mail as part of its anti-inflation strategy.

The House Budget Committee has asked that deliveries be cut in a move to save about $500 million in expenses and reduce the government's subsidy. That figure is questioned by many postal experts.

The proposal quickly ran into trouble from all sorts of rural organizations.

And Congress should expect flack from its constituants should the House or Senate move on such a proposal.

When a similar move to cut mail delivery from six days to five was proposed about three years ago, the House passed a resolution 377-9 urging the Postal Service to continue six-day delivery. If that is not a mandate we don't know what is.

This time, it seems, Congress isn't quite so sure about how people feel Two Pennsylvania legislators this week indicated that if money could be save by cutting mail service then Saturday mail may have to go. But there is more to mail delivery than money.

Weekly newspapers, received by 42.3 million Americans, are one of the reasons farmers need Saturday delivery. It's not only farm papers like **Lancaster Farming** which are distributed through the mail, but also local papers and the weekend editions of daily newspapers.

The House Post Office sub-committee figured going to five-day delivery would save less than a penny per letter in postal costs, hardly a major contribution to inflation.

There is also the importance of parcel post, containing shipments of parts and units needed as soon as possible for on-farm use.

Rural mail delivery in particular was set up to be a service, not a money maker.

Retreating to five day delivery to save a few cents is a poor idea. Farmers must let their legislators know any such idea should be nipped in the bud.

THE BIBLE SPEAKS

BY LAWRENCE W. ALTHOUSE

THOMAS

Lesson for March 30, 1980

Background Scripture:
John 11:7-8, 14-16; 14:1-7; 20:19-29.
Devotional Reading:
John 17:16-26.

In my opinion, Thomas' reputation as a cynic is undeserved. He has been tagged with "Doubting Thomas," and the name has stuck, despite the various positive qualities which this man displayed. I think Thomas was hard-headed, and at times given to pessimism, but I do not think he was the "Doubter" most people paint him to be.

Our first glimpse of him is in John 11 as we find him with Jesus and the disciples when the bad news of Lazarus's death reaches them. When Jesus proposes to re-enter Judea, his disciples are quick to warn him of the danger there from his enemies. And who is it, who challenges the rest of the disciples to put his fear aside and join the Master in Judea? That's right, Thomas! "Let us also go, that we may die with him" (11:6). He was pessimistic about the consequences of this decision, but he did not waver in his loyalty.

How Can We Know?

Again we find Thomas with Jesus and the disciples in John 14. Jesus has been speaking to the uncomprehending disciples about his impending separation from them. Jesus reassures them that "you know the way where I am going" (14:4), although obviously none of the disciples understand what Jesus is saying. They know, but they do not realize that they know. Most of the disciples, however, rather than admit their incomprehension, would remain silent at this point. Not Thomas, though, he wants to know what Jesus means! "Lord, we do not know where you are going; how can we know the way?"

At this point, Thomas displays both a passion for understanding and great courage. He would rather ask Jesus' disdain than fail to grasp what the Master is saying. Thus the meaning is made clear for all the disciples: "I am the way, and the truth, and the life; no one comes to the Father, but by me" (14:6). Call it "doubt" if you will, but from his questioning there came greater faith.

My Lord And My God!

This brings us to the final appearance, the only one most people remember: "Unless I see in his hands the print of the nails, and place my finger in the mark of the nails, and place my hands in his side, I will not believe" (20:25). Even here, Thomas is asking for no more proof than had been available to the others who had seen the resurrected Lord. He was simply the only one to verbalize it.

We all remember that Jesus, when he appeared, invited Thomas to make good his boast, "Put your finger here and see my hands..." Yet very few ever realize that the writer of John's Gospel does not tell us that Thomas accepted that invitation. Instead, he records what has stood as one of the most profound confessions of all time: "My Lord and my God!" (20:28).

That is why Thomas is my candidate for one of the greatest of the apostles — a man with both an inquiring mind and a faithful heart.

NOW IS THE TIME

TO CLEAN UP TOBACCO TRASH

The current tobacco growing season will soon be getting started. A number of growers will be seeding their beds as soon as weather conditions permit. A very important part of any enterprise is to practice good sanitation methods. In the case of tobacco, I refer to the disposal of all old tobacco stalks and ribs. Since a large number of growers had blue mold in the field last summer, it is very important that the stalks and stems be either buried, plowed down, or burned where regulations permit. These old left-over plant parts will carry the infection to the new plants in the bed. It would be best if the stalks were not plowed down where tobacco is to be grown this summer. This matter should be taken care of soon, before the plants are up in the tobacco beds.

TO PLACE FERTILIZER PROPERLY

In the next several weeks, many gardens and fields will be planted. No doubt tons of various kinds of fertilizer will be used. Growers are reminded that fertilizer containing nitrogen, or potash, will burn seeds and plant roots. This is often the case where we get poor germination. The fertilizer should be placed either to the side of the row, or several

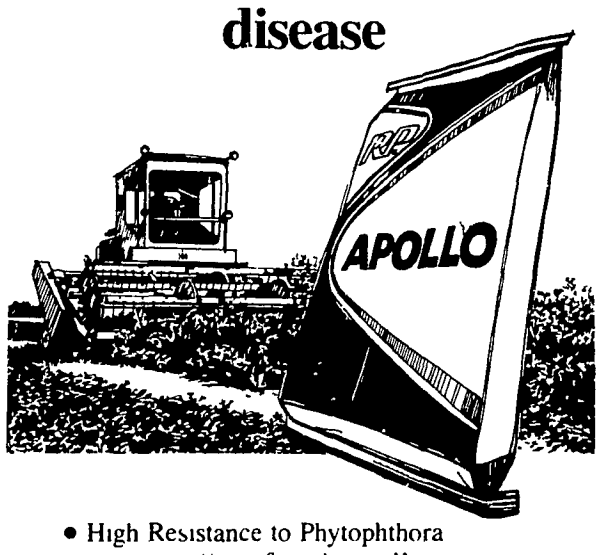
ROHRER'S

Distributors for RP forages from NAPB

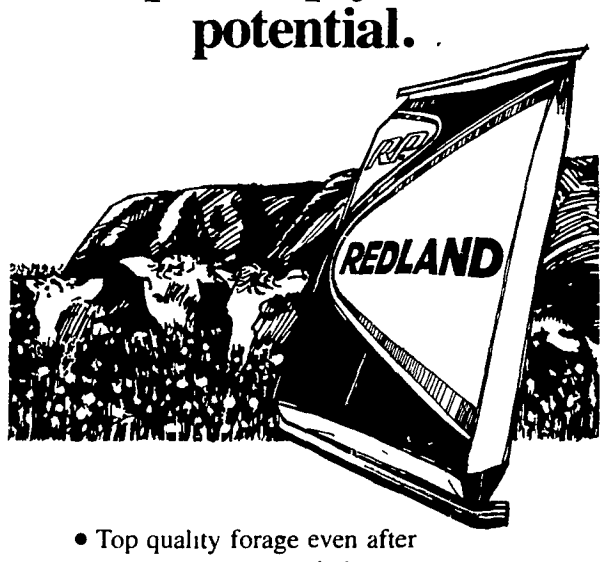
(North American Plant Breeders)

Your first choice to beat "wet foot" disease



- High Resistance to Phytophthora root rot—"wet foot disease"
- Very high yield potential
- Excellent winterhardiness
- Rapid recovery after cutting
- Greater resistance to anthracnose, pea aphids and leafhoppers than most other alfalfas
- Available with GroZone™ Seed Coating

Persistence plus top yield potential.



- Top quality forage even after typical two-year red clover rotation
- Excellent winterhardiness
- Resistance to southern anthracnose
- Tolerance to powdery mildew and northern anthracnose
- Full season performer that comes on early in the spring
- Available with GroZone™ Seed Coating

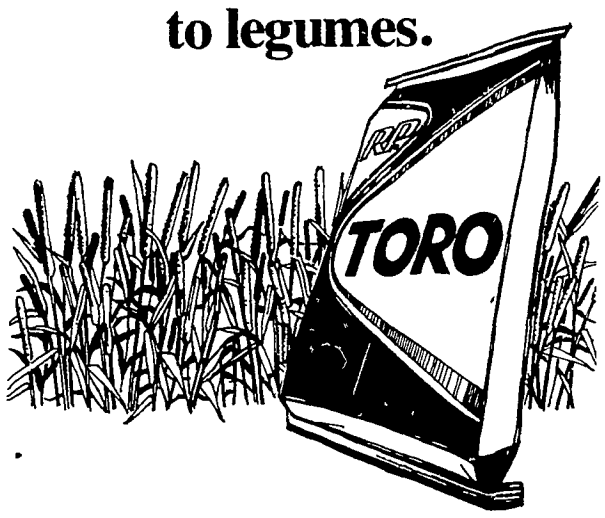
Ahead in yields *and* anthracnose resistance.

- Fights "summer decline" caused by anthracnose
- Proven yield leader
- Early maturity, fast regrowth
- Good bacterial wilt resistance
- Fine stemmed, leafy forage
- Available with GroZone™ Seed Coating

Consistently high-yielding smooth brome grass.

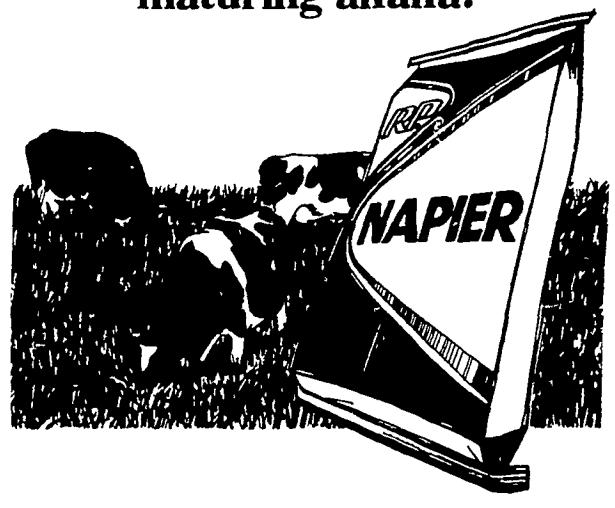
- Extra leafy, quality forage
- Ideal grass for use with legumes
- Broad disease resistance
- Excellent winterhardiness
- Good drought resistance

New timothy that stands up to legumes.



- Early maturing—ideal for use in alfalfa mixtures or straight grass seedings
- High yield potential
- Rapid growth and recovery ability
- Fine-stemmed and extra leafy
- Good leaf disease resistance

Ideal orchardgrass to plant with early-maturing alfalfa.



- Ideal maturity for easier haymaking
- Outstanding drought resistance
- Fast recovery, high yield potential
- Excellent winterhardiness
- Good resistance to leaf blights

Omaha Cattle

Thursday, March 27
Report supplied by USDA

Midweek prices on slaughter steers were mostly 1.50 lower and heifers were 1.25-1.50 lower. Cows closed 1.50-2.50 lower and bulls were 1.00 lower.

Four Day Receipts This Week: 10,000; Last Week: 9,600; Year Ago: 12,600.

The fed cattle trade followed much the same pattern as the previous week. General trading was again bearish despite the need of packers for cattle as movement of carcass beef continued on the dull side. Most buying interests were selective and competed for only minimum numbers; the daily rate of slaughter was still of modest proportions. Feeder buyers were for the most part not competitive for two-way steers as futures prices also broke sharply. The small supply included a fair percentage choice steers and heifers although many still carried some mud. Steers made up approximately 46 pct. and heifers 30 pct. Cows compriced 11 pct. and feeders 10 pct.

STEERS: Load Choice and Prime 3 with end 4 1215 lbs. 66.10, three loads Choice 3 1203-1276 lbs 66.00, load Choice and Prime 4 1420 lbs 64 50. Choice 2-4 1000-1275 lbs. mainly 64.50-65.50 at midweek. Mixed Good and Choice 2-3 1000-1275 lbs. 64.00-65.00. Good 2-3 60.00-64.00. Several loads Good and Choice 2-3 1300-1400 lbs. holsteins 59.00-59.50

Average of LS-214 detailed quotations for Choice 900-1100 lbs. Steers this week 65.12; Choice 1100-1300 lbs. 65.22. Average weight steers this week 1161 as compared 1167 last week. Average weight heifers this week 1017 as compared 1013 last week.

HEIFERS: Early, load Choice and Prime 3-4 1083 lbs. 65.50. At midweek, load Choice and Prime 3-4 1095 lbs. 65.25. Two loads 1025-1088 lbs. 3-4 65.00. Choice 2-4 900-1100 lbs. 63.50-65.00. Mixed Good and Choice 2-3 900-1050 lbs. 62.50-63.75. Good 2-3 59.00-62.50.

COWS: Utility and Commercial 2-4 43.50-46.50. Cutter 42.50-44.50. Canner and Low-Cutter 40.00-42.50.

BULLS: 1-2 1300-2000 lbs. 53.00-60.00, individual 1 61.00-63.00.

Joliet Cattle

Thursday, March 27
Report supplied by USDA

Friday through Wednesday's salable receipts 4,000; 5 days last week 3,351; same period a year ago 4,367. Trading slow to moderate for the week. Slaughter steers ended the week mostly 1.00, instances 1.25 lower than Wednesday of last week. Slaughter heifers closed the week mostly 1.00, instances 1.50 lower than Wednesday of last week. Cows ended the week mostly 1.00 lower.

SLAUGHTER STEERS: Mixed high Choice and Prime 3-4 1150-1350 lbs. 65.75-66.25 Monday; 65.76-66.50 Wednesday. Choice 2-3 1050-1150 lbs. 66.00-66.50. Choice 2-4 1050-1300 lbs. 64.50-66.00, couple loads 1260-1350 lbs. 63.00-64.00 Monday. Mixed Good and Choice 2-3 1000-1250 lbs. 63.50-64.50. Load mixed Good and Choice holsteins 1410 59.00 Wednesday.

SLAUGHTER HEIFERS: Mixed Choice and Prime 3-4 950-1140 lbs. 65.50-66.50 Monday; 65.50-66.00 Wednesday. Choice 2-4 900-1050 lbs. 64.00-65.50, some 66.00 Monday; 64.500-65.50 Wednesday. Mixed Good and Choice 2-3 800-1000 lbs. 63.00-64.50.

COWS: Utility & Commercial 1-3 45.00-48.00, few 49.00 Monday; 45.00-49.00 Tuesday; 44.00-47.00 Wednesday.

Cleona co-op asked to defend marketing system

BY SHEILA MILLER

STOUCHSBURG — Two representatives from the Northeast Dairy Cooperative brought members of the Cleona Milk Producers Cooperative up-to-date on two important pieces of legislation concerning the dairy industry, along with a summary of the current trends in marketing.

Ralph Smith, Director of Education for NEDCO, Syracuse, N.Y. told the dairymen at their Wednesday evening meeting that the co-ops are the foundation of the whole milk marketing system. "Whenever things get tight, co-ops provide the needed outlet for the milk you produce."

He pointed out that prior to 1920, there were only dairy co-ops. But after the Depression and World War I, the government stepped into the dairy industry and created marketing orders.

The orders, he explained, set up an environment where the handlers were required to pay the dairymen the established minimum price based on the intended use of the milk. This base, he said, was geared to the Minnesota-Wisconsin series because the milk in that area was used primarily for manufacturing.

Today, this price based on supply and demand is declining because now the dairymen in the M-W region are able to market their milk for fluid use, along with manufacturing.

The marketing order was set up to allow dairy farmers to vote and make changes by petition, with the hearing and referendum route following.

Smith pointed out a recent petition filed last Friday calls for a change in Order 2. It calls for a nickel increase in the amount paid for transportation credit and deduction for hauling.

Currently, a 15 cent transportation credit, taken out of the pool, and a 15 cent deduction for hauling, seen as a deduction on the milk check, are said not to be meeting the current costs.

Smith also mentioned the proposal to expand the New York-New Jersey order to include Northeastern Pennsylvania. This would mean a better milk price for farmers in that area, he said.

Concerning the current marketing trends, Smith pointed out there has been a 25-30 pound drop in per capita consumption of Class I milk in this area. However, nationwide, the 50 billion pounds used for fluid milk has remained steady because of the increased population. But, he said, the type of milk consumed by the population is changing.

In New York, the consumption of skim milk has increased 15 percent from 1972 to 1979, whereas the consumption of whole milk has dropped 23 percent. The number of farms delivering milk in that state has dropped 18 percent, but the average production per farm has gone up 28 percent. In 1972, the average farm produced 476,000 pounds each year, and last year the average was 610,000 pounds. This has been done with 21

(Turn to Page A16)

William A. Moore, R1 Myerstown, Secretary of the Cleona Milk Producers Co-op, left, speaks with James Beaver, District Director for Co-op #10, center, and Ralph Smith, NEDCO's director of education.

percent fewer cows, with each cow's average production up 45 percent from 7780 pounds to 11,259 pounds per year.

"The bright light in the dairy business is cheese," Smith said, "even though the rest has been gloomy." He added that butter sales also have increased, but non-fat dry milk has declined. The American - Italian - Cream cheeses have increased the most, with mozzarella at 83 million pounds and ricotta at 44 million pounds. The milk used to produce these cheeses was formerly used to make butter or powdered milk.

In the past two to three years, the government hasn't had to buy much cheese to stabilize prices and put a floor on the market, but Smith said 1980 may find more of a difference between production and commercial purchases. He pointed out milk production is up 3 percent, estimated at 126 billion pounds. The federal government anticipates a cost of $600 million to $800 million to support the price, he said.

The 80 percent parity semi-annual price adjustment will be up-dated on April 1, 1980, adding 85 cents to the current $11.22 per hundredweight, Smith said. He noted the government has recently been buying a lot of cheese, adding that he's not sure whether they're buying because of the supply on hand or the price of money. Smith anticipates another price change by October 1 because of inflation.

Smith warned there is a movement to reduce the 80 percent parity to 75 percent. "This figures out to about 60 cents less per hundredweight for the dairy farmer," he said.

The 1980 price forecast for Class I and II milk, said Smith, is $14.10 and $12.87 respectively. And, he called to the producers' attentions that there will be a referendum in a few months to determine whether the promotion and advertising support will be charged to dairymen in the cooperatives at a rate of 12 cents per cwt. or at one percent of the blend price of the previous year.

Smith concluded by saying dairymen must defend the system that has worked reasonably well since 1937. "As private buyers drop farmers, the cooperatives save the day and fulfill their members guarantee of a milk market. You can have all of the milk orders, but if you don't have a market for your milk, you don't have anything."

James Beaver, District Director for Co-op #10, Bellefonte, told the group the Community Nutrition Institute's November 13th proposal is a federally funded organization's attempt to go against farmers. "One dealer and three consumers filed a petition with the Secretary of Agriculture to get reconstituted milk off Class I prices. This would drop the $2.25 price of skim milk from 8.270 cents per pound to 6.15 cents if it were in Class II."

Beaver listed nine points why the co-ops are opposed to CNI, saying it will waste energy; reduce milk supply and cause shortages; and ruin the federal order, creating chaos.

"At the present time it looks like CNI has been stopped, but it's an election year and if a candidate feels if by pushing for a hearing it will mean more consumer votes, things may change. Farmers don't represent a large number of voters," Beaver stated.

The Bellefonte dairyman reviewed the status of Senate Bill 1287, the Milk Security Bill, which requires dealers to have a bond to cover 60 days of milk purchased or pay 1 cent per cwt. into a fund governed by the Milk Marketing Board in Pennsylvania. (See page one story). He concluded by emphasizing that co-ops that don't want to be involved in the Milk Security Fund must "ask out" every year.

Farm Bureau to push ag. planks

PARK RIDGE, Il. — Farm Bureau leaders will tell both major political parties that "farmers want to produce for the market–not for the government" when the platform drafting committees of the two parties meet in April and May.

In the statement, the American Farm Bureau Federation will advise the two committees that "Farm Bureau supports commodity loans, target price programs and farmer-held grain reserves which are designed to facilitate the orderly marketing of agricultural products but is unalterably opposed to government-owned reserves of agricultural commodities.

The Democratic Party's four regional platform drafting committees will meet in Baltimore, Maryland, April 10; Seattle, Washington, April 30; Columbus, Ohio, May 8; and Houston, Texas, May 29. The farm plank of the Republican Party platform will be considered in Davenport, Iowa, on April 18.

The summary of Farm Bureau views to be expressed to the platform committees will reflect the policies adopted by voting delegates at the 61st annual AFBF meeting in Phoenix, Arizona, in January, 1980.

Areas of concern to the more than three million AFBF member-families will include reliance on the market price system; control of monopoly power; fiscal responsibility; tax policies; role of the U.S. Department of Agriculture; access to markets; marketing and bargaining; farm programs; government regulations; transportation; and opposition to any form of compulsory national health insurance.

The summary statement confirms Farm Bureau's belief in the American capitalistic, private, competitive enterprise system in which most property is privately owned, privately managed and operated for profit and individual satisfaction.

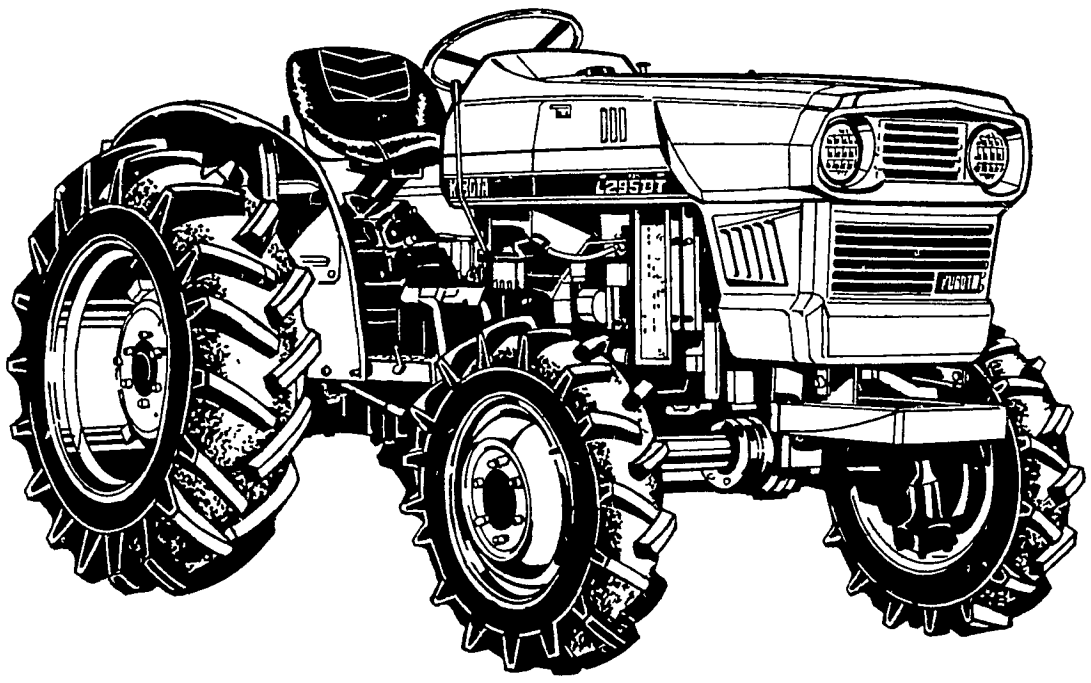
"We support efforts to maintain constitutional government, strengthen the market system, reduce government interference in the management decisions of individual farmers, stabilize the general price level, restrain monopoly and prevent price-fixing, promote private ownership and management of resources, and expand mutually advantageous international trade," the summary statement concludes.

Ag Progress Days August 19-21

ROCK SPRINGS — "Penn State Agriculture–125 Years of Progress", is the theme for Penn State's Ag Progress Days to be held August 19, 20, and 21 at the Rock Springs Agricultural Research Center, nine miles west of the campus on Route 45.

Machinery will demonstrate harvesting of corn and alfalfa. Featured will be tours to plant science research plots and to a soil and water conservation site.

Family and youth activities, dairy and livestock exhibits, and educational and commercial displays will be highlighted.



The orange digger.

Our orange Kubota L295 has an outstanding earth moving capacity. It can use a tiller, plow, cultivator, front-loader, front blade, post-hole digger, and disc harrow.

The L295 also has a sturdy, reliable 30 hp diesel engine, and is available with two or four wheel drive

With a Kubota L295, the only thing you won't dig up are buried costs.

We're looking for work.

Sheila's Shorts

By Sheila Miller

As a follow-up to my last week's column, I thought I'd try to tackle the subject of how pork is evaluated. And, as in beef, I am going to fall back on the knowledge of the National Livestock and Meat Boad when it comes to the why's and wherefores.

In the past few years, the meat industry has seen rapid changes in the type of hogs selected as grand champions at local fairs and state livestock shows. While on the hoof, these prize-winning hogs reflect the judge's opinion on what is best, and this is hopefully based on the final end-product that animal was bred for – hams, pork chops, and bacon.

But even more important to today's swine than the judge in the show ring, the modern hog has been molded by the consumer. Purchase power tells the hog producer what the families in the U.S. and worldwide want and demand in the pork products they buy.

Since most hogs are marketed within a small weight range, the U.S.D.A. has been able to establish strict standards of how long the best slaughter hog should be, along with the amount of fat it carries, and the size of chops. Actually, they measure the area of the longissimus dorsi muscle at the tenth rib — a rigid criteria.

Hog breeders and commercial hogmen have responded to the publics demand for less fat and more lean meat by trying to raise trimmer, meatier hogs. The leaner cuts have become more fashionable in our thin-conscious society, making ham, loin, and shoulder blade cuts most popular.

According to NLMB's Meat Evaluation Handbook, pork carcass evaluation is based on the expected yield of the four lean cuts — ham, loin, arm picnic, and Boston butt. It also considers the quality of the lean — the meat's firmness and color, the amount of firmness of fat, and the meat's marbling and texture.

To refresh your memory, marbling is the speck flecks, or fat deposits in the muscle that adds juiciness and flavor to the meat. And texture is the size of the fiber bundles that make up the muscle, either coarse or fine.

Reflecting the recent trends to low-fat diets, the NLMB reports that during the past twelve years, tests run by a Mid-west experiment station have shown as increase of ham and loin percentage of carcass weight from 32.3 percent to 42.6 percent.

The 1800 barrows measured also showed decrease in the amount of backfat, going from 1.64 inches thick to 1.25 inches thick. The loin eye, or muscle at the tenth rib, increased in area from 3.22 square inches to 4.74.

The lean-cut yield of an individual hog is a direct relation to the amount of finish or fat on the carcass. Finish is measured by taking the average backfat thickness at three spots along the hog's back — at the first rib, last rib, and last lumbar vertebrae.

NLMB suggests an average backfat thickness of about one inch to be optimum for a hog weighing 140 pounds, dressed.

After fat and percent lean cuts available from the hog carcass, the trained eye should look for the curve and bulge of the carcass. Hopefully, it will be plump in the right spots, — the ham, loin, shoulder, and belly.

NLMB points out the length of the carcass is not necessarily related to the carcass value or the amount of meat that it will produce being increased. However, length is used in the certification standards of pork carcasses.

Let's take a closer look at one of the favorite cuts in pork, the hams. Each hog comes equipped with two potential Easter or Christmas delicacies. Whether fresh or cured, there are certain things that make one ham better than another.

What does a terrific ham look like. Well, once again referring to the expert opinion of NLMB, a desirable muscled ham is both broad and deep with the meatiness extending toward the hock of the hog's leg. This gives the consumer more of the most preferred ham section, the center steaks.

And, the hams should not be covered with an excessive amount of fat, because in the commercial trade, this fat is trimmed off on the upper two-thirds of the ham, with the lower part left on. In either case, it means waste.

NLMB goes on to describe the high-quality ham as one where the cut lean surface is firm, fine-textured, and uniformly bright, greyish-pink. In cured hams, this color will be changed slightly through processing.

The muscle should contain a uniform and extensive amount of firm, white marbling. The outside finish should also have the firm, white fat and it should be dry, with smooth skin.

Variations in this high-quality ham range in color from dark red, to almost pure grey, or the ham could be two-toned in color, with the meat becoming darker as it nears the bone. Inferior hams also tend to have a coarser texture and may appear soft and watery, a weeping ham.

Getting back to the hog carcass as a whole, the process of grading involves all the points mentioned. But, it differentiates between gilts and barrows, and sows. Boars and stags are left out of the grading system completely.

In the gilts and barrow category, the carcasses are separated into two major areas — those with acceptable or unacceptable lean.

Those that are pulled off into unacceptable row are graded U.S. Utility. Their bellies may be too thin for bacon production, or they may have soft and oily carcasses which throw them into Utility regardless of other quality factors.

Acceptable carcasses are divided into U.S. No. 1 through No. 4. These U.S.D.A. grades are set up to estimate the percent of yield of the four lean cuts, with U.S. No. 1 yielding 53 percent or more, U.S. No. 2 yielding 50 to 52.9 percent, U.S. No. 3 with 47 to 49.9 percent, and U.S. No. 4 bringing up the tail end with everything less than 47 percent.

As in any standard, there are variations and reasons for them. Judgment by Federal inspectors on the amount of fat, lean muscle, length, and muscling however, will be the final determining factor in the grading of pork carcasses.

These grading standards help hog producers and consumers receive the benefits in cost and payment for the high quality pork marketed, and encourage producers of the inferior hog carcasses to improve in order to get top dollar.

Letters To The Editor

Dear Editor:

We are pleased to read the article "Bradford group joins hands to dump the dump" in the March 22 issue.

Hopefully, **Lancaster Farming** will continue to report on DER's next proposed hazardous chemical waste dump site in Ridgebury Township, Bradford County, to be operated by Stabatrol Corporation.

We own a 140 acre farm less than thre miles from this proposed site. We are also members of Pennsylvania Farmers' Association and concerned members of BCAUSE (Bradford Citizens Against Unsafe Environment).

As you know, the Bradford-Sullivan County Farmers' Association has publicly denounced this proposed site along with many other Bradford County organizations, state and county officials.

I realize, as well as many other people, that hazardous chemical wastes are by-products of our twentieth century society and that they have to be disposed of somewhere, but it appears to us that DER just indiscriminately chooses areas without investigating present and future consequences for that area. I also find it alarming that some of the former DER employees eventually become employees of hazardous waste corporations.

What has become of Pennsylvania's constitutional amendment, **Article 1, Section 27? Haven't there been enough near** catastrophic mishaps within Pennsylvania this past year with TMI, the Lyncott and Allenwood dumps, to name a few?

Must we add Ridgebury to this list?

Certainly there must be wastelands elsewhere in the state away from productive dairy and farm lands, water sources, game lands, and God-given natural scenic lands.

I feel a state-wide moratorium should be effected against additional proposed hazardous chemical waste permits issued by DER. This state is just too beautiful to destroy because of the whims of a few money-hungry people.

I would appreciate any help your editorial staff, or others, could give in our fight against this dump.

Mrs. Pam Salerno
R 2, Sayre

Dear Editor:

There is a simple solution to the TMI problem. What must done is a make a mountain on the Island. This is a practical way to solve the problem. If enough dirt is hauled to cover over man's mistakes the TMI problem will be solved.

The sooner we give up the curiosity of nuclear power, the better off we all will be. It is unfair to expose all the good people of the TMI area to anymore dangers, just to satisfy the curiosity of a few greedy and egotistical people.

Cover it over and let it be a monument to man's imperfections. The only answer to problems of the future is in theotechnology. Recently on "60 Minutes" it was made quite clear that there isn't such a thing as safe nuclear fission. The after effects will linger on for years.

Daniel M. Groff,
Lititz

Wind erosion again damages Great Plains soils

WASHINGTON, D.C. — Wind damaged almost three times as much land—more than 3.1 million acres—in the Great Plains during the months of November 1979 through February 1980 as it did during the same period a year earlier, Norman A. Berg, administrator of the U.S. Department of Agriculture's Soil Conservation Service said Monday.

Berg said reports from the 10-state area indicate the wind damaged 3,123,710 acres, up from 1,170,849 for the same period a year earlier. He said the major factors contributing to wind erosion this season were low summer and fall precipitation and lack of snow cover.

Of the total land reported damaged, 96 percent (2,999,890 acres) was cropland; three percent (93,740 acres) was rangeland; and one percent (30,080 acres) was other land.

Hardest hit was Texas with 989,247 acres or 32 percent of the total. The southern plains states reported 57 percent of the land damaged (1,770,922 acres) and the northern plains 43 percent (1,352,788 acres).

Wind also destroyed crops or cover on 400,569 acres of land not damaged. Of this total, 79 percent was in the southern Great Plains.

Soil Conservation Service compiles wind erosion reports covering seven months, November through May each year, using data supplied by almost 550 counties in the Great Plains.

Milk dealers still unhappy over security bill

HARRISBURG — The introduction of Senate Bill 1287 to create the Pennsylvania Milk Producers' Security Fund has not been enthusiastically received by the state's milk dealers.

The fact that such legislation–copied from New York–was not introduced earlier has been erroneously blamed on "pressure" from milk dealers and irresponsibility on legislators. The fact is that no one could come up with a plan which would accomplish the job and still be fair to all segments of the industry, maintains Milk Dealers Association Henry R. Geisinger.

Senate Bill 1287 still does not meet these requirements and is unfair, he said Wednesday. After preliminary discussion on the legislation it was prepared and sent to the Senate floor without even an opportunity to make minor amendments to clear up some language, he charged.

Once again the proprietary milk dealers — not cooperatives – appear to be the main economic target of this legislation. The Security Fund concept is "farmer protection insurance" but neither farmers nor operating cooperatives are asked to ante up one penny for their own business protection, he pointed out.

Dealers wish they could find the same kind of benefactor or financial angle to meet losses which they face in the market place due to bankruptcies and other business losses when stores, restaurants or other accounts go bankrupt.

The question arises why should dealers pay for farmer insurance at one end and take the losses at the other end of their business operation and now long they can stand it, Geisinger said.

When the system began in the depression '30s it was a little different story. Then there were over 1100 milk dealers, most of which were small, localized operations with minimum capital and with low bond requirements. Today, with fewer than 200 dealers remaining, placing the cost of this bond or Security Fund on them creates a near impossible situation from a cost standpoint if dealers are to remain in business, he said.

What is less than thrilling is the fact that the drive to make dealers pay comes mainly from cooperative leaders and their pressure on major farm organizations rather than from independent farmers, he said.

This "sock-the dealer" approach stems from a number of organizations which, according to the best financial records available, need a lot to learn about their own financial management, Geisinger said.

It is most unfair to have the pressure, the big talk and the accusations against dealers coming from people who don't have to pay the bill – and co-ops are virtually exempt though they compete in the market place where they are not even required to pay the minimum prices demanded from dealers. It is miraculous if you can get someone to pay your bills or insurance, he said.

If farmers had to pay for this coverage it would be a mere fraction of their current return–about one to two cents on a $12 blend price. And it certainly would be a drop in the bucket cost compared to the millions paid in recent years for co-op dues, assessments to cover losses, money lost in reblending (again, only a co-op privilege), etc., Geisinger said.

If farmers paid they could get 100 percent protection and could "run the show," he said.

From the dealer viewpoint there are serious competitive problems in border area where out-of-state dealers, who would not be forced to pay, sell much non-Pennsylvania-produced milk.

He raised a question as to whether there is protection in Senate Bill 1287 for the Keystone State milk producer who sells his milk out of state.

All dealers ask is that farmers be assessed at least part–if not all–of the cost of this insurance. One of these days, with this kind of legislation, there no longer will be independent dealers. Perhaps that is the aim of the cooperatives, Geisinger said.

From recent reports it would appear that many co-op losses stem from cooperatives fighting cooperatives for business and the question continues as to the soundness of the pricing structures and whether the banks, which lend them money, can continue to give them financial help, he concluded.

Golden Guernsey 4-H club to meet April 8

The 4-H Golden Guernsey Club held its first meeting of the year at the home of Mr. and Mrs. Raymond Witmer.

Officers were elected for the upcoming year. The new president will be Gerald Garber, while Connie Balmer was elected vice-president.

Other new officers include: Mary Witmer, secretary; & Jay Garber, treasurer; Joanne Ferguson, news reporter; Joe and Doug Rohrer, song and game leaders; and Carol and Connie Balmer, county council officers.

The next meeting will be held on April 8, at 7:30 p.m. at Mr. and Mrs. George Rohrer's farm. At the meeting, the members will hold an auction to bring in some money for the club. After the auction, a slide presentation is planned.

The club is still open to any youth between the ages of 8 and 18 who would like to raise a Guernsey calf.

Good thinking...

Feed top-quality silage from a Madison® Silo

You've decided on the best way to feed economically with top-quality, home-grown silage

And, you've decided the best way to make top-quality silage is in a Madison silo That's because you already know about Madison's exclusive Vibra-Cor Stave, and the full measure hooping and Colordome white roof and chute—and many, many other value packed features which make Madison silos give you more for your money

If you haven't decided yet, give us a call

Put the Profit-Tier to work for you.

Egg production challenges new heights with the Big Dutchman Profit-Tier cage laying system. Four tiers high with extreme efficiency in cage design, the Profit-Tier allows optimum access to feed, water, fresh air and light. So hens have excellent conditions for good feed conversion and high production.

And you enjoy the efficiency of more layers per square foot of building space, as well as better utilization of lighting, feed and ventilation.

See all the labor-saving features Big Dutchman built into the money-making Profit-Tier. We can show you how quickly it will pay for itself in extra production.

The Dairy Business

By Newton Bair

TRADITIONAL VALUES CAN WE AFFORD THEM?

Southeastern Pennsylvania is tourist country. Why do the Auslanders like to visit here? There are lots of reasons, but let's look at some of the ones that relate to the business of breeding and milking cows.

First of all, the eye of the tourist or traveler is always attracted to anything that suggests permanence and stability. Large, substantial houses of stone or brick, or nicely painted wood, often set the stage for that first impression that our visitors get when they come to visit our farms. The second glance takes in the barns, fences, lanes and fields, and with some good cows in sight, the picture is complete. The viewer is content with a feeling of permanence and security. Most of the time, anyhow.

This impression of solidness and stability is a part of the Pennsylvania Dutch tradition. Everything is neat and orderly, spic and span. We have a right to be proud and there's nothing wrong with it. So, why am I raising any questions about it? Why? Only because of the crazy economics of the times in which we live.

The kind of permanence that is symbolized by brick, block and stone has become outrageously expensive. So costly, in fact, that the very permanence which it symbolizes is threatened.

A tremendous lesson in how some folks view these values was illustrated to a group of Lebanon County farmers recently. We had a two day tour of some of the finest dairy breeding establishments in Virginia. Swinging down through the Shenandoah Valley to Harrisonburg, then across the Skyline Drive and north through the Piedmont Region to the east, we visited a number of top breeding herds and met the family-owners who developed them. At every stop we got the same feeling – these folks love their cows, know their cows and are proud of their cows. But you rarely see anything that resembles the housing and solid structures we are accustomed to in Southern Pennsylvania.

Make no mistake, the cows are well bred, well fed and housed in what we might call functional shelters. Old barns or sheds are frequently used to shelter some of the finest breeding stock in the country, either on a well bedded pack, or in crude wooden box stalls. New housing may consist of rows of free-stalls with only a simple flat roof to keep the stall dry. You rarely see a dairy structure that is designed for the comfort of the operator! But the cows like it alright and, of course, they are paying the bills.

Paying the bills is the whole point I'm trying to make. We've reached a point in history where we must decide whether a dollar (usually a borrowed one) spent today will return the price of using it, plus a few cents extra to repay us for the pleasure of making it work for us. It is brick, stone and cement that pays the bills, or is it Ragis, Mitzi, and Marla?

At Round Oak, one of the truly great breeding establishments in the east, and the home of Round Oak Rag Apple Elevation, there were at least a dozen excellent daughters of this famous bull wondering in and out of a simple, unpainted shed. No fancy housing here, but they had all the comforts and provisions necessary for producing 20,000 to 30,000 pounds of milk and turning out high quality offspring just like themselves. There was a new silo and a modern free stall barn, but Ron Hope, one of the junior partners, was almost apologetic in explaining their need for new facilities. The emphasis was on cows. Breeding, feeding and management. Not buildings.

The same was true everywhere we went. The sons of the family, after completing college, come back to the farm and become true students of dairy science. Their talents and enthusiasm is directed at breeding the best and making it pay. The impression we got was one of permanence and stability. Not because they had invested in buildings, but because they put their talents where the money is – their cows.

We need to hold dear the traditional values of beauty, permanence and convenience that is so dear to the Dutch Country. But let's make sure we don't go broke, meanwhile.

MILK

SO GOOD SO NUTRITIOUS

Dover FFA presents chapter farmer degrees

BY PATRICIA GREEK
Staff Correspondent

DOVER — John Thorton and Fred Hotchkiss, both of Ashcombe Dairy, Dover, were the recipients of 1980 Honorary Chapter Farmer Degrees at the 28th Annual Dover FFA Chapter Banquet held recently.

Speaker for the evening was Don Trimmer, of Woodsboro, MD, the National Eastern Region Vice-President of the FFA. Trimmer said he got his start in the FFA by working on his grandparent's Angus farm. According to Trimmer, the two most precious resources this nation has are: Agriculture - "We've yet to reach our limit," and the Youth - "They are the leaders of tomorrow and are preparing for progress." He said the FFA has both of these resources. This is why last July, President Carter stated, "FFA must take the lead among all the Youth of America for energy conservation."

Outgoing FFA Sweetheart, Linda Green, spoke on what she has done as she held her honor. Linda then crowned the 1980 Dover FFA Sweetheart, Brenda Spangler. Brenda is the 15 year old daughter of Bonnie and Paul Spangler, Dover.

Awards were then presented to the members. The 1979-1980 Chapter Farmer Degrees were awarded to Jerry Atland, Jack Shoemaker, John Hilbert, Mark Shoemaker, Harvey Myers, and Bob Livingston.

Foundation awards were presented to: Jerry Atland, sheep; Steve Nelson, beef, Marvin Kunkle, swine, Brian Lighty, poultry; Steve Nelson, crops; and Mark Mummert, dairy.

Also Brad Shoemaker, vegetable; Mark Shoemaker, livestock; Keith Ross, wildlife management; Randy Clegg, ag sales and service; Bryan Ross, ag mechanics; and Shane Becker, forestry.

Tim Strouse, ag electrification; Ronald Storm, placement in ag production; Randy Montag, extemporaneous public speaking; Jacob Helfrich, soil and water management; Mark Shoemaker, Star Greenhand; and Randy Montag, Chapter Star Farmer.

Shown presenting the Honorary Chapter Farmer degree are from left: Randy Montag, club president, Fred Hotchkiss, recipient, and Don Trimmer, National Vice-President, Eastern Region. John Thornton who also received an Honorary degree was absent.

Winners of Chapter Farmer Degrees were from left: Jerry Altand, Jack Shoemaker, John Hilbert, Mark Shoemaker, Harvey Myers, and Bob Livingston.

Show are winners of Foundation Awards from left: Brian Lighty, poultry; Brad Shoemaker, vegetable; Marvin Kunkle, swine; Mark Shoemaker, livestock and Star Greenhand; Jerry Altand, sheep; and Steve Nelson, crop.

New officers were also installed at the banquet. They are: Harvey Myers, president; Jacob Helfrich, vice-president; Jack Shoemaker, treasurer; John Hilbert, secretary; Robert Livingston, reporter; Brian Lighty, sentinel; Gerald Lighty, chaplain; Marvin Kunkle, parliamentarian.

Shown with her new Dover FFA Sweetheart crown is Brenda Spangler. Linda Green, last year's sweetheart, is shown adjusting the crown.

Special spreader clearance.

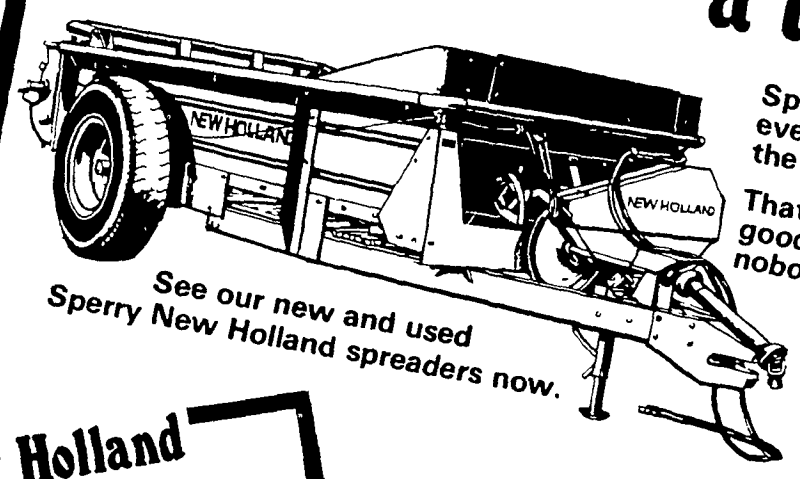
Now you can spread wet or dry.

- Hydraulic endgate (on five largest models) works with upper beater installed
- Worm gear drive is standard on five largest models. Practically eliminates need for adjustments
- BONDED PROTECTION! You get new sides free if they ever rust through while the rest of the spreader is still operational
- Beefed up frame and side joints take pressure of peak loads, rutted fields
- The country's No. 1 spreader line 7 box-types and 5 tank-types

Come in today and see why they're called "The Strong-Boxes."

Sperry New Holland
STRONG-BOXES
The Name Says It All . . . See One At

Who gives you new sides free on a used spreader?



See our new and used Sperry New Holland spreaders now.

Sperry New Holland does, if the old sides ever rust through during the useful life of the spreader.

That's **BONDED PROTECTION** -- good for every owner, from first to last. And nobody else offers that!

- More value when you buy!
- More value when you sell!
- And peace of mind while you own!

Sperry New Holland tank spreaders

Keep your barn area tidy, the roadway clean and your neighbors happy!

Here's the spreader we'll stand behind! No drip! No trail! Plus, Sperry New Holland spreaders have a solid warranty

- Liquid-tight steel tank!
- All-weather operation!
- 593 to 1,421 gallons!

BULLETIN!!

1. "FREE FINANCE" ON ALL SPERRY NEW HOLLAND SPREADERS UNTIL SEPT. 1, 1980

State house approves capital stock exemption

HARRISBURG — Legislation to help preserve family farms has been adopted by the House.

Rep. Noah W. Wenger, prime sponsor of the measure, said the legislation to exempt family farm corporations from the state capital stock and franchise tax passed Wednesday by an overwhelming 155 to 31 vote.

"This tax has discouraged many farm families from incorporating their holdings," Wenger said. "By not incorporating it's very costly to pass the farm from one generation to the next.

"My legislation will exempt this type of corporation from the stock tax and thus encourage families to benefit from the many advantages of being incorporated."

Two attempts to amend the bill were beaten back. The first amendment gathered only 26 votes. The second was withdrawn from consideration.

Governor Richard Thornburgh has indicated he will sign the bill when it gets to his desk. Next hurdle is the state senate, but Wenger said he anticipates no problems there.

He said he anticipates early action on the bill in the senate. He also said he hopes the bill will help insure that Pennsylvania remains a major food producer.

"Our state has rich land, abundant water supplies and good agricultural climate," he said. "We need to preserve this great strength."

This legislation will help keep family farms together and see that they are not split up and used for non-farming purposes.

The Lancaster County legislator said the measure defines a family farm corporation as one organized and operated for the agricultural use of land.

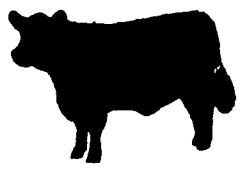
At least 75 percent of the stock of the corporation must be owned by members of the same family. Approximately 75 percent of the assets must also be devoted to the business of agriculture.

Montgomery County offers tractor safety course

NORRISTOWN — The Montgomery County Extension Service will offer a tractor safety certification course for area youth. Although the course is designed for youth, anyone who is interested in learning more about tractor safety is welcomed. To reserve a spot in the course, call Nancy Kadwill at the 4-H office 215/277-0574.

Under the Fair Labor Standards Act, all 14 and 15 year olds who plan to be employed off the home farm and will be operating a tractor of over 20 PTO horse power, must have evidence of satisfactorily completing such a course before they can be employed.

The course will be held from 7 to 9 p.m. on April 8,15,22 and 29 at the agricultural classroom at the Western Montco Vo-Tech School, Limerick. The driving exam is scheduled for Saturday, April 3. Some experience is desired. The instructor will be Roger Michelone.



Delaware County slates clothing workshops

MEDIA — A series of four workshops concerning clothing has been scheduled. They will be held on succeeding Wednesdays from 10:00 a.m. to 12:00 p.m. in the Toal Building Auditorium, Second and Orange Streets, Media.

On Wednesday, April 16, Wardrobe Planning is the topic. Those attending are asked to bring with them a garment that they have not worn for at least 3 years.

April 9 is Quick Tailoring; April 30 is Selecting A Sewing Machine; and May 7 is Quick Tips. All the meetings are free.

Out standing in her field.

Standing out in the field of Maplegrand Farms in Peru, New York is one outstanding producer. Her name is Maplegrand Rockman Meadow, and she's produced 165,648 lbs of milk through 5 lactations! Her average daily milk since first calving (including dry periods!) has been 94.2 lbs. And that translates to an average daily income of $9 02!

One reason she's been so outstanding is good management Sired by C Fawcettdale Ambassador, she was raised by Kermit Irwin and Family, Peru, N Y., highly experienced and knowledgeable owners of over 220 head of Holsteins with 100 milkers.

The other reason is Beacon Irwin took advantage of the Beacon Feedback Program, which planned the nutritional needs of his top producer Following the advice of his Beacon Dairy Specialist, Irwin has typically fed her 10-20 lbs of Beacon Super 30 Concentrate every day, along with corn silage, high moisture ear corn, corn and oats chop, and hay (treated with Beacon Hay Pre-Serv).

If you'd like to have better producers, maybe even super ones like Maplegrand Rockman Meadow, call your Beacon Advisor We obviously can't do everything to make your cows outstanding, but we sure can help

LeHi reorganization

(Continued from Page A1)

Farmers equal to the balance of the book value of the assets, or approximately $1.8 million."

In other words, total assets are roughly $21.8 million.

Upon liquidation of the old organization, the remaining cash would be distributed to the preferred shareholders. Depending on the results of pending litigation, the actual figure may vary, but it is expected to be close to $1.8 million.

That would result in a payment of about 15 cents on the dollar to the preferred shareholders. Common shareholders will receive nothing.

Atlantic Processing, Inc. will be formed by the present directors of Lehigh Valley Cooperative Farmers investing $20,000 of their own money, officials say.

The stock, however, will be subject to a voting trust, the trustee of which will be a bank.

The Baltimore Bank for Cooperatives, which is the dairy's principal creditor, will finance the transaction. But officials emphasize the Bank did not suggest the plan.

In conditionally accepting the proposal the Bank has agreed to repurchase $2.3 million of its own stock for 80 percent of its value from Atlantic Processing. That amount, about $1.8 million, is the source of funds for the purchase of Lehigh Valley Cooperative Farmers.

The Bank also has agreed to restructure other obligations.

Once the new organizations are set up, Lehigh Valley Farmers would enter into a milk marketing contract with Atlantic Processing.

Officials say the new marketing agreement would provide members with the same terms and payments as they now are receiving but would require participation for one year.

The agreement between Lehigh Valley Farmers and Atlantic Processing would be in effect until the debt to the Baltimore Bank is repaid.

The plan further provides that Lehigh Valley Farmers may buy back the stock of Atlantic Processing, Inc. within 10 years at the same price paid.

The organization has been struggling to regain its financial footing since 1974 when it was discovered the Co-op paid $5.2 million in overdistributions. In order to keep afloat the association collectively assessed its members $3.8 million.

Fiscal 1978 was the first year since then that the dairy operations showed a profit, but even in that year farmers were assessed to cover losses incurred during a strike at the Allentown plant.

Fiscal 1979 is expected to show a considerable gain but the Co-op's staggering debt load, including interest to shareholders, has complicated its overall financial picture.

In July 1978 a proposal to buy stock back from preferred shareholders was withdrawn by officials when it became clear there was overwhelming opposition to it.

That plan called for a $5000 per farmer assessment and provided a 20 cents on the dollar distribution to preferred shareholders.

A vote on the current plan is expected April 25 at the organization's annual meeting in Lancaster.

Lancaster Guernsey tour April 7

LANCASTER — The Lancaster County Guernsey Breeders Association will conduct a tour Monday, April 7, 8:30 a.m. sharp meeting at the Lancaster Shopping Center, Routes 501 and 222.

At 9:45 a.m. the group will tour the Inter-State milk processing plant, ½ mile east of Mt. Holly Springs on Route 34.

At 11:15 p.m. they will reach the Lester VanArsdale farm, 1 mile east of Biglerville on Route 234. This is a father and three sons operation with 175 head of Guernsey cattle and a new freestall set-up. This stop also features a covered manure storage facility with hydraulic ram and a lagoon. The milking facility is a double six parlor with Universal automatic takeoffs. This family farms 600 acres.

At 12:45 p.m. the tour will include the farm of Mervin Myers. This also is a family operation with two sons. Snider's Prince Lilly the holder of national class records and with a lactation of 2-9, 21,350 pounds of milk and 1203 pounds of fat — a 5.6 test in a 305 day lactation lives here. A manure holding pond with a mechanical manure ram and earthen banked holding area are also to be seen at this farm.

The last stop at 2:15 p.m. will be the Hanover Shoe Manufacturing Company. Here the group will see shoes made from the leather to the box.

Anyone interested in the tour is invited to attend. The group plans to car pool and everyone is asked to bring their own lunch. For more information call, 717/464-2894, 717/548-2618, or 717/626-8055.

Apple holdings up 7 million

HARRISBURG — Pennsylvania apples in cold storage on February 29 totaled 108,310,000 pounds, 2,579,000 bushels of 42 pounds each, according to the Pennsylvania Crop Reporting Service.

Apple holdings are up 7,160,000 pounds, or seven percent from a year ago.

York Imperial apples in storage for processing, at 769,000 bushels, comprise the largest variety in cold storage, followed by Red Delicious at 502,000 bushels; Rome apples at 457,000 bushels; and Golden Delicious apples at 358,000 bushels.

Holstein tour

(Continued from Page A1)

Kenneth Fry, of MarCove Farms, explained. Fry and his father-in-law, George Breidenbaugh, operate the dairy farm that's nestled in the narrow Morrison Cove valley in the shadow of Tussey Mountain.

"There were six embryo transplants from the first super," Fry said.

In fact, as the tour group of nearly 70 visitors were filing through the stanchion barn and past Carmel, contentedly munching hay, her litter of six was in the process of being born a number of miles away.

"Three were on the ground as of Wednesday," Fry said.

"The remaining three are due any time now. In fact, the calvings could be going on right now."

The first three calves were bulls, as well as the offspring born after she was brought to Blair County following the purchase. That bull, Dunwood Pistol Pete, is quartered at the farm

Semen from two bulls were used in the first super. They were Locust Glen Elevation Ivanhoe and Cahill Standout Cavalier.

"In Carmel's second super, eight eggs were transplanted," Fry said.

"Six pregnancies resulted and their calves are due the end of April or the beginning of May."

Bulls used in the second super were Straight Pine Elevation Pete and SWD Valiant.

Carmel is now pregnant to Glendale Arlinda Chief. Counting the two heifers born while still on the Stoltzfus farm, she has borne a total of 16 offspring as a five-year-old.

Her production records show 27,140 lbs. and 1146 butterfat as a two-year-old; 28,393 lbs. and 1331 butterfat as a three-year-old and 27,967 lbs. and 1148 fat as a five-year-old.

"We have about 300 acres on two farms here," Breidenbaugh told the tour group.

"We rent another 170 acres. We have 65 cows and are milking 55 now."

The herd average stands at 18,000 pounds and 620 fat.

He described their operation as a combination of dairying and nursery business.

"It's a terrible mixture," he admitted.

"The times for the most work in each are always conflicting with each other."

Over the rolling countryside dotted with residential homes mixing with the farm land, the two buses moved on to the Ken Mowry farm, also in the Morrison Cove valley, but across the county line in Bedford.

Along the narrow rural roads the buses were threaded past large gleaming tankers, which graphically demonstrated that dairying was a leading business of the valley.

Despite temperatures in the low-50's, patches of snow were still visible through the bus windows lying in the lea of the picket fences still in the fields.

At the Mowry farm, super ovulation is centered around Mowry Princess Corrine, the daughter of the former national champion production Holstein, Mowry Prince Corrine.

The national production record of 50,750 pounds was set about five years ago and stood for about a year.

"I remember that she died the exact day that the record was topped by a cow in Indiana," Steve Mowry said.

"I guess she just couldn't take getting beat."

Princess Corrine had a production record of 34,000 pounds as a two-year-old and thus far in 260 days has 29,000 pounds.

"We're up to the ninth generation of this family of cows here on the farm," Mowry said.

"It all began with a cow that grandfather bought back in 1941 at a sale at the Harrisburg State Hospital for about $100.

The Princess has already borne 14 offspring. She was born in 1975.

Her offspring include eight bulls and six heifers.

All of the heifers are still on the farm and all the bulls are in AI.

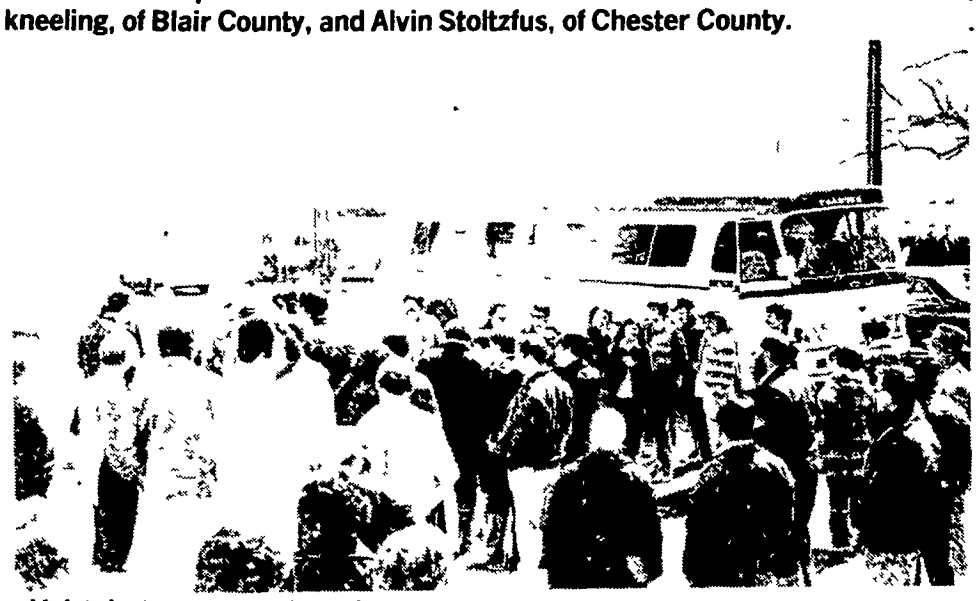
Three of her daughters recently were supered using the bull, Raybrook Starlite. There have been a total of 25 pregnancies from these supers.

The Mowry farm has a total of 650 tillable acres, most in hay and corn for silage.

They have a total of 200 milk cows.

Other stops on the day-long tour included the Singing Brook Farm of Mr. and Mrs. Obie Snider and the Burket Falls Farm of Polled Holsteins of Mr. and Mrs. Dave Burket.

Present and past owners with Dunwood Chief Carmel include Kenneth Fry, kneeling, of Blair County, and Alvin Stoltzfus, of Chester County.



Holstein tour group from Lancaster County prepares to enter barn on MarCove Farms, located near Martinsburg.

Second stop on the Holstein tour through Blair and Bedford Counties was the Ken Mowry farm, home of past national production champion.

State 4-H leaders tour Washington

WASHINGTON, D.C. — Southeastern Pennsylvania 4-H leaders returned this week from Washington, D.C., where they attended a National 4-H Leader Forum at the National 4-H Center.

They were part of 65 delegates from Nebraska, Missouri, Arkansas, Indiana and Pennsylvania. Bob Leiby, Lehigh County Agent, coordinated the Pennsylvania group.

Developed around the theme of expanding horizons, the sessions helped leaders become more effective in working with 4-H members and other volunteer leaders. Featured were in-depth workshops on citizenship, the legislative process, health, rocketry, leadership, fun in 4-H and economics, job and career educational programs for youth, and National 4-H Council services.

Educational field trips added depth to the program. Special features during this forum were meetings at the U.S. Department of Agriculture and field trip workshops at the Museums of History and Technology and of Natural History. During a day on Capitol Hill to see the federal government in action and discuss issues, these 4-H leaders visited with local representatives, met with Senator Heinz's aide and observed debate in the U.S. Senate.

One of the most exciting parts of the forum was sharing ideas with others. They plan to apply newly acquired skills in the southeastern Pennsylvania Extension Region.

4-H Leader Forums are conducted throughout the year by National 4-H Council in behalf of the extension service.

Fourteen 4-H leaders from Southeastern Pennsylvania counties met on Capitol Hill at Washington, D.C. while attending the National 4-H Leader Forum.

Red meat increases

HARRISBURG — Commercial red meat production in Pennsylvania during February totaled 77.5 million pounds, up nine percent from February 1979, according to the Pennsylvania Crop Reporting Service.

Cattle slaughter at 52,300 head was up one percent while calf slaughter at 21,100 head was five percent more than in February a year ago. Hog slaughter totaled 270,700 head, 16 percent greater than last year. The number of sheep and lambs slaughtered totaled 11,500 head, up 29 percent from February 1979.

Nationally, commercial red meat production in February 1980 totaled 3.05 billion pounds, up 11 percent from February 1979. Beef production at 1.71 billion pounds, was up less than one percent, while average liveweight increased 37 pounds to 1,069.

Veal production at 28 million pounds declined 20 percent.

Pork production totaled 1.29 billion pounds, up 29 percent. The 7.60 million head killed was up 28 percent and was a record for the month, surpassing February 1952. The average liveweight of hogs was 239 pounds, up two pounds.

Lamb and mutton production increased 19 percent to 25 million pounds.

Egg output soars another 21%

HARRISBURG — February 1980 egg production in Pennsylvania totaled 347 million, according to the Pennsylvania Crop Reporting Service.

The February production was 21 percent above the 287 million eggs produced in February 1979. The February average of 16.6 million layers was 11 percent higher than a year ago. Egg production per 100 layers was 2092, compared with 1926 in February 1979.

The nation's laying flocks produced 5.59 billion eggs during February 1980, six percent more than a year ago. The number of layers during February averaged 290 million compared with 291 million a year earlier. Egg production per 100 layers during the month was 1924 compared with 1816 a year ago.

24 HOUR SERVICE

As R. Fenton Murphy, chairman of the state dairy co-ops' security fund comittee issues a statement of unity on SB 1287, backers look on. From foreground are Agriculture Secretary Penrose Hallowell; and sponsors of the legislation, Senators Frank J. O'Connell and Patrick Stapleton.

Security fund

(Continued from Page A1)

It will allow dealers to provide alternate security such as bonds. While it establishes a separate fund for dairy cooperatives, it also gives the co-ops an easy out from any participation at all in any program.

R. Fenton Murphy, chairman of the Pennsylvania Dairy Cooperatives for Milk Security Committee, said, "We feel the bill will get the job done to the benefit of all concerned."

Murphy read a prepared statement saying there was full agreement by all segments of the state dairy industry and farm organizations.

But Pennsylvania Farmers' Association took exception.

Al Myers, director of PFA's governmental relations department, made it clear that PFA intended to fight for contributions of two cents per hundredweight rather than a penny.

"Our delegate body stated the fund would need a contribution from dealers and processors of two cents per cwt," he said. "PFA will be actively seeking an amendment to SB 1287 to raise the dealer-processor contribution to two cents," he said.

Secretary of Agriculture Penrose Hallowell pointed out, as he has in the past, that a two cent contribution would not raise twice the revenue the one cent rate could. In fact, he said, fewer dealers may participate at the higher rate and the fund could easily build slower.

Hallowell showered praise on all of the parties united behind the bill.

Senator O'Connell said in his talk the bill was a "bastard bill" with sections offered by many segments of the industry.

But Pennsylvania Association of Milk Dealers Vice President Henry Geisinger had a different inflection on the term when he pointed out the bill places all of the cost on the dealer or processor.

He also said he objected to having a bill rammed down the industry's throat by co-ops which won't even be participating in the fund.

But most of those at the Wednesday meeting were strongly in favor of the measure.

Grange Master Charles Wismer, himself a dairyman, called it a "great step in security for farmers."

Wismer said he was willing to take the one cent rate rather than risk having no fund at all.

Earl Fink, Executive Secretary of the Milk Marketing Board, said PMMB would have no trouble carrying out the letter and intent of SB 1287.

Fink said PMMB has seen the problem first hand and said dairymen need the protection the new measure provides.

N.J. to run farm tours

FLEMINGTON, N.J. — The Hunterdon and Somerset County Extension Services are accepting reservations for a tour of three horse farms scheduled for Saturday, April 12.

The tour is climax to a three-session Adult Horse Management Institute underway in Hunterdon's Extension Center on Tuesday evenings and Hackettstown High School on Wednesdays.

Tour participants need not have been enrolled in the extension service course. However, admittance to the farm on the April 12 tour will only be by bus.

Details available by calling Hunterdon's office, 201/788-1339, or Somerset, 201/526-6293.

Former farm reporter, Bob Malick dies

LANCASTER — Robert W. Malick, for years a familiar face as WGAL-TV's farm reporter, died suddenly Thursday around 6 p.m.

According to the station, Malick's death came as a shock to everyone. He had no known illness at the time of death.

Bob Malick first started to cover the Lancaster County farm beat back in 1950 on a show known as TV Farmer.

Later, he anchored the TV Farmer segment on Chanel 8's Noonday at Eight program.

A long time employee of WGAL, Malick had been promoted from the farm beat to a position as director and sound producer for the station.

Malick had received a host of awards from Lancaster County farm groups, including being made a 4-H national honary member.

The County Future Farmers of America had made him an honorary member and he was recipient of an Honorary Keystone Farmer Award.

Julie Singer, current farm reporter for the station, spoke highly of Malick's ability and reputation. She said he was a fine man and a great help to all of the reporters at the station.

Malick is survived by a son and a grandson.

Now Is The Time

(Continued from Page A10)

hundred inches deeper than the seeds or plant roots. In the case of large fields, other than gardens, the fertilizer can be either plowed down or worked into the topsoil prior to planting. When complete fertilizers are applied with innoculated seeds, here again the seeds and the fertilizer should be kept separate. The fertilizer will kill the legume bacteria used in the innoculant. Special attention to the proper placement of fertilizer is suggested.

TO FOLLOW SOIL TEST RECOMMENDATIONS

Soil testing is a very common practice to learn the needs of a soil; more and more home owners and farmers are utilizing this testing service as a means of efficient crop production. However, I'm afraid that some growers do not follow the recommendations that are given; too many short-cuts are used. This may not do any harm in a fertile soil because the reserves might carry the crop for one season. However, in the case of lime requirement, we urge all growers to apply the amount that is recommended. A soil that needs lime will not permit other major plant nutrients to become available; also, soils needing lime will not respond to good weed control with herbicides. There are many reasons for trying to maintain the proper ph is a soil. Don't short-cut soil test suggestions if you are after maximum and efficient crop yields.

TO INSPECT PASTURE FIELDS

Before too many weeks some permanent pastures will be ready to graze; I fear some are grazed before they are ready. However, the point in this article is to go over the pasture areas before the livestock are turned out; all trash should be removed in order to prevent injury and poisoning. Unfortunately, folks still use the rural areas to dispose of their solid trash. Some of this may contain glass, or poisons, that will kill livestock. Remove the junk before the livestock have a chance to become involved. If there is any evidence on the trash reflecting the guilty person doing the discarding, this information should be forwarded to local officials. Most township regulations do not permit the dumping of solid waste on private property.

Here are specifics of milk security proposal

HARRISBURG — It is fairly certain SB 1287, the Milk Security Fund bill, will become law as it is now written.

Provisions of the bill will govern dairymens' lives for many years in much the same way the $200,000 bonding requirement does today.

The Senate bill actually calls for establishment of two separate security funds in an effort to protect all of the state's dairymen.

One is to be built by cooperatives, The Cooperative Security Fund. It is doubtful anything ever will come of this fund.

Cooperatives are allowed to opt out of the fund by vote of their Board of Directors. General membership approval is not required.

It is a near certainty that all six Pennsylvania co-ops will choose not to participate.

The second fund is the Milk Producers' Security Fund. This fund will be established by contributions from handlers at the rate of one cent per hundredweight milk produced.

The fund will be built to a $4 million dollar level.

Central to the fund legislation is a plan to accelerate the payment schedule from handlers to farmers.

Because of jumbled jurisdictions between states and the Federal Order system, no specific language is included in SB 1287.

Prompt payment provisions are complicated by the slow payment from government programs, like school lunch, to handlers.

But the legislators made clear they expect action to shorten the present payment interval will be taken once the bill is passed. The Milk Marketing Board is instructed to hold hearings to that end.

Title to milk, under SB 1287 is deemed to be transferred from producer to buyer at the point of first shipment of the milk.

Therefore, milk produced in the Commonwealth and going to an out-of-state buyer is intended to be covered by the fund.

The buyer would be required to obtain license to buy milk in the Commonwealth.

The out-of-state provision may face a court test once the bill becomes law.

Dealers can obtain alternative bonding on their own or are allowed to offer collateral. The total coverage must cover the amount of milk purchased during any consecutive two month period of the current year.

At the moment, farmers have no lien on a milk dealer's assets and depend on the milk dealer's $200,000 bond to cover losses.

All too often, the $200,000 has fallen far short of the total loss.

Under the new proposal, claims will be allowed up to 75 percent of the loss. This is to assure the fund is not milked dry by a succession of early failures before it can be built to full strength.

Once the fund becomes actuarially sound, farmers could be fully reimbursed via a hearing process. Such a change also is indicated as the intent of the lawmakers.

No claims at all will be allowed against the fund for sales to dealers not licensed by the Pennsylvania Milk Marketing Board.

Adjustments will be allowed for sales of butter, cheese, and nonfat dry milk manufactured by a dealer or co-op participating in the milk security fund and to the Commodity Credit Corporation.

Dealers and participating cooperatives would be eligible to receive rebates and credits for those manufactured products sold to the government.

The bill was given its second reading by the State Senate this week.

The bill, for the most part, has the support of the state's farmer organizations, the agricultural leaders of both parties in both chambers of the legislature, the Agriculture Department, dairy co-ops, and other related groups.

A number of its supporters expressed hope the measure could be passed and signed by June Dairy Month, although given the legislative calendar and the number of recesses scheduled that may be a bit ambitious.

But SB 1287 could easily become law before cows have to come in off pasture. And that should help Pennsylvania dairymen sleep easier.—CH

Franklin County Rabbit Club gets visit from Easter bunny

CHAMBERSBURG — The 4-H Rabbit Club in Franklin County got a head start on the Easter Bunny at a recent meeting.

Nancy Funk, Penn State, was the guest speaker. She was accompanied by an assortment of her pet rabbits, ranging from a smaller Dutch rabbit to one large Flemish Giant rabbit named "Porgy".

The professor began her talk by showing 4-H'ers examples of a few breeds of rabbits. She used her five-day-old rabbits to demonstrate how one can feed baby rabbits with an eye dropper if a doe should die. She explained that it is possible to save babies using a purchased formula, if one is willing to feed the babies every two hours around the clock.

4-H members darted questions at their guest and laughed as "Porgy" and "B-2" hopped around the room or sat up to beg for cookies.

The speaker concluded her talk by inviting the members and their guests to pick out a pet rabbit to take home. Ms. Funk has introduced many children to the happiness and responsibility of owning pet rabbits. So far, she has given away 218 of the hoppers to young people willing to raise them as pets.

To show appreciation to the professor for her presentation, Mrs. Wayne Snider of St. Thomas presented to Nancy a cake shaped like a large sitting rabbit surrounded by smaller rabbits.

Wool pool dates listed

UNIVERSITY PARK — Dates for the 1980 Wool Pool schedule have been announced for Pennsylvania.

The county schedule of dates includes:

Northumberland, May 29; Northampton, June 2; Bucks, June 3; Lawrence, June 3 and 4; Berks, June 4.

Venango, June 9; Mercer, June 9; Centre, June 9 and 10; Somerset, June 10; Tioga, June 12 and 13.

Wayne, June 17; Wyoming, June 17; Crawford, June 17; Sullivan, the morning of June 17; Bradford, the afternon of June 17 and June 18.

Susquehanna, June 18; Indiana, June 18 and 19; Franklin and Cumberland, June 18 and 19; and Washington, June 24 and 25.

Grain bin

(Continued from Page A1)

Since Krall's farm had been zoned commercial and light industrial by the township in 1973, all buildings were required to be 100 feet off any roads.

Krall stated he built the grain bin where he did so that he could make use of his present equipment. He transfers the dried grain to a Harvestore silo which was built in 1967, about 80 feet from Hinkle Road.

The silo, which was said to be "non-conforming" in Judge Gate's comments, had been constructed six years prior to any township ordinances being in effect.

"When we built the silo, we placed it so we could fill it from the north side, the side toward Hinkle Road. So in order to unload the corn from the bin to the silo and make use of my 60 foot auger, the bin was put up where it is now," said Krall.

He went on to explain he could have put the grain bin on the other side of the silo, as was suggested by the zoning people, but this would have situated it on the wrong side for filling the silo. "I would have had to turn the silo around, or get a longer auger. And 61 feet is the longest length of auger I am aware of that you can buy."

By building the bin on the south side of the silo, Krall added, it would have been in the long-rows part of the field, where now it is where the field had a triangle of point rows. The grade also falls away on the south side of the silo, therefore there would have been more of an angle on the auger to fill the silo which would have made it harder on the equipment, he said.

The county judge made his determination on whether or not to grant variance from legal principles set forth in a case involving O'Neill versus Zoning Board of Adjustment.

"...variances should be granted only sparingly and only under exceptional circumstances;... in order to obtain a variance, the petitioner must prove (1) that the variance will not be contrary to the public interest and (2) that unnecessary hardship will result if the variance is not granted;... a variance will not be granted solely because of the petitioner will suffer an economic hardship if he does not receive one..."

The Krall grain bin, located next to the farm's buildings, situated in the center of the owner's 170 acre farm, is 250 yards from any neighboring homes. And that home is owned by Krall's daughter and husband.

A neighbor, living further east along Hinkle Road, said you can sometimes hear the grain drier's fan, but then only for about a minute.

This same neighbor, who attended the court hearing last July, said it was obvious to him that the Township's attorney did not understand the engineering and reasoning behind the bin's location, and if he didn't, chances are the judge didn't either.

Krall said he tried to explain to the court the location was based on equipment and engineering, and that any other location would have meant a cost of $5000 more to build the bin. To move the bin the distance needed to be in compliance, Krall estimated last July it would cost about $3000.

He pointed out that there are about 28 yards of concrete in the base for the bin, which in 1976 cost around $30 a yard.

court's decision when they picked up the local paper on March 19, 1980. About one week later, they said they finally received a letter from the attorney telling them what they had read was correct.

Judge Gates' comments stated, "The evidence here clearly discloses that the land is suitable for the intended purpose and that it can be accomplished in conformity with the Township's Zoning Ordinance.

We will accept the assertion that a financial hardship will result. But as was noted previously, economic hardship standing alone is no valid basis for departing from the terms of a zoning ordinance.

Nor are we impressed with the petitioner's contention that he was mislead by the grain bin salesman's asserted belief that no building permit was required. Petitioners were aware of the existence of the zoning ordinance as is demonstrated by their inquiry of the salesman as to whether or not a building permit was required."

Krall said he knew the township had adopted an ordinance and that he could either buy the book or read it in the municipal building. He said he could not remember reading any notice in the paper, and could have missed it because they don't get the newspaper on a regular basis.

But, Krall said he felt when the contractor told him a permit wasn't necessary—it wasn't necessary. He said he found out about his error from neighbors and friends, later.

Township Supervisor Raymond Phillippy, who was elected to his local government position last Fall, says he needs to look into this situation in more depth.

He said he has been studying the Pennsylvania Municipality Planning Code Act 247 which states that the purpose of zoning is to protect, promote, and facillitate public health, safety, morals, and general wellfare.

But, he said, he can understand what happened to Krall because the same thing almost happened to him when he wanted to construct a swimming pool.

"The pool salesman said I could locate the pool within 5 feet of my boundary, and I believed him. But, one day when I was in Lebanon, I thought I'd better check it out—I found out he was not giving me the right information. Luckily, I found out before I was in violation."

"These salesmen have a way of working around to sell their stuff, and it's up to the individuals to check it out before they sign anything," he added.

To stop this sort of thing from happening in their township, Krall said the supervisors have instructed the police to notify them of any construction going on and check to see if the needed permits were obtained. "This way we can stop the people before they get into trouble, and ask them if they know they need to get a permit under Act 247."

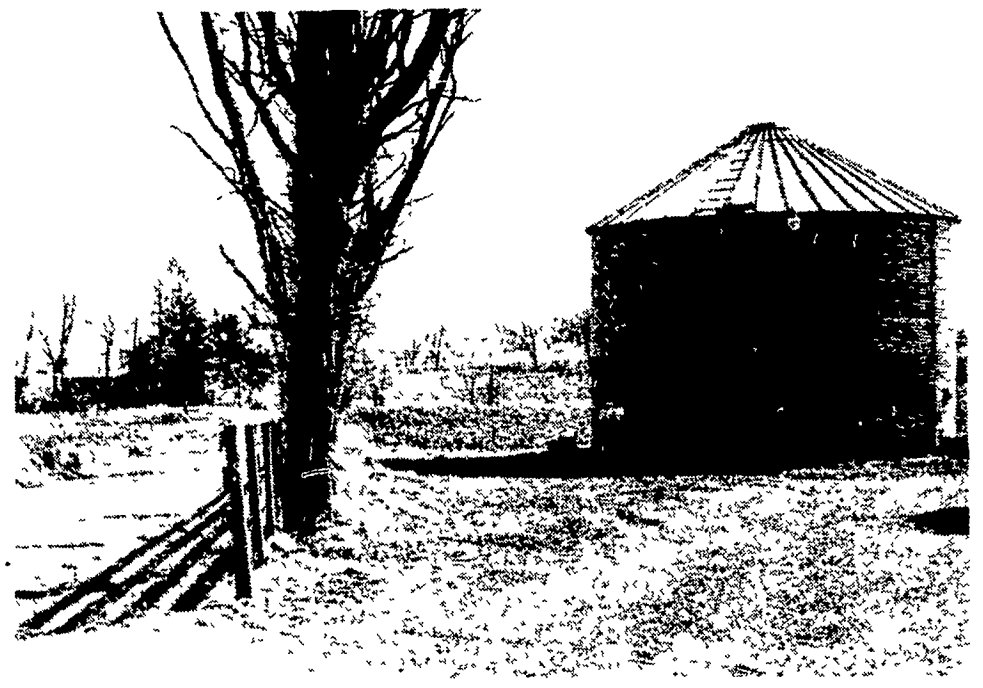
When asked whether the township will enforce the Lebanon County decision and require Krall to move his grain bin, Phillippy said he could not say. He added he is not sure whether the township has the power to accept or change the zoning regulations. "Under Section 605, I read it to mean we can, but I read on and then I'm not sure."

Phillippy stated that the supervisors have to be very careful not to bend the rules for one individual or another one may come to them with a request to change.

He added he hopes something can be done peacefully to settle this situation reasonably, but he pointed out he is just one-third of the board.

"I am a Christian, and I like to see people treated like human beings," he said. "I'll have to dig into this and see what I can do."

This seems to be a candle of hope for Krall who said if he has to move the bin, he might just as well give up farming. "But, if all the farmers give up, we'll be in a lot of trouble. You can't raise food in rule books."



Harvey Krall's grain bin, located in Scuth Londonderry Township, was erected 40½ feet off Hinkle Road. If he does not receive a variance from the township, he will be forced to move the structure an additional 59½ feet away to be in compliance with the local ordinance.

How to figure corn:soybean ratios

GEORGETOWN, Del. — Before you decide how much land to plant to soybeans this year, take a look at their profitability relative to other crops such as corn. To do this, you'll need to compare relative price ratios and production costs.

The break-even soybean/corn price ratio is often considered to be 2.5 to 1. This means that if soybean prices are more than 2.5 times greater than corn prices, soybeans will probably be more profitable to grow, explains University of Delaware extension crops marketing specialist Carl German.

Just remember that break-even ratios vary from farm to farm, and with prices, yields and costs.

The soybean/corn price ratio in mid-February and the November 1980 ratio (based on Chicago futures prices) has been running 2.4/1.

Last March, when farmers were planning to expand their 1979 soybean plantings by a tenth, the price ratio was 3 to 1.

Whether you grow corn or soybeans, this may be a good year to consider forward pricing a portion of your crop, says German.

Carryover supplies of both crops are expected to be quite large by fall and harvesttime prices may be sharply lower than they were last fall. Delmarva growers can anticipate a possible rebuilding of stocks both here on the Shore, and nationally.

Have your production cost and return to management in mind when signing any forward contract on your 1980 crop, he advises. This is especially important this year since price levels at harvest could be below production costs.

Forward pricing is one way to hedge yourself against a price decline

Another way would be to take advantage of the acreage certification program available to you at your county ASCS office. If you sign up for this program or certify your 1980 acreage, then you may become eligible for any deficiency payment made on corn, barley, wheat or grain sorghum if grain prices do not exceed a specified target price for a certain length of time.

The specialist advises growers to pay a visit to their county ASCS office and get the details on this program as soon as possible.

North American Livestock Expo sets dates

LOUISVILLE, Ky. — The 1980 North American International Livestock Exposition will kick off November 8.

The two-week long livestock activities and events will end on November 22. Once again, the NAILE will be held at the Kentucky Fair and Exposition Center in Louisville.

According to Harold Workman, this year's Expo premiums are expected to exceed the $225,000 offered during the 1979 show, an event which drew over 12,000 entires in the various livestock shows. Workman is General Manager of the event.

Entered in the livestock shows at the NAILE are beef cattle, dairy cattle, quarter horses, sheep and swine. Workman said he expects entries for the 1980 show to top those of last year.

In addition to the numerous breed shows held during the Expo, approximately 25 livestock sales will also be held, attracting buyers from across the U.S. and several foreign countries.

Workman noted that some of the finest breeding stock in the world traditionally participate in the NAILE.

"The overall quality of livestock shown and sold during the Expo creates a showcase of fine bloodlines", said Workman. "Breeders not only come to Louisville to participate in the shows, but they also come to upgrade their herds by purchasing championship stock at the North American International."

Many entertaining activities of interest to the general public will also be featured at the 1980 Expo, including a return of the Great Lakes Circuit Rodeo Finals, live music shows, contests, and more. A host of livestock breed meetings and three nationally recognized judging contests will also return to the 1980 Expo. It will contain a wide variety of exhibits of interest to livestock breeders and the general public.

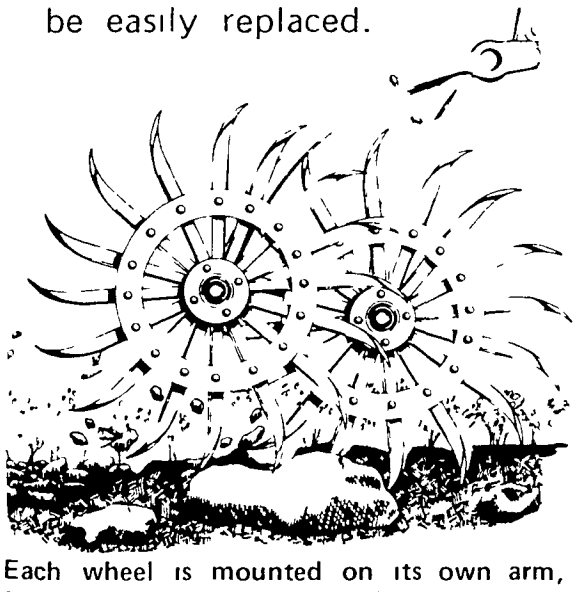
THE MOST ADVANCED DESIGN IN ROTARY HOES IS BY M&W!

The M&W Rotary Hoe controls weeds better because each wheel works independently, free to follow the ground contour without being effected by a neighboring wheel. Spring loaded arms assure maximum ground contact. Maintenance is kept to a minimum with replaceable, permanently lubricated ball bearings on each wheel and self sharpening forged teeth can be easily replaced.



Each wheel is mounted on its own arm, free to follow the ground contour for maximum weed control and crust busting

With rigid models available in 15', 21', 28' and 30' widths, and hydraulic fold models in 21', 25' and 30' widths, M&W has a size for every farm. Standard features such as the M&W E-Z hitch make the M&W Rotary Hoe an even better investment. Take a closer look at the most advanced design in rotary hoes today at your nearest M&W dealer or write for more information.

$2100 top at York-Adams Calfarama

YORK — An average price of $1048 per head was brought on the 50 head of calves consigned to the York-Adams Calfarama '80 held Tuesday at Avalong Farms, York.

The calves were sired by such top sires as Marvex, Ivanhoe Star, Molly Chief, Apollo Topper, Proud Performer, and Jet Stream.

Top selling animal was Avalong Chief Sabrina, a daughter of Vincent View Molly Chief. Sabrina was consigned by Avalong Farms, Inc., and purchased by Wayne Reeder of New Windsor, MD. On the maternal side, her dam is classified Very Good and has milk records to 21,594 milk 4.8% 1035 fat, with over 100,000 milk lifetime.

Second high, at $1670, was Bupplynn Marvex Jan. Consigned by Leroy and Joyce Bupp, Seven Valleys, Jan was the purchase of Mike Stebbins, York. A Marvex daughter, her dam has records to 18,574 milk 3.6% and 650 fat.

Shown from left with the top-selling calf, Avalong Chief Sabrina which brought $2100 are: Denny Remsburg, representing buyer Wayne Reeder, New Windsor, MD; Barb Kilgore, Alternate York County Dairy Princess; Larry Amspacker, representing consignor, Avalong Farms, Inc.; Billie Heath at the halter. In the box, Doty Remsburg, auctioneer and Norman Hill, pedigrees.

Guernsey cows make high records

WILLOW STREET — Two registered Guernsey cows in the herd of Raymond F. Witmer, Willow Street, have recently completed top official DHIR actual production records, according to The American Guernsey Cattle Club. All cows were milked two times a day. The testing was supervised by Penn State.

Penn Del Jaguars Kitten, a five year old, produced 17210 pounds of milk and 796 pounds of fat, in 305 days.

Penn Del Fabian Blondie, a four year old, produced 17340 pounds of milk and 896 pounds of fat, in 305 days.

Lindenhof Dari Midas Carla, a five year old, Registerd Guernsey cow, owned by K.D. Linde, Oxford, has completed an official DHIR actual production record of 17190 pounds of milk and 852 pounds of butterfat, in 305 days 2 times a day milking, according to The American Guernsey Cattle Club.

Lancaster Holstein 4-H reorganizes

LANCASTER — Doug Hershberger, Quarryville R4, was elected president of the Lancaster County Holstein 4-H Club at its reorganization meeting Tuesday night. Hershberger, who succeeds Arlen Keener in the post, will head a group of veteran 4-H'ers elected to fill the top officers' positions.

Other officers elected include Steve Kauffman, Elizabethtown R1, vice-president; Deborah Hershberger, Quarryville R2, secretary; Leonard Stoltzfus, Gap R2, treasurer; Jane Stoltzfus, Gap R2, news reporter; and David Stoner, 3207 Bowman Road, Landisville, and Mark Welk, Peach Bottom R1, game leaders. County Council representative will be Glenn Shenk, Lititz R2, and other officers.

Steve Leiser, Pennfield Feed Corporation, spoke to the nearly 80 4-H'ers about how to select project calves and the care and management of animals as projects.

Lancaster County Extension Agent Glenn Shirk told the group that applications for transfer of animals must be made by May 1 for calves. Shirk encouraged the members to have 4-H animals registered in their names.

Lancaster County Holstein Director Robert H. Kauffman distributed membership cards for the Holstein Association, and told 4-H members they can belong for a $2 membership fee.

Young people between the ages of 8 and 18 before January 1, 1980, may still become members of the dairy club. The next meeting will be held April 24, at 7:30 p.m. at the Farm and Home Center and feature the "dairy bowl" quiz.

People who would like to join may contact Shirk at the Extension officer or any of the following leaders: Elam Bollinger, Gary Akers, Kenneth Rutt, Elvin Hess, Rod Denlinger, Jay Landis and Robert H. Kauffman.

New officers of the Lancaster County 4-H Holstein Club include front row, from left: Doug Hershberger, president; Steve Kauffman, vice-president; Leonard Stoltzfus, treasurer. Second row, from left, includes: David Stoner, game leader; Mark Welk, game leader; Jane Stoltzfus, news reporter; and Glenn Shenk, county council representative.

Delaware names members of soybean board

DOVER, Del. — Secretary of Agriculture Alden S. Hopkins, Jr. announced Wednesday that the new members of the State's first Soybean Advisory Board.

They include, from New Castle County: William Cross and Henry Retz.

Elected from Kent county are: Olin Gooden, Joe Hughes, and C. Wesley Webb; and from Sussex County: Clark Calloway, Robert E. Dukes, John Hastings, and William Vanderwende.

Under this referendum process this Advisory Board is responsible for drafting the soybean development order. It is the development order that specifies how much money can be collected by the checkoff and how the money may be used. After public hearings on the development order, an election will be held to allow the State's soybean producers to vote on the development order.

5400 acres may sit idle if state doesn't act

BY CURT HARLER

HARRISBURG — A total of 5400 acres of state owned land, capable of producing good crops, may sit idle this year unless some state action is taken soon.

The land is that controlled by the Welfare farm system.

Having that land idle could mean a loss of over $100,000 of potential rental income, or the loss of crops produced for the use of the institution inmates.

The land, at the moment still under the control of the Public Welfare Department, may or may not go to the state Agriculture Department. Depending on the timing of any transfer, the land may or may not be used for agriculture.

At present, it is unsure whether the land would be sold off, leased to individual farmers to plant, farmed by the Ag Department, or let fallow.

Welfare says at least two of the institutions will be divided into plots and rented to farmers this coming month.

If other land is to be sold, delay in disposing of the acreage means loss of tax revenue for local municipalities.

In addition to the farmland, there are number of dairy cattle and other livestock involved. About half of the cows are Registered Holsteins.

A contract is in place with the state Holstein Association to disperse the seven dairy herds between May 12 and May 27.

Heavy animals will be slaughtered and used at the institutions. Lightweights will be sold at local auctions.

While confusion reigns, one thing seems certain: Welfare wants to be rid of those farms.

But the Welfare Department has done some seemingly strange things to farms which are to be sold off.

At Norristown, for instance, the Welfare Department spent about $12,000 on a new milking system. They also made improvements on the silos there.

These capital improvements were made within the past several months. The milking system was completed this month.

Welfare's only justification was that the project had been started and apparantly could not be stopped once the money had been set aside.

Welfare seems to see the problem ending for them once the whole farm system is given, by the legislature, to someone else. That someone else may be the state Agriculture Department.

But at the moment, Agriculture has no power to do anything with the farms.

One of the holdups in resolving the problem is a lack of money in the Agriculture budget to allow PDA to run the farms.

The 3993 acres of good crop land, 400 acres of tillable soil which has not been farmed recently, and 992 acres of pasture may go to seed unless the funds are appropriated.

Depending on the timing of any supposed transfer, Agriculture will have to decide whether or not to use the land itself to feed the institution's inmates, or to lease it to farmers.

The final decision of the Budget Office may make a big difference here. If the money is not given to Agriculture, the land could end up as a part of the General Services holdings, to be lumped with desks, snow shovels, and state buildings.

Questions have been raised about the value of leasing the land to outsiders. Such a move would generate funds for state coffers. Even at an average $20 an acre, the state could realize $108,000 from the 5400 acres.

But two further problems arise. If the state goes out of the food producing business, what penalty will it pay by having to produce food on the open market? Welfare says they hope to break even on food production costs by buying produce outside.

If the state were to continue producing food for inmates, hard-pressed farmers could lose a good, local consumer for their products.

Whether or not the state will realize savings in salaries from the welfare farm employees also is argued.

It is difficult to run a profitable operation with 40 hour a week farmers, as Welfare found out. Agriculture may come to learn the same lesson.

Because the current farm workers are members of the state employees' union, they will not lose their positions. Regulations require the state to offer them other work within the system.

Another yet-unanswered question is how many of the welfare farms actually can be saved.

Two of the operations are in Pittsburgh and may not be worth the trouble of saving. Norristown, while urbanized, has a fair amount of good ground.

Since Welfare wants only to be rid of the problem, and nobody yet knows who will end up with the burden, it is unsure of how many operations will continue to be farmed.

Observers in the Agriculture Department indicate they will have to sit back and await developments.

But the seasons will not wait. Planting season will come and go without regard to the legislative calendar.

Meanwhile, many of those 5400 acres await further turning of the legislative wheels.

And General Services, hardly experts in farming, will have control of the lands until HB 1535 is shaken loose from the legislature and Agriculture can take over the farms.

Extension slates sheep shearing schools

CARLISLE — The Penn State Extension Service will conduct two sheep shearing schools in this part of the state.

They will be held as follows: April 14 and 15 in Cumberland County, near Carlisle; and April 16 and 17 in York County, near York.

These are two-day shearing schools where interested persons will have a chance to shear several sheep. Both sheep and equipment will be provided for these schools.

Advanced registration is required with Duane Duncan, County Agricultural Agent, 1100 Claremont Road, Carlisle. Phone 717/249-7220. He will accept registrations for both of the above shearing schools.

Interested persons should contact Duane Duncan soon as registrations will be accepted on a first-come, first-served basis.

Blue Mountain FFA installs officers

The Blue Mountain FFA held their 36th annual banquet recently.

Receiving awards were: Steve Dunn, Star Chapter Farmer and Ronald Phillips, Star Greenhand.

Robert Dunn was awarded an honorary membership degree for the help he gave the chapter.

Robert Evanchalk was also honored.

Officers installed included: Timothy Koch, chaplain; Dave Potts, conductor; Mark Weaver, sentinel; Scott Tucker, reporter; Steve Dunn, treasurer; Dennis Seltzer, secretary; Dennis Fidler, vice-president; and Kent Heffner, president.

New officers shown from left are: Timothy Koch, chaplain; Dave Potts, conductor; Mark Weaver, sentinel; Scott Tucker; reporter; Steve Dunn, treasurer; Dennis Seltzer, secretary; Dennis Fidler, vice-president; Robert Dunn, honorary member and Kent Heffner, president.

Schmidth Farms, Inc. joins Simmental Assoc.

BOZEMAN, Mt — Schmidt Farms, Inc., owned by Walter E. Schmidt, Sudlersville, Maryland, has recently become a lifetime member in the American Simmental Association.

ASA is unique among beef breed associations in that it offers only a one-time, one-payment life membership. Once a person joins the association, there are no future dues or membership payments.

"We want to extend a sincere welcome," said ASA Executive Secretary, Earl B. Peterson, from the association's headquarters in Bozeman, Montana.

Founded in 1968, the American Simmental Association now numbers more than 12,600 life members and the ASA herd book has exceeded the 550,000 figure in number of animals processed for registration.

Simmental cattle originated in the Simme Valley of Switzerland, and have been in North America only since 1967. In that time, the Simmental breed has grown enormously in numbers and in popularity. The breed currently ranks fourth among U.S. beef breed organizations in the number of animals registered annually.

Schmidt, who is engaged in general farming, including hog production in addition to his cattle operation feels that the vigorous nature of the Simmental may be their most outstanding characteristic.

Tobacco referendum soundly rejected

LANCASTER — The tobacco referendum, voted on in the latter part of February in Lancaster County, was soundly defeated.

The referendum called for the farmers to decide whether they were in favor of marketing quotas for cigar-filler, type 41, tobacco for three marketing years beginning October 1, 1980.

Out of a total of 727 persons who voted, only 55 were in favor of the quotas, with 634 ballots cast in opposition. There were 38 ballots that were challenged and disallowed. SM

PENNSYLVANIA AGRICULTURE

Why Jessie-type partnerships make a lot of 'cents'

BY PAT KAUFFMAN

LANCASTER — Money, the making and keeping of it, was the reason behind the recent spectacular price of Lime-Hollow Elevation Jessie.

While Jessie's genetics and records were the reasons for her selection as the cow to purchase, investment tax credits, tax shelters, and long-range capital gains were the reasons behind Jessie Partners' search for a cow.

M. Robert Young, one of two general partners in Jessie Partners, has been involved in other partnerships. In particular, he and Martin Y. Sponaugle, the group's attorney, are also currently involved in a partnership comprised of three general partners and nineteen limited partners and the purchase of a cow nicknamed Tilly.

In both the Jessie and the Tilly partnerships, the structure is generally the same. Two or three individuals serve as general partners in the group taking care of the purchase, maintenance and sale of the animals. In addition, there are varying numbers of limited partners. These limited partners are limited both to their participation in the group and to their liability. In other words, the limited partners are strictly investors.

Sponaugle explained the interest in purebred cattle. "Suppose a person were to buy a $50,000 cow. And also suppose that the person is currently in the 50 percent tax bracket. By his purchase of the animal, he comes under the heading of farmer and can make use of credits and accelerated depreciation normally available to farmers."

"Now let's say that on this $50,000 cow, the purchaser takes the first year investment credit of 10 percent or $5000. In the 50 percent tax bracket, this is equivalent to a $10,000 deduction. If the person then assigns a life to the cow of 7 years, he can depreciate her at what would amount to a $10,700 deduction. And if he holds the cow as breeding stock for at least two years, he can claim an additional $2000. In total then," claimed Sponaugle, "the buyer can claim a first year deduction of $22,700. And if he purchased the animal with a 30 percent down payment or $15,000, he has recovered his investment the first year."

Sponaugle added, "What you have to remember is that the tax advantages are all in the front end here. The investors are looking for a gain over the long term. And that gain will eventually be taxable."

Sponaugle was quick to point out that these partnerships come under the Securities and Exchange Commission's regulations and are fraught with pitfalls. "Many attorneys are not really familiar with all the regulations governing these partnerships." Caution, he emphasized, must be exercised even by those who have a working relationship with the myriad of laws to assure compliance with all the regulations.

The internal workings of a partnership are set up differently for each one. But in the partnerships recently set up by Sponaugle, a maintenance contract is issued for the care of the cow and her off-spring which, if the buyer hopes to take advantage of capital gains tax breaks, must be held until the age of two. "You're entrusting the farmer with a sizeable investment, and much of the success of the investment depends on the care the animal receives."

The biggest hazard in the investment in purebred cattle, is the possibility of sterility, Sponaugle noted. The second as he sees it is the production of an excess number of bull calves, and the third is the uncertainty of economic conditions that could make the availability of purchasers for high priced off-spring a problem.

Sponaugle noted that while each partnership is different, shares are generally sold to less than 25 partners to ease the restrictions on the group.

While Sponaugle declined to indicate the size of the individual investments needed and the projected profits, he noted that the size would be relative to the purchase price and the number of investors in the group, and the profits would have to keep pace with existing returns on government bonds, currently around 15 percent.

In addition, to attract investors, it would be necessary to project a return of closer to 20 percent per year on the partners' funds.

While he expressed great hopes for Tessie and satisfaction with the previous partnership involving Tilly, he noted that the structure of the partnership was studied closely and took a sizeable chunk of time and study to institute. This area he cautioned is for experts only.

$116,000 cow

(Continued from Page A1)

eighth generation to have completed a 20,000 pound lactation. To my knowledge there are no other cows in the U.S. with both these distinctions."

The purchasers, Jessie Partners, have entered into a limited partnership. The two leading or general partners in the group are Young from Lancaster and Galen Crouse on whose farm Jessie is stabled.

In addition to the general partners, there are five limited partnerships belonging to Robert and James Humphreville, Lancaster; Stanley Brunn, New York; Elden Bjurling, Massachusetts; Ty Myers and Larry Wyles.

Young explained he is in charge of purchasing and selling and Crouse is in charge of Jessie's care. The other partners are simply investors. The limited partnership arrangement is used as a tax shelter and is regulated by the Securities and Exchange Commission.

Jessie was bred by Benny Gunzenhauser, New York and was co-owned by Ron Mueller, Illinois. What prompted the owners to sell such a landmark cow?

Young theorized that the geographic distance between the owners and the fact that Jessie as a six year old is now in her prime were the two determining factors.

Contending bidder at the auction was Larry Kibler and Associates, Stanley, Virginia.

The Great Expectations Chapter Three auction was the third annual auction held in Lancaster County and co-managed by Young. He explained he tries to get cows with both outstanding pedigrees and outstanding looks for the prestigious sale.

The purchasers' partnership was formed when they learned Jessie was to be consigned.

Average price for all animals auctioned, including Jesse, was $9150.

Jessie is currently in calf to Poverty Hollow Milestone and will be introduced to super ovulation and embryo transplant when she has calved. Recently one of Jessie's daughters brought $31,000 in Reno, Nevada, according to Young.

House overwhelmingly passes two farm bills

BY DICK WANNER

HARRISBURG — The Pennsylvania House considered two farm bills this week passing both by nearly unanimous votes.

House Bill 1778, a measure which restricts alien ownership of Pennsylvania farmland to less than 100 acres, was passed by the House in December, passed without a single dissenting vote last week in the Senate, and returned to the House with minor changes.

The bill's prime sponsor, Lancaster's Rep. June Honaman, asked the House to concur with the Senate changes, they did so on Tuesday and sent the measure onto the desk of Governor Thornburgh where, according to Honaman, it should have very little trouble being signed into law.

HB 1608, sponsored by Noah Wenger, also a Lancaster Countian, was approved by nearly the entire membership on Tuesday. The bill would amend the Pennsylvania tax code to exempt family farm corporations from the annual one-percent levey exacted from the owners of all stocks and bonds.

When he introduced the bill, Wenger said the tax bore down unfairly on incorporated farmers because the value of their properties was rising faster than their ability to generate income from the land. The capital stock tax is imposed on the theoretical sale value rather than the actual income generated from the land.

Wenger said he also believes the stock tax hinders the formation of family farm corporations, even in cases where that business tool may be useful in preserving valuable farmland.

Return of an old hand

Neil Buss, former deputy secretary of Agriculture with Kent Shelhamer, returned to the Hill last week to work full-time for the Senate Agriculture Committee. Buss had performed similar duties for the House Ag Committee when Shelhamer was its chairman.

As a committee staffer, he'll have considerable influence on the shape of farm legislation considered by the Senate.

Buss is a Northampton County native, has BS and MS degrees from Penn State and a PhD in animal science from Virginia Polytechnic Institute and State University.

Gone Fishing

For votes, that is. The legislature adjourned this week until after the Pennsylvania primary, with the lawmakers scheduled to return to their desks on April 29. Big item on the Senate calendar is the Milk Security Fund measure, a bill which has yet to meet the challenge of either the Senate or the House.

Trees damaged by ice need immediate care

MILFORD, Del. — Ice storms can do considerable tree damage. Should one hit this winter, knowing what to do and how to do it could mean the difference between saving your favorite tree or chopping it up for firewood.

According to James McKeehen, agricultural agent, the greatest storm injury is likely to occur on the faster growing trees. These include poplars, maples, willows, black locust, and Chinese and Siberian elms. Stronger species are oak, sycamore, and honeylocust.

If you're faced with the job of straightening a toppled tree or mending the wounds of broken or split branches, the following first-aid treatment is suggested.

Remove all broken branches, and do all cutting with sharp tools. You may need saws, knives, and wood chisels. Make cuts either at a good side branch or nearly flush with the mother branch. This avoids leaving dead-end stubs.

Make smooth, fast-draining wounds surfaces. Remove splintered, rough, or loose wood from all parts of any wound with a wood chisel or sharp knife.

Trim off all bark not solidly attached to the wood. Use a sharp knife, exposing uninjured bark on all edges of the wound. Recent research has questioned the need for painting tree wounds.

After the wood has thawed, lift, straighten, and support trees, shrubs, or evergreen trees with wire encased in a hose whereever it touches the bark. Supports should remain a full season. Cover exposed roots with soil and mulch with leaves or straw.

Still more broilers placed in state

HARRISBURG — Placements of broiler chicks in the Commonwealth during the week ending March 8 were 2,457,000 according to the Pennsylvania Crop Reporting Service.

The placements were 12 percent above the corresponding week a year earlier and seven percent above the previous week. Average placements during the past nine weeks were four percent above a year earlier.

Placements in the 21 key poultry producing states were 82,309,000, six percent above the same week a year earlier and one percent above the previous week. Average placements during the past nine weeks were six percent above a year ago.

Broiler-fryers slaughtered in Pennsylvania under Federal Inspection during the week ending February 27 totaled 1,916,000, with an average liveweight of 3.98 pounds.

Potato stocks off 25% from last year

HARRISBURG — Total stocks of potatoes stored in Pennsylvania by growers, local dealers and processors in March 1 were estimated at 1,650,000 hundredweight, 25 percent less than a year ago, according to the Pennsylvania Crop Reporting Service.

The seven eastern states had 20.1 million cwt on hand, 23 percent above a year ago and ten percent higher than the 1978 figure.

At the United States level, an estimated 127 million cwt. of potatoes for all uses were in storage in the fall producing areas. This was a five percent decline from last year's record holdings, but five percent above the stocks on March 1, 1978.

Disappearance of the 1979 fall crop on March 1, 1980 totaled 170 million cwt., eight percent short of the 185 million cwt. for the comparable period last season.

Squeeze tubers now to assure blooms later

FLEMINGTON, N.J — It will be a little while before it's time to plant gladiolus corms and dahlia tubers, but it's not too early to look over the ones you've stored away for the winter.

Many homeowners put corms, bulbs and tubers in baskets, bags and boxes in the fall and forget about them until planting time. If any happened to have soft spots when they were put away, you'll find a few more bad ones when you get ready to plant them.

Sort through the corms and tubers and throw away any that show the slightest indication of decay.

If you find any with soft spots and cannot even see any decay areas, consider it a candidate for the trash pile. The short time it takes you to do the job now may save you a lot of disappointment later.

National officer speaks at Kutztown FFA banquet

BY LAUREL SCHAEFFER
Staff Correspondent

KUTZTOWN — Members of the Kutztown FFA Chapter honored their own March 18 at the Kutztown Grange Hall. Participating in the climax of a year's endeavors and making the occasion even more special was Don Trimmer, Jr., National Eastern Region FFA Vice-President.

The national officer commented on some of the many opportunities he has had and discussed a recent trip he and several other FFA members took to Japan.

Trimmer, of Woodsboro, Md., reminded his colleagues to thank the sponsors of the many awards presented during the banquet, especially the National FFA Foundation, sponsors of the Foundation Awards.

Trimmer remarked on how the FFA is helping to prepare and develop the leaders of tomorrow.

"Agriculture is a basic resource of America," he said, "and nobody can do it like we can."

"I haven't heard that we have reached our limit in agriculture production," he said.

Highlighting the presentation of awards were the Star Chapter presentations. Receiving the Star Greenhand Award this year was Mark Latshaw, 15, son of Mr. and Mrs. Earl Latshaw, Alburtis.

Chapter Star Farmer was awarded to Dean Bruno, 17, of Kutztown, son of Mr. and Mrs. John Bruno. Dean was also the recipient of four foundation medals, including beef production, diversified livestock production, agriculture mechanics, and placement in agriculture production. Other awards included: the outstanding record book for eleventh grade, a leadership award, and two state project book medals. These were for his four enterprise entries, earning a silver medal for ninth place and another silver medal for his occupational work experience which earned a seventh place.

Shown front from left are: Daniel Adam, Marlowe Greis, Mike Mertz and Gerald Haas. Back from left: Bruck Latshaw, Tim Behm, Mike Heiter and Keenan Hilbert.

Keith Flicker, chapter president, was honored with the Chapter Star Agribusinessman award. Keith is the 18-year-old son of Mr. and Mrs. Kenneth Flicker, Maxatawny. Other awards included a foundation medal for agriculture electrification and a leadership award.

Foundation awards were also given out to Bruce Latshaw, Alburtis, dairy production; Michael Heiter, Lenhartsville, swine production and crop production; Daniel Adam, Mertztown, poultry production; Gerald Haas, Lenhartsville, fruit and vegetable production; Tim Behm, Kutztown, ornamental horticulture and soil and water management; Michael Mertz, Fleetwood, home and farmstead improvement; Keenan Hilbert, Kutztown, agricultural sales and service; and Dean Shoemaker, Mertztown, public speaking.

Other outstanding record book awards were presented to Ted Kleinsmith, Kempton, ninth grade; Bill Zollers, Mertztown, tenth grade; and Daryl Kunkel, Kutztown, twelfth grade.

Bill Zollers was honored with the scholarship award and was given a bronze medal for his state project book for placing eighth with his four enterprise book.

Keystone Farmer pins were awarded to Michael Heiter, Terry Kleinsmith, Kempton; David Reigel, Kempton; and Larry Shrawder, Kempton.

State FFA chorus pins went to Elen Kamp, Kempton, and Scott Rabenold, Kutztown. Richard Hershberger, Kutztown, and Paul Reinert, Lenhartsville, received State FFA band pins.

Other state project book awards were presented to Marlowe Greis, Kutztown, single enterprise-1st place silver; Dean Shoemaker, single enterprise, third silver; Donald Lorish, Alburtis, two enterprises, ninth bronze; Ted Kleinsmith, Kempton, three enterprises, tenth bronze; Daryl Kunkel, six enterprises, second bronze.

Honorary Degrees were presented to Christopher Haring, language arts teacher; Fay Kamp, secretary; John Bruno, Russel Heiter, and Ernest Riegel, Fathers of Keystone Farmers.

The chapter also presented letters of appreciation to Paul Getz, Kutztown, and Helenirene Blefgen, Sinking Spring.

Dean Bruno, the star of the awards presentation also received the district award

Hat fashions program presented

BY LAUREL SHAEFFER
Staff Correspondent

LEESPORT — Dedicating a day for themselves, the Berks County Farmer's Assn. womens committee held their annual Ladies Day Out, March 19 at the Berks County Agricultural Center.

Highlighting the program were Catharine Schieferstein, who presented a program entitled "Where did you get, that Hat," and Sally Rubright, who presented a fashion show by Queen's Way Fashions. Schieferstein's act was a mixture of song and comedy centered on hat fashions, past and present.

Laura Miller, daughter of Mr. and Mrs. Robert Miller, R 2 Bernville, spoke to the large audience about her involvement in FFA and how she was selected to attend a youth conference sponsored by the women's committee.

Other events included a presentation by Debbie and Arlan Davis, Richland, past talent contest winners in religious singing, and a brief explanation by Pennsylvania Farmer's Association Regional Organizational Director, Ed Taczanowski concerning his duties and responsibilities to the organization.

Debbie Sunday, Berks County Dairy Princess was also on hand during the day long event.

Chairlady Glenna Hix reminded the many women present of upcoming events. These included a Farm-City Festival, April 30, the Ag Expo scheduled for the Berkshire Mall June 16 - 21, and a farm safety field day in July.

Good Nutrition

One serving of cooked mustard greens has only 16 calories but provides 91 percent of the vitamin A, 74 percent of the vitamin C and 12 percent of the calcium in the suggested daily adult nutritional requirements

Guest speaker, Catharine Shieferstein, Bernville, modeled hats for the group.

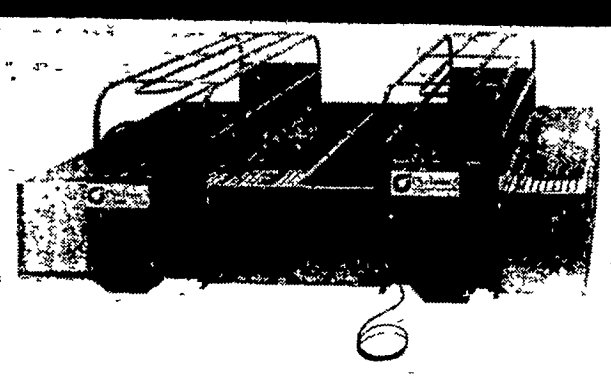
Are You Ready To Go Whole Hog?

Cyclone-

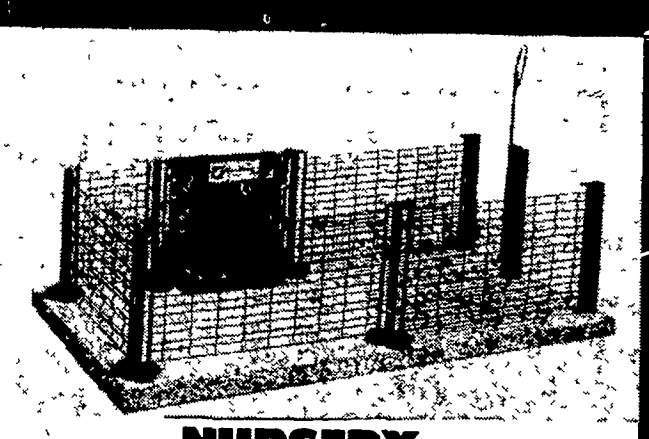
• Breeding • Gestation • Farrowing
• Nursery • Growing • Finishing

Profitable hog systems don't just happen . . . at Cyclone they are the result of the continuing program of field tests and product improvement initiated in 1961. Cyclone service includes helping you plan the type of system that can increase your production profit by reducing your labor requirements and costs . . . whether it is a complete system you are planning or merely components you require contact Hershey Equipment Co. for complete package information including equipment, plumbing, electrical & building.

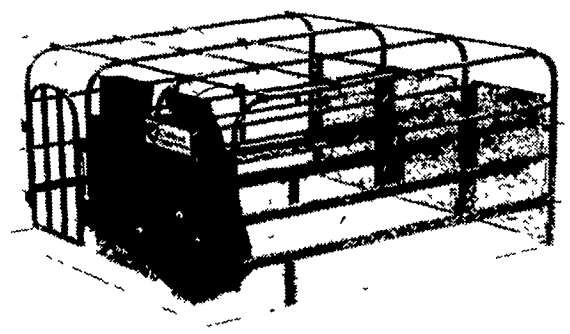
Let Us Help You Put The Pieces Together



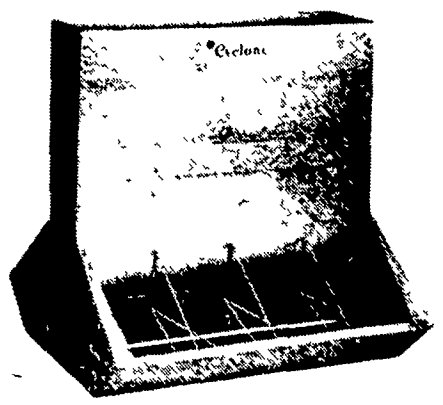
FARROWING
• CYCLONE Farrowing Systems — they will lower your hog mortality, increase profits.



NURSERY
• CYCLONE Nursery Systems — provide the ideal environment for faster growth.



GESTATION
• CYCLONE Gestation Systems — allows controlled feeding makes your feed dollar do more for you.



FINISHING
• CYCLONE Finishing Systems — you finish your hogs with less feed per pound of gain.

Eastern 4-H Dairy Club tops Franklin County clubs

CHAMBERSBURG — The Eastern 4-H Dairy Cub here in Franklin County secured the 1980 Franklin County 4-H Dairy Bowl senior team championship from defending champions Greencastle-Antrim 4-H Dairy Club.

The championship contest was held at the Franklin County Extension Office, Franklin Farm Lane, Chambersburg, last Thursday.

In the final three-round contest, Eastern 4-H Dairy Club members — Cindy Donough, Chambersburg; Kelly Cordell, Chambersburg; and Jesse Reichard, Waynesboro — won a 150 to 80 victory over Greencastle-Antrim 4-H Dairy team members — Alan Meyers, Greencastle; Keith Grove, Greencastle; and Doug Martin, Chambersburg.

In the junior team dairy bowl competition Greencastle-Antrim 4-H Dairy Club members — Lori Harshman, R4 Greencastle; Ronnie Harshman, R4 Greencastle; and Lori Gsell, Marion — won a 205 to 185 championship victory over Northern 4-H Dairy Club members — Rodney Meyers, Chambersburg; Dale Mummert, Chambersburg; and Beverly Meyers, Chambersburg.

Ten teams competed in the 1980 Franklin County 4-H Dairy Bowl Contest which is in its sixth year of existence.

The junior and senor first place teams have their

Montgomery DHIA to adjust testing fees

NORRISTOWN — Because of general inflation and increased travel costs, the Montgomery Dairy Herd Improvement Association is increasing its testing fees to farmers starting with the April tests.

Effective April 1, regular DHIA testing will cost a minimum of $38 plus 35 cents per cow up to 64 cows. Farmers with 65 or more cows will pay 94 cents.

The Association will receive 33 cents per cow. The supervisor gets the balance.

On mono testing programs the fee will be a minimum of $20 plus 35 cents per cow up to 41 cows. Farmers with over 41 cows will be charged [illegible] cents per cow.

For owner-sampler, the fee will be a minimum of $10 plus 35 cents per cow up to 32 cows Over 32 cows, the fee will be 65 cents per cow.

Both the mono testing and the owner-sampler fees will be split in the same way as the regular DHIA program

The Montgomery DHIA will have no change in meter fees. The life history sheets will remain at a nickel each

At its meeting last Friday, the DHIA elected new officers.

New President is Wallace Derstein. Vice president is David Longacre. Secretary-treasurer is Durrell Alderfer.

The annual DHIA banquet will be held November 15 at at the Christopher Dock School.

New strawberry variety promises delicious yield

COLLEGE PARK, Md — This spring, strawberry lovers can look forward to Scott, a new disease-resistant, late-midseason strawberry variety that is now available to home gardeners and commercial growers throughout the eastern half of the United States It is being featured in several mail order catalogs

The new variety was developed by the Science and Education Administration of the US Department of Agriculture in cooperation with the Maryland Agricultural Experiment Station, headquartered at the University of Maryland in College Park

It was named after Donald H. Scott, former small fruit investigator for the USDA. Now retired, Scott obtained his Ph D in horticulture at the University of Maryland

He has received international acclaim for his work in small fruit production, having been awarded two gold medals and a special citation from three Italian fruit growers associations.

The Scott variety resulted from the 1969 cross of Sunrise and Tioga. In 1971 the Scott berry was selected for further testing. And in March 1979 the new variety was released to commercial nurserymen.

The fruit is large in size, deep red in color, with firm flesh and skin that resists bruising The berries are good for freezing and are comparable to the Guardian variety, although the Scott is somewhat smoother in appearance and milder in taste.

Scott berries are extremely vigorous, producing as much as 25 percent more fruit per acre than the Guardian variety. The Scott is also resistant to five types of red stele root rot, and it has partial resistance to verticillium wilt Foliage is resistant to leaf scorch and powdery mildew

Scott has been evaluated at several locations in the eastern and central United States and is recommended for soils where red stele root rot may be a problem It appears to be widely adapted in Pennsylvania, Maryland, New York and Ohio

Winning first place junior team in the 1980 Franklin County 4-H Dairy Bowl Contest was Greencastle-Antrim Dairy Club. Team members are from left to right: Lori Harshman, Rt. 4 Greencastle; and Lori Gsell, Marion. Missing from the photo is Ronnie Harshman, Rt. 4 Greencastle

Eastern 4-H

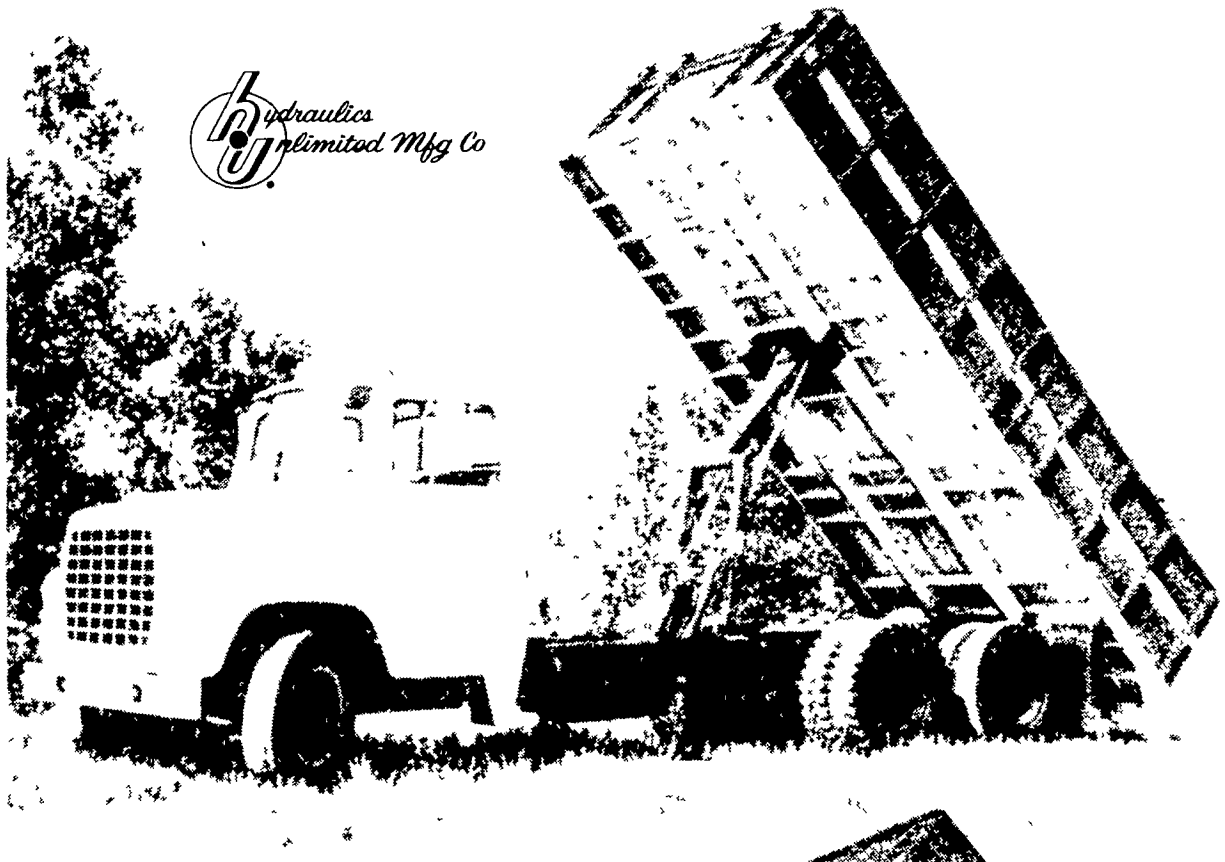
(Continued from Page B4)

clubs' name engraved on a plaque displayed at the Franklin County Extension Office, Chambersburg.

Four-H club leaders of the winning teams are: Eastern Dairy — Edgar Reichard and Dennis Crider; Greencastle-Antrim Dairy — Richard Harshman, Garry Harshman and Richard Crider.

HARSH® HOIST

Why buy a copy... when you can have the original ?



- Thirty years as the leader in hoist design and research makes HARSH® the name to be trusted in hydraulic hoists
- Unique telescopic scissor hoist
- Models available to fit 12-26 ft bodies
- The one-piece Rigid-Lift® hoist weighs less and is stronger than the competition's "add-on" unit
- HARSH's one-piece unit is more quickly installed
- And best of all, the price of an original HARSH Rigid-Lift® hoist is less than that of a copy!

Kansas firm to receive $11.8 million for gasohol plant

WASHINGTON, D.C — Secretary of Agriculture Bob Bergland last Friday announced that Farmers Grain and Fuel Products, Inc., Liberal, Kans., has been tentatively approved to receive a plot loan guarantee of $11.8 million to help finance a six million gallon a year anhydrous alcohol plant.

The plant will produce alcohol suitable for blending with gasoline to make gasohol from grain sorghum. A cattle feedlot that will use all of the byproduct wet stillage generated by the distillery is an integral part of the project, Bergland said. There is also a facility for recovering byproduct carbon dioxide to sell to a neighboring meatpacking concern.

Bergland said this project is part of President Carter's renewable energy program, and that the plant can contribute significantly to achieving the President's 1981 fuel alcohol goal–500 million gallons of annual capacity.

"Obviously," Bergland said, "it would take only 83 plants of this size to achieve the President's goal Considering other larger plants on the drawing boards or already operating, I think we are going to make it. I'm pleased that USDA has other program resources it can contribute to the effort "

The Kansas project replaces one submitted by Midwest Solvents, Inc., but withdrawn at that firm's request several months ago

Bergland said the loan guarantee, authorized by the 1977 Food and Agriculture Act, will permit Farmers Grain and Fuel Products, Inc to begin ordering plant components and construction materials within a month. The plant should begin producing marketable anhydrous alcohol in May or June of 1981

Montgomery County 4-H ambassadors available

NORRISTOWN — Several Montgomery County 4-H'ers recently attended a 4-H Teen Ambassador Weekend in Leesport.

The purpose of the weekend was to prepare teens to tell the 4-H story to the public, such as civic and service clubs, PTA groups, and others.

Those attending the weekend were: Colleen Kinsky, Lansdale; Karen Waltermyer, Collegeville; Jeannie Underland, Philadelphia; Heidi Schempp, Lansdale; Dana Trumbauer, Hatboro; and Mary Pat McGann, Maple Glen.

According to County Agent Nancy Kadwill, these 4-H'ers and others are interested in sharing their 4-H experiences and programs with area groups. If your club is interested in a program on 4-H and youth work, please call the Montgomery County 4-H Office at 215/277-0574.

Kreider is Little Dutchmen's Star Farmer

BY SHEILA MILLER

ANNVILLE — Robert Kreider, son of Mr and Mrs Ben Kreider of R1 Annville, was selected as the Star Farmer for the Little Dutchman chapter of the Future Farmers of America

Kreider, who says everyone knows him as Bob, received his chapter's highest honors during the annual awards banquet held last Thursday evening at the Annville-Cleona High School.

Kreider has served as his chapter's president for the past two years, and was the chaplin during the 1977-78 school year. He received his Keystone Farmer Degree this past January

The A-C senior had to leave his seat many times until the evening's ceremonies were completed He received the chapter leadership medal, and was a member of the chapter's parliamentary procedures team that captured national honors.

Kreider's proficiency awards were in the poultry category His experience in the poultry industry comes from the fact that he lives on a farm that produces over a half million broilers every year. He also helps out with his parents grain operation, growing 300 acres of corn and wheat.

The recipient of the DeKalb Agricultural Award, Kreider plans to help out on the family farm for at least a year or so after graduation from high school

Another top-notch Little Dutchman received the Star Agribusiness honor Roland Maust, son of Francis and Lenore Maust of R4, Lebanon, was given the top chaper recognition for his accomplishments Maust, too, was a member of the parliamentary procedures team that brought home a fourth place national trophy

He received his proficiency medals in agricultural mechanics and agricultural sales and service Maust was awarded the DeKalb Agricultural Award in agribusiness

Maust is currently serving as his chapter's vice-president, and was last year's sentinel. He received the Eleanor Witmeyer Leadership Development Award at last year's award banquet, and was this year's first place tractor driving contest winner

The Little Dutchman Star Greenhand was Edward Hostetter, R2 Annville The A-C Freshman is the son of Mr and Mrs Eugene Hostetter

Hostetter also left the banquet with his hands full of awards. He received a medal for State FFA Band, along with an FFA creed contest plaque and one for the Greenhand contest.

The following is a list of other award recipients

Eleanor Witmeyer presents the Leadership Development Award, given in her honor, to Jeff Reigel, R2 Annville.

County Project Book
Blue Ribbon

Salesmanship Award

Donald Baer

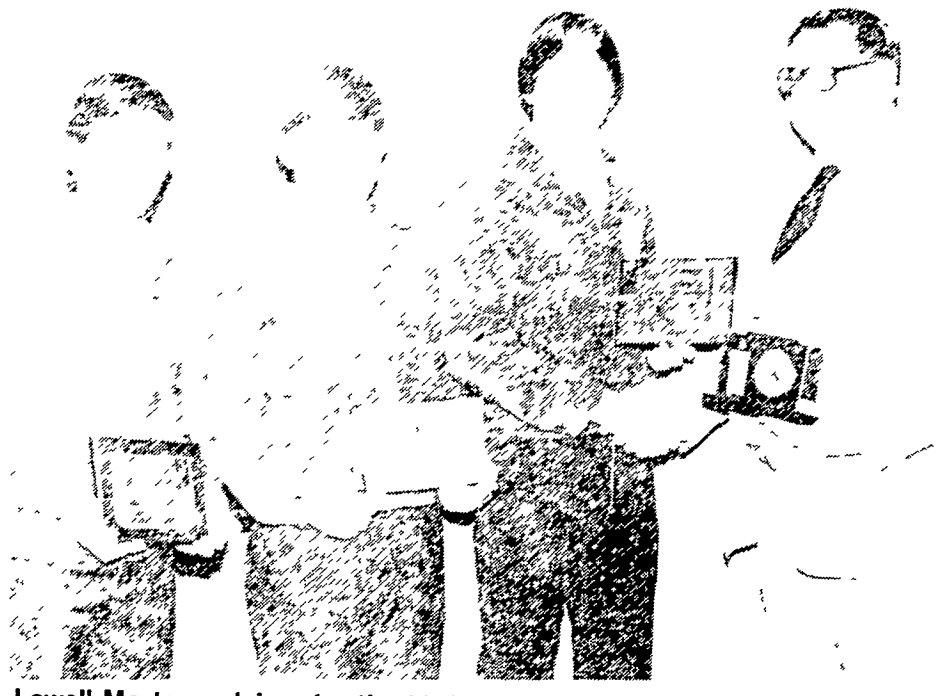
Proficiency Award

Roland Maust; Stuart Lemon, Dale Meyer; Dawn Dohner; Melodye Keller; Jeff Reigel; George Wilson; Henry Martin; Alan Graves; Kerry Mortin; Daryl Balmer; David Bomgardner; George Hoffman; Mike Fair; Joe Harvatine; Gary Mase; and Robert Kreider.

State Proficiency Award

Donald Brandt, R4 Lebanon.

Honorary FFA degrees were awarded to Clarence Mase; Mr. and Mrs. Harvey Bomgardner; Charles Bomgardner; Joan McCulloh; and Mr and Mrs. Ben Kreider.



Lowell Morton, advisor for the Little Dutchman FFA, right, awards the Star Chapter Farmer award to Bob Kreider. The Chapter's Star Greenhand is Ed Hostetter, far left, and the Star Agribusiness award went to Roland Maust.

Vitamin C can reduce cold symptoms

SOUTHAMPTON - Cold weather often means that flu or colds come by and stay awhile. While these problem ailments are hardly preventable this time of year, the severity of their symptoms can be lessened, according to Dairy Council Inc.

One way to lessen colds severity is by understanding the role vitamin C (ascorbic acid) plays in the protection of the body against infections.

This vitamin plays a primary part in the formation and maintenance of a substance called collagen, which binds body cells together. This substance is important for the growth and repair of body tissue cells, for health gums and blood, and for sound bones and teeth.

It is known to reduce colds symptoms by blocking the action of histamine.

However, there is insufficient scientific evidence to substantiate reports that large intakes of vitamin C will prevent the onset of colds.

Vitamin C, says Dairy Council, is a water-soluble vitamin and thus is not stored in the body. Amounts over and above that which are needed by the body are usually excreted. This is why good food sources of the vitamin need to be eaten each day

Because vitamin C is not stored in the body does not mean, however, that large doses will do twice the amount of good. On the contrary, excessive intake can have harmful affects on diabetics or cause the formation of kidney stones or diarrhea.

In order for foods containing vitamin C to retain their nutritive value, they should be used as soon as possible, kept refrigerated or frozen, and cooked quickly in small amounts of liquid or steamed

Some fruits and vegetables that contain appreciable amounts of vitamin C are oranges, grapefruit, broccoli, cantaloupe, strawberries, brussels sprouts, cauliflower, potatoes, tomatoes, green peppers, collards, spinach, and mangos.

It should be remembered that fruits and vegetables are only one of the Four Food Groups that are important for health and bodily vitality. Others are the milk group, the meat group, and the grain group.

An orange a day will not necessarily guarantee you a colds-free winter season. But daily use of vitamin C at recommended levels should make those colds a little easier to tolerate.

States asked to comment on examination

WASHINGTON, D.C. — State governments have a chance to say whether they would like to assume responsibility for examining federally-licensed warehouses and whether they want to take part in a model program for giving states that responsibility, a U.S. Department of Agriculture official said.

Barbara Lindemann Schlei, adminstrator of the USDA's Agricultural Marketing Service, said the agency also is seeking comments from farmers, warehouse operators, bankers, food processors, and other interested individuals and groups about how state assumption of the examination responsibility would affect them

USDA's Agricultural Marketing Service now examines federally-licensed warehouses under the U.S. Warehouse Act.

Schlei said farmers who store their goods in federally-licensed warehouses can get receipts showing that their goods are stored inside, and bankers accept these receipts as loan collateral.

USDA warehouse examiners check to see that commodities are properly graded and stored and that accurate records are kept. They also check to be sure the warehouse is free from mold, insects or excessive moisture that could damage commodities stored inside.

If the states assume responsibility for the examinations, state employees, instead of USDA employees, will examine warehouses under federal supervision and will use federal guidelines. The USDA would be responsible for issuing licenses and taking corrective action if any warehouses are found not complying with the regulations.

States interested in starting new warehouse examination programs also can request help from the USDA, Schlei said.

All comments, to be available for public inspection, should be sent to Orval Kerchner, Warehouse Division, Agricultural Marketing Service, USDA, Washington, D.C. 20250. Or, phone 202/447-3821. States and individuals have until May 12 to submit comments. Notice of the request for comments was published in the Federal Register March 12.

DE LAVAL™

MANURE SYSTEMS

Manure - Liability or Asset?

We have the equipment and experience to convert what is often a major liability into a valuable asset.

- Mechanically automated manure scraping equipment
- Transfer systems to move manure to storage or field
- Processing equipment to remove odors from stored manure
- Separators and dryers for easier handling and sale of finished manure products.

Let us convert your manure liability into a manure asset.

DAIRY EQUIPMENT

HERE ARE TWO FIRSTS FOR PENNSYLVANIA:

One, the first Satellite Challenge Feeder sold and installed on a Pennsylvania farm, and the first Challenge Feeder we have sold in Chester County, Pennsylvania.

This unique feeder is a compact assembly of two challenge feeders and the concentrate Storage bin - all in one package, which can be located in most feed lots without any further concrete work.

This unique feeder was installed on Mr. and Mrs. Richard Hoopes Farm at West Grove, Pennsylvania in December, 1979.

Mr. Hoopes states that this feeder is operating exactly as it is designed to do and he is sure that the cows like it very much from the usage it is getting. He can't verify how much more milk he is producing because he just started a new milking parlor in October and his cows need to get adjusted to all the new facilities.

He also is using the new DV 300 parlor model milker control in his parlor and is really sold on their performance.

Why not stop in at Mr. and Mrs. Hoopes farm and look over his new system and talk to them about their challenge feeder. He will be happy to talk about them.

We will be getting two more Satellite Challenge Feeders in stock in April - so if you are interested in this outstanding feeding mechanism that controls the amount of concentrate you want to feed your cows, just give us a call at 301-658-6923, and talk to any of our service personnel about your needs.

Ruth Akers patterns her days around 4-H activities

BY SUSAN KAUFFMAN
Staff Correspondent

As the end of the school year nears, and young people look toward a summer full of activities, many of the youth in the southern most portion of Lancaster County will plan work on various 4-H projects ranging from capons to table lamps. As with every youth centered activity, there are several dedicated adults who are willing to put time and talent into organizing and overseeing the activities. One such individual is Ruth Akers from Quarryville.

For the past seven years Ruth has been a 4-H leader in the sewing club and she has been Southern Lancaster County Community Club organizational leader for six of those years.

Over the last few Spring and Summer seasons Ruth has enrolled as many as over one hundred young people in the nine or ten projects offered by the community 4-H club. Sewing, cooking and crafts are the three most popular projects according to recent enrollment trends, Ruth pointed out.

Mrs. Akers has sewn not only for her family, but for many others for years, and her natural interest in sewing led her to help with the first sewing 4-H club seven years ago. The next year she undertook the time consuming task of organizing the various clubs, finding leaders and setting up community wide 4-H activities.

About one-hundred children and young adults from the ages of eight to nineteen turn out each Spring to learn more about a previously taken project or to learn about something entirely new to them.

The swine club will have a new leader this year, Richard Meyers. The capon and strawberry projects will be supervised as in recent years by Clyde Aument. Field corn and sweet corn projects will be under the direction of Dennis Allen, Kirkwood. Handiman club, a popular project involving wood-working skills, will have a twelve year minimum age limit so that the leader, John Ramsey, can handle the workload and scheduling without devoting several nights out of each week to the 4-H projects. Ruth says she is working hard to find someone in the area who has tools and interest in woodworking with younger children so that the ones who are looking forward to taking the handiman project and are less than twelve years old will not be disappointed.

Cake decorating was a new project for the Solanco Community Club last year when Ruth recruited two women – Eleanor DeLong and Vickie LeFever – to take the club. Eleanor has the club meet at her home with Vicki assisting her. This club also has a twelve year age minimum.

Crafts, a popular project at present, will be conducted by Labertha Tindall again this year. Donna Kreider will again work with the cooking projects. The sewing club, which generally includes over fifty girls will be in Ruth's hands as she is assisted by fourteen helpers. The first year sewers make hand sewn projects such as slippers and ponchos from wash cloths and ready-made dry goods using basic joining techniques. They also learn to sew on three kinds of buttons.

The second year projects are patchwork skirts with zippers. Third year sewers make sleeveless dress or jumpers with facings. Fourth year projects include set-in sleeves and fifth through seventh year projects may be whatever the member wishes to select with supervision from the leader.

The first year girls meet at the high school to sew on machines in the home economics department under the supervision of several helpers and Ruth. The older girls often meet in the homes of helpers to complete their projects before club round-up and judging in August. The girls are encouraged to participate in County Dress Revue that month in addition to having their garments judged within the community club.

Ruth explained that the Solanco Club should probably be split into two clubs. The group now covers a large geographical territory ranging from Willow Street south to the Maryland Line and east to Kirkwood. Having a smaller group of members to work with at a time would benefit the individual member, Ruth added.

Her involvement in 4-H in the past few years has given her the opportunity to see several changes occuring in the community. First Ruth finds that, although there has been a considerable amount of residential building and many people have moved into the area who are not farm families, these families and their children are not seeking out 4-H projects. Occasionally, she says, a parent will call her who has been in the area for a year or two and inquire about a 4-H project for his or her child, but not very many do.

One aspect of the economy, the rising cost in gas, may be a noticeable factor in 4-H as well as other organizations' participation. "Parents are not taking their children everywhere the way they did at one time. They stay home more now than before," she explained. If the community club were divided into two clubs, the distance members would have to travel could be decreased, she reasoned.

Perhaps because of the increased costs of transportation, Ruth suspects that the decline in activity participation has resulted. "At one time we held club meeting from March through to Christmas," she said. "Last year we planned roller skating parties, swimming parties at the Legion Park Pool, and a picnic for the family. The attendance was so disappointing at all these functions that we are seriously considering holding only one or two community club functions this year," she stated.

When talking with extension leader Nancy Meyers, she found that the Solanco Club was not alone in this respect. A trend seems to have developed where parents are much more restrictive in all the "running" that they were accustomed to doing in the past.

A primary concern that Ruth has is the need for more adults to take part in the leadership roles. "We could offer more clubs and handle many more children if we just had more leaders," she lamented. "I'd especially like to find someone who is interested in being a leader who has been a 4-H member herself," Ruth explained. "They already know what the program is all about. I did not go to 4-H when I was young so it was all new to me," she added.

One leader who was schooled in the 4-H program as a young person and who is interested in carrying on its traditions and principles for the present members is Sharon Kleinz, Little Britain. Next year she will be the community club organizational leader. Ruth will continue as the sewing club leader and turn the organizing over to Sharon. Ruth explains, "It takes a lot of time on the phone getting new helpers and leaders each year and talking things over with Nancy Meyers, the extension agent."

This year the beginning night for the community club will include displays of the various club projects and allow time for parents and members to ask questions about the projects and to then select the one or ones they wish to complete this Summer. "If the parents back the members it works better," Ruth said. Without adult leaders and parent interest and support the 4-H program would be far less effective.

Ruth is the wife of Curt Akers, mother of three girls and one son now married and working with his father on their dairy farm near Mechanic Grove south of Quarryville. While the children were little, Ruth said she stayed at home on the farm and took care of the children and helped with the work. After the children were older and all but the youngest out of elementary school, Ruth started working with the 4-H program in addition to supporting the programs, especially musical, in her church.

She joined the Farm Women Society #31 and has in the past few years been increasingly more involved with Inter-State Milk Producers' functions since her husband was elected director. She also works with the Solanco Fair Association in the sewing judging and display department. She sees 4-H as a way to teach basic skills, leadership and responsibility to all young people not just those from farm families

Ruth has always enjoyed sewing, not only for her family which includes three daughters and one son, but also for many other people in the Quarryville area. Her natural talent in sewing led her to help as a leader for the sewing project when the club began seven years ago. The next year she became organizational leader, a job she has done for the last six years.

Her job as sewing leader keeps Ruth busy on the phone.

As part of her job as club reorganizational leader, Ruth spends lots of time at her desk.

Ladies Have You Heard?

By Susan Doyle

Lancaster Home Economist

CHECK ON TURKEY

Check on turkey prices if you're really interested in saving money on the meat bill. Turkey supplies during March are expected to be 35 to 40 percent above a year ago. While much of the increased supply will go into further processed turkey products, you should be able to find whole turkeys of all sizes, plus turkey parts such as drumsticks, breasts, wings and boned rolled roasts.

If you can't use a whole turkey at one time (even a small 10 to 12 pound size) ask someone in the meat department to saw the bird in half. Then cook the halves as you would a whole turkey with the flat side down. You'll be saving money as well as providing meat for more than one meal even when you roast a half.

Most homemakers realize that the number of pounds of meat they buy and the number of pounds of meat they can actually eat are often quite different. Comparing the price per pound of boneless cuts of meat is another way of comparing value. A 12 to 13 pound oven-ready turkey has a yield of about 66 percent meat, not including the neck, tail, outer two wing sections and giblets. If a turkey costs 59 cents a pound, as some do presently, the cost of the meat is 89 cents a pound. (66 percent of 12 pounds is 7.9 pounds. Divide this into the total price of the turkey, 59 cents x 12 lb. = $7.08 — 7.9 lbs. = 89 cents a pound). This price compares with boneless beef cuts ranging in price from $1.69 to $1.99 a pound.

But price is not the only reason for buying and using turkey. Turkey is an excellent choice for anyone who has a weight or diet problem. The meat of roasted turkey, as a whole, ranks higher in protein and lower in cholesterol than other cooked meats. Turkey meat is also lower in calories than most other meats.

Some consumers are concerned that a frozen turkey that has been in storage a couple of months may have lost something in quality. If the turkey has been handled properly the quality can be as good as a fresh turkey. In today's commercial poultry processing plants the birds are chilled rapidly after slaughter. Freezing is completed in a blast freezer at twenty degrees below zero which means the freshness is quickly frozen in. That's why a frozen turkey is just as good as a fresh one.

SELECTING A MOBILE HOME

A prospective mobile home buyer should look for certain construction features before making a choice, says Joseph L. Wysocki, Extension family housing specialist at Penn State.

Brands and models of mobile homes differ in stud spacing, number of beams, duct size and locations, and insulation. As a rule, the more you pay for a mobile home, the more you get in terms of quality features. Ask mobile home dealers for a list of construction details to justify the extra cost of a high priced unit.

The new mobile home buyer should look for the label of an authorized inspection agency certifying that Federal mobile home construction and safety standards have been met.

It is wise to choose an energy-efficient mobile home to cut down on heating and cooling requirements. Check the inside of the unit for the amount of insulation, furnace size, duct and thermostate locations, ventilation patterns, and ability to close off areas within the home. Also look for features such as storm doors and windows, and weather stripping.

On the outside, use of shade, wind breaks, roof covers, and light or dark colors can affect the performance of a heating or cooling system. Skirting the home conserves heat, and shading windows and roofs lowers inside summer temperatures.

Choose a floor plan that is suitable to your way of living. Consider the traffic pattern, storage space and lighting.

To save lives and property, it is important to anchor the mobile home adequately to the ground. Federal standards require manufacturers of all new mobile homes to provide for the attachment of an anchor system and to include instructions for installing the system.

The mobile home owner is usually responsible for providing some anchoring equipment and having it installed. Some anchoring may be furnished by the mobile home park owner.

Hunterdon Beekeepers 4-H Club is humming

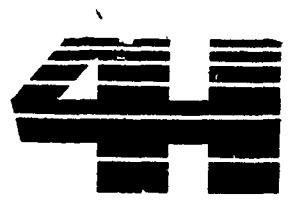
FLEMINGTON, N.J. — The Hunterdon County Beekeepers 4-H Club met recently at the Ditson residence in Bethlehem Township.

The American Beekeeping Essay Contest and the Bee Tree at Miller's were discussed by the members. A demonstration was given by Mr. Ditson on gadgetry.

Ditson showed the members different gadgets used in beekeeping, and taught them how to use each item.

A demonstration on various feeding methods for bees in the spring was also given. After the demonstration, the members finished the bee hive on which they have been working for the past few months.

The next meeting is set for April 19 at the Goeller home, Hampton. Reported by Richie Roberts.



Recipe Swap

You readers are really going to clean up this week!

Today's feature is a duo of soap recipes to experiment with. So get the lard out and see how these recipes wash.

SOAP

25 pounds of lard or tallow
5 pounds of caustic soda
3 12-quart buckets rain water

Heat water to boiling and add the caustic soda. Do not add all at once as it will splash up over the kettle. When dissolved, add the lard. Boil 2 to 3 hours and add one handful of salt. Borax, color or perfume may be added at this time. Cool in kettle overnight. Cut into pieces in the morning. Be sure to use rain water, as pure water does the best job and allows for a mild soap.

Amos Nolt

BOILED HOMEMADE SOAP

36 pounds grease (old lard, ham scraps, crackling and tallow can be used)
8 13-ounce cans lye
3-10 buckets of water
1 quart salt

Put water in an iron kettle and heat until warm. Add grease and stir in water thoroughly. A very slow fire is needed or the mixture will boil over.

Add 4 cans of lye and bring to a simmer or slow boil and continue until scraps are dissolved, approximately 2 hours. Add 4 more cans of lye individually during cooking.

Cold water may be added anytime during cooking if needed to keep from boiling over.

Mix thoroughly 1 quart salt when scraps are dissolved.

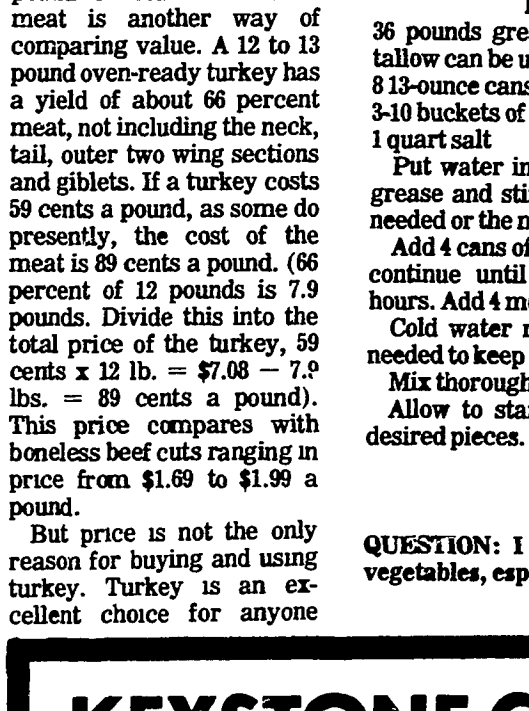
Allow to stand until cold and hard and cut into the desired pieces.

Annetta Martin, Fleetwood

QUESTION: I would like some good diabetic ideas for vegetables, especially green beans, carrots and peas.

Betty Hikes, York Springs

KEYSTONE COAL FIRED WATER HEATING STOVES



Stove is 32" high - 16" diameter. 6" flue comes out of top and feed door on top, Water jacket is made of ¼" steel and coated inside so the water don't get rusty. 5" brick ring and ash pit and 3 fine mesh grates are made of cast iron.

These heaters can be depended on to furnish a constant supply of domestic hot water at a minimum of attention and fuel cost.

Population goes up, milk consumption drops

LANCASTER — By the ides of March in 1980, the world population reached 4.5 billion people with 220 million living in the United States. According to the United Nations and the U.S. Bureau of the Census, it took mankind more than a million years to reach the one billion population mark. But the second billion took only 120 years, the third billion, 32 years, and the fourth billion, 15 years.

The means that 172 persons per minute are added to the world population or 90 million people every year. The rate of increase reflects the number of births minus the number of deaths.

However, while the people meter keeps running, what has happened to per capita consumption of fluid milk?

But per capita consumption of fluid milk in the United States was 11.214 ounces per day in 1965 and estimated at 10.204 ounces for 1979. During the past 15 years, this means a per capita loss of one ounce of fluid milk per day for every American.

That translates into a 1.40 glasses of milk per American per day in 1965 versus an estimated 1.28 glasses in 1979.

What has the efficient dairy industry been doing since 1965?

More with less might be the answer. In 1965, American dairy farmers milked 14.9 million cows with an average annual production per cow of 8305 pounds of milk. By 1979, 10.7 million cows produced almost as much milk by increasing per cow production to 11,471 pounds per year. That means 28 percent fewer cows and each produced 27 percent more milk.

Dairy industry people have a vested interest in fluid milk sales. There's nothing wrong with that. If they don't speak up for dairy products, who will? Other people don't want to be bothered or get involved.

But the industry can't do it alone. Besides there's nothing lonelier than a solitary drinker. So when you lean on the milk bar, buy a round for the crowd. Or set your sights on one other person to help you maintain milk consumption. If we all do that, we'll soon run out of people and fluid milk sales will soar.

Ida's Notebook

Ida Risser

Cindy has her drivers license. The first evening when she asked for the car to go to band practice, her father said, "This must surely be some kind of milestone." Here was our youngest of six children taking the family car and leaving her parents alone in a quiet house.

We have been very lucky in that all of our children have been careful drivers (as far as we know) because they realized the importance of safety and the consequences of an accident. When Cindy went to take her test, we heard a man tell a story of reckless driving, in front of his son, and loud enough for the small roomful of people to hear.

He said that he got arrested for driving 90 miles an hour on his way home from taking his test many years ago. And, he went on to say that after having several accidents connected with fast driving his father finally carried out his threat and sold his car. Was that a good example for his son?

Getting my own license was a traumatic experience for me as my instructor was an impatient father. I suppose I was a slow learner in the 1931 blue Chevrolet but he made me so nervous that thinking straight was impossible. How much better it is to have a trained Driver Education teacher as an instructor.

When I failed my test the first time, my parents were so very ashamed of me that I was quite miserable for days.

This is a busy time for me as the 4-H Club should be organized, the garden planted and on top of all of that my mother is moving to a retirement community. So her large house will have to be emptied. And, all of her life she was a saver of everything possible.

So weeks and weeks of hard work are ahead of me. I should be very grateful that Cindy has gotten her license at this time and can help with the driving.

F.W.S. Calendar

Today, March 29

Lancaster Co. Society 5 meets at the home of Elizabeth Hottenstein. Robert Turner will present a program on prison ministry.

Tuesday, April 1

Lancaster Co. Society 27 will hold a craft night at 7:30 p.m. at Stauffer's of Kissel Hill.

Thursday, April 3

Lancaster Co. Society 17 will hold a progressive meal.

Lancaster Co. Society 20 will entertain Society 11 at the Quarryville Memorial Methodist Church.

Saturday, April 5

Lancaster Co. Society 10 meets at 1:30 p.m.

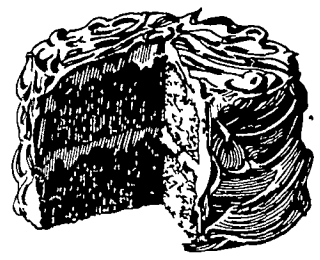
Home On The Range



Make ham the centerpiece of your Easter meal

In grandma's day, colored eggs and chocolate nests were hungrily pursued to the heady aroma of a big ham in the oven.

Long before the kids began the search for their Easter bunny fare, grandma was up and had placed the giant ham in the oven. Then she opened up the big table, adding ten or twelve boards, and carried all the chairs down from guest rooms and storage. Next she spread the white tablecloth over the long table and gathering the family's best china from the jelly cupboard, set the table for the noon feast.

While many of us still enact this scene each Easter morning, times have changed and smaller family units frequently dine with less bother. Nevertheless, when people think of Easter and food, they think of ham. Here then, in plenty of time for the big day, we have ham recipes galore.

Just in case you're serving that big meal, we've offered a super recipe for a whole baked ham. And if more variety is your game, we have several different recipes for ham loaf as well as dishes that use the leftover ham.

So take a look at our recipes, then head for your local grocery store and get your ham, Sam.

BAKED HAM

1 whole ham
1 can peach halves
1 can pineapple slices
1 small jar peach jelly
1 pound light brown sugar

In an open pan at 325° F., roast the whole ham. Use the following table as a guide:

8 to 10 pounds	2¼-2½ hours
10 to 12 pounds	2½-3 hours
12-15 pounds	3-3½ hours
15-18 pounds	3½-4 hours
18-22 pounds	4-4¾ hours

When ham has ½ hour left to cook, remove from oven. Score the fat with criss-crossing cuts using a sharp knife.

In a bowl, combine the jelly, brown sugar, and enough peach juice to make a thick sauce. Pour half the mixture over the scored ham. Arrange peach slices and pineapple over the ham and coat with the remaining mixture. Return to the oven and bake at 400° F. for 30 minutes.

HAM BALLS

2 pounds ground ham
2 pounds ground pork or chicken
2 cups cornflake crumbs
2 cups milk
2 tablespoons dry mustard
4 eggs

Mix well and shape into balls. Use ⅓ cup for each ball. Glaze if desired with the following:
2 cups light brown sugar
2 tablespoons dry mustard
½ cup vinegar

Heat and spoon over ham balls. Cover and bake for 30 minutes at 350° F. oven. Baste with glaze during baking and uncover and bake for an additional 30 minutes.

Mrs. Amos Horning, East Earl

SCALLOPED HAM

1½ cups ground ham
½ cup ham broth
2 cups cracker crumbs
2 eggs, beaten
3 cups milk
1 tablespoon butter
1 teaspoon salt
dash of pepper

Brown ham and cook until tender, then grind. Line bottom of casserole with layer of cracker crumbs, then a layer of half of the ground ham and repeat the process until all the ham is used. Mix the milk, seasonings and eggs and pour over the meat. Top all with cracker crumbs and dot the top with butter. Bake at 375° F. for 30 minutes or until done.

Mrs. Henry B. Yoder, Kirkwood

HAM SALAD SANDWICHES

2 cups ground, cooked ham
3 stalks celery
1 large dill pickle
¼ teaspoon dry mustard
¼ teaspoon onion powder
½ cup mayonnaise
½ teaspoon salt
1 tablespoon lemon juice

Put ham, celery and pickle through the coarse blade of a food chopper. Add remaining ingredients and mix.

Mrs. Henry Yoder, Kirkwood

HAM LOAF

1½ pounds ground ham
1½ pounds ground pork
1½ pounds dry bread crumbs
1½ cups milk
2 eggs beaten

Mix ingredients together well. Shape into a loaf in a pan and bake for 2 hours at 250° F.

Mrs. Daniel Weaver, Boiling Springs

GOOD HAM SOUP

½ cup leftover chopped ham (more may be added)
2 tablespoons chopped onions
2 cups diced raw potatoes
2 cups diced raw carrots
2 cups corn
2 cups water
1½ teaspoons salt
pepper to suit taste

Cook all together until soft, then add 4 cups milk and 2 tablespoons butter Heat and serve.

Anna Z. Nolt, New Holland

HAM LOAF

2 pounds ground ham
1 pound ground veal
2 cups soft bread cubes
¼ cup chopped onion
¼ cup chopped green pepper
½ teaspoon salt
dash of pepper
dash of ground cloves
½ teaspoon Worcestershire sauce (optional)
1 10½-ounce can condensed cream of celery soup
2 eggs, beaten

Mix ingredients thoroughly. Place in a 9x4 inch loaf pan. Bake at 350° F. for 1¼ hours. Makes 8 servings.

Mrs. Carl S. Bacon, Felton

GRANNY RUSSELL'S HAM QUICHE

1 pastry shell, unbaked
2 tablespoons butter
diced onion, celery and green pepper to taste
2 tablespoons flour
dash of nutmeg
1½ cups milk
4 ounces shredded swiss cheese
3 beaten eggs
1 cup diced ham

Melt butter. Cook onion, celery and pepper until tender. Mix in flour and nutmeg. Add milk all at once. Cook until thick. Add cheese and stir until melted. Pour this mixture into beaten eggs. Return whole mixture to a fry pan. Add the ham and mix thoroughly. Pour into the pie shell. Bake at 375° F. for 20-25 minutes.

B. Russell, Pine Bush, N.Y.

HAM LOAF

1½ pounds ground ham
1½ pounds fresh ground pork
2 eggs
1 cup milk
1 cup bread crumbs
salt and pepper to taste

Combine all ingredients and shape into a loaf in a pan Make a sauce as follows:
½ cup water
½ cup vinegar
1½ cups brown sugar
1 teaspoon dry mustard

Cook sauce ingredients and pour over the ham loaf. Bake at 350° F. for 1½ hours.

(Continued from Page C6)

SAUCY HAM AND POTATO BAKE

2 tablespoons chopped onion
¼ cup butter or margarine
¼ cup flour
1 teaspoon salt
½ teaspoon dry mustard
dash of pepper
1½ cups milk
2 cups shredded cheddar cheese or any kind of cheese you desire
½ pound of ham cut into thin slices
6 cups cooked potato slices

Saute onion in margarine. Blend in flour and seasonings. Gradually add milk, cook, stirring constantly until thickened Add 1½ cups cheese; stir until melted. Toss potatoes in cheese sauce. Pour into 2-quart greased casserole, reserving 1 cup potato slices. Arrange ham and remaining potato slices on top of casserole. Bake at 350° F. for about 30 minutes. Top with remaining cheese. Makes 6 servings.

Carol Williams, Lake Ariel

UPSIDE-DOWN HAM LOAF

2 tablespoons butter
¼ cup brown sugar, firmly packed
1 can (20 ounces) pineapple chunks, drained
4 cups ground ham
1 cup ground beef
1 cup ground pork
1 cup bread crumbs
½ cup milk
½ cup pineapple juice
2 eggs, slightly beaten
1 teaspoon mustard
1 tablespoon minced onion

Melt butter in bottom of the loaf pan. Sprinkle brown sugar over the butter and arrange pineapple chunks in the pan. Mix all remaining ingredients in a separate bowl and then pack over pineapple. Bake in 350° F. oven for 1½ hours Turn out on the serving platter. Serves ten.

Ruth Halteman, Clearspring, Md.

HAM CROQUETTES

3 tablespoons butter
¼ cup flour
¾ cup milk

Combine the above ingredients in a saucepan and cook, stirring until thick and bubbly. Boil 1 minute, stirring constantly. Remove from heat and add:
2 cups coarsely ground cooked ham
1 teaspoon grated onion
2 teaspoons prepared mustard

Blend well. Chill and shape mixture into 8 to 10 balls. Roll in ¾ cup fine dry bread crumbs. Shape into cones, handling lightly. Dip into mixture of 1 beaten egg and 2 tablespoons of water. Roll in crumbs again. Fry in deep hot fat (365° F) for 1½ to 2 minutes, until heated through. Drain. Serves 4-5. Serve with Creamy Egg Sauce, below.

Creamy Egg Sauce

2 tablespoons butter
2 tablespoons flour
¼ teaspoon salt
dash of white pepper
1 cup milk

Melt butter, blend in flour and add seasoning. Add the milk and cook, stirring until mixture is thick and bubbly Add 1 hard-cooked egg, chopped. Makes 1¼ cups of sauce.

Ruth Halteman, Clearspring, Md.

HAM LOAF

3 cups minced cooked ham
1 small onion
1 teaspoon dried parsley
2 eggs, well beaten
¼ teaspoon pepper
1 tablespoon prepared mustard
½ cup dried bread crumbs
1 cup milk

Put ham and onion through a food chopper. Add remaining ingredients and beat well. Pack into a greased loaf pan 10x2 inches. Bake 40 minutes at 350° F. Serves 6.

Ruth E. Ruoss, Blain

COUNTRY CASSEROLE

2 to 3 cups diced cooked ham
6 hard-cooked eggs, sliced
1 can condensed cream of celery soup
½ cup milk
2 cups grated sharp American cheese
2 teaspoons Worcestershire sauce
5 to 6 drops Tabasco
¾ cup dry medium bread crumbs
3 tablespoons melted butter or margarine

In a 2 quart casserole, alternate layers of ham and egg, starting and ending with ham. Combine soup and milk; add cheese, Worcestershire and Tabasco. Heat, stirring, until cheese is melted. Pour sauce over layers in the dish. Mix crumbs and butter and sprinkle over the top. Bake uncovered at 375° F. about 25 minutes, or until heated through and crumbs are golden. If desired, trim with additional egg slices and a few sprigs of parsley just before serving. Makes 6 servings.

Syl Ruoss, Blain

Golden Fleece Sheep Club organizes

QUARRYVILLE — The Chester County Golden Fleece Sheep 4-H Club met recently at the home of William MacCauley.

The following officers were elected: Dave Lytle, president; Billy MacCauley, vice president; Steven Gontarz, treasurer; Nancy MacCauley, secretary; Samuel Holmes and Ernest Barrett, reporters; Joan MacCauley, Jerrie Gontarz and Donna Stoltzfus, adult leaders.

Making posters of the sheep projects for the Exton Mall display April 12-13 and for the club's poster contest, was discussed.

The Cecil County Fair, May 31, will have classes for showmanship and fitting and market lambs.

Club projects are sheep breeding and market lambs. The 4-H market lamb round-up will be November 4. The lambs will be judged at the MacCauley farm, then taken to Vintage Sales for the auction.

Fund raising items such as selling pens and having a cake sale were discussed.

The next meeting will be April 21, 7:30 p.m. This meeting will be held at the MacCauley farm. Anyone interested in information about the Golden Fleece Club, call 215/593-6521.

Farm Women Societies

Berks Co. Society 1

Berks Group 1 held their March meeting at the home of Ella Richard, Oley.

Mrs. Richard's grandson, Michael Williams, showed slides of his recent trip to Germany, Austria and Switzerland.

Marion Haas, reported that Pauline Hartman is confined to her home with a broken ankle. Get well cards can be mailed to Mrs. Pauline Hartman, R.D 1, Oley, Pa. 19535.

The following are dates to remember. April 17, Bingo at Berks Heim; May 7, tea at Berks Heim; and a picnic, June 8, at Berks Heim. The society county hoedown at Hamburg field house is April 19 and the Farm Women Spring Rally at York fair grounds is May 1.

Easter candy can be purchased from any member of group 1

Russell Haas of Oley, representing the Bank of Pennsylvania, will be the speaker at the next meeting to be held at the home of Grace Schaeffer, R1 Oley

Berks Co. Society 4

Berks Society 4 met at the home of Jeanine Franz, Boyertown.

The group donated $25 to help defray the medical expenses of Ricky Cooper, a ninth grade pupil at Daniel Boone High School, who has been ill for a year.

For the convention in October, members or their families are asked to submit a cover for the program booklet. Vegetables are to be the theme this year. A prize will be awarded to the winner.

Jeanine Franz presented a program on banking.

The April meeting will be held at the home of Linda Taylor, Palm

Berks Co. Society 6

Berks Group 6 met at the home of Mrs. Harold Snyder, Oley

A donation of fifty dollars was made to the Memorial Fund of Zion Spies Lutheran Church, Reading. And a donation was given to the Heart Fund.

Tickets were available for the County Hoedown on Saturday, April 19. Three door prizes and two cakes will be donated for the event.

The group will be serving at the refreshment stand at Oley, Friday, April 4, starting at 5 p.m.

The next meeting will be held at the home of Mary Youse, R2 Oley, on April 15. The speaker will be from Penn's Agri-Women.

Lancaster Co. Society 22

Lancaster Society 22 entertained Society 13 at the United Church of Christ, Willow Street.

After the luncheon, Peter Beaton, a native of Durbon, South Africa, gave a slide show of the life style of the native blacks and of the white population in South Africa

The American Cancer Society will hold its first Fashion Show May 1 at Landis Valley. Members were urged to fill vacancies in membership, as overall membership is down.

More help and prizes are needed for the Bingo party at Conestoga View

The next meeting will be held April 8 at Shady Maples. This is Craft Day and begins at 9 a.m.

Farm and Home Foundation to offer ag scholarships

LANCASTER — The Lancaster County Farm and Home Foundation is offering scholarship awards to encourage the higher education of the youth of Lancaster County.

Awards will be made for 1980 for study in the fields of agriculture, home economics, and nursing. Depending upon the financial need and ability of applicants, a maximum of 20 scholarships may be awarded.

Each scholarship will be for $750 and may be used to help defray tuition, fees, or room and board expenses at any accredited educational institution, which offers a course of study in agriculture, home economics or nursing.

Some of these Farm and Home Foundation Scholarships are earning from an Irrevocable Trust Fund set up by the late Elmer L. Esbenshade, one of the founders of the Lancaster County Farm and Home Foundation. The income frm this trust fund will be offered annually in the form of educational scholarships through the Farm and Home Foundation.

In addition, funds from the Foundation Treasury are also being used to help finance the scholarship program.

All Senior Guidance Counselors throughout the Lancaster County School Districts are being informed of these scholarships in order to get prospective boys and girls informed.

Interested youth are urged to contact their Senior Guidance Counselor for details and an application blank.

Additional information is also available from M.M. Smith, chairman of the scholarship committee, 1383 Arcadia Road, Lancaster, PA 17601. Phone 717/394-6851.

Application forms must be submitted by April 25, 1980.

Junior Cooking Edition

We're turning the tables, juniors. Today the first recipe is from us to you.

RECIPE FOR A SPRING DAY

Take one deep breath of warm air.
Add a whiff of daffodil.
Mix with the sight of geese returning home.
And bake all under a 50° F. sky.
Store lovingly in your memory for a rainy day.
Enjoy anytime.
Not fattening!

CREAMY WHAT AM I

2 cups leftover cooked oatmeal
2 apples (chopped)
1 cup cream (whipped)
½ cup sugar
1 teaspoon vanilla

Mix all the ingredients together and serve and ask your family, "What is it?"

Aaron Nolt, Age 5, New Holland

PEANUT BUTTER BONBONS

1 cup peanut butter
¼ cup oleo, softened
½ pound confectioners sugar (approximately 2 cups)
2 cups Rice Krispies
9 ounces semi-sweet chocolate
1 ounce (¼ bar) paraffin

Melt chocolate and paraffin in the top of a double boiler. Blend well.

Put peanut butter, oleo, sugar and cereal in a large mixing bowl. Squish your hands into it until the mixture is well blended. Form mixture into balls a little less than one inch in diameter.

Dip balls into chocolate mixture using tongs and place on wax paper to harden. If chocolate mixture becomes too hard to coat balls, set the top of the double boiler back over the bottom until the chocolate melts again.

Laura Lynam, Age 9, Monroeville, N.J.

ICE CREAM CAKE

½ cup Crisco
1½ cups powdered sugar
½ cup milk
½ cup cornstarch
1½ cups flour
2 teaspoons baking powder
2 teaspoons vanilla
6 egg whites

Sift flour once, measure. Add baking powder and cornstarch. Sift together three times. Cream shortening and add sugar gradually. Add flour and milk alternately. Add vanilla and fold in egg whites. Bake 20 minutes at 350° F. Makes 2 round layers.

Soften ice cream slightly and ice the first layer with ice cream. Gently place the second layer on top and add more ice cream to the top of the cake. Serve immediately.

Naomi Fisher, Age 11, Narvon

EASTER CANDY

2½ cups sugar
½ cup white corn syrup
½ cup cold water

Boil the above until the mixture forms a hard ball when a drop is placed in cold water.

Beat 2 egg whites and add to the cooked mixture. Beat until light, then add 1 cup shredded coconut and 1 cup chopped nuts to the mixture and fold in gently.

When the mixture is cool enough, mold into egg shapes using powdered sugar to coat your hands. Cover with melted semi-sweet chocolate.

Leon S. Martin, Age 10, New Holland

CURVIN'S FAVORITE TAFFY

2½ cups white sugar
1½ cups white corn syrup
1 teaspoon unflavored gelatin
½ cup sweet milk
1 teaspoon flavoring
½ inch cut from the narrow end of a bar of paraffin

Soften the gelatin in a cup with 2 tablespoons of cold water. Set aside. Combine sugar, syrup and milk in a sauce pan and bring to a rolling boil. Add gelatin and wax. Continue boiling to a very hard ball stage (265° F.). Pour into a greased container and place in snow or ice-water to cool. As the mixture begins to harden around the sides, fold it into the middle. Repeat this until it is cool enough to pull. Nail a hook in a cold place. Place candy on the hook and pull into a rope, twisting it as you pull. Rehook and pull longer each time, up to 12 to 15 feet. Continue to pull until the rope begins to break into threads. Remove from the hook, coil on a board dusted with powdered sugar. This candy should be made in cool weather only. For extra goodness, add crushed nuts just before pulling.

Curvin Zimmerman, Age 13, Fleetwood

MARKET CRACKERS

2 eggs
3 cups sugar
1½ cups lard
9 cups lard
10 tablespoons water
1 teaspoon cream of tartar
1 teaspoon soda
1 tablespoon vanilla

Mix, roll thin, and cut into squares. Bake at 350° F. When cool, put jelly or frosting between two crackers and paste them together.

Elizabeth M. Nolt, Age 6, New Holland

BREAKFAST SPECIAL

6 cups oatmeal
3 cups wheat germ
3 cups coconut
1½ cups brown sugar
½ cup melted butter
¾ teaspoon salt

Mix well and toast in a 200° F. oven for about 1 hour. Store in an air-tight container. Serve with milk.

Ada Mae Burkholder, Age 15, Kutztown

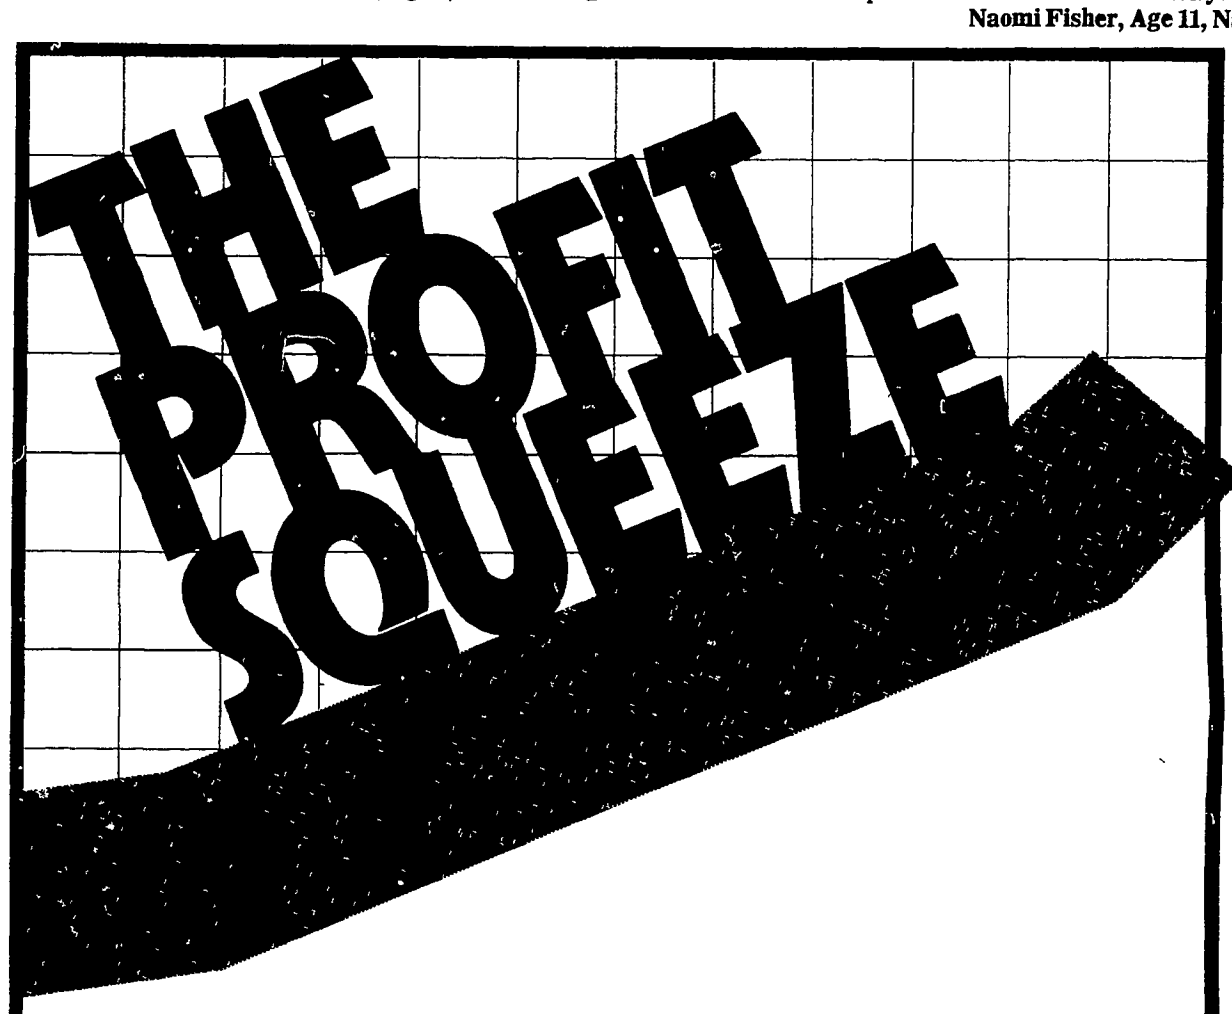
WATERGATE SALAD

1 9-ounce container Cool Whip
1 small box instant pistachio pudding
1 can crushed pineapple
1 cup miniature marshmallows
½ cup nuts

Fold dry pudding into Cool Whip, and add pineapple, nuts and marshmallows. Refrigerate until ready to eat.

Lucille M. Burkholder, Age 14, Kutztown

(Turn to Page C10)



NO.1 REASON FOR NO-TILL.

No matter how you slice it, No-Tillage farming is more economical than conventional farming and every bit as productive. The secret is a super-efficient herbicide called ORTHO Paraquat CL. It kills on contact with extraordinary speed and destroys an exceptionally broad spectrum of unwanted weeds and grasses.

After spraying with Paraquat and your recommended residual herbicide, you simply plant corn or soybeans right into the stubble of a preceeding crop. There is no tillage involved. You save time, labor, and since No-Till is a once across the field operation, significant fuel costs. For best results, apply Paraquat with ORTHO X-77® Spreader.

DANGER: Paraquat is highly toxic if swallowed and should be kept out of the reach of children. To prevent accidental ingestion, never transfer to food, drink or other containers. Read the label carefully and follow all directions, danger statements and worker safety rules. Restricted Use Pesticide. Use all chemicals only as directed.

Adam's countians concerned about USDA program redirection

BY RUTH ANN BENEDICT
Staff Correspondent

GETTYSBURG — Attracting some 50 concerned citizens, ranging from farmers to political figures, a Resource Conservation Act meeting was held in Gettysburg on Tuesday, March 11, 1980.

The RCA meeting, held at the Adams County National Bank on the Harrisburg Road, was a joint effort of the United States Department of Agriculture's local Soil Conservation Service and the Agricultural Stabilization and Conservation Service offices in Gettysburg

Glenn Miller, county director of ASCS and Timothy Hann, soil conservationist trainee of SCS presented a slide-tape presentation on RCA and addressed the questions and concerns of the group attending.

RCA, which was passed in 1977, addresses the serious resource conservation problems that have surfaced over the years and that have become threatening to non-federal land areas.

The Act focuses on seven resource areas, and also presents seven alternative strategies that could be used in achieving the conservation objectives.

The seven resource areas are: soil resource quantity and quality; water quality; water supply and conservation; fish and wildlife, habitat; upstream flood damages; energy conservation and production; related natural resources.

The seven alternative strategies accompanying these resource areas are redirect present programs, cross compliance; regional resource projects; state leadership; regulation, conservation performance bonus; and natural resource contracts.

By conducting local and regional RCA meetings the USDA can collect public feeling, both for and against the proposed strategies

RCA meetings are designed to generate and gather public input of concerned citizens on what the USDA is currently doing in resource conservation Are they doing what citizens feel they should be doing? — Are they meeting the needs and demands of today?

During the Gettysburg RCA meeting, a concern that was widely expressed was, why can't our present conservation programs work? Why must we redirect programs and fall back on alternative strategies?

RCA resource areas, objectives, and alternative strategies will roughly cost $3.9 billion to achieve.

Some of the RCA goals are as far as 50 years down the road to accomplishment.

The USDA is asking for public help on deciding which of the proposed strategies should be considered and developed for the Nation's soil and water conservation programs

Auctioneers to celebrate special week

LANCASTER — Auctioneer members of the National Auctioneers Association will observe National Auctioneers Week, April 6-12. Proclaimed by state governors and municipal officials, special National Auctioneers Week activities will also be sponsored by state auctioneer associations across the nation.

"By observing National Auctioneers Week," explains NAA president, Charles E. Cumberlin, "we're emphasizing the successful contribution that the auction method of selling makes to American business and industry The great variety of products and properties sold by auction demonstrates the potential of the auction method in today's marketplace."

The National Auctioneers Association, through its membership and affiliated state auctioneer associations, continues to improve the auction services and professionalism of its 6000 NAA members. Headquartered in Lincoln, Nebraska, the National Auctioneers Association offers member auctioneers educational seminars, auction skills workshops, and the Certified Auctioneer Institute at Indiana University.

"For the nation's farmers and ranchers in particular, the professional auctioneer will continue to provide a reliable market that serves both buyer and seller. Farm machinery, livestock, and farm land will continue to bring fair market value with the auction method."

During National Auctioneers Week, members of the National Auctioneers Association will participate in state and local promotions of "The Week" across America. Only NAA members are permitted to display the official emblem of the National Auctioneers Association.

PEANUT BUTTER BALLS

1 cup peanut butter
1 cup light corn syrup
1 cup instant dry milk
1 cup cookie crumbs (chocolate cookies with no filling are the best)

Place about 10 cookies in a clean plastic bag (a plastic bread bag works great). Crush the cookies with a rolling pin and set aside.

Mix peanut butter, corn syrup and dry milk crystals together thoroughly. Shape into balls about the size of a nickel. Roll balls in the cookie crumbs and place on a cookie sheet. Refrigerate about one hour to harden.

Resurrecting wood furniture takes true grit

BY SALLY BAIR
Staff Correspondent

LEBANON — "When in doubt, clean and condition first. You can't hurt furniture by cleaning and conditioning and it might save many hours of work," says Alletta Schadler, Lebanon County extension home economist

Speaking at a session designed to help people "resurrect" their old furniture, Letie advised participants to consider carefully before deciding to strip it and refinish it

In many cases, she said, the value is more when the old finish is cleaned than when furniture is stripped to the bare wood. "You have to decide what your purpose is," Letie said.

She pointed out that hot dry houses are hard on furniture finishes, and that putting a piece of furniture in storage for a time may also produce a haze on the finish Smokers contribute a film to furniture, and sudden changes in temperature from hot to cold also are harmful to wood furniture

She suggested that cleaning and conditioning a few times a year, followed by a paste wax will keep furniture in good condition

The cleaner conditioner recommended consists of one part gum turpentine to three parts boiled linseed oil, mixed in whatever quantity is convenient. She said the cleaner-conditioner can be mixed and stored indefinitely in a tightly covered jar

To use, the cleaner-conditioner must be poured over hot water. Letie used an electric tile to keep the water hot while working, but suggests that a coffee pot filled with water kept near the working site can be effective Pour the hot water in small amounts in a container, then add cleaner-conditioner. When the water cools, discard it and start with fresh hot water and more cleaner-conditioner. The turpentine-linseed oil mixture will float A soft cloth or very fine (0000) steel wool is dipped into the oil, then used to apply the mixture to the furniture surface

The turpentine is used for cleaning, and the linseed oil feeds the wood. Letie recommends working really hard with a soft cloth Work on a small space at a time or it will get tacky She said it gets creamy as you work

Let the piece of wood dry completely before waxing it, since a second application may be desirable Paste wax is then used, rubbing carefully with the grain

Letie cautioned, "You must have cross ventilation" She pointed out that almost all furniture refinishing products are flammable and some of the vapors are harmful when inhaled She said, "Read all precautions before proceeding.

When waxing furniture, Letis said, it should be done on a dry day because a humid day will cause it to take longer and will result in too heavy a coat. After letting it dry, Letie said the surface should be buffed really hard for a finish which will last longer She cautioned, "Do not be in a hurry"

Mineral spirits can be used for periodic cleaning of wax buildup.

In dealing with white marks on furniture caused by moisture, Letie said the most important thing is to let it go for several days until the wood has dried completely "Don't mess with it right away or you may ruin the finish" She said a mild abrasive is needed. Toothpaste is one agent that works, as well as cigaret or cigar ashes Rottenstone works best Pumice is more abrasive than rottenstone but can be used, and English chalk whiting is a very fine agent, used by cabinet makers

Removing a white mark,

(Turn to Page C13)

In some cases a more drastic step is needed than the cleaner-conditioner. Here Letie works on a rocking chair with furniture restorer.

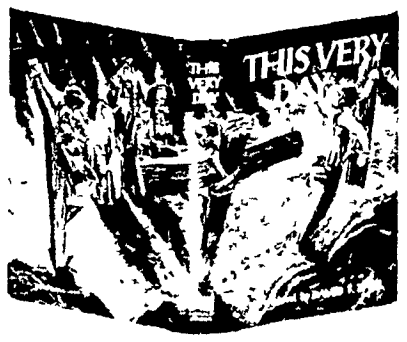
Easter reading for the entire family

Festive Breads of Easter
by Norma Jost Voth
Traditional Easter bread recipes from around the world such as Ukrainian Paska, Polish Babka, Mexican Pan De Fena, Greek Lambropsomo, English Hot Cross Buns combined with delightful personal anecdotes, stories, and remembrances of Easter customs
Paper, $2 95

The View from East Jerusalem
by John A. Lapp
A perceptive Christian assessment of the Israeli Palestinian conflict Written this past summer, it clarifies the position as it is NOW A guide to this complex, critical situation
Paper $4 95



This Very Day
by David F. Barr
A haunting novel about the last week before the crucifixion through the eyes of the two thieves who were crucified with Christ The story takes the reader to meet Christ afresh, as a criminal might, and makes you realize that no matter how debased your life, Christ offers cleansing and forgiveness
Hardcover, $7 95

For Children

My Friend, My Brother
by David W. Swartley
Eric Miller, twelve, enjoyed his life in a small town—except when Jon Simon made fun of him for his faith Later, Eric learns of Jon's tragic childhood and overcomes Jon s hatred through understanding and friendship For 9 to 14 year olds
Paper, $2 95, hardcover $4 50

Scamp and the Blizzard Boys
by Dorothy Hamilton
Unexpected adventure and excitement when Doug is snowed in with his mother by a howling blizzard When Craig and his dog Scamp are rescued by snowmobile and brought to Doug's house for the night, the boys and their families grow closer together
Paper $2 95, hardcover, $4 50

Former U. of Md. ag professor's trial delayed

BY SHEILA MILLER

BALTIMORE, Md. — Wolcott E. Stewart, the former University of Maryland agriculture professor, has been given more time until his case is tried, according to Inspector Robert Warren of the Postal Inspection Service.

Stewart's trial date had been set for March 5, 1980. He was to be tried for 13 counts of mail fraud and one count of wire fraud. At the request of Stewart's attorney, David Woll, the judge granted a continuation in order to give the court appointed attorney additional time to prepare the case.

Stewart was charged with using $182,000 for his personal gain rather than paying farmers for their grain he sold to four grainaries in Maryland and Virginia, according to the Postal Inspection Service.

Between March and June of 1978, Stewart made arrangements for the grain deals through his company, Exchange Market Traders. (See the January 26 issue of Lancaster Farming, Section C-38, and the February 9 issue, Section B-2).

Through dealings with Stewart, over 40 farmers were victimized in Pennsylvania, Maryland, and other states.

"The case will have to go on May 12," said Inspector Warren. "The judge would never allow another continuance—but then again, you never know."

Resurrecting wood furniture

(Continued from Page C12)

she said, "is a long, tedious job." The abrasive can be used with either oil or water (or spit). While mineral oil is sometimes suggested, Letie said ordinary salad oil is just as acceptable. "You need a lubricant and you use your fingers for rubbing. It's dirty job." First the finger is dipped in oil; then in rottenstone While the whole process is slow, Letie said the results will happen slower with oil than with water. "You're rubbing away the top layer of finish. Go with the grain."

A great deal of work will result in the removal of the white mark. She cautioned that once the white mark is removed the rest of the surface of the wood may require some work with a cleaner-conditioner to restore it to its proper finish.

She pointed out that the cleaner-conditioner recommended will go a long way toward filling in tiny cracks which appear in furniture finish from hard use. She added that for serious cleaning of furniture, a mixture of half gum turpentine and half linseed oil may be used following the method described for the cleaner-conditioner.

Alletta Schadler works on a chair with cleaner conditioner to remove tiny marks in the surface of the chair's finish.

General Features:

- Integrally cast cylinders with inserted and removable wet type cylinder liners
- Light hypereutectic alloy pistons
- Extra-resistant steel connecting rods alloyed with special alloy head bearings
- Surface hardened steel crankshaft
- Drop-forged, casehardened and tempered steel camshaft
- Anti-friction cast-iron tappets alloyed
- Cast-iron tunnel type crankcase
- Rotary injection pump with mechanical governor
- Force-feed lubrication with built-in circuit and lobe type pump
- Diaphragm pump feed
- Oil and fuel filters with integral type element.

Special structure and patented engine with consequent increases in performance and easier operation with low weight/output ratio low smoke emissions.

Engine based on a design "modulus" formula which allows a maximum parts standardization and interchangeability.

Open house set Wednesday

VIRGINVILLE — Final plans are being made for the open house and 60th anniversary observance of the Virginville Grange on Wednesday.

Among special guests scheduled to attend the program are Charles E. Wismer, Jr., Master, Pennsylvania State Grange; Rodman Myers, Master, Maryland State Grange; and John Scott, Past National Grange Master.

Charter and 25-year members will be honored during the observance.

Members of the planning committee include Kenneth Spease, Dorothy Miller, Esther Stitzel and Jane Treichler.

The Centerport Grange held its open house on Tuesday night and the Kutztown Grange is scheduled to hold its program on April 12.

The program at the March 20 meeting of the Virginville Grange featured a slide program on lawn and garden care by Marlin Donahue.

Upcoming events include a bus trip to Atlantic City planned by the women of the grange on July 26.

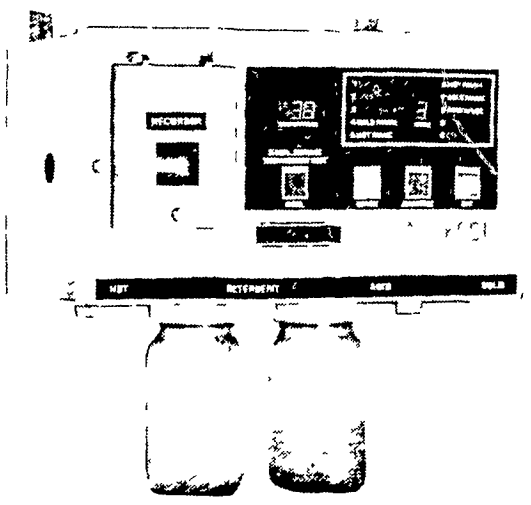
THINKING . . . OF BUYING A MILK TANK?
DON'T DELAY! - CONSIDER TEMP-MATIC by Dari-Kool

DARI-KOOL® BULK MILK COOLERS

WOULD YOU LIKE A TEMP-MATIC® SOLID STATE RECORDER/CONTROLLER IN YOUR MILK HOUSE?

The Tank with Features no other tank can offer

Pump shroud shown removed for detail



Featuring:

- Built-in recorder
- No Problems with Interval times
- Interval timer agitates milk 4 different times in one hour
- Built-in warning system - A horn or light warning signal is given when milk temperature rises two degrees or when milk temperature drops to 34 degrees
- Built-in automatic washer
- Milk agitates 1½ minutes out of every 15 minutes
- Automatic washer is built in
- Full flood refrigeration system
- Can operate the tank manually in time of emergency

Features:

- Temp-Matic shows the temperature and records it every hour.
- Identification light signals when the temperature being monitored rises above 45°, Falls below 34°, or when the controller is switched off.
- Solid-state six-cycle washing and sanitizing assures dependable, complete cleaning of the tank interior.

Cumberland Farmers' Association holds Spring meeting

BOILING SPRINGS — The Cumberland County Farmers' Association held its Fifth Annual Spring Banquet meeting here Monday night.

About 225 farmers packed the South Middleton Fire Hall to hear U S Representative William F Goodling speak on the economy and farm-related matters. See accompanying story.

Association President Roger Hoke introduced Connie Harness, Chief of Promotions for the Pennsylvania Department of Agriculture, who spoke and provided entertainment for the evening.

The former Miss Pennsylvania told farmers about the Department's campaign to promote Pennsylvania grown products to the Pennsylvania consumer.

She said the slogan "Pennsylvania Agriculture—We're Growing Better" is being widely accepted by state grocers, including Weis and Giant foods.

She said the Department is working with commodity groups to develop product characters to promote specific commodities.

The first of these, Eggatha, appeared at the Farm Equipment Expo last month. Two more, Milton the Milk Carton and The Big Cheese, also are ready to meet the public.

Harness said the Department is willing to help other groups develop similar characters for mall promotions There are 35 shopping center promotions scheduled across the state this Spring and Summer

She sang a number of Broadway show tunes as entertainment.

PFA District Director Horace Waybright congratulated the Cumberland County group on achieving an all-time high membership.

He also said PFA is establishing its own Workmens Compensation fund and said it should be ready to roll as of May 1.

PFA has formed a Political Education Committee. The PEP group is looking for help from any farmers interest in politics.

PEP will give individual farmers a bipartisan mechanism to contribute money to candidates through a political action committee.

The PEP committee also will provide assistance to farmers who choose to run for office, either locally or on a state-wide basis.

Duane Duncan, the Cumberland County Agricultural Agent, told farmers that CPR training would be available through the extension office.

He said the training sessions will be offered Tuesday, Wednesday, and Thursday starting April 15.

Interested farmers should contact the extension office for details —CH

Connie Harness, promotions chief for the state ag department, asked farmer help and support for the 35 shopping center promotions of farm goods slated for the coming months.

USDA to restrict distribution of veterinary products

WASHINGTON, D.C. — The distribution of rabies, bovine brucellosis and bovine turberculosis vaccines will be restricted to authorized persons under new provisions to the U.S. Department of Agriculture's veterinary biologics license rules.

The new provisions will allow each state to establish additional conditions or restrictions under which Rabies Vaccine, Brucella Abortus Vaccine, Brucella Antigen and Tuberculin-PPD Bovis may be distributed, according to Pierre A. Chaloux, deputy administrator of USDA's Animal and Plant Health Inspection Service.

"The additional control of the use of these products is essential to strengthen programs to control or eradicate rabies, bovine tuberculosis and bovine brucellosis," Chaloux said last Friday.

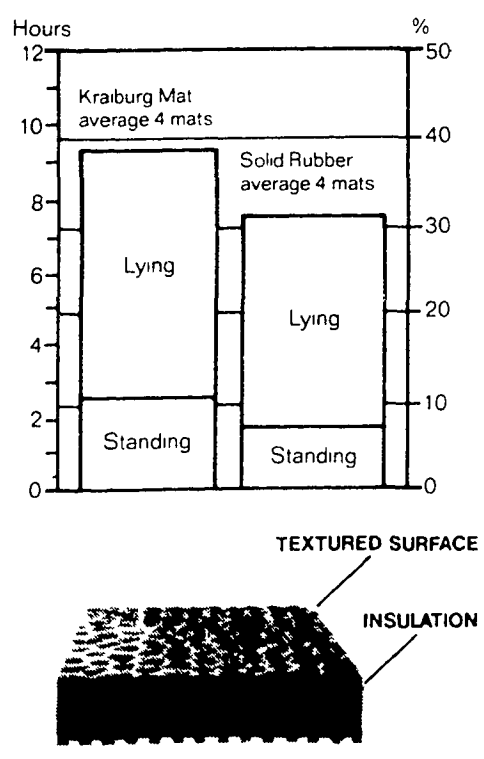
USDA proposed restricting the licensing for these vaccines last September 21. More than half of the 150 comments received supported the action. However, a number of replies from rural areas objected to limiting rabies vaccine to veterinarians because of the need for flexibility to meet local conditions. Therefore, distribution of rabies vaccines is left to the discretion of each state.

The new conditions on licenses for these four products became effective February 20. Companies holding licenses to produce these products must contact animal health officials in each state to determine how the products may be distributed.

The new provisions were published in the March 21 Federal Register. Copies are available from R. J. Price, USDA, APHIS, room 828, Federal Building, Hyattsville, Md. 20782.

Kraiburg Happy MooMats Keep Cows Happy, Resting...and Profitable!

The installation of our mats in your free stall or stanchion barn doesn't just save you time, which is money, it helps your herd give more milk, which means added profit! And more! Just look at the following:



Elastic comfort surface. Our advanced rubber chemistry and design groups have developed a surface and a rubber understructure that provides a pleasant lying surface and results in noticeably increased milk yield Testing has shown that increased milk yield results from increased comfort in lying and standing time Details available on written request

Sanitary non-porous texture. Resists barnyard acids, trapping of bacteria and disease Reduces barn odors

"Sure-grip" textured surface. Specially developed tread surface gives solid footing, protection against udder injuries, abrasions and sore hocks

Excellent heat loss resistance. Keeps cows' body heat from dissipating Thermal insulation action rejects cold and dampness from concrete underflooring and minimizes mastitis

Saves bedding materials. Reduces yearly bedding costs by up to $7,000 00 per 100 cows

No bulging, edge or hair cracks. Superior compounding and proper ¾" thickness provide insurance against wear, aging and loss of service

10 Year Warranty Program. Because Kraiburg products are carefully manufactured and have been thoroughly tested, we back every cow mat sold with a Ten Year Warranty

Available in 10 sizes
Happy MooMat

Goodling tells Cumberland farmers about inflation, marketing, TMI

BY CURT HARLER

BOILING SPRINGS — It's time we stopped throwing asprins at our sick economy and did something about the cause of the illness, U.S. Representative William F. Goodling told the Cumberland County Farmers' Association.

Goodling spoke at the group's Fifth Annual Spring Meeting held here Monday night.

Goodling predicted the coming months will be difficult ones for farmers, especially young farmers.

"Things are not going to get better for a good while no matter who is campaigning and tells you different," he said.

He compared the present situation in the United States to that in Germany in the early 1930s He said Germans today have good cooperation between labor and management because they fear a repeat of the 30s when Hitler stepped into an ecomomic and leadership vacuum

Goodling said the U S House of Representatives has passed legislation to counteract some of the pain of the economic crunch on farmers, but added that the Senate must approve any such action and then a conference committee must reconcile the differences.

He indicated that such a process could take quite a while to be completed

Goodling cited the government's deficit spending, decreasing productivity, energy problems, and a lack of incentive for individuals to save as causes of inflation.

He noted the President's inflation program spares no segment of the economy, including the farm segment.

He said one thing that may help farmers is a national marketing bill

While Goodling has promised farmers to work for such a measure, he pointed out that processors don't want to hear anything about farmer marketing groups.

He said a few hearings are scheduled to be held in California on the subject But he said farmers should push on a state level to get some sort of program enacted.

Goodling said he was pushing for legislation to allow USDA to issue letters of credit for commodities purchased in the school lunch program

That program is opposed by the Wisconsin dairy industry

Goodling said Wisconsin groups are against it because other farmers, including those in Pennsylvania, will be able to sell materials locally to local schools.

It said it would be an advantage to have local people control local funds, although USDA will have guidelines established on what can be purchased.

Goodling said he sees the windfall profits tax as revenge on oil companies. But he was worried that it will help produce no extra energy.

On the night of the first anniversary of the Three Mile Island disaster, he waffled on questions from the floor about the future of TMI.

He placed much of the blame for the problem, and the public's perception of the problem, on the Nuclear Regulatory Commission.

He said NRC caused more of the devistation than anyone else due to NRC's false and misleading reporting

If they don't find a way to get rid of the Krypton we are sitting on a timebomb," Goodling said

He admitted the public doesn't seem to want it vented, but added that doing nothing might be the most dangerous course

"We have to be rid of it in some way," he concluded

He said mass transit will solve some transportation problems on the East and West Coasts, but not in the country's vast heartland.

He said Congress would have to act to force acceptance of programs which make welfare recipients work for the money they receive

"We need a change in philosophy, one that tells people there is no Santa for people over 12 years old," he said.

"Working people are tired of taking their stubs home rather than their pay checks," he added

Goodling, who is serving as Republican Presidential Hopeful George Bush's Pennsylvania Campaign Manager, said the one thing uniting the Democratic party is Ronald Reagan.

He said the moderate Republicans are fighting one another and the conflict is working to the advantage of Reagan.

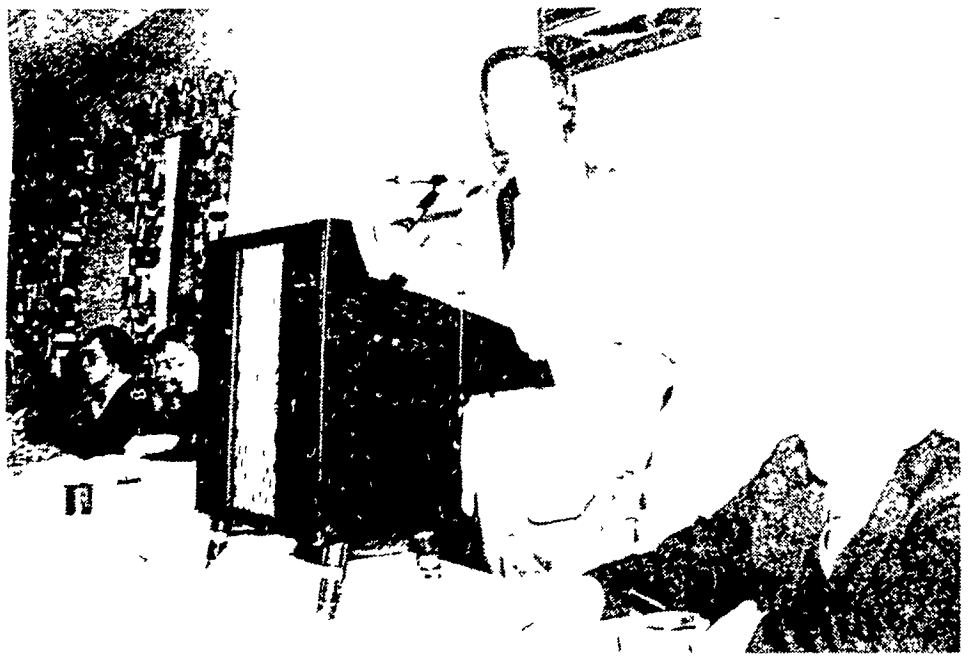
Goodling said he feels land use planning legislation should be left to the state and local governments and not be handled on a Federal level.

He also said he foresees no Constitutional amendment forthcoming to balance the Federal budget

He said the budget never will be balanced if people wait for that long, intricate process to take place.

But, he added, the people of the country, talking to Congress could force a balanced budget through legislation

He concluded by saying the power in this country rests in Congress and he urged farmers to make their feelings known on any and all matters of legislative interest



U.S. Rep. William F. Goodling told the Cumberland County Farmers' Association of economic hard times ahead. But he added the cure was available if the public pressures Congress to take action.

How to add $75 value to new alfalfa seedings

OLEY — Getting control of potato leafhopper in your newly seeded alfalfa this spring could return almost four times the cost of control. There's a relatively new way of getting control which has a lot of alfalfa producers who've tried it excited.

The system calls for application of a systemic insecticide for leafhopper right at seeding time – which means farmers won't have to go back over delicate new stands with a sprayer Presently only one insecticide, Furadan, is registered for this application.

"For insect control you have to get the spray on when the problem occurs," points out Penn State Agronomist Bill McClellan. "A trip with a sprayer will often leave wheel tracks in newly seeded alfalfa that will be there for the four or five year life of that stand.

"And I personally hate to go over a new alfalfa stand with a sprayer," McClellan adds "So the seeding time treatment offers an alternative."

Studies in Pennsylvania show roughly 0.35 ton extra alfalfa yield on new cuttings treated at planting time for leafhopper. Other tests showed sharply higher results, up to near three-quarter ton.

"That will add up to about $75 extra return in the first year. The value of pure alfalfa in the first year is about $85 per ton, with an average of two to three cuttings in the first year," FMC Northeastern Service Director Sue Wendler says.

Plus, the cost of the insecticide application is almost saved by reduced seeding rates, she points out. "At seed prices today, the savings will be about $16 or more, since the seeding rate can usually be cut in half."

But what if the leafhopper doesn't show up?

"In some parts of the state nine years out of ten you can expect leafhopper," points out Stan Gesell, Penn State Extension entomologist.

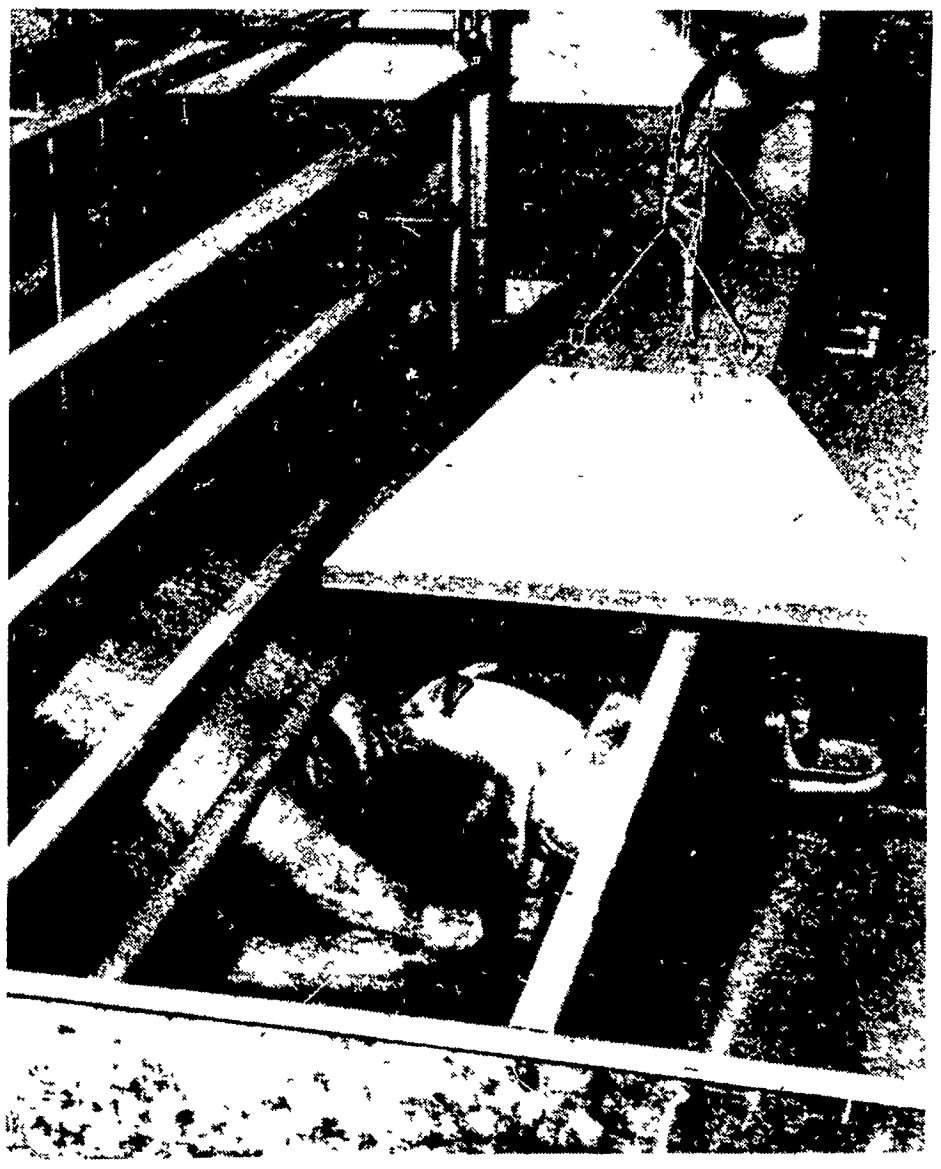
Generally the hottest area is here in the south central part of Pennsylvania. The new seeding practice is also recently registered for use in Maryland alfalfa.

"Leafhopper can almost kill a stand, so if I were a grower in that area I know what I'd do," Gesell says.

(Turn to Page C20)

With up to five cuttings per season on his alfalfa, Eugene Moser, Oley, is especially concerned about new stand establishment. It's the key to high production, he feels.

Leafhopper control can be a key part of establishing new alfalfa stands, contends Ross Orner, Jr., Rockton.



Warm-Up to Northco

With Zone Heating

■ Efficient Gas Heating

★ **ECONOMY** - Northco Pig Brooders operate on just pennies a day because they use two small burners rather than one large gas eating burner Its operating cost is over 75% lower than that of heat lamps

★ **SIMPLICITY** - One simple needle valve provides positive heat control Burners can be easily removed for cleaning Chain suspension allows simple, quick height adjustment for added temperature control

★ **SAFETY** - Northco Pig Brooders can be safely used over straw or litter There is no need to worry about pigs being cut by broken lamps or loss by bedding fire It works with any ventilation system

★ **Safe, Dependable "Zone Heating"**
Northco Pig Brooders are excellent for brooding little pigs because they provide "zone-heat" Ideal temperatures for little pigs may be 25 to 30 degrees warmer than needed for the sow With "zone-heating" temperatures are directed only to the little pig area, while sows remain cooler If more heat is needed in extremely cold weather the brooders can be raised to heat the entire house . eliminating the need for furnaces or costly unit heaters

How to

(Continued from Page C19)

The Furadan application gives protection up to about 60 days, usually until the first cutting on new stands. Penn State is also studying the treatment for fall seeding, and some growers have already tried that practice.

"Leafhoppers are our worst enemy in this area," points out Ross Orner, Jr., Rockton, Clearfield County. He and his family operate Summit Farms here. He says he feels the fall application paid off

"We got a beautiful stand, even though the seeding rate was cut to just 7.5 pounds, half of what we would normally use for straight alfalfa."

The insecticide treatment is cleared only for use on pure alfalfa stands.

Orner estimates his alfalfa yields average about five tons per acre over a season. But he follows an intensive management program.

"We run 35 to 40 soil tests per year, which is a very valuable tool," he points out

Sharply sloping soils in this area mean about 20 different soil types are included in Summit Farms, he adds.

"We seem to have ideal growing conditions for alfalfa here, though. It's a little pocket that is a little bit cooler than some areas and often a little short and cool for corn, but the alfalfa stands up well."

To make sure new seedings are well established, the Orners won't cut until the crop is in bloom.

"That helps the root system get well established. And getting the new seeding established is the most important step," Orner adds.

"Even if leafhopper doesn't kill out a stand, it can reduce the alfalfa population to the point where weeds come in and take over," points out Stan Gesell.

Spring alfalfa seedings are the hardest hit by leafhopper, though, Gesell says.

Eugene Moser, Oley, Berks County, seeds most of his alfalfa in the spring.

"We've had trouble getting stands started when insects hit," he says.

Last season he applied two quarts per acre of liquid Furadan 4F along with his herbicide, Tolban, on new seedings. Measured yields on test plots showed a yield difference of 0.76 tons per acre—5.93 tons per acre on two cuttings in the treated area, 5.17 tons per acre in the untreated area.

"I'm planning to use the same treatment this season although I'll put it on with liquid fertizer," Moser says.

"We use our alfalfa very hard," Moser points out. "We'll start cutting at the bud stage and cut about every 30 days. That means we'll often get five cuttings per season."

But Moser smiles as he adds, "Last season the weather was hard on us, and we only got four."

Recommended application procedures for the planting-time treatment call for broadcasting 10 to 20 pounds of Furadan 10G or one to two quarts of Furadan 4F per acre. Either insecticide should be incorporated just prior to seeding.

At the two quart rate, the 4F formulation will run $16 to $18 per acre. The granules are somewhat cheaper, at about $14 cost for materials.

Wendler says farmers can get by with about half the normal label rate if all goes well, but that they may sacrifice some residual control.

At standard rates, the material gives about 60 days protection, or one cutting.

There must be a delay of 60 days between application of material and feeding of cut alfalfa. This period would be about the normal interval between planting and first cutting.

Should cows break into a new stand of alfalfa before the withdrawl time of 60 days, FMC recommends dumping the milk for 96 hours, or eight milkings from cows which ate treated alfalfa.

Other leafhopper control methods on new stands call for spraying after the crop is up, or of course, no treatment at all. But the latter method runs the risk of losing the stand entirely or sharp reductions in the protein value of the crop, points out Gesell.

"Leafhopper feeding is responsible for a sharp reduction in protein content that adversely affects the feeding value of the forage," he adds.

Not only do leafhoppers actually feed and suck juices out of the plants, but they inject a toxin that results in the plugging of vessels which carry nutrients.

Damaged stands will be stunted and yellowish. The crop has reduced vigor and lowered yields, as well as lower protein content, Gesell adds.

The leafhoppers are actually killed off each year when freezing weather arrives. But the migratory pest heads north from warmer climates and arrives in time to sap the life out of the crop ahead of the first cutting, arriving in late May and early June. Numbers may vary, but susceptible areas usually have at least some problem fields.

Farm Talk

Jerry Webb

There was a time when the farm bloc had a lot to say about who was elected to political office in this country. Presidential hopefuls courted the farmer promising him all kinds of things in exchange for his vote.

But over the years the differences between farmers and nonfarmers have lessened. Farm votes have dwindled and the personal contact between farmers and politicians has almost vanished.

Instead, the candidates go for media blitzes and appearances where large crowds can be counted. Places like factory gates, shopping centers and bustling urban centers. Once in a while one will venture out into farm country to test the water and make a few promises, but usually they retreat rather rapidly when faced with some of the questions farmers pose for them.

The result of all this has been a virtual breakdown in the farm bloc when it comes to electing a president. And to a large measure this is also true of some lesser political offices. Farmers are counted just like factory workers, housewives, office workers, salesmen, and everybody else. They're just voters and they're not given much special consideration.

But farmers don't think that's the way it ought to be and so they're flexing their muscles here and there in various ways, including marches on Washington and large annual farm meetings where top politicians are invited – and where some actually go. In those circumstances, sometimes our politicians and political hopefuls get a chance to hear what farmers are thinking.

A new effort to tell the politicians about farm concerns has been instituted by the Agriculture Council of America.

This is a nonprofit, nonpartisan organization made up of farmers, farm and commodity organizations, and businesses that serve the agricultural community. ACA is famous for its toll-free farm lines that are conducted periodically where anybody in the country can call in and talk to government leaders.

The most recent one of these farm lines was done a few weeks ago when ACA held the nation's first "National Farm Issues Primary." In this one, people were encouraged to call and talk to the political candidates or their representatives about agricultural issues. The callers were also asked some questions to help draw out certain information that might be useful in shaping agricultural policy.

Here's the lead-off question from that survey: "There has been much talk lately about cutting off food shipments to another country when that country does something we don't like. Do you believe there are times other than during wartime when the U.S. should cut off food shipments to another country?"

If a caller answered that question "yes" then the follow-up question, "Should U.S. food shipments to another country be cut off if that country takes over property owned by American companies; invades one of its neighbors; violates the human rights of its own citizens even though it may be an ally of ours; or mistreats American citizens within its own borders?"

Another question: "Do you believe there's an energy crisis? And even if you don't, do you think the rising price of fuel will cause an increase in no-till farming; will make us turn to alternative fuels like gasohol; will lead to a decline in productivity in food supply; or will lead to an increase in food costs?"

There were several other questions that dealt with things like farmland preservation, the qualities of a good president, what the government can do to help the farmer, and what single issue should be the most important one for the current presidential campaign.

About 450 people from 29 states called the farm line to ask questions and respond to the survey. Most of them tagged inflation as the most important issue for the presidential hopefuls to focus on.

More than half didn't agree with the grain embargo and almost two-thirds thought the next president should be a strong leader who won't mind making some enemies in order to get things done.

The majority of callers felt there is an energy crisis and that in turn will lead to an increase in food costs, a decline in productivity and reduction in food supply and a move to alternative fuels like gasohol.

The callers also felt the government should:

Be doing more to help the small farmer;

Guarantee farmers a market price at least equal to the average cost of production;

Try giving tax credits and other incentives for reduction of work-related accidents and for cutting down on pollution.

No doubt the old farm bloc that elected presidents and

UNIPEL® 13-34-10

fertilizer can get your corn crop off to a super start:

It has a high concentration of water-soluble Phosphorus that gets to young seedlings quickly Helps plants establish a good root system – the starting point for top yields Its quick-acting and long-lasting Nitrogen team up to feed the young plants for full yield potential, continually from sprouting to harvest

This is the Starter Special that corn growers know from good experience It's highly effective as a banded starter And it's SAFE no chance of ammonia damage to tender, young seedlings when used as a "pop up" and applied directly with the seed at 50 lbs /acre

How can we fit UNIPEL 13-34-10 into your corn fertility program?

Farm-wife-minister

Rosalyn Kummer wears many hats

BY JOYCE BUPP
Staff Correspondent

EVANS CITY — Farm wives, long viewed as the salt of the earth, are adding spice to their lives by pursuing part and full-time off-farm jobs and hobbies Few, though, have taken the direction of Butler County dairy farm wife Rosalyn Kummer

Rosalyn Kummer is an ordained Presbyterian minister and serves the congregation of Crestview Presbyterian Church at Callery, north of Pittsburgh

Crestview Church lies just a mile over the hill from Lee and Rosalyn Kummer's 75-head registered milking herd at R2 Evans City From the doors of Crestview, Reverend Kummer can look across the fields to some of their Leheart Farm's 340 acres of hay, corn and soybeans She's also a mother, with Scott - age 11, and Jean - 9, now in school nearby

Standing in the pulpit on Sunday mornings, writing a weekly sermon, performing marriages, funerals, baptisms and counseling is the result of an educational odyssey spanning several years, two continents and a variety of universities

Born on an Erie county dairy farm, Rosalyn had grown up as the youngest of five children and the only girl So even though the milking chores weren't dependent on her help, the excitement on a dairy farm is always at the barn and not the house, so of course I was at the barn"

Following graduation from Penn State with a degree in home economics, Rosalyn flew with the college choir to Scotland, the home of her ancestors While tracing family roots during the visit, she looked up some of her relatives and became entranced with the country The brief stay was not going to be enough, so Rosalyn decided to stay, providing for her extended visit by landing a job as a maid for a Canadian couple living there

Part of the Edinburgh University in Scotland is New College, a divinity school Rosalyn signed up for the first semester that Fall She stayed a year

"Edinburgh's the only city I've ever lived in, but I really loved it It was a really good year, the kind of year you look back on later and remember as a wonderful time in your life," she recalls fondly

Following the year of divinity studies and before returning home, she and a friend, a farm girl from North Carolina, hitchhiked some 3,000 miles across Europe Admitting that they set out "scared as we could be," there was not one unsettling incident and a host of good memories from the adventure

Arriving home in Pennsylvania, it was back to the home-ec field, this time as an extension staffer for

(Turn to Page C23)

Rosalyn Kummer is successfully combining two difficult careers: dairy farm wife-mother and full-time Presbyterian minister.

Farm Talk

(Continued from Page C21)

influenced congressmen is gone and will never live again But that's not to say that farmers are without a voice or are without influence

It just means they're going to have to work harder to get a much smaller voice listened to, and they're going to have to work harder just to agree among themselves what it is they want to tell the politicians

I thinks it will be most enlightening to everyone to see survey results of what farmers themselves consider the important farm issues in this presidential election year

USDA announces 1980 target prices

WASHINGTON, D.C. — Acting Secretary of Agriculture Jim Williams today announced changes in the 1980 farm programs, including higher target prices for wheat and feed grains.

Producers who stay within their normal crop acreage qualify for farm program benefits based upon the new announced target prices, Williams said.

"President Carter signed the Agricultural Adjustment Act of 1980 which raises the 1980 wheat target price to $3 63 a bushel and the 1980 corn target price to $2.35 a bushel," Williams said

"We are also setting the 1980 sorghum and barley target prices at $2.50 and $2.55 per bushel, respectively."

However, Williams said producers who want to receive the higher target prices must stay within their normal crop acreage

"Those who exceed their NCA will receive benefits based upon the formula target in the Food and Agriculture Act of 1977," he said. This formula establishes 1980 target prices for wheat at $3 08, corn at $2 05, sorghum at $2.45 and barley at $2.29," Williams said.

Williams also announced 1980 target prices for upland cotton and rice and the loan price for rice. The target prices will be 58.4 cents per pound for upland cotton and $9.49 per hundredweight for rice. The 1980 loan rate for rice will be $7.12 per hundredweight.

"The new act extends the disaster payments program through the 1980 crop year for producers of wheat, feed grains, upland cotton and rice Producers who plant within their NCA will be eligible for disaster payments on wheat and feed grains based on the higher target levels

"However, combined disaster payments under all programs will be limited to $100,000 per person," Williams said.

Rosalyn Kummer

(Continued from Page C22)

Crawford County. Also on that staff was associate county agent Lee Kummer

"After two years, we knew we were ready to become engaged," she recounts "But there were two things I had to do before I could get married One was to transfer my divinity credits to a school nearby, and the second was a 'pilgrimage'."

That pilgrimage was to accompany her Scottish-born 90-year-old grandfather back to his homeland for a visit. Again, the trip was made on a flight that carried the Penn State choir on a cultural exchange. Within two weeks after setting foot on Scottish soil and the reuniting with his relatives, Rosalyn's grandfather died. The force that had compelled her to make the trip had become clear to Rosalyn.

Fulfilling the second duty began with a trip to register at the Pittsburgh Theological Seminary, a Presbyterian ministerial studies institution, where Rosalyn studied for one semester With two responsibilities completed, the wedding day was set in April, 1960

By Fall, Lee and Rosalyn returned to school together, this time for Masters degree studies at Purdue University in Indiana While Lee continued his agronomy major, for Rosalyn it was again a return to the home economics labs.

But before the year was out, a life-changing decision faced the newlyweds Back home on the family dairying operation, Lee's two uncles, who were in partnership with his dad, had decided to leave the milk business.

"We had never really talked about going into farming," Rosalyn reflects "But there was no real decision to make. Lee came home as soon as his classes were finished to start dairying with his father. I had to stay on in Indiana to finish my thesis, meanwhile teaching as a home-ec professor heading the home management house for one semester "

Once settled into the Kummer farmhouse by the summer of 1963, Rosalyn again returned through school doors, this time as a high school home-economics teacher After three years in that position and the acquisition of her teaching certificate, she "retired" And with good reason· she and Lee had decided to apply to adopt a baby

During the year that it took for baby Scott to arrive with the Kummers, Rosalyn again returned to work, as a home economist for Penn Power Company When Scott was a year old, like many young mothers, Rosalyn felt the need for an outside interest To "fill a few spare hours," she again felt drawn to the seminary at Pitt, signing up for just one course. About the same time, the Kummers again filled out adoption papers, this time hoping for a little girl

Penn State, in need of a night school teacher for a short period, offered Rosalyn the job Mothering, part-time studies, teaching and helping on the Kummer farm filled her days

Still the call of the seminary came ever stronger Rosalyn drove once more into Pittsburgh to register for classes But a new dean was heading the school and he lowered an ultimatum on the young mother the only way she would be allowed to re-register was on a promise to graduate that year.

It made 1973 another year that is permanently etched in her memory.

"I had two babies, was teaching two days a week in a nursing school and carrying a full schedule of courses. I'd drop the children on my way at a child care center associated with the university Sometime the diapers went into the wash at midnight; and I remember taking the hired man in to talk to my nursing students one time as part of a class," she laughs "Sometimes I got desperate "

Then, suddenly years of study and classes were all over, and the Presbyterian church added the name of Reverend Rosalyn Kummer to their ministerial list.

Officially, she was "licensed", which mean a full practicing minister in all ways, with the exception of having her own church For three years she "practiced around," a period of filling in for vacationing or absent clergy in the area

"I remember being so scared that I lost my voice the first time I had to preach and asked for a drink of water. The water was a good distance away and by the time someone had brought it, I was speaking again," she laughs

When Crestview church was "unyoked' from a parish in 1976, the congregation extended a call to Reverend Kummer. In a field where equality is still far more theory than practice, farm wife Rosalyn had been fully accepted.

One of her most satisfying accomplishments, and one that perhaps she especially understands having been a young mother, is the establishment of a Mother's Day Out - a series of weekly classes held at Crestview for community women Held for two hours on Wednesday mornings, participants pay a $15 fee for 10-week classes which include free babysitting Six thousand letters go out yearly throughout the area, offering courses like the popular communications- assertiveness series taught by professors from Butlat Community. College, as well as topics like crafts, cooking and home decorating.

Husband Lee is just as busy, involved in a variety of agriculture and community activities He's a director and past president of the school board, a director of Atlantic Breeders Cooperative, the Pennsylvania Holstein Association and Farm Credit and serves on the national legislative committee for the Farmers Association

Although her work around the barn is extremely limited, Rosalyn still manages to keep up on happenings at the dairy barn, where a capable herdswoman manages the milking operation. She likes to know which cows are ready to calve, or who is likely to be tied up for the breeder One day especially stands out in her mind, when a particular cow was still running with the herd when the A.I technician showed up. Rosalyn, who recognized the cow only from the feeding end, had to make a quick trip through the animals examining faces until she found the identifying marks.

Would she recommend to other young women that they follow in her footsteps? Thus far, only one percent of theology students are women and there are even fewer with their own churches.

"The ministry is a lot more emotionally draining that I though," she reflects. "But both farm wives and ministers must be their own persons. Whatever characteristics it takes to survive as a farm wife are about the same things that it takes to be a minister And every person should do whatever it is they feel inside that they must do."

Jefferson club plans auction

The monthly meeting of the Jefferson Community 4-H Club was held March 18 at the firehall. The members discussed what they like best about spring.

Reports were given on county council, roller skating party, family fun night, spring fling, and the Adams County dance. The club discussed the bake sale scheduled April 5 at the Hanover Market. The 4-H auction was also discussed and members were urged to bring items.

The club hosted the Loganville and the Glen Rock 4-H clubs to a square dance. The caller was Irwin Rappoldt. The next meeting will be held April 8 on meats identification and judging, which will be presented by last year's state winning team from York County.

Hunterdon bake-off is on the rise

FLEMINGTON, N.J. — Mouth-watering cheesecake, freshly baked breads and savory main-dish pies were among the entries at the sixth annual Hunterdon County Extension Bake-off last Saturday.

The Bake-Off, co-sponsored by the 4-H Foods Council and the Home Economics Council, enjoyed the biggest response in it's six-year history, with 90 participants and over 175 entries.

No-Knead Yeast Breads were the specialty class this year. The winners were:

Joan Massaro, 1st; Beth Olson, 2nd and Pat Plumstead, 3rd.

Also known as "batter breads", these breads offer a quick alternative to regular yeast bread baking. The crusts are somewhat thicker and crustier than a kneaded yeast bread, and the grain is coarse and uneven. However, flavor is excellent, and they generally take much less time to prepare.

Seventeen other classes of baked goods were open to those who entered the bake-off.

Winners listed in order were: Sally Herb, Jill Staudt and Anne Marie Parsons, plain yeast bread; Georgette Madak, Joan Massaro, and Carol Jurkowski, yeast bread, other; Christine Tirchio, quick plain bread; Jeff Van Duyne, Kim Crommelin, and Patrick Bird, quick bread, other; Paul Staudt, Sherrill Jurkowski, and Judy Sands, pies; Pam Landry, Georgia Muhs, and Ruth Gold, main course pies; Lorretta Rayne, Barbara Gabruk, and Helen Gall, novelty pies; Millie Matyola, and Ruth Crommelin, foam cakes, Kimberly Crommelin, Judy Sands, and Jimmette Sue Leming, butter cakes-unfrosted; Judy Sands, Marie Palotas, and Edith Walton, butter cakes, frosted; Pam Landry; Erika Waechter, and Michelle Lipka, novelty cakes-special crusts; Ruth Crommelin, Susan Blew, and Jennifer Ackerman, cheesecake; Susan Blew, and Kim Ryan, fancy icings; Robin Stokes, Patrick Bird, and Kim Crommelin, drop cookies; Geri Madak, Tami Bird, and Justine Hobday, bar cookies; Helen Huska, Linda O'Connor, and Elsie Madak, rolled and molded cookies.

Demonstrations were given during the judging. Eileen Siebenlist of Plants 'N Things in Glen Gardner, demonstrated how to make a spring wreath. Donna and Jill Cole, members of the Country Cooks 4-H Club taught the audience the correct method for making Jelly Rolls. Sharon Opdyke, also from the Country Cooks demonstrated how to make Raspberry Bars.

Kamera Kapers 4-H to hold Chinese Auction

FLEMINGTON, N.J. — A Chinese Auction was the main topic for discussion at the March meeting of the Kamera Kapers 4-H Club.

The Auction has been scheduled for Friday, April 25 at the Extension Center. There will be a $1 admission fee, door prizes and refreshments.

Doors will open at 7:00 p.m. and a ticket drawing will be held at 8:00 p.m. The proceeds from this project will go towards purchasing dark room equipment to be used at club meetings. Reported by Todd Lewis.

Vet to speak on sheep research

SOMERVILLE, NJ — An up-date of research in breeding, management, and confinement, housing of sheep will be the topic of a state-wide sheep meeting scheduled for Wednesday, April 2, 8 p.m. in the Somerset county, N.J. Extension Service.

Speaker will be Dr. Arthur Hackett, noted veterinarian, researcher and educator with the Canadian Animal Research Institute in Ottawa, Canda, reports Beth Perry, Readington Township sheep breeder and enthusiast.

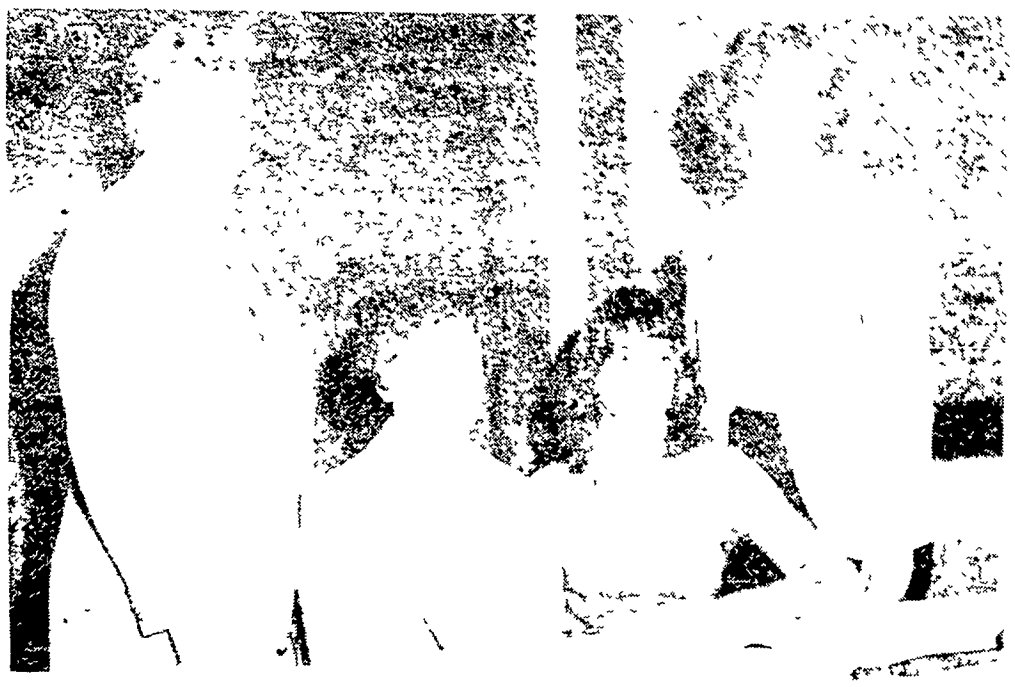
Formerly on the staff of the Rutgers Animal Science Department, Dr. Hackett has addressed livestock farmers on a number of occasions. He spole several years ago on sheep research underway at the Canada station and was very well received, says Mrs. Perry.

The meeting is sponsored by the N.J. Sheep and Wool Cooperative, of which Mrs. Perry is President, the N.J. Dorset Assn., and the N.J. Hampshire Assn.

The Somerset County Extension Service is located on Milltown Rd., just one-half mile west of route 202, about 4 miles southwest of Somerville Follow signs marked Somerset 4-H Center.

Meeting is open to the public.

State extension 4-H and youth workers elect officers



Officers of the Pennsylvania Association of Extension 4-H and Youth Workers elected recently at the organization's annual meeting on the Penn State campus are, seated from left: Mae Bleiler, Berks County extension agent, president; and Janis Sokoloski, Lackawanna County extension agent, vice-president. Standing from left: Alan Wentz, Cumberland County extension agent, treasurer; and Cheryl Miller, Clinton County Extension agent, secretary.

Penn to rededicate New Bolton Center

NEW BOLTON — The dedication of an 11,430 square foot addition to the Large Animal Clinic Facility at New Bolton Center, the rural campus of the University of Pennsylvania School of Veterinary Medicine, will take place Monday, May 12, 1980.

This $1 million wing is funded entirely by private contributions.

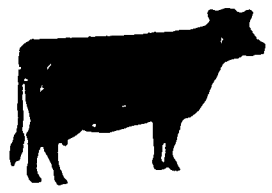
During the ceremony dedicating the new addition, the Large Animal Clinic will be renamed the George D Widener Hospital for Large Animals. The late Widener, a well-known philanthropist and patron of the arts was also known as one of the nation's foremost breeders of thoroughbred racehorses.

Attending the ceremony will be University of Pennsylvania President Martin Meyerson and Provost Vartan Gregorian along with F. Eugene Dixon, Jr., a nephew of Widener, and a well-known philanthropist in his own right.

The new facility has an enlarged waiting area and a conference room, much needed office space for faculty and support facilities for staff. All of these represent improvements which were badly needed to alleviate overcrowding, to improve patient admissions procedures and patient care, and to provide a comfortable place for consulation with clients

Available academic space at New Bolton Center will also be substantially increased with the addition of both a teaching laboratory and a lecture hall in the new wing. This amphitheater was bequeathed by the late Mrs. Ralph Woerner, a nationally known breeder of horses and Hackeny ponies, in memory of her husband and brother.

The addition was designed by a noted Philadelphia architectural firm, Kling Partnership It was constructed by Keefer and Kessler Associates



A doggone good 4-H program

WEST CHESTER — 4-H members are literally "going to the dogs" in the 4-H Dog Care and Training Program And youngsters from across the state can join

Most youngsters have an affinity for small animals, explains Cheryl Moran, Chester 4-H agent The pet becomes a trusted friend and companion

But pets do not live by love alone; they depend on their owners to provide care and nutrition That's why 4-H dog care projects and activities encourage young people from ages 8 to 19, to learn by doing about proper feeding, health, grooming and handling practices

What are some of the canine care basics? Good nutrition is a must It is just as important for dogs as it is for a human Most commercially prepared dog foods provide a balanced diet It's a good idea to feed on a regular schedule Always have fresh water available.

Second, all dogs need exercise and some basic training for family living. Periodic bathing, combing to remove dirt particles and clipping out mats and burrs, should be part of a regular grooming schedule

Third, all outdoor dogs need a warm house–free of drafts and elevated to keep out water and dampness. Never confine a dog where he cannot reach adequate shelter

Fourth, puppies need shots to prevent infections. Many communities have rabies vaccination laws and regulations and dog licensing and leashing It is up to the dog owner to learn and obey these laws

4-H'ers who demonstrate sound dog care and management practices are eligible for county awards

More information on the 4-H dog care and training program is available from your extension office

Lucky 4-H club hears evaluation

FLEMINGTON, N.J - The Lucky 4-H Club held their March meeting at the home of Carol Nebiola, Flemington.

The Evaluation of the window display, which received a very good, was read to all of the members

Members were encouraged to give presentations at the 4-H Day at the Mall Program in May.

A demonstration on Planting Zinnia Seeds was given by Moninder Puri, Flemington.

Cooking members enjoyed a meal of Jambalaya, hot biscuits, salad tray and apple crisp at their last meeting. Reported by Lynne Ashmen

When is next litter of calves due?

BY DICK ANGLESTEIN

SCHOENECK — She's a big animal, but no bigger than some of her neighbors.

She has her own box pen to move around in at will. But the cows next to her and across the aisle have the same accommodations

Above the pen is a sign listing her impressive pedigree and production statistics. But the names and information on the signs of adjacent pens would be just as easily recognized by Holstein breeders.

After commanding a record price tag of $116,000 at auction last week, Lime-Hollow Elevation Jessie has settled in among the other black and white breeding stock on the Galen Crouse farm, nestled on the eastern edge of the rural village of Schoeneck, Lancaster County.

"We won't be treating her any different than any of the other cows," Crouse said.

"She's fed the same ration and goes right along with the other cows up to the bunk at the other barn to eat."

But in less than two weeks, interest and concern in Jessie will pick up significantly.

"She will be calving on April 11," Crouse said.

"We'll be keeping a good eye on her. You can be sure we don't want to take any risks with one of her calves."

This interest and concern can be translated into terms of tens of thousands of dollars or even more.

If Jessie has a daughter, she could become numbered among the seventh generation classified as excellent in production That has been achieved only one other time in the history of the Holstein breed .

An earlier daughter of Jessie previously has sold for $31,000 in Nevada

Already, interest in a bull from Jessie has been expressed from overseas

Then in another two months, Jessie will begin to be put to the test to determine the scope of the possible eventual return on the record investment made in her

We could do our first super on her the beginning of June," Crouse said

The Holstein breeder is referring to the super ovulation process in which the production of multiple eggs is induced in a single cow, fertilized by artificial insemination and then flushed for transplanting into recipient grade heifers

(For a complete explanation of the process, see the story on page D8)

In the Crouse barn, Jessie is stalled next to another Holstein that is a veteran of the super ovulation process

Her record so far gives an indication of the possibilities that may lie ahead for the newcomer

' Kathy (Windy Mont Matt Kathy) will have 36 offspring by the time she's seven years old," Crouse explained

Eight offspring are due in May from a super ovulation performed on Kathy in August An additional 11 are scheduled to be born to recipient heifers in July from a second super done last October

From each of the super ovulations, 16 fertilized eggs were transferred to recipient heifers While the pregnancy rate was 50 percent from the first super, it increased to 68 percent from the second.

Combined with two calves already born from single transplants, Kathy's offspring for this year alone will total 21.

Crouse admitted that Kathy has produced an exceptionally large number of fertilized eggs in the two supers and flushes. The average number of good eggs from a flush ranges from about three to six, he explained.

But if any of this reproductive capacity rubs off on Jessie in the neighboring pen, the possible magnitude of the financial return can be left to the imagination.

The super ovulation process already has brought about quite a few changes in dairy cattle breeding.

One example is the terminology used, and not just the technical jargon, too.

When Crouse checks his little pocket notebook for calving dates, he talks about a "litter of eight" due in May and a "litter of 11" scheduled for July.

And blood tests have become common place.

In a super ovulation, semen from two or even three bulls can be used.

"First, this requires that we check the blood types of the bulls," Crouse said.

"We can't be using two bulls with the same blood type at the same time. Then after the calves are born, we must wait until we get the results of blood tests back to determine who is the sire."

But Crouse adds a word of caution.

"We've been in the program for two years," he said, "and Jessie will be our sixth cow The thing to remember is that all cows are different and all eggs won't fertilize and result in good pregnancies. But as far as we're concerned we've had real good success so far "

Lime-Hollow Elevation Jessie joins breeding stock on Galen Crouse farm at Schoeneck.

Franklin 4-H Dairy Club holds awards banquet

CHAMBERSBURG — Approximately 160 4-H dairy club members, family and friends gathered for the annual Franklin County 4-H Dairy Club's Covered Dish Supper and Reorganization Meeting last Saturday at the Franklin County Vo-Tech School in Chambersburg.

Philip Wagner, county dairy agent, along with Robert Eckstine presented 4-H bulletin boards and scrapbooks to outstanding junior and senior 4-H dairy club members These awards were based on 1979 4-H project books.

Winning awards from the six dairy clubs in Franklin County were from Western Dairy, juniors — Thomas Eckstine and Steve Eckstine, seniors — Maryanne Johnson and Victoria Zimmerman; Northern dairy, juniors — Rodney Meyers and Beverly Meyers, seniors — Allan Mummert and Gary Martin, Eastern Dairy, juniors — Kelly Cordell and John Mummert, seniors — Jesse Reichard and Dave Mummert; Greencastle-Antrim, juniors — Lori Harshman and Timothy Deshong, seniors — Alan Meyers and Carolyn Meyers, Quincy-Washington Dairy, juniors — Douglas Layman and Susan Wilhide, seniors — Jeffrey Benedict and Patricia Layman; and Hamilton-St. Thomas Dairy, juniors Nicholas Myers and Nancy Myers.

The awards these 4-H dairy club members received were sponsored by the Franklin County 4-H Dairy Council.

Jesse Reichard and Kelly Cordell received pins for their achievements as county winners in the 1979 National 4-H Awards Program (blue forms) in the dairy category This award is sponsored by the Insurance Company of North America

Carol Mummert received an award from the Eastern Milk Producers' Cooperative for being the outstanding first-year 4-H dairy club member.

The 1980 Franklin County 4-H Dairy Bowl winners were presented rosettes Receiving blue rosettes was first place senior team Eastern Dairy Club Team members were Cindy Donough, Kelly Cordell and Jesse Reichard First place junior team was Greencastle-Antrim Dairy. Team members were Lori Harshman, Ronnie Harshman and Lori Gsell.

Receiving red rosettes was second place senior team Greencastle-Antrim Dairy. Team members were Keith Grove, Alan Meyers and Douglas Martin. Second place junior team receiving rosettes was Northern Dairy Team members were Beverly Meyers, Rodney Meyers and Dale Mummert

The senior and junior first place teams in the Franklin County 4-H Dairy Bowl Contest. Front from left: Greencastle-Antrim Dairy Club members, Lori Harshman, Ronnie Harshman, and Lori Gsell - junior team winners. Back from left: senior team winners - Eastern Dairy members, Jesse Reichard, Kelly Cordell and Cindy Donough.

Alan Meyers tries to put the halter on his 4-H project calf (Ronnie Harshman) during a club skit Both 4-H'ers are members of the Greencastle-Antrim Dairy Club in Franklin County

Robert Eckstine reorganized the 4-H Dairy Club leaders Club leaders are Eastern Dairy- Edgar Reichard and Dennis Crider; Greencastle-Antrim Dairy- Richard Harshman, Richard Crider and Garry Harshman; Hamilton-St. Thomas Dairy- Mrs Larry Hartman, Northern Dairy- Kenneth Mummert, Robert Helman, Steve Kendig and John Moore, Western Dairy- John Stoner and Nina and James Burdette, Quincy-Washington Dairy- Mark Gayman and Grant Gayman

During the business meeting 1980 4-H Dairy Council officers were elected They are Kenneth Meyers, vice-president, Mrs J Robert Meyers Jr , secretary Amos Egolf, treasurer; and Rhoda Brake, news reporter.

The 1980 4-H Dairy Council President is Ted Small Small served as vice-president in 1979

Roy Cordell gave a Calf Sale Committee report He announced that the annual calf sale is scheduled for April 3 at the Franklin County Fairgrounds, Chambersburg

Sixteen calves are to be sold to 4-H members at this sale.

George Cashell gave a Franklin County Fair report. Cashell reported that the fair parking problems are being worked out and that the fair expansion is still on the go

Eckstine urged members to attend the district dairy show meeting since Franklin County has the largest district show participation.

Each participating club presented a skit.

People To People Tour

'Luttringers' find goodwill in New Zealand and Australia

LANCASTER — Americans visiting New Zealand and Australia come to the pleasant realization that Americans are very, very welcome and that American policies are sympathetically supported.

H. K. Luttringer, who traveled in February and March as a leader of an agricultural leaders People-to-People Goodwill Mission, said the welcome his 21-member group from south central Pennsylvania received was genuine. He added, "What our group saw impressed them that 12,000 miles away is a country very capable of a high degree of agricultural technology. The people know exactly what they're doing and they're doing it very well." Luttringer, 1559 Mission Road, is vice-president for worldwide marketing and communications for Sperry New Holland.

Australia is almost as big as the United States, and the Pennsylvania delegation visited a very small portion of the country around Sydney in southeastern Australia. They visited primarily the North Island of New Zealand, one of the two islands which comprises that nation.

The area they visited in Australia used mostly dryland farming, which means it is non-irrigated. Thousands of acres are planted to wheat, Luttringer said, and it is all grown with normal rainfall, which is about 25 inches a year maximum, but may amount to only 15 inches. The biggest agricultural enterprise there is sheep, and the Pennsylvania group saw sheep grazing by the thousands on the flatland.

Luttringer said that "stations", as their farms are called, average from 2000 to 4000 acres and are operated as family units. A single family can handle that acreage, he explains, because of the good weather and the flat land. "They don't have winter." Often, it is possible to grow two crops annually.

Soybeans are being grown there as a new crop, and there are fields of sunflowers from which seed or oil is harvested. Luttringer said, "Many people were surprised that they didn't use larger equipment, but they don't have the tractor power we have." Nevertheless, big equipment does help with the harvest.

He added, "Many of our grassland practices are from New Zealand and England, and they are very advanced in their technology."

The Pennsylvanians had the opportunity to stay overnight with some of the Australian farmers they visited. One couple they stayed with had been crowded out of the Melbourne area because of growing suburbanization, and moved 600 miles northeast of that city to run sheep. The couple reported paying $200 an acre for land 18 months ago, with the land now worth $600 per acre Luttringer pointed out that this is land suitable only for grazing.

This family had 1850 head of sheep, which is less than one animal per acre, the average for sheep farming there. "It is just pasture," Luttringer said. The man handles the whole farm himself with the help of sheep dogs. They sell spring lambs and mutton and breed their own replacement animals. Because of the temperate climate, the breeding is spread out year round. An operation such as this one, Luttringer said, was totally new to the Pennsylvanians.

He explained that a basic problem with the land is the small depth of topsoil. It leaches easily, losing its fertility. Fertilizing is extremely important, and he said superphosphates are

(Turn to Page C30)

Mr. and Mrs. H.K. Luttringer show a sample of the few momentos they purchased on their goodwill mission to New Zealand and Australia. The agricultural mission learned about farming practices in those countries. Luttringer sports his "Joe hat", a straw hat designed by Prime Minister Joe Fraser to protect farmers from the sun.

Luttringers'

(Continued from Page C29)

added to the land by plane "by the ton." He was impressed with the ability of the plane operators to apply it with extreme precision.

Australians harvest a lot of grain and cereals, but Luttringer said, "They are very sympathetic and supportive of the grain embargo with Russia. They recognize that they are very dependent on the United States for military protection.

He said they found the Australians very well-informed about the whole world. "They are not as isolated as you might think."

He said standards of living compare favorably, and the Americans saw no slums in the cities they visited. "Country living is like here on farms." He characterized them as being "very European" in some respects. Clothing carries a high price, despite the fact that it is manufactured there.

In Australia, the price of gasoline "floats" against the world price, with it costing from $1.50 to $2.00, with the expectation that it will go to $3.00.

Luttringer explained that Australia is 75 percent self-sufficient in energy with large gas and oil reserves. Solar energy has great potential there because of the mild climate, and windmills already are available so they use "wind power anytime they want to."

New Zealand, on the other hand, is completely dependent on others New Zealand features one "carless" day per week, and each car carries a sticker which clearly states which day it cannot be driven Luttringer said there are "tremendous fines" for disobeying with the possibility of the suspension of licenses Emergencies are an exception. He said, "People accept it. They see it as a necessity."

While Australia suffers from inflation, it is at a lower rate than in this country. Luttringer stated "the very personal opinion" that their trend toward establishment of a welfare state is a basic problem for them." Labor organizations are very strong, and strikes and slowdowns are not uncommon. Persons making over $10,000 annually are in the 40 percent income tax bracket Nevertheless, he said, "They are a strong people and I think they will work their way out of it."

When the group visited New Zealand, they had a chance to look at dairying which is a primary industry there New Zealand is a large exporter of dairy products.

Luttringer said, "It was startling to people here to see experiments there by the Massey Agricultural College where they had one huge carousel, with one cow being milked every 45 seconds. There are very advanced laborsaving techniques being used." The group also saw smaller carousels designed to accommodate 20-30 head.

There is a reason for the labor-saving devices, Luttringer explained. Hired help is very difficult to find and keep. He said neighbors may be 20-30 miles away, and it means a lonely life for hired help if they are not members of the family. Nearby towns are also small. In fact, Luttringer said there are some children who go to school by radio if they are far enough out in the country

Because of the wide open spaces, Luttringer said it requires planning which he termed "magnificent." Community structures have been built to accommodate the interests of the whole family, including cricket fields, bowling greens, rugby fields, swimming pools and indoor dancing facilities.

On the North Island, dairying is the primary industry although many sheep are raised in the hilly sections. He said farmers there put in long hours.

In contrast to its neighbor, New Zealand gets good rains which average from 40-50 inches per year, although Luttringer said, "Sometimes it comes all at once." Family farms there average "a couple of hundred acres," and year-round grazing is possible. Grain is stored in silos, much of it underground.

As with many dairy farmers, Luttringer said they met ones who felt they were not getting enough money for their milk, although milk is quite expensive to buy. He paid $1 in American money for a glass of milk in a small town motel.

Luttringer characterized the people as being "very vocal. They are not shy or reticent and speak their peace." He recalled television interviews which he said were "very frank."

He said farmers know their farm programs, but like many farmers "are never satisfied with them." The agricultural industry in Australia is recovering from three years of drought, but the sheep industry is doing very well, particularly with wool. Australia has a fairly large beef industry and a very small pork industry. Beef or lamb is usually served at the table

Australia is "getting into suburbanization, with farmland around the cities being bought up for housing. It is sending the price of land up dramatically," he said. Farmers are therefore moving inland, away from the cities. Another problem for farmers is that often their children do not want to stay in farming.

Luttringer pointed out that the "people-to-people" exchange was an idea originated by Dwight Eisenhower when he was president He said Eisenhower based his assumption on the fact that governments will never make peace, but people can.

The important part of the exchange is meeting with counterparts in another country, and would-be participants must express this commitment by joining the non-profit organization. Luttringer said, "Farmers in most countries are not in dire straits and for the most part are pretty well satisfied with their lives."

For people from this country, Luttringer said, "They gain a more mature understanding and they learn how cheap food is here. They also gain a better understanding of world politics and a much better appreciation of how good they have it here." He explained that the interest of the people going on the trips tie in with farm visits as close as possible.

After taking three trips through the goodwill mission, Luttringer adds, "People are just about the same whether they speak our language or not and whether they are advanced or not."

Round Valley Riders 4-H Horse Club to meet

FLEMINGTON, N.J. — The Round Valley Riders 4-H Horse Club held their March meeting at the home of Nancy Funkhouser, Lebanon, N.J

The coming events in which the members will be participating are: Horse Show, July 13; 4-H Day at the Mall, and the County Presentation Contest.

Members plan to give their presentations for their parents at the next meeting scheduled for April 7 at the Funkhouser residence. Reported by Jacqueline Lewis.

State fruit, vegetable growers eligible for marketing grant

LANCASTER — Fruit and vegetable growers in the states of Pennsylvania, Connecticut, Maine, and Washington will receive $60,326 from the U.S. Department of Agriculture to help improve the marketing of their products.

Additionally, $17,100 will be provided to identify consumer cooperatives in South Carolina which buy fresh fruits and vegetables and to learn what services cooperatives may need from the state department of agriculture

Bobby Smith, assistant secretary of agriculture for marketing and transportation, said the funds are being awarded under the federal-state marketing improvement program, administered by USDA's Agricultural Marketing Service. Under the program, states request the funds and match approved grants with state money.

A $5346 grant will be used to expand the reporting of prices and supplies of fruit and vegetables grown and sold in Pennsylvania. The information will be gathered from producers who sell directly to consumers and will be available on a toll-free telephone line.

Connecticut will receive $14,420 to complete a directory of farmers who are willing to sell their produce directly to consumers. The directory will provide consumers with "where-to-buy" information, and will also develop additional customers for farmers.

Maine will receive $18,400 to develop a management program for a new small-farmer cooperative, most of whose members are vegetable growers. The state department of agriculture hopes to extend the marketing season for the cooperative members.

Washington will receive $22,160 to determine if there is a market for processing tomatoes and alfalfa grown on land formerly used for sugar beet crops, and if equipment and buildings used to process sugar beets can be used to process tomatoes and alfalfa.

How to prepare mares for breeding

NEWARK, Del. — A successful equine breeding program depends upon a properly conditioned mare, says C M Reitnour, University of Delaware equine specialist.

Proper nutrition, a sound preventative medicine program and adequate exercise are of utmost importance in conditioning. A preventative medicine program should include immunization against diseases, and prevention and control of internal parasites.

Worm mares every six to eight weeks with recommended anthelmintics to prevent and control infestation by internal parasites such as strongyles, ascarids, bots, and pinworms.

In addition, it is advisable to vaccinate mares against tetanus, eastern and western encephalomyelitis and, possibly, upper respiratory problems found in your particular area.

Feed mares a well balanced grain ration containing approximately 15 percent crude protein and about 75 percent TDN and a high quality alfalfa or alfalfa-grass hay to prepare them for the upcoming breeding season. A vitamin and mineral supplement may be fed if good quality roughage is not available.

All mares should be turned out, lunged, ridden or driven for adequate exercise. The highest conception rates occur when mares are in excellent physical condition, neither too fat nor too thin.

It is well established that mares in a weight gaining condition going into the breeding season will conceive more easily than mares extremely over or underweight.

Start your mare now on a good sound management program so that the chances for fertilization are high.

Udder Joy Kids 4-H to hold craft demonstration

FLEMINGTON, N.J. — A Program on the 4-H goat project was given by the Udder Joy Kids 4-H Goat Club to the Kingwood School.

The members plan to take part in the 4-H Day at the Mall Program, to be held in May.

A craft demonstration and movie will highlight the April 7 meeting to be held at the Jurkowski residence. Reported by Donna Compton.

Spread of acid rain burns farms, fish, buildings

BY BARBARA S. MOFFET
National Geographic News

WASHINGTON, D.C. — Those sweet spring showers and pure fluffy snowfalls turn out not to be so sweet and pure after all In fact, some rain and snow are downright filthy.

High in the sky, before falling to earth, rain and snow often mix with pollutants — mainly sulfur dioxide and nitrogen oxide — and through a series of chemical changes become acidic

By the time it reaches earth, the stuff farmers and skiers are calling a godsend scientists are calling "acid precipitation" Some rain and snow that have made their way to earth in recent years in this country have been almost as acidic as vinegar, and the acid precipitation problem seems to be spreading.

About 50 million metric tons of sulfur dioxide and nitrogen oxide are spewed into the air every year in the United States, as byproducts of fossil fuel combustion Car engines, home furnaces, coal-burning power plants, and smelters all contribute

As the use of coal increases, these pollutants could intensify, an idea that worries scientists because they really don't know how the pollutants travel or what happens after they come down

Many do believe that acid precipitation can wipe the fish from lakes, corrode buildings and statues, leach minerals from soil, and possibly slow tree growth, damage crops, and taint drinking water

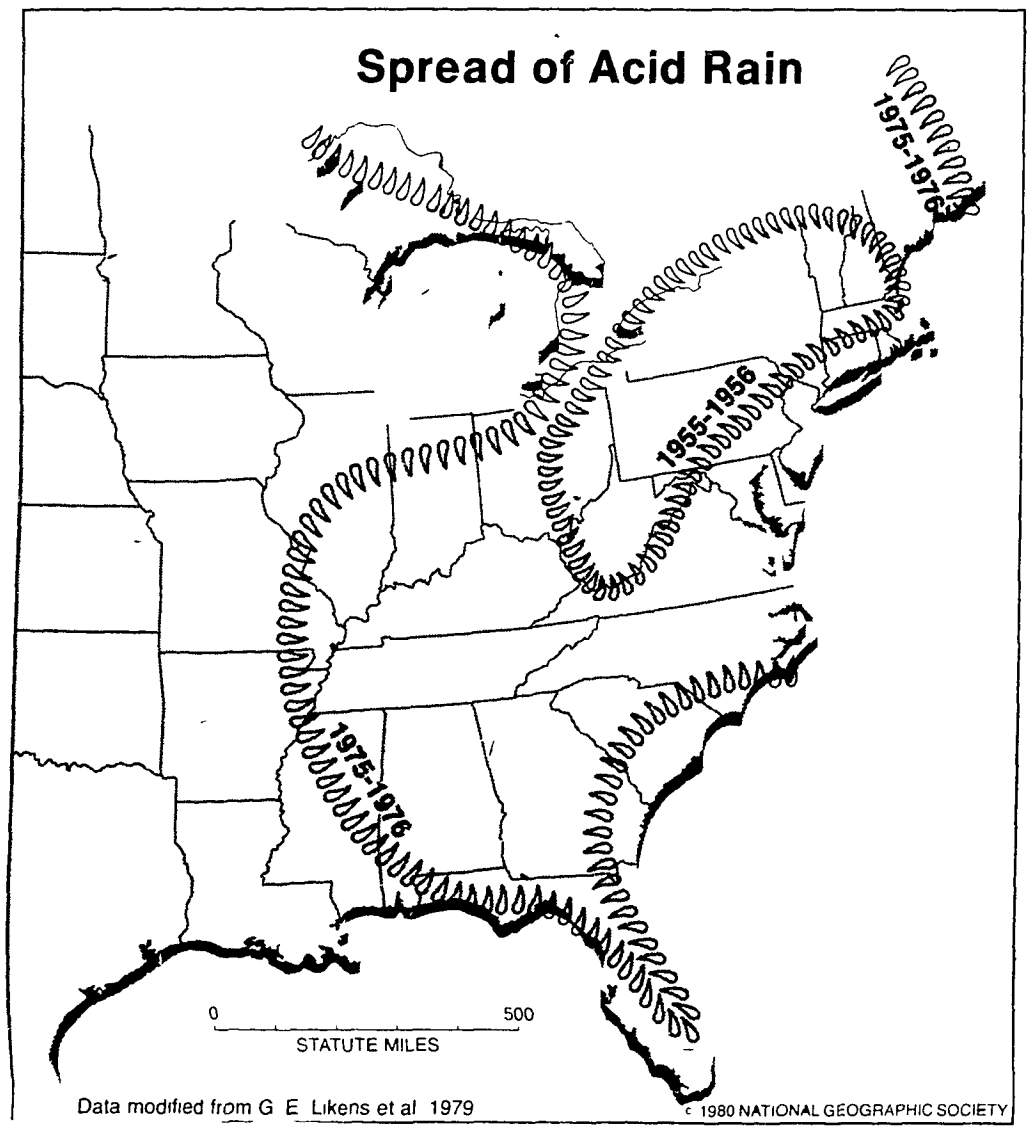
"The phenomenon of rather direct damage caused by what once was thought to be pristine rain and snow is appalling," said Dr Kenneth J Hood of the Council on Environmental Quality "Acid sprinkled all over the land just doesn't sound good

But what we all agree on is that we don't know exactly what kind or how much damage acid rain is doing "

Hood is being paid to try to find out He is executive secretary of the Acid Rain Coordination Commiteee, set up last year by President Carter to manage a 10-year research effort. Ten million dollars is budgeted for several government agencies in their first year of tackling the problem

Researchers already know that almost 200 lakes in New York's Adirondack Mountains that once drew

(Turn to Page C33)



Confined to a few states in 1955-56, acid precipitation's range grew drastically in two decades. The map's outlined areas represent regions receiving precipitation at least 10 times as acidic as unpolluted rain or snow. Acid rain has been detected as far west as Los Angeles and Seattle, but most of it falls to earth in the East after being carried by prevailing winds.

Acid rain

(Continued from Page C32)

fishermen are now fishless, apparently because of much greater than normal acidity The dead lakes are at high elevations, where soil lacks buffering agents that neutralize acid as it pours into the streams.

Scientists there think the fish probably died out because, in the acid-laden water, they lost capacity to reproduce. Some have been killed more directly, in sudden surges of acid resulting from quick snow thaws.

The sterile lakes don't appear murky or polluted Instead, they are blue and clear, the "ideal of a pristine lake," observed Thomas J Butler of Cornell University, who is studying acid precipitation's effects on aquatic life.

"I've been diving in some of these lakes and there's nothing left except a few water bugs," he said. "People who used to fish there in the 50's just don't go there anymore."

The high acidity already has taken an economic toll. The Adirondack Park Agency estimates the decline of game fish has meant an annual loss of at least $1 million in recreational revenue.

Exactly what acid precipitation does to plants and crops is not as clear, but preliminary data show reduced seed germination, damage to seedlings, interference with photosynthesis, lowered resistance to disease, and lesions on leaves And there is direct evidence that acid precipitation leaches minerals from soil and can even release soil's metals, sometimes sending them into streams or water supplies

Some of the world's most majestic man-made structures — the Parthenon, the Colosseum, Taj Mahal — also are feeling acid precipitation's effects. The progressive disfiguring of the sculptures on the Acropolis, for example, has been the work of acid rain

"We can even see streaking on the Washington Monument — possibly the result of acid rain's grooving and pitting effects," Hood said. "Rock that might last hundreds of years is lasting only decades." Wood, metal, and other minerals are not immune either.

In this country acid precipitation first was detected in the Northeast, but it appears to have spread south and west in the last 20 years despite the prevailing west-to-east winds. All states east of the Mississippi now are regularly stung by abnormally acidic rain or snow, and acid precipitation has found its way to urban areas of the West such as Los Angeles, San Francisco, and Seattle.

What perplexes scientists is how acid precipitation moves. Often shoved high into the atmosphere by tall smokestacks, the pollutants can be picked up and carried for weeks and miles before being dropped in rain or snow The spring shower that drenches New England might be loaded with pollution from an Ohio Valley power plant

Some of our pollutants even wind up in storms over Canada, and the amount is expected to increase under a plan to convert dozens of American utilities to coal use. Officials on both sides of the border are negotiating to try to limit the fallout.

In Scandinavia, where acid rain first was detected, the industrial areas of Britain and northern Europe are blamed And some experts think an acidic haze over the Arctic was made in Japan.

"Not being able to tell whose pollution is whose makes it difficult to do something about the problem," Hood pointed out

Because its sources are so hard to pin down, acid precipitation passes over most of the country's clean air regulations Bruce Jordan of the Environmental Protection Agency's Office of Air Quality, Planning and Standards, says the EPA probably will recommend to Congress that the clean air act be amended to address acid precipitation

One way to dry up acid rain sources is to cleanse coal of some of its chemicals before it is ever burned, Jordan said. Another possible remedy for factories and plants is the scrubber, which removes the byproducts of combustion before they are released into the atmosphere.

But some people are not convinced that acid precipitation is really hurting anything.

"We recognize the potential for harm, but we're not convinced that acid rain actually is doing damage in the real world," said Ralph Perhac, acting director of the Electric Power Research Institute, an organization set up to do research for power companies

"We also know that coal-fired plants contribute to acid rain, but do they contribute 5 percent or 100?" The institute is funding studies of acid precipitation in the Adirondacks as well as in Britain

Most scientists agree that the effects of acid precipitation are still in question, but they'd rather not wait around for a more precise picture to be drawn

As a plant physiologist studying the phenomenon said "By the time we determine the full effects of acid rain, it will be too late to reverse them "

Soybean group to study grain transportation

ST. LOUIS, Mo. — The American Soybean Association has appointed a four-member task force to study and recommend actions to modernize and improve the U.S transportation system.

"The transportation system is vital to our efforts to expand soybean and grain exports in competition with other producing countries," says ASA President Allan Aves

"U.S farmers are dependent upon the transportation system. As the nation's leading export crop, soybeans must be able to move efficiently and freely to our ports. At the direction of the ASA voting delegates and Board of Directors, I have appointed this task force to develop recommendations which our farmer-delegates will consider in New Orleans in August "

ASA Board Chairman Merlyn Groot of Manson, Iowa, will chair the task force. Other members include. James M. Ferguson, Calhoun City, Mississippi, vice president of the Mississippi Soybean Association; Roger Asendorf, St. James, Minnesota, president of the Minnesota Soybean Growers Association; and Andrew Winslow, Hertford, North Carolina, a member of the North Carolina Soybean Producers Association.

"In order to avoid reinventing the wheel, we plan to meet with other groups who are currently studying the transportation problems," Groot said

"We will study all three major transportation systems: rail, barge and truck. We hope to develop recommendations that will consider cost efficiency and utility of the systems, as well as ways in which the three modes can work together."

Groot said the ASA committee will be working closely with transportation committees already at work for the Iowa Soybean Association and the Minnesota Soybean Growers Association

Fertilizer cutback may be profitable

UNIVERSITY PARK — For the first time in many years farmers need to take a serious look at the amount of fertilizer they are applying to their crops, says Frederick A. Hughes, extension farm management specialist, at Penn State.

Fertilizer prices for many years did not change Farmers were able to fertilize for maximum yield and not worry about the most economic level of fertilization.

With fertilizer prices tripling in the last several years, farmers need to consider whether that last increment of fertilizer is returning enough production to pay for the cost of the fertilizer.

On many crops such as corn, that require a sizable amount of nitrogen for maximum production, it would be well for a farmer to try to determine what response he gest from incremental applications of nitrogen fertilizer

It is questionable whether the last 10 to 30 pounds of nitrogen will be profitable in trying to obtain an extra 10 or 15 bushels of corn.

In many cases, that extra 10 to 30 pounds of nitrogen will only yield one or two bushels of corn and this will hardly pay for the price of the additional nitrogen, Hughes points out.

Conference committee clears emergency farm credit bill

WASHINGTON, D.C. — A Senate-House Conference Committee Tuesday approved legislation authorizing $2 billion in emergency loan funds for credit-pinched farmers.

The committee resolved differences in House and Senate versions of a bill to extend the life of the Farmers Home Administration's economic emergency loan program through Sept. 30, 1981, and to increase the lending authority from $4 billion to $6 billion.

Unless the legislation is enacted, the economic emergency loan program will expire on May 15. All of the loan funds authorized under present law have been exhausted.

The bill now goes to the Senate and House for final Congressional action

Sen. Herman E Talmadge, chairman of the Senate Committee on Agriculture, Nutrition, and Forestry, and a sponsor of the bill, told conferees that prompt action is needed because "thousands of farmers all across the country are waiting for money to plant"

The economic emergency loan program, established by Congress as a temporary measure in 1978, provides an additional source of operating credit to farmers and ranchers unable to obtain financing from normal sources due to national or areawide economic stresses, such as a general tightening of agriculture credit, high production costs, and low commodity prices

Under the conference bill, interest rates for economic emergency loans would continue to be based on the cost of money to the government.

The Conference Committee agreed to a House provision increasing the maximum loan that the Department of Agriculture may make for on-farm storage facilities from $50,000 to $100,000. The provision sets an 8 percent interest rate ceiling for such loans. However, the changes in the farm storage facility loan program will only become effective to the extent provided in appropriation acts.

Agee pleads guilty to bait and switch

ANNAPOLIS, Md — Walter F. Agee, a 37 year old Pennsylvania man, pleaded guilty to 9 counts of operating a bait and switch meat scheme in LaVale, Maryland, according to Lacy DeGrange of the Maryland Department of Agriculture's Weights and Measures

DeGrange said a hearing has taken place but the MDA was not contacted to appear since Agee pleaded guilty He said all they know at Weights and Measures is what they read in the newspaper.

Agee had been arrested last November after he opened another store, known as the Beef Quarter Meat Store, in Roscoe, Pennsylvania. The former resident of Indian Head, Fayette County, was released on bail set at $75,000

The former Pennsylvanian, who recently resided in the Keyser area of Maryland, was arrested after warrants had been issued for his arrest as a result of an under-cover investigation by MDA and the Allegheny Health Department. (See **Lancaster Farming** February 9 issue, Section B7)

The investigation turned up meat that contained maggots, and sales with meat less than the quality and quantity advertised.

Since his plea of guilty, Agee has been free on bond continuation until the presentencing investigation is completed as ordered by Judge Getty. Agee was represented by Attorney Tim Finan

Sentencing has been scheduled for April 11, 1980, said DeGrange It convicted on all counts, Agee could face a jail term of 30½ years and a fine of $10,500

Delmarva sets poultry short course

DELMAR, Md — The 1980 Delmarva Hatchery and Breeder Flock Management Short Course will be held Wednesday, April 9, from 8:30 a.m to 3 10 p.m at the Del-Mar-Va Convention Hall in Delmar, Md.

Topics to be covered during the day-long meeting include incuba. . eggs--past, present and future, labor efficiency improvements on the broiler breeder farm, breeder vaccination programs--when and why, and a primary breeder update

There will also be presentations on the effect of light during incubation on broiler performance, monitoring hatchery sanitation and vaccination techniques, parasite and insect control on broiler breeder farms, and a discussion of broiler breeder research

Registration fee for the course is $12 per person This covers lunch, a copy of the proceedings, coffee and doughnuts

The course is sponsored by the Eastern Shore Hatchery Association, Delmarva Poultry Industry, Inc., and the Delaware Cooperative Extension Service

For further information contact extension poultry specialist George Chaloupka at the University of Delaware Georgetown Substation 302/856-5250.

Insurance lobby favors house crop coverage bill

WASHINGTON, D.C. — The House version of the Federal Crop Insurance Act of 1979 is a reasonable compromise on insurer and consumer needs should be enacted, the American Insurance Association said today.

In a letter sent to Senate Agriculture Committee Chairman Herman Talmadge, AIA President Larry L. Jones warned that the Senate version of the bill "is opposed by the entire private insurance industry. The bill does not contain adequate provision to protect the private crop insurers who are currently providing a vital market for the American Farmer. It would not permit competition in the all-risk market or protect the role of private agents," he said.

"While not perfect, H.R. 4119 is a reasonable compromise because of the amendment so carefully worked out by Representatives Ed Jones (D-Tenn.) and Edward Madigan (R-Ill.). The amendment has the support of the Administration and the Federal Crop Insurance corporation."

Briefly, the House amendment does three things.

It permits farmers to substitute private hail-fire coverage under their federal all-risk policy and allows a 25 per cent reduction in the federal premium for those using the option;

It places private insurers on equal footing with subsidized federal coverage and requires that a federal reinsurance program be initiated by 1982.

And it requires the Federal Crop Insurance Corporation to offer agents contracts that meet industry standards.

Jones said the American Insurance Association shares Congress' concern for American farmers and believes that their insurance needs can "best be met by providing a healthy, competitive, private market...The American Insurance Association believes that the amended version of H.R. 4119 will foster competition" while costing the taxpayers substantially less than the Senate proposal, he said.

New bulletin gives ideas on protecting stored grain

WASHINGTON, D C — A new bulletin for farmers on protecting stored grain against insect damage will be distributed nationally by the U.S Department of Agriculture

The insect problem is expected to be a serious challenge in 1980 because of abnormally large amounts of grain in storage. Space in grain bins and elevators will be at a premium as a result of record crops in 1979 and the decision by the USDA to store 13 million metric tons of grain that may be delayed in entering export channels

As in past years during record harvests, some grain may have to be stored temporarily on the ground where it is much more susceptible to insect infestation

To aid farmers, USDA will distribute 200,000 copies of "Insect Control in Farm-Stored Grain," Farmers' Bulletin 2269, through county offices of USDA's Agricultural Stabilization and Conservation Service The bulletin, which was written by scientists of USDA's Science and Education Administration, will also be available through county offices of state Cooperative Extension Services

Participants in the ASCS loan program bear the responsibility for maintaining quality of the grain against damage by insects, which can reduce its quality and value substantially The farmer must sustain any losses in the value of grain which is damaged in storage, even though it may be under a price support loan.

The bulletin, written by Charles L Storey and Roy D Speirs at the U.S. Grain Marketing Research Laboratory, Manhattan, Kans , and Lyman S Henderson, now retired, tells how climate, harvest conditions, temperature and moisture effect pest infestations It also explains how to prepare grain bins before storage, how to treat grain during binding, and how to inspect, fumigate and aerate grain during storage

A commercial formulation of Bacillus thuringiensis–a bacterium that controls Indianmeal and almond moths–has been approved for use in stored grains and soybeans, according to the authors

Single copies of FB 2269 are available free upon postcard request to· Office of Governmental and Public Affairs, U.S. Department of Agriculture, Washington, D C., 20250

Sikorski is Pa. P.H.A. queen

FAIRFIELD — The Pennsylvania Polled Hereford Association queen for 1980 is Jane Sikorski, daughter of Mr. and Mrs. John Sikorski, Emmaus, Lehigh County.

The Sikorski family runs and operates JEMS Polled Herefords, a farm of approximately fifty head of registered cattle.

Jane is a member of her county 4-H Club, serving as newsreporter and secretary and has been showing Polled Herefords for the past seven years

She is also a member of the Lehigh County 4-H livestock judging team, which has entered local and state-wide contests in the past few years. Jane is proud of winning High Junior Individual in the Pennsylvania South Eastern Counties competition.

The Pa. queen is also secretary of the Pennsylvania Junior Polled Hereford Association and is serving a two year term as a director.

Jane's hobbies include music, sports and showing cattle. She is looking forward to representing Pennsylvania at the Junior National in Columbus, Ohio and the National Convention and Show in Denver in 1981.

Conservation comic book

ANKENY, Ia. — The Soil Conservation Society of America released a new educational cartoon booklet designed to teach young people about the value of water as a natural resource.

"Water, the Basis of Life" explains the importance of water to plants, animals, and man; communities; agriculture; and industry. Emphasized throughout the booklet is the protection of water supplies and water quality.

The booklets are designed to help young people in the upper elementary grades understand the value and wise use of natural resources. A teacher's guide accompanies each booklet in the series.

Single copies of "Water, the Basis of Life" are 35 cents. The accompanying teacher's guide is 25 cents a copy.

The Society is a private, nonprofit association dedicated to advancing the science and art of good land and water use. It has 15,000 members in the United States, Canada, and more than 80 other countries.

John Deere Lawn Tractors make mowing and pickup easy

Take care of your mowing and bagging chores in one simple operation with a John Deere Lawn Tractor and optional 4-bushel rear bagger

John Deere Lawn Tractors are available in two models — the 8-hp 108 with 30-inch mower and the 11-hp 111 with extra-wide 38-inch mower Both models feature color-coded controls for quick identification And a 5-speed transmission with on-the-go shift conveniently mounted on the right fender deck

These tractors are designed for your safety and comfort. A triple-safety system guards against accidental starts. And a safety switch automatically shuts off the engine if you leave the seat with the PTO engaged There's an adjustable, padded seat mounted on two springs for an easy ride And a roomy operator's area with 2-position footrests.

Take care of mowing and bagging chores the easy way with a 108 or 111 Lawn Tractor For snow removal and light grading, a 32-inch snow thrower and 42-inch front blade are also available.

Dairy specialist shares formula for heifers

UNIVERSITY PARK — The objective of any successful heifer rearing program should be to keep the calves alive, keep them healthy and have them big enough to breed at 15 months, according to Richard Warner, department of animal science, Cornell University.

Speaking at the dairy herd management conference held recently at Penn State University, Warner said one of the best ways to meet these objections is for dairymen to hire their wives to do the calf raising.

Warner said data support the fact that women are more successful in calf raising than men.

Warner said the most important consideration is to immunize calves with colostrum, since they have no immunity at birth because immune golobulins won't cross the placenta as they do in humans and rabbits.

He said, "Calves get no passive immunity except by drinking." There are important immunities in the mother's milk which a calve can absorb only during the first 24 hours after birth. The sooner the calve drinks the better off it will be, according to Warner.

He added, "Immunity is a race to see which gets to the gut first - colostrum or bacteria." Warner made it clear that it is vital to feed 15 pounds of first and second milk colostrum during the first four feedings.

Also important in the rearing of herd replacements is to have a clean calving site. If none is available, Warner suggests dairymen move the tractors and equipment out to make room for clean calving facilities.

The smaller the herd size, the lower the mortality rate will be, according to Cornell research Warner also noted that variations in temperatures can be crucial in calf rearing, with wide fluctuations worse than the extremes of weather. Windbreaks and housing therefore become important considerations in a good herd management replacement program.

Warner said it is important to have a planned feeding program, not a haphazard approach. "The system is just as good as the feeder. Poor feeders will not be happy with the results of low levels of milk."

He cautioned, "Never wean a calf unless it is consuming at least one and one half pounds of grain per day."

For the calf which insists on eating hay to the exclusion of grain, Warner suggests removing the hay. He says the removal of hay won't hurt the calf and gain will be superior in that way.

While once-a-day feeding usually works well, Warner said dairymen must nevertheless check calves twice daily.

Warner discussed alternatives in feeding calves and said that while whole milk is good, it is expensive. Milk replacer, he said, makes an effective, highly useful substitute. "Hospital milk" can be fed with no adverse effects, if this dairyman avoids garget.

Fermented colostrum is good to feed, and Warner offered some guidelines, suggesting that the dairymen collect the first six milkings after the calf has nursed. Clean plastic cans are required, and it must be used within one month.

Warner said colostrum should be started with one cup buttermilk and fresh milk can be added Fermented colostrum should be fed at a two-to-one ratio with warm water and can be fed at a level of eight to ten pounds daily, diluted.

The ideal way to handle fermented colostrum is to have three cans: one clean and waiting, one full and waiting, and one filling and fermenting. With fermented colostrum, the calf can be switched to milk and back to colostrum if necessary.

Warner gave ingredients for a calf starter used by Cornell up to eight weeks, but added that prices affect which ingredients are in the formula.

The Cornell formula is: Corn and cob meal, 20 percent; crushed oats, 25 percent; beet pulp, 15 percent; brewers grain, one percent; soybean meal, 20 percent; molasses, eight percent; dicalcium phosphate, one percent; and salt, one percent

Warner also showed statistics which illustrated the response of calves to mash was far superior to pellets. Their rumination started earlier and was observed more frequently. Warner said feeding all-in-one starter after eight weeks probably has merits

He added heifers on pasture may not do as well as expected, but concluded: "They can recover." — SBB

USDA to test electronic marketing

WASHINGTON, D.C. — The U.S. Department of Agriculture will test an electronic meat marketing system, along with traditional methods, in buying meat for school lunch and other feeding programs, Secretary Bob Bergland announced Monday.

The system, called the Computer Assisted Trading System–or "CATS"–is a bidding and trading procedure which uses a central computer in conjunction with remote computer terminals CATS also stores and compiles transaction data and furnishes market information to subscribers. It was developed by the American Meat Exchange, Inc., with technical assistance from the General Electric Information Services Company.

Bergland said his decision to test the electronic system was the result of a recommendation submitted to him by meat pricing task force last year

The task force, composed of meat producers, processors and consumers, was established in March 1979 to recommend ways to improve meat pricing systems.

The group met several times and held a series of public hearings. Their report, issued in June 1979, concluded that the potential benefits from electronic trading in improving market information and enhancing competition were promising. The group recommended that the meat industry be encouraged to develop and test the system and that USDA participate in such testing.

USDA's general counsel subsequently ruled that USDA had the authority to participate in a pilot test of such a system.

The Department of Defense, the other major federal meat buying department, has also agreed to test the system, and will work alongside USDA in acquiring, installing and programming the necessary equipment.

USDA's Food Safety and Quality Service will continue to buy meats on a competitive basis. Prospective contractors may bid using either CATS or the traditional electronic or mail methods. The agency will also use the system, along with traditional procedures, to announce meat purchase programs, invite offers and award contracts.

FSQS officials said the system should be in operation when meat buying for the 1980-81 school year begins

Glen Rock 4-H changes meeting date

GLEN ROCK — The Glen Rock 4-H club held it's monthly meeting recently at the Susquehannock High School Administration building.

In connection with the club's health project, members responded to roll call with their favorite foods. The members with the most nutritious foods received prizes.

The next meeting date was changed to Thursday, April 10.

All members between the ages of 8 & 12 were encouraged to attend the county-wide Junior Fun Night April 11.

Leasing or cash payment can cut equipment costs

LANCASTER — Record interest rates are changing the way farmers are buying tractors and combines.

Many now prefer to lease or shell out straight cash register than pay 14 percent to 17 percent interest or higher.

As a result, farm machinery manufacturers are seeing an upswing in their leasing business. "Our leasing volume has almost tripled over this time last year," says E.W. Muehlhausen, vice-president, marketing for Steiger Tractor, Inc.

Farmers with high incomes find their greatest advantage in leasing, explains Richard Duvick, extension economist at Ohio State University.

"Leasing offers particularly significant tax advantages to those farmers in the 40 percent to 50 percent tax brackets," Duvick says. "But you don't necessarily have to be in those higher tax brackets to benefit from the tax advantages of leasing, depending on the terms of the lease."

Even though the annual payment for the lease might be greater than an annual loan payment for the same equipment, a lease makes good business sense for these farmers. This is because the entire lease payment can be deducted from taxable income, while only the interest expense can be deducted for a loan.

And as the cost of borrowing increases, leasing looks even more attractive to these farmers The fellows who took the lease two years ago are sure smiling today. They've got seven-year leases with payments figured at 11.5 percent and that looks pretty nice to them.

Muehlhausen summarizes these advantages to leasing·

Alternative source of funds: When money is tight, leasing allows a farmer to acquire equipment without borrowing. This leaves his other credit lines open.

Tax savings: All lease payments can be deducted from taxable income. Some leases qualify for investment tax credit, as well.

Better cash management: Payments are fixed for the life of the lease, which allows for better cash flow projections. Some loans have fluctuating interest rates, on the other hand, so payments increase with the interest rates.

Ability to purchase machine at lease's end: With most leases, when the lease concludes, a farmer has the option to buy the equipment. Most farmers do.

And because of inflation, leasing offers a considerable advantage over purchasing with cash, Muehlhausen says.

"Because leases are spread out over a number of years, just like a loan, a farmer pays for the use of today's modern equipment with tomorrow's inflated dollars," he says.

Daugherty terms, 4-H 'last outpost of warmth'

DOVER, Del. — In a meeting held recently here at the Capital Grange Hall, Hope Daugherty, told Delaware 4-H leaders that 4-H has been called "the last outpost of warmth in a society where everyone seems to be out for himself."

Daugherty, from SEA/4-H Youth Development, told the audience of 100 volunteer leaders from around the state that they, along with parents and teachers, "were put on Earth to help young people and to try to prevent them from making irrevocable mistakes." Leaders are able to do this, she said, by listening, communicating, sharing concerns, teaching, and caring about their young charges.

Daugherty also spoke about the age-old problem of nutrition of older members of the 4-H organization, which serves youth of ages 9-19. Teens often tell us they quit 4-H because they are too busy with school work and extracurricular activities, she said. But a recent survey proved that the most active 4-H members, those involved in two more more project areas, are the ones that generally remain in the organization throughout high school. Furthermore, those teenagers who are most involved with 4-H, Scouts, or other organized youth activities, are also more involved than other young people in after-school activities such as sports, music, and the high school yearbook committee. This proves, she said, that outstanding teenagers find the time to accomplish many things.

Silver Spurs 4-H elects officers

LANCASTER — The Silver Spurs 4-H Horse and Pony Club held a meeting recently at the home of April Poyck, 1224 Hunsicker Road.

Election of officers was held for 1980. Those elected were: Amy Rockwell, president; Jef Hobman, vice president; Denika Gum, secretary; Randy Glick, senior treasurer; and Curt Huber, junior treasurer.

The next meeting will be held at Jeff Hobman's home on Friday April 11 at 7:30 p.m.

CPA weighs alternatives in farm structure

BY CURT HARLER

HARRISBURG — The decision to form a partnership or corporation has implications on tax returns for that farm for years to come.

Even if taxes are not the sole consideration, the fate of future generations on the farm may be determined by how wisely the farm owner of today provides for the farming generations of the future.

Steven M. Hoffman, a certified public accountant and manager of the Harrisburg office of Peat, Marwick, Mitchell and Company, says there are pros and cons to each of the three typical farm structures· individual ownership, partnership, and incorporation.

As an individual, a farmer can be sole owner of the farm business and its assets As a result, that individual is taxed on the total income from his operation.

This could be subject to some extremely high rates, Hoffman said. Individual tax rates are graduated and go as high as 70 percent.

Only the net amount of income after taxes is available for reinvestment in the farm or to meet individual expenses.

The primary advantage of the individual ownership of a farm business is simplicity in paying only one tax the first time around.

Partnership is not a separate taxable entity, but the earnings of the partners pass through to the individuals along with the credits and deductions.

The assets of the business are jointly owned by the partners and, again, only one tax is paid. Losses can also be passed through.

One of the major advantages of a family partnership is the profits from a farm operation can be spread among the members of the partnership rather than being all bunched in the parents' tax return, Hoffman said.

This avoids the need to pay tax at the highest tax rates.

But, he cautioned, a partnership can not be formed just to spread income. It has to have some sort of economic reality, and the partners have to own a share in the partnership.

The disadvantages to a partnership include unlimited liability, the same as with an individually owned operation.

Normally, upon the death of one partner, the partnership disolves. And a further disadvantage may be that the fiscal year has to be the same as that of the general partners, he said.

The third form available is the corporation.

A corporate farm's assets are owned by the corporation and the individual owns shares of stock.

In essence, the individual has no direct ownership, but the ownership is represented by the share of stock he owns in the corporation.

It is possible to have a corporation with an individual owning the one and only share of stock.

A corporation is regarded as a separate taxable entity for federal tax purposes. So the individual, theoretically, is not responsible for paying the tax of the corporation, he said.

The individual generally is not liable for the debts of the corporation, either.

The maximum corporate tax rate is 46 percent of taxable income over $100,000, so there is a rate differential between corporate and personal taxation that could favor the corporate farm.

Salaries paid to the owner and shareholders can be deductions for the corporation.

The corporation has good continuity — if one member of the corporation dies, it does not spell the end to the corporation.

If a partner dies, a partnership has to be dissolved.

There is flexibility in compensation, too.

Corporate ownership is more readily adaptable to a gift-giving program. It is easier, for estate planning purposes, to give away a few shares of stock than it would be to break off a section of land or a physical part of the farm operation.

Also, a corporation can adopt a different fiscal tax year than that for the owners

There is one tax election to be made for a corporation called Subchapter S which allows that corporation to be taxed similarly to a partnership.

That is, the income or loss is passed through to the owners.

Also, the sale of stock in a corporation is generally viewed as a capital gain. And 60 percent of a capital gain is excluded from tax, whereas all of a normal gain is taxed

Sale of an individually owned farm or a farm partnership generally results in ordinary income

The primary disadvantage of a corporation is double taxation. The corporation pays tax. And if the individuals want to participate in the earnings of the corporation, and they can't be paid out as salary, then the corporation has to pay a dividend.

Dividends are not deductable by corporations and taxes have to be paid by individuals on dividends received.

Among other disadvantages Hoffman pointed our are the added complexity of a corporation's tax returns and the need for a bit more record keeping.

But there is more to consider than just tax advantages when deciding whether or not to form a partnership or corporation.

Business and personal goals must be reviewed, then based on that, a farmer can decide on what form of operation to have, Hoffman concluded

On being a farm wife -And other hazards

Joyce Bupp

Over the course of the past several years, we've been honored with the receipt of literally hundreds of pieces of postal correspondence. Tempering the discovery that we are so desirable to the signers of these letters is the reality that most of the stuff can be described at best as "junk mail."

With last week's shipment of goodies came an invitation from the prestigious George Washington University in the nation's capitol. On the gold-colored flyer was a registration form and invitation to the owner-operator to pursue a continuing engineering education in a three-day, $485 advanced course titled: "Analysis of variance for data having unequal numbers of observations in the subclasses"

While the various individuals with this operation have accumulated many years of assorted engineering-type experience, none of it comes with a B.S. degree. We include what could loosely be labeled an agriculture engineer, a mechanical engineer, a couple of volunteeer top-notch general fix-it engineers and, of course, a domestic engineer.

Nevertheless, pursuing this advanced study might help us all better understand the engineering principal of unequal numbers that confront and confound us daily.

For instance, there's the case of the 40 by 30 inch calf which manages to escape regularly through the 14 by 12 inch head-hole in the welded steel front of the calf pen stall. Would that be what you call a variance of data of unequal numbers?

Or, what about the contrary cow that persistently wedges her 24 by 12 inch head under the 3 inch clearance beneath the pasture fence, even though the grass is just as green on the inside?

Other problems of unequal numbers could also stand some analysis. Like how can a 1/30th acre of an unfarmable rock pile produce three acres worth of weeds?

And what engineering data supports the unequal numbers of the 88 square inches of shoe sole that regularly tracks 197 square inches of yucky mud on my kitchen floor?

Unfortunately, my analysis of the data brings me to the observation that this advanced course is offered in early June, when all the unequal numbers of subclasses on this farm will be involved in wrapping up the first session of haymaking.

Confidentially, I'd be happy to settle for knowing what in the world the title of the course means.

Industrial finance companies may provide some farm loans

NEW YORK, N.Y. — For farmers, the ever-present problem of securing credit needs is particularly pressing this year As Washington attempts to dampen inflation through monetary policy, the availability of funds is tightening across the country.

What does this mean to farmers? Simply that their usual sources of credit may be pulling in many cases. Their ability or willingness to lend may not be what it was in prior years

For many growers, this has meant sharpening their pencils and sitting down to some careful financial planning, looking at all the options that are open to them.

One such option: adding an industrial sales finance company -- often also referred to as a commercial finance company – to their normal sources of credit for financing and leasing of new equipment

How does an industrial sales finance company differ from other lenders? What does it look for before it decides to provide equipment financing for a farmer? What should you look for in such a finance company? Peter McSherry, National Marketing Manager - Agriculture, at C.I.T. Corporation, a leading nationwide industrial credit concern, provides the answers.

First, an industrial finance company is in business to finance and lease equipment and to do so profitably, according to McSherry. One chief characteristic of a commercial finance company is that it is a secured lender According to McSherry, this means that it will provide funds for acquiring new farm machinery based, in great part, on the fact that it has reliable collateral.

While all financing sources naturally take a prudent approach to credit, each varies somewhat in the emphasis it places on the different credit factors. For example, one financing source might look unfavorably on a credit request because it feels the farmer is carrying about as much debt as he can handle at the time. Or, it may perceive his working capital – the funds he uses to buy supplies and pay for other immediate needs – as being light or inadequate as the planting season approaches. Then too, a spell of bad weather in the previous year may have lowered crop yields and hence, profits, and this may be a deterrent.

Sales finance companies on the other hand, are primarily interested in intermediate-term loans which average from three to ten years. Consequently, they tend to look beyond any temporary setbacks the farmer has had and, instead, analyze his longer-term prospects, McSherry explains.

Most important, however, is the fact that any risk in the transaction will be minimized due to the security afforded by the equipment, the value of which the company has carefully determined. This security can be responsible for a "yes" rather than a "no" on a loan request.

Where do commercial finance companies get the funds they lends to farmers and other borrowers? Unlike banks, which get a major portion of their funds from deposits, major industrial finance companies raise their money primarily by selling commercial paper, or by selling notes to the public, as well as by borrowing or private placements, McSherry explains.

Of course, above and beyond the value of the collateral, a funding source will also want reasonable assurances that a farmer will be responsible in meeting his obligation, and in this regard it will take a close look at the "man factor," he says. Honesty, integrity, proven management ability, and a demonstrated record of meeting past credit obligations are factors that weigh heavily in the applicant's favor.

If the farmer is experienced, runs a profitable operation, and has shown good management ability – as demonstrated by crop yields or livestock production that compares favorably with county averages – chances are he is a candidate for a positive decision on his application. The case for his getting the financing, however, also depends heavily on the farmer's cash flow

The expected cash flow must be adequate under normal conditions and sufficient to meet operating expenses as well as family living expenses and prior loan obligations.

But, being profitable depends on many factors including a good number that are beyond the farmer's abuity to control. Weather and prevailing market prices are the two obvious ones.

For this reason, a commercial lender will also want to know if the grower has enough equity in his operation to sustain a temporary downturn. Looking at the farm's debt-to-worth ratio, for example, will help give the lender an insight in this question.

All things being equal, however, the industrial financing source will place important emphasis on the collateral, For him, this is the "safety valve" in the transaction. Not only must it provide security for the finance company in the event of default, but it must also add appreciably to the farm's productivity, and hence "pay for itself," McSherry comments.

Does he understand farming? How much does he know about the equipment I'll be buying? Is he represented locally? These are all questions a farmers should ask in evaluating a prospective credit source.

"A credit decision works both ways, just as the finance source evaluates the farmer, so should the farmer size up the finance source," McSherry suggests.

Much in the same way an industrial finance company looks to stability and a good, consistent record in a farm operator, the grower is advised to do the same with a prospective creditor.

"An important piece of advice that I would give to a farmers is to find out whether he will be dealing with the same company right through the full term of the transaction," he stresses. That means being wary of the possibility that the financial source will sell or otherwise transfer the contract to another company or individual.

"The problems that can develop when a financing commitment is assigned by the original source can be substantial," McSherry contends.

"Dealing with a well-established company is one way to avoid that possibility and assure that your transaction will be handled by the same company you started off with," he says.

So, as money availability becomes a major consideration for many farmers, it is important to carefully evaluate all the sources open and use credit availability wisely. Today, skills in financial management are just as much a tool of modern farming as fertilizer and feed.

Do your crops need Manganese?

NEWARK, Del. — High prices and narrow profit margins are forcing growers to consider every aspect of fertility management to get the best return on investment. One aspect of fertility management which concerns many farmers is the possibility of micronutrient deficiency.

In Delaware, the most commonly observed micronutrient found deficient is manganese, especially in soybeans and occasionally in corn.

Managanese deficiency usually occurs on high pH soils and is usually associated with over-liming, says University of Delaware extension soils specialist Leo Cotnoir.

It is seldom observed at soil pH values under 5.8, becomes more prevalent at pH 6.0, and most often is found at soil pH values over 6.5. This is especially so on sandy soil. At pH 6.0, for example, manganese deficiency is much more likely to occur on a loamy ind than on a silt loam.

One of the best ways of preventing manganese deficiency is to monitor soil pH carefully and avoid over-liming.

Loamy sand soils should not be limited than 6.2 while silt loams should be kept at around 6.3 to 6 5

This may be a problem on loamy sands, where a ton of lime (often considered the lowest amount that can feasibly be applied) may get soil pH values over 6.2.

On soils with known histories of manganese deficiency, lime applications of less than one ton should be considered, says the specialist.

Manganese deficiency in soybeans is rather easily recognized. The new growth turns yellow. Only in extreme cases will entire plants be yellow. In many instances, mild manganese deficiency symptoms will disappear as the roots reach more acid subsoil. In corn, manganese deficiency generally results in an overall light green color.

The most effective way of correcting manganese deficiencies is by the use of foliar sprays.

One to two pounds of actual manganese as manganous sulfate in 20 gallons of water applied when deficiency symptoms are first observed is very effective. A second spray application two or three weeks later may be needed. Some burn may occur if the spray is applied in mid-day but it is seldom serious.

The most effective method of application is as a band. This requires 8 to 10 pounds of actual manganese per acre. As the deficiency results from soil conditions which convert manganese to unavailable forms rather than from an actual lack of total manganese, broadcast applications are the least effective way of applying this nutrient.

When broadcast, manganese must be applied at the rate of at least 40 pounds per acre. Even this rate may not be very effective on high pH soils. It will not "carry-over" and will need to be repeated yearly.

In cases of mild deficiency, banding of an acid fertilizer may be beneficial. Fertilizers formulated with ammonium sulfate provide enough soil acidity in the vicinity of the roots to convert unavailable manganese to the available form.

Davidsburg 4-H Club

DOVER — The March meeting of the Davidsburg 4-H Club was held recently.

The Club will clean up assigned roads on April 26. Junior Fun Night will be April 11, 7 p.m. - 9.30 p.m. The club will be constructing an obstacle course at Paradise Elementary's Spring Spree, May 17, 3 p.m. - 7 p.m. Also, the club is in charge of the baked good stand at the 4-H Auction, March 28, 6 p.m., at the 4-H Center at Bair. Preparations should be made for the May talent show.

The next meeting will be April 17.

Sheep numbers down, early crop up

LANCASTER — The number of sheep and lambs on feed in seven selected States on March 1, 1980 totaled 597 thousand head, down one percent from the 604 thousand head on feed a year ago.

There were 287 thousand placed on feed during January and February this year, down 6 percent from the 306 thousand placed during the same period of 1979.

Of the total number of feed March 1, 1980, in the seven States: 9 percent weighed less than 70 pounds, 7 percent weighed 70 to 79 pounds, 14 percent weighed 80 to 89 pounds, 26 percent weighed 90 to 99 pounds, 44 percent weighed 100 pounds and over

The early lamb crop in California, Kansas and Texas totaled 1.44 million head, up one percent from a year ago. The January 1 inventory of ewes one year old and older for these States was up less than one percent.

Forest game program acreage tops 600,000

HARRISBURG — The enrollment of the newest cooperator in the Pennsylvania Game Commission's Forest Game Cooperative Program has pushed the total number of acres involved over the 600,000 mark.

The newest cooperator is The Glatfelter Pulp Wood Company of Spring Grove, York County, which has enrolled nearly 25,000 acres of its land in Bedford, Cumberland, Franklin, Fulton, Huntingdon, Juniata, Mifflin, Perry and Snyder Counties in the program.

Most of the 98 Glatfelter tracts involved are reverting farm land in the ridge and valley sections, which have been planted with various species of pine.

Some of the acres involved were previously enrolled in the Game Commission's Cooperative Farm Game and Safety Zone Programs

All of Glatfelter's timber lands are enrolled in the American Tree Farm System. The Tree Farm System recognizes tracts which are being managed for timber, wildlife, watershed protection and recreation.

Glatfelter pioneered Tree Farms, and was the first enrollee in the program in Pennsylvania.

Under the Forest Game Program, large wooded tracts which are enrolled are open to all responsible hunters. The privately-owned lands, in turn, are protected by Game Law enforcement officers.

For years, landowners were plagued by a few inconsiderate slobs who dumped garbage, litter and worn-out major appliances, abandoned disabled vehicles, cut and removed firewood without permission, damaged roads, trails, signs, gates, etc. Cleanup and fixup operations caused severe inconveniences and at times rather extensive financial losses

To combact the private hardships, and to guarantee access to these holdings by hunters, the Game Commission established its Forest Game Program, patterning it generally along the lines of its Farm Game and Safety Zone Programs.

Under the Forest Game Program, over 600,000 acres are guaranteed available for use by hunters. The period of heaviest utilization comes during the deer season. In return for public hunting rights on the land, the Game Commission provides the services of game conservation officers, who enforce the Game Law and prevent abuse and misuse of the property and the landowners' rights.

Cooperators have found fewer serious problems with hunters after enrolling their tracts, while the sporting public is able to enjoy recreational opportunities on the properties, some of which might have been closed to public hunting or restricted in access.

Quite a few deer (as well as other game) are harvested on Forest Game Lands, to the advantage of hunters The wildlife harvest, on the other hand, has helped keep the deer herd under control, which means less wear and tear (browsing) on the range, to the benefit of the forests and property owners.

During certain seasons of the year, some roads on certain Forest Game tracts are closed to vehicular traffic, either by gates or signs. These roads are closed because traffic will result in severe ruts, vehicles getting stuck in mud or snow, etc.

Landowners are then forced to pay for repairs to damaged roads. Respect for closing these trails must be shown by the general public, or prosecutions by Game Law officers will follow.

The 600,000-plus acres of land guaranteed open to public hunting through the Forest Game Program are but a small part of the Game Commission's total program which in 1979 resulted in more than 8 million acres being utilized by the general hunting public.

Over 1.2 million acres of State Game Lands, properties which have been purchased since 1920 by the Game Commission with funds derived through the sale of hunting licenses, were utilized by hunters in Pennsylvania last year.

About 2 million acres in the Farm Game Programs were open to public hunting in 1979, while the Safety Zone Program also provided approximately 2 million acres of public hunting grounds. These lands make up the bulk of the best small game habitat in the state.

Marketing spread blamed for 1979 food price rise

WASHINGTON — The difference between what farmers receive and consumers pay for food — called the marketing spread — widened nearly 12 percent in 1979, the largest increase in five years, according to a report issued today by the U.S. Department of Agriculture.

The marketing spread, representing charges for handling, processing, and distributing a market basket of U.S. farm foods, accounted for slightly over half the 10.8-percent rise in grocery store food prices last year.

Increased farm value accounted for about a third of supermarket food increases and higher fish and imported food prices accounted for the rest of the 1979 gain, according to the report by USDA's Economics, Statistics, and Cooperatives Service.

Unlike the farm value of food, the marketing spread has risen each of the past 10 years and has been the most persistent cause of rising food prices, the report said.

The report also shows these facts about 1979 food prices:

Grocery store food prices increased only 3.9 percent (annual rate) in the last six months of the year; but a 15.5 percent annual rate during the first half raised the average for the whole year to 10.8 percent.

Farmers received about 39 cents of every food dollar spent in grocery stores, virtually the same as in 1978.

Retail prices rose 17 percent for red meat, 12 percent for fresh fruits and vegetables, 10 percent for bakery products, 8 percent for fats and oils, and 5 percent for poultry.

Dairy product prices went up 12 percent, while egg prices averaged 10 percent higher.

Prices of inputs, such as fuel and food containers used by food processors and retailers, rose 13.5 percent.

Average hourly earnings of workers in processing and retailing rose 8.3 percent.

After-tax profits of food chains with over $100 million in annual sales averaged one percent of sales for the second and third quarters combined of 1979, compared with 0.9 percent during the same period in 1978. After-tax profits of food manufacturers averaged 3.4 percent of sales during the first 9 months of 1979, compared with 3.2 percent a year earlier.

Single free copies of "Developments in Marketing Spreads for Food Products in 1979" (AER-449) are available from ESCS Publications, room 0054-S, USDA, Washington, D.C. or call 202/447-7255; please indicate your zip code.

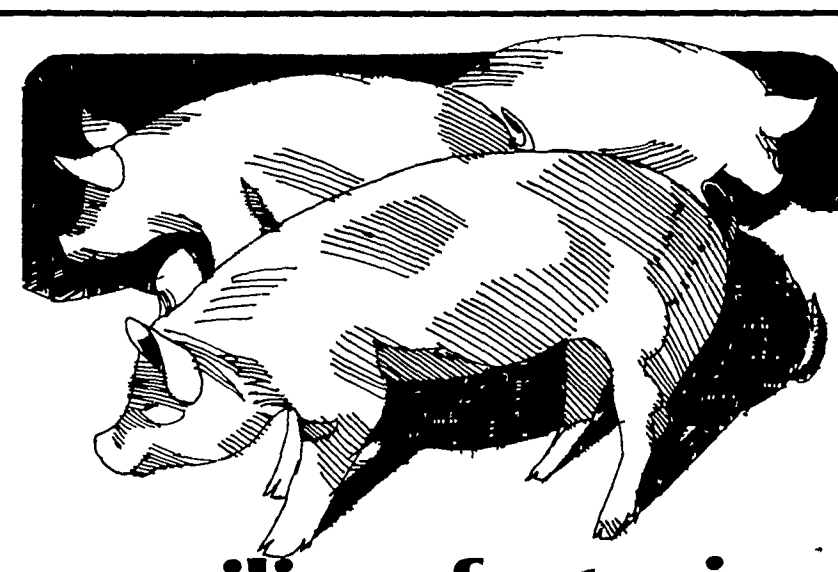
Star Rider Horse Club

FLEMINGTON, N.J. — The All English Horse Show was the main topic covered at the recent meeting of the Star Riders 4-H Club.

Presentations were given at the meeting on "Snakes" and "Tack Cleaning."

The club's next meeting is scheduled for April 4 at the Cain residence in Glen Gardner. Repoted by April Harrison.



Fertilizer factories

A single 150-lb. hog yields about $11.00 of fertilizer value a year Multiply that by the number of hogs you raise and you have a substantial supply of N, P, K you don't have to buy

But it has to be managed. That means the right handling and spreading equipment. Calumet vacuum tanks are built to last with heavy-duty components and a choice of two vacuum pumps — both engineered to load fast and run cool

To get the most value from hog manure, pair your Calumet vacuum tank to a Calumet 2 or 4-shank soil injector and put manure where it does the most good

Take advantage of the value produced by your living fertilizer factories — with Calumet manure management equipment

Members of the Lebanon County Holstein Club visited Round Oak Farms, home of the famous Round Oak Rag Apple Elevation, a bull who left his mark on the Holstein breed. They also visited seven other top dairy operations in Virginia on their two day tour.

Lebanon farmers visit Round Oak, other Virginia dairy farms

LEBANON — Forty Lebanon County Holstein breeders and agri-business men visited breeder herds in Virginia and the Shenandoah Valley recently. The two day tour featured stops at eight well known herds throughout the state.

The first stop was at Har-Vue Farm, operated by Jack Hardesty and Sons. The 300 cow herd has a herd average of 17,000 pounds of milk and features a large number of Excellent and Very Good cows.

The Hardesty sons, all graduates of Virginia Tech, are enthusiastic students of breeding good cattle and know the herd as well as their own family.

Other herds visited on the tour were: Roc-Hil-Val Farm, owned by Bernie Frye; Rocby Holsteins, owned by the Nelson Gardner family; Mid-Rock, owned by W. G. Blose; John Hunt farm; Oak Green Farm, owned by Richard Harris; and Round Oak Farm, owned by the Ronald Hope family.

The tour was highlighted by a visit to Round Oak at Purcellville, Virginia. Well known as the home of Round Oak Rag Apple Elevation, a nationally known herd sire, the herd featured about 30 Elevation daughters, of which 23 are classified Excellent.

Overnight accommodations were arranged for the tour participants at the Sheraton Motel in Harrisonburg, Virginia. Everyone attended an evening banquet at Lloyd's Steak House. Guests of the evening were Mr. Jim McKenna, Rockingham County Agent and John Miller, Executive Secretary of the Virginia Dairymen's Association.

McKenna presented a discussion of the nature and development of the dairy industry in Virginia and its importance to the economy of the state. Miller gave a detailed explanation of the development of a valuable working relationship between dairymen, dairy organizations and the land grant college. A strong leadership and cooperation has been developed and nurtered among these segments of the industry.

Arrangements for the Virginia tour were made through the cooperation of the Lebanon County Holstein Tour Committee and Dairy Specialists at Virginia Tech and local county agents in the counties visited.

Club Tour Committee members are: Irvin Horst, Ray Sattazahn, Raymond Getz, Clifford Groff, Kenneth Sellers, Albert Moyer and Newton Bair.

Cooperating county agents were: Lance Kauf, Clark County; Ned Conklin, Shenandoah County; Jim McKenna, Rockingham County; Roy Heltzel, Culpeper County; and Bill Harrison, Loudoun County.

Gerald Jones, dairy specialist at Virginia Tech, Blacksburg, Virginia, coordinated the tour in cooperation with Newton Bair, Lebanon County Extension Agent.

The Round Oak operation today boasts about 30 Elevation daughters, of which 23 are classified Excellent. Farmers had ample opportunity to inspect udder attachments and toplines on the tour.

Super slurper swells out all over

PEORIA, Ill. - Super slurper, the starch-based absorbent that swells as it jells hundreds of times its weight of water, is "swelling out all over."

Reports received at the U.S. Department of Agriculture laboratory from industrial and research resources indicate that production will have to continue increasing to keep pace with use and company expectations.

Planting uses alone could eventually account for more than 100 million pounds a year of an absorbent that jells hundreds of times its weight of water, estimates William M. Doane, Northern Center research leader.

"Earlier reports pointed toward absorbent soft goods as the most promising application," says Doane, "but planting uses emerged as the leader this year."

Research sources report corn, soybean and milo sorghum yield increases ranging from 10 to 50 percent in seed coating field tests.

Several water-jelling absorbents, made by chemically grafting man-made acrylic compounds to cereal grain starch and hydrolyzing the combinations, were introduced as super slurpers, 1973-77, by Doane, M. Ollidene Weaver, George F. Fanta, Edward B. Bagley and other scientists at the Northern Center of Agricultural Research, a division of the U.S. Department of Agriculture, located in Illinois.

The super slurpers, absorbing 300 to 5,300 times their own weight of pure water in the laboratory, established new standards of absorbency and a name for the standards, the products and the industry. Henkel Corporation, formerly General Mills Chemicals, Minneapolis, is taking steps to trademark "Super Slurper."

Three companies produce the starch-based absorbent. Henkel licensed the first USDA patent application in August 1974; Super Absorbent Company, Lumberton, N.C., in March 1976, and Spenco Medical Corporation, Waco, Tex., in October 1977. A total of 45 companies or individuals have licenses on three USDA patents now.

"We have extensive seed coating technology," said Gilmore of Henkel Corporation. "It permits, adding thin coatings, which do not change seed size substantially, or pelletizing, which does increase seed dimensions significantly.

"We can coat seeds as small as guayule, as large as castor beans and as frail as peanuts." Guayule is a rubber-producing desert plant under development as a United States rubber crop.

Gilmore says seed coating research is continuing on vegetables and other crops including corn, sorghum, soybeans, sugar beets, guar and jojoba, a desert shrub that produces a liquid wax replacement for sperm whale oil.

Super slurper coatings "form a gel capsule of water around each seed," Gilmore says. "The amount of coating is extremely important in providing water uptake without drowning the seed.

"The coatings lead to an increase in stand from lower seeding rates, better emergence, more uniform and vigorous stands and higher yields." He says the coatings help especially in dry land planting, under irrigation, on low quality seed, and in double cropping, for example, soybeans in wheat.

He says other materials can be added to super slurper seed coverings to protect against disease and insects, break down seed coat impermeability, absorb toxic residues of herbicides and stimulate root growth or the germinating embryo. A test covering on cottonseed, for example, contained fungicide and embryo stimulant.

Slurper-coated corn "planted under moderate to severe moisture stress" produced 4,100 more plants an acre than "naked seed" produced and yielded 13 more bushels than the 123-bushel control yield in field tests by Dale E. Behmer of American Ag & Bio-Tech.

Behmer says coated soybeans broadcast in chemically killed sod "showed 7 to 28 percent stand improvements" over uncoated beans in Arkansas tests. Highest yield increase from coating soybeans was 18 bushels an acre.

Coating milo seed increased yields in a range of 17 to 49 percent on chemically killed sod in Behmer's Arkansas tests.

At least one step beyond planting coating seed is the possibility of sowing pregerminated seed in a super slurper gel. "The gel protects the exposed root from damage and facilitates planting," says Alan Taylor, research assistant to James Motes in the Oklahoma State University Department of Horticulture.

Taylor says the gel-seeding technique offers "earlier emergence, better and more uniform stand and greater ability to withstand environmental stresses. It can be used on flower, tree or crop as well as on vegetable seed."

He says that 20 acres were planted with pregerminated vegetable seed this year. "Greenhouse growers will benefit in the future by sowing pregerminated seed," Taylor says.

"The significance to consumers may not be seen for several years. The question is will the technique be accepted by the vegetable industry and to what extent."

Florida nurserymen and other growers use super slurper to start and grow high value vegetables, foliage plants and ornamentals in trays, beds, pots and sandy fields where water is vital and expensive.

James J. Quinn, Industrial Services International vice president for agriculture, says the absorbent cuts water use 90 percent on bedding plants and seed trays, cuts misting time on foliage plants and shortens the usual 4 to 5 weeks between potting plants and marketing them by about a week because the plants develop faster in slurper-treated soil.

Quinn says farmers, greenhouse operators, nurserymen, condominum owners, landscapers and bare-root shippers use the absorbent in areas ranging from mini trays to acreages for all kinds of plant growing. "The only exception is hydroponics," he says.

Musser Forests, Indiana, Pa., uses and markets super slurper as Water Gel for root coatings. "We think this is just the product we have been looking for to reduce losses in bare root trees," reports Fred Musser, Jr.

He estimates that Musser Forests coated the roots of 2.5 million trees for shipping in 1979. Large orders are not root coated now because water held on the roots adds to the transportation cost.

"We feel that super slurper will retain moisture around roots of plants during shipment better than other materials we have tried," Musser says. "It also appears to increase the survival rate of bare root plants for field planting in hot, dry weather."

This year's experience gave an example, Musser says. The nursery completed its own plantings late – in the hot, dry weather of June. By the middle of September, 85 to 90 percent of the root-coated seedlings were growing. Survival rate of untreated seedlings was zero.

Tips on catching the big one

LANCASTER — A lively minnow will attract the attention of a passing fish far better than a lethargic one. To make your minnows livelier, clip off the tail fins. The "clipped" minnows have to work much harder to maintain equilibrium, thus are more active.

Some fish smell so fishy when you clean them that the odor lingers on your hands and in the sink. You can neutralize the odor by washing hands and sink in a mixture of tomato and lemon juices.

Covers for your reel and rod handle can be purchased, or you can make your own at far less expense. Just slip a plastic bag over reel and rod handle, and secure the opening with a wire bag sealer.

It doesn't count much to set a hook with all your might if you dont' first reel all the slack out of your line. For each foot of slack you need one foot of movement in your rod tip.

So, for best hook-setting efficiency reach your rod tip toward the fish as far as possible, reel all the slack out of your line, then give it to him.

Demand needed, not production soybean group says

WASHINGTON, D.C. — The American Soybean Association has asked Congress to help create expanded demand for soybeans rather than accept supply proposals that could artificially stimulate soybean production.

"The short-term outlook for soybeans is not as bright as it has been but we strongly believe the free market forces must continue to be the prime determinant of U.S. soybean production and demand," ASA First Vice President Frank Ray, a Baker, Florida, soybean grower, testified at Monday's Senate Agriculture Committee hearing.

"We believe the federal government should expand its market development assistance to help in ASA's efforts to expand world demand for soybeans and soybean products. We feel Congress should avoid 'quick cures' which in the long run will damage the soybean industry and cost taxpayers millions of dollars."

The Senate hearing was called to determine possible changes in the U.S. farm program as a result of President Carter's embargo of shipments of grain and soybeans to the Soviet Union.

In an effort to boost soybean demand to replace the Soviet market, ASA urged Congress to appropriate an additional $2 million for USDA funding of soybean market development efforts.

"While the additional $2 million is no small amount, it is much less than the $35 million that USDA seems determined to spend on storage payments for a soybean reserve that growers do not want," Ray testified.

"This additional $2 million combined with the current $2.8 million simply means that the government will match the $4.8 million growers invest. Expanded international markets for soybeans and soybean products are the best insurance against price declines in the future and we urge USDA to increase its assistance in developing those markets."

ASA also requested Congress to expand direct Commodity Credit Corporation export credits program beyond the $800 million authorized in the current fiscal year.

"The direct CCC export credit program has been an important tool in expanding foreign markets without any net cost to U.S. taxpayers," Ray said.

"Yet, no additional direct loans have been authorized in the current fiscal year and the president's FY1981 budget calls for the elimination of such loans in lieu of a less effective loan guarantee program. It makes little sense to soybean growers for the federal government to cut back funding for a money-making loan program at a time when the need to expand foreign markets is greatest."

In its testimony, ASA asked Congress to determine why the administration had failed to implement intermediate-term credit provisions authorized by the Agricultural Trade Expansion Act of 1978.

Theses loans would be used in key importing countries for construction of facilities that would enhance agricultural imports.

ASA's Ray said the organization supports Senator Herman Talmadge's resolution that would allow soybean producers not complying with the 1979 feed grain set-aside to be eligible to participate in the soybean loan program.

"ASA in January asked Secretary Bergland to eliminate this cross-compliance provision," Ray said.

"To date, however, the Department of Agriculture has not chosen to take this step in providing soybean producers with an important marketing tool.

"ASA believes removal of the cross-compliance provision is justified because soybean producers should not be penalized by overproduction in the feed grain sector. Removal of this provision would allow thousands of soybean growers to obtain needed financing while maintaining marketing control over their soybeans."

The soybean association repeated its opposition to both a federally-financed soybean reserve program and a high soybean loan rate.

"ASA strongly opposed the establishment of a soybean reserve program similar to those in effect for feed grains and wheats," Ray told the Senators.

"ASA is convinced such a reserve program is neither justified by current market conditions nor would it provide any long-term benefits to soybean producers. In fact, we believe a reserve program would distort normal soybean production and marketing and result in increased soybean production in the U.S. and around the world.

"We also oppose any increase in the soybean loan rate. We feel the current $4.50 level is sufficient to provide soybean producers with sufficient capital to cover the current out-of-pocket expenses for their 1980 crop. A higher loan rate, as proposed by Senator McGovern, would stimulate overproduction and allow our foreign competitors to undersell U.S. soybeans."

Window shades cut energy costs

MEDIA — The U.S. Department of Energy claims that windows are the second worst squanderers of energy in the home, says Greta C. Vairo, Extension Home Economist with the Penn State Extension Service.

Air infiltrates homes through cracks in loose-fitting windows. Caulking and weatherstripping helps, but glass is an excellent conductor of heat, so warm air is easily transmitted through windowpanes.

Tests have demonstrated that window shades, properly installed and used, can slash energy consumption and fuel costs, they add a handsome decorative touch while cutting heat loss in winter and shutting out hot sun in summer. Window shades available today are attractive as well as practical and can be used as an alternative to draperies.

Window shade fabrics vary widely in texture, from sheer to translucent to opaque. Colors and patterns are almost unlimited.

If you want window shades to match draperies or wallpaper, they can be laminated with the same fabric or paper. There are also shades that are color-coordinated with paint. Roman or bamboo shades add to variety. The type of window and the desired decorating effect will determine the shade and mounting you choose.

Brackets are available to pull window shades down from the back of the roller, or from the front. There are also ceiling brackets and brackets that can be installed at the floor or sill level and operate on pulley cords. These would provide privacy and control sunlight and fresh air as needed.

For maximum energy-saving performance, window shades should be installed properly. The shades should be inside the window frame and about one inch from the glass. This forms an effective barrier between the glass and the shade.

To get the tightest seal and to create the best blocking deflection, the gap between the vertical edge and the window frame should be very narrow.

How to beat alfalfa insect oats

LEBANON — Sweeping elds with an insect net is ecoming an established ractice for an increasing mber of Pennsylvania rmers who monitor pest pulations and spray falfa only when there is ed.

As one grower remarked, t saves energy and spray aterials. This in turn gives a better image with ople who are concerned out the use of too much ray material."

Last year, 20 farmers is Lebanon County used the alfalfa insect management program developed by Penn State entomologists. They were trained to monitor fields and evaluate damage from alfalfa weevil and potato leafhopper. Farmers found damage and populations varied among farms.

Lebanon County Extension Agents Newton J. Bair and Denis W. Hoke estimated at least $6000 worth of pesticide was eliminated because it was not needed.

In Adams County, seven farmers used insect nets to monitor populations of potato leafhopper in alfalfa during the 1979 crop season. Extension Agricultural Agent John H. Schwartz says these farmers reduced by two the number of sprays that normally would have been applied.

Schwartz notes, "The first three cuttings did not require spraying for this insect."

Other Adams County growers were advised by Schwartz about the best time to spray for alfalfa weevil. This increased the effectiveness of the spray. He says, "The advice was based on tabulation of degree days." For some farmers the information eliminated one spray application.

Bair and Hoke report the alfalfa weevil management program used by Lebanon County farmers put the pesticide on the crop at optimum times and saved many more dollars by giving better control.

Farmers and university personnel report that some effects of the program are hard to evaluate. They can't put a figure on reduced damage to plants due to fewer trips over fields. Nor is it easy to put a value on improved management of the crop by a farmer who periodically walks over his fields.

Extension Entomology Specialist Stanley Gesell says that across the state in 1979 both alfalfa weevil and potato leafhopper populations were below the economic threshold in most fields.

About 200 farmers following the program cut back on the usual number of sprays for weevil or leafhopper. About 90 percent of the farmers saved three spray applications. Another 10 percent avoided two applications, Gesell said.

He estimates time involved in monitoring a 20 acre field for weevils and leafhoppers required about two hours. That's about six minutes and 50 cents per acres, at $5 per hour for labor.

Gesell says the average savings per grower was about $20 per acre during the 1979 crop year.

Another measure of the program is interest shown by those not participating. Around the state the neighbors of farmers in the 1979 program noticed the results and are asking for information this year.

Alfalfa growers interested in using the Penn State insect management program this spring should contact the agricultural agent at the office of extension service located in the county where the growers resides.

Estate Planning Stressed

NEW DANVILLE — The importance of good estate planning was outlined by Richard Denison, of the staff of the Pennsylvania Farmers' Association, at the Spring Banquet of the Lancaster County Farmers' Association Tuesday night.

"Estate planning involves some of the most important farm financial decisions to be made," Denison said.

The four major objectives of estate planning were outlined by Denison. These include providing for the surviving spouse, minor children and disabled dependents, movement of the farm to the next generation, equitable distribution to heirs and keeping tax liability to a minimum.

He defined a will and use of a trust as two basic effective tools to use in estate planning.

Denison heads both the PFA Legal Staff and Farm Management Business Analysis.

Reports on their attendance at the Youth Conference were given by Nelson Shaiebly and Owen Hartz. This year's conference will be held at Elizabethtown College June 24 - 27. Names of candidates to attend the conference, a male and a female student who have completed their junior or senior high school years, are now being accepted.

In his president's message, Earl Newcomer reported that the county's membership goal of 1,301 had been topped by two members.

The evening's program also included a slide program of displays at Farm-City Week at Park City and a humorous skit by Mowery Frey and Marty Armstrong based on the Abbott-Costello "Who's on First" routine.

Western riding clinic held

CLEMENTON — Rocky Dare, professional horse trainer from Salem, N.J. conducted a western riding clinic for 4-H members at the Camden County 4-H Center last Saturday.

"4-H'ers gained practical experience at the clinic", said Joan Podosek, 4-H leader with the Silver Spurs Club and secretary-treasurer with the Camden County 4-H Equine Advisory Board. "Rocky covered western equitation, western pleasure riding and riding and reigning categories," Podosek concluded.

All participants attended the clinic with their horses and were evaluated on their riding habits.

The experience the 4-H'ers received at the clinic will assist them as they prepare for the Camden County Western Qualifying shows, May 10, June 7 and 28, all held at the 4-H Center at Lakeland.

Hunterdon 4-H Horse Council busy schedule

FLEMINGTON, N.J. — At the March meeting of the Hunterdon County 4-H Horse Council, it was announced that the mare for the Quarter Horse Breeding Project will not be available this year.

However, there is a free stud service at Doll House Farm to a grey thoroughbred, 15.3 hands.

The Equestrian Contest will be held June 26.

The mandatory rules meeting for qualifying shows has been set for April 24. Members must attend this meeting and bring their up-to-date record books with them in order to show at the qualifying shows.

Other coming events include: the treasure hunt, May 17; two work days, April 26 and May 4; and the State 4-H Horse Show, August 23. Reported by Nancy Funkhouser.

Pa. N.J. differ on land policies

WEST CHESTER — The neighboring states of New Jersey and Pennsylvania have conflicting viewpoints on how land preservation should be carried out.

Representatives of the two states gave their divergent views at the Rural Preservation Conference held at West Chester State College last week.

Samuel M. Hamill, Jr., Executive Director of the MSM Regional Study Council, Inc., a principal consultant to the New Jersey Department of Agriculture, offered the opinion that governmental policies must move in new directions away from existing policies, such as zoning.

Caren Glotfelty, Chief of the Division of Planning Assistance, Pennsylvania Department of Environmental Resources, said that land preservation must be left largely to "tried and true" measures, such as zoning.

These conflicting approaches to rural land preservation were given in a workshop on Preservation Planning Strategies.

Hamill explained that the network of government policies in the past have been oriented toward growth.

"We must stop thinking in terms of managing growth," Hamill said.

"We must change our policies and move away from such policies as zoning and start thinking in terms of promoting agriculture."

Two primary agricultural considerations must be emphasized concerning governmental policies on land preservation, according to Hamill.

The effect of such policies on agricultural profitability must be considered, he said, along with how much they encourage long-term agricultural investment in the future.

Pennsylvania has not been very successful with farm land preservation, according to Glotfelty.

"Several bills to create agricultural districts have been proposed," she said.

"But none of the bills are expected to be adopted. It doesn't make any difference because they contain no advantages for farmers other than removing some harrassing activities of the DER."

Land use policies in Pennsylvania, she continued, will be left largely to the local municipalities.

"For the most part, we will need to depend on the tried and true measures of zoning and subdivision planning to implement rural preservation."

Keeping Hams

Refrigerate whole hams no longer than 7 days, cured half hams, slices of fresh ham, no more than 3 to 5 days Fresh hams may be kept in the freezer from 4 to 8 months, but cured hams no more than 1 to 2 months.

Cumberland Farmers support Trail policies

NEWVILLE — The Cumberland County Farmers' Association held it's monthly board meeting last Thursday at the home of Harold Myers. Those present were President Rodger Hoke, Fred McGillvray, Robert Jamison, Donald Heishman, Lee Davidson, Mike Berkheimer, Marlin Miller, Harold Myers, Dave Muzzy, and Shirley Heishman.

The Local Affairs Committee met March 4 and Sheldon Brymesser Monroe Township Planning Commissioner and Glenn Kimmel from the ASCA office were there to present information relating to the relocation of the Appalachian Trail through prime farm land.

The committee unanimously voted to support the policy adopted by supervisors of the four Cumberland County Townships effected. The committee discussed the need for all county PFA members to actively become involved with land preservation efforts in their local townships.

Members discussed the bridges in Cumberland County that are being checked for overweight vehicles and the extra gas it takes for going extra miles to avoid these bridges. The board suggested looking into what can be done to help correct this problem.

The Harrisburg Legislature Tour has been changed to April 29.

The next board meeting will be held April 17 at Fred McGillvray.

Safemark Committee reported a meeting was held March 18 and reported there will be a savings of 8 to 10 percent on all tires purchased between March 31 and April 15.

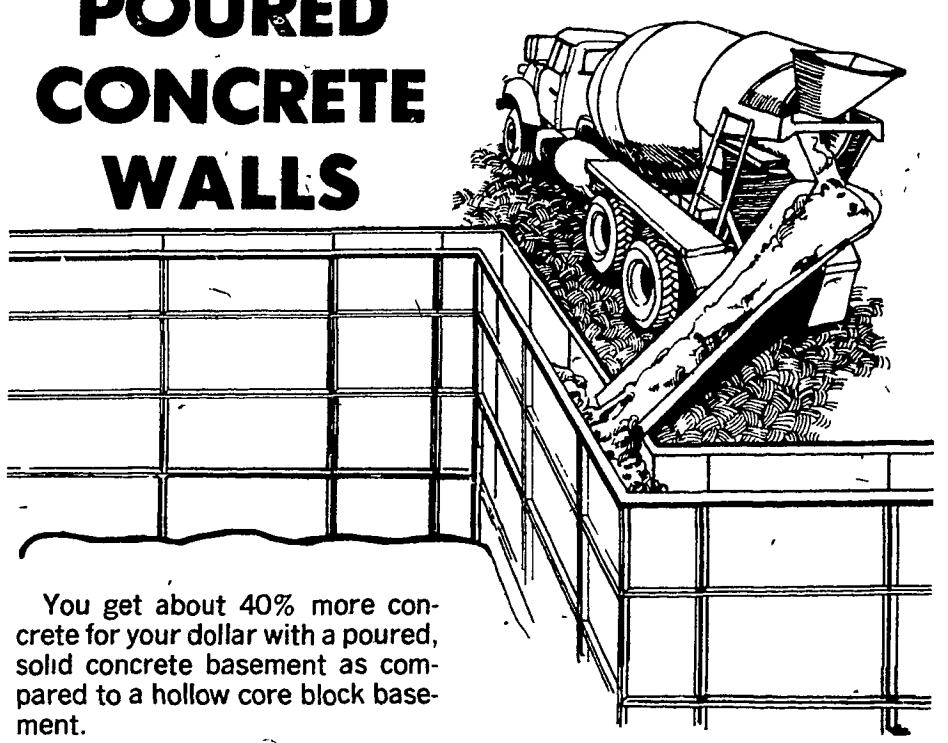
START WITH THE BEST!
POURED CONCRETE WALLS



You get about 40% more concrete for your dollar with a poured, solid concrete basement as compared to a hollow core block basement.

A poured solid concrete basement weighs about 50 lbs. more per cubic foot! Far denser. What's more, poured solid concrete walls are monolithic . . . there are no joints!

This is why laboratory tests show poured, solid concrete basements have many times the flexural and compressive strength to withstand the side and down pressures caused by earth, wind, water and building loads and the material density to resist water penetration.

Best of all, thanks to modern and efficient construction techniques, poured, solid concrete basements are competitively priced.

Solid Concrete For:

- Manure Pit Walls
- Hog House Walls
- Barnyard Walls
- Chicken House Walls
- Retaining Walls
- House Foundation Walls
- Silage Pit Walls
- Cistern Walls
- Concrete Decks
- Concrete Pit Tops

Farm Business News

NEWTON, IA- Winpower Corporation is offering a new, fact filled 'What should you know before you buy any alternator?'

A 12-page, two-color guide from Winpower answers such questions as "Do you even need an on-the-farm emergency power source"; and, "How to choose the model that's powered for your place."

The guide, being made available to farm prospects through Winpower representatives, answers a variety of additional questions regarding alternator quality, performance and selection. For additional information, contact: Thomas A. Noble, Director of Marketing, Winpower Corporation, 1207 First Ave., East Newton, IA 50208.

IH moves Eastern office

HARRISBURG — International Harvester's District Sales Office for Central and Eastern Pennsylvania and New Jersey has been moved from its former International Harvester warehouse location to Suite 102 at 800 Corporate Circle, Harrisburg, according to District Manager, Harold E. Bower.

Bower said 800 Corporate Circle is located at the intersection of Interstate 81 and North Progress Avenue. The District's mailing address will remain the same - Box 1357, Harrisburg, Pa 17105. He said the new District Office phone number is 717/545-4269.

The District Sales Office has been located in Harrisburg since November of 1978, according to Bower. It is one of eight districts the IH Agricultural Equipment Group has in the Northeast Region of the U.S.

"Harrisburg is an excellent location for a district office because it is centrally located between the East Coast and the western border of the district which ends around Altoona. This gives us an excellent opportunity to provide immediate service to our agricultural equipment dealers in Pennsylvania and New Jersey," Bower said.

New bull enters service

Boss Man, Curtiss Breeding Industries' new well-pedigreed young sire entered service on his first birthday.

Purchased by Curtiss President Tom Neff at the World Dairy Expo on October 5, 1979, Boss Man's auction sale price set a new record for the Expo's World Premiere Dairy Cattle Sale at Madison, Wisconsin.

Boss Man is a son of Bootmaker, a nationally acclaimed sire with more than 25,000 tested daughters. He has a full sister that is Excellent with over 35,000 pounds milk and a Cow Index of +2156. His dam — Niederjohns Sensation Pollyann — is excellent and 3E with three milk records over 30,000 lbs. and a Cow Index for milk of +1953. This dam and daughter pair is believed to have the highest combined Cow Index of the breed.

Small wonder that ringside observers at the Premier subscribed unanimously to the "well-pedigreed..." rating and spoke of this young bull's potential as rivaling that of Curtiss' great Astronaut.

Curtiss Breeding Industries, at Elburn, Illinois, is one of the leading artificial insemination organizations in the United States, and is the only major AI organization which is owner-operated. Curtiss celebrated its 30th anniversary in 1979, having been founded in 1949 by the late Otto Schnering, president and founder of Curtiss Candy Company and a well-known and long-time dairy cattle breeder.

Trio graduates from auction school

WILLOW STREET — Steve Adriance, R5 Montrose; Harvey Clary, R4 Montrose; and J. Edward Leaman, R1 Willow Street, have returned from Mason City, Iowa where they completed a course at the Reisch College of Auctioneering.

They received training in all phases of Auctioneering including real estate, registered livestock, general farm, antique and sale managing.

They also received on-the-spot training by selling at real public Auction sales during the term, where they demonstrated their ability as an Auctioneer.

There were 141 students graduated from 29 states and Canada. There were six women students in the class.

The Reisch World Wide College of Auctioneering is the largest college of its kind in the world, and has been operating for over 44 years with over 17,000 graduates.

Steve, Harvey and Edward are fully qualified to conduct any, and all, types of Auction sales using the most successful and advanced methods in the Auction profession.

Steve and Harvey will be serving their state apprenticeship with Steve's father, Jim Adriance of Montrose. J. Edward Leonard is currently seeking a sponsor for his apprenticeship.

Bachman's attend MFS, Inc. convention

FALLSTON, Md. — Mr. & Mrs. Thomas Bachman of Fallston, Md., distributors for Modern Farm Systems, Inc., joined nearly 350 other mfs. distributors and their personnel from the United States at the Sarasota Hyatt House in Sarasota, Florida, for the twelfth annual Modern Farm Systems, Inc. National Sales Convention, earlier this month.

The convention was conducted by Modern Farm Systems, Inc., President, Don Reimer, and Sales Manager, Bob Marsh.

A seminar was conducted by Tom Haggai of High Point, North Carolina, an internationally known leader in the business world. Haggai presented the group with pertinent remarks reminding everyone that they needed to get concerned and involved in all areas of public life - from the township and school level thru to the state and federal level if our nation is to survive in the form we now know it.

Ham it up, America

CHICAGO, Il. — "Ham It Up, America. Enjoy Pork For Lunch." is the new bumper sticker being offered by the Wayne Feed Division of Allied Mills, Chicago-based feed and food company.

As a major supplier of animal feed for hogs, Wayne Feeds is offering the bumper sticker as a promotional device to encourage the American consumer to eat more pork and pork products. The company expects to distribute 100,000 of these bumper stickers throughout the United States.

A 12-month ad program to support the promotion will appear in the Iowa Pork Producer magazine beginning in April. Bumper stickers can be obtained by writing directly to Wayne Feeds Advertising Services, Box 537, Ft. Wayne, Ind. 46801, or may be picked up at a Wayne Feeds dealer.

Brubaker equipment announces new sales person

MANHEIM — Roy A. Brubaker has announced the appointment of Stanley L. Miller of 501 Doe Run Rd., Manheim, to the sales position formerly held by Howard Erb, who recently passed away.

Miller is a graduate of Manheim Township High School and completed the Dale Carnegie sales course. He was born and grew up on a farm and had some sales experience with a local feed company.

Since 1947 the Brubaker farm equipment firm located southwest of Lititz, has been selling and servicing farm supplies and machinery including Sperry New Holland, Allis Chalmers, Van Dale, and Starline.

Sigler joins Farm Credit

YORK — Richard Zook, General and Associate Manager of the Federal Land Bank and Production Credit Association of York, announced the appointment of James K. Sigler to the Associations' field staff.

Sigler is a native of western Pennsylvania. He received a B.S. degree in ag education from Penn State University in 1961. He taught vocational agriculture two years at Northwest-Bradford High School, Rome, Pennsylvania, and three years at Marathon Central High School in New York State.

During the past thirteen years, he owned and operated a 400-acre, 70-cow dairy farm in Broome County, New York. He recently served as President of the Marathon Central High School, School Board and as Chairman of the Broome County Extension Dairy Advisory Committee.

Jim will be responsible for providing agricultural credit in south central and southwestern York County.

He and his wife, Joy, a Registered Nurse, and two sons, reside at Brodbecks R1.

Martins tour Madrid

MANHEIM — Mr. and Mrs. Galen Martin of Manheim; and Amos Horst, Clear Springs, Maryland, toured Madrid, Spain and the Costa del Sol recently.

Their trip was part of the Curtiss Breeding Company's 30th anniversary Award program.

They were among 16 Curtiss distributors to make the trip.

FARMERS:
Now Is The Time To Topdress Wheat, Barley, Rye With 30% Nitrogen Solution or Liquid Blend Fertilizer
Also Seed Corn & Soybeans Available. Soil Conditioner Can Be Added To Nitrogen or Liquid Fertilizer.
ASK US ABOUT IT.

Since SOIL CONDITIONER improves soil texture and water penetration, root development also improves. Root growth goes deeper into the subsoil for stored moisture and minerals. Roots produce more fine roots and root hairs, which allows roots more places to take up nutrients in the soil.

The now available nutrients in the soil are due in part to increased soil life. Because SOIL CONDITIONER has helped to cause an increase in soil life, there are now more available nutrients in the soil. Let SOIL CONDITIONER LEND "a helping hand" in your soil and water management.

Puerto Rico halts U.S. egg imports

SAN JUAN, P.R. — The Puerto Rican Department of Agriculture has suddenly halted the sale of imported eggs, leaving U.S. exporters and Puerto Rican importers with quantities of eggs in various stages of transit, and uncertain as to the extent and duration of the action.

Most troublesome as of this writing are shipments estimated at 11-15 trailer loads which are in Puerto Rican ports, having been denied entry, according to the United Egg Producers.

It was announced last week that importers were bringing eggs into the country without having the necessary permit, and that as of March 10 there would be no more imports.

According to some importers, permits had been properly applied for, but had not been issued to anyone since last year's permit expired December 31.

Importers said their Secretary of Agriculture had stated that no permits had been applied for but they believed he had been misinformed on that point.

Meanwhile, U.S. producers with eggs prepared for export, including stamping, found themselves with the figurative rug pulled from under their feet. Also at issue will be the assumption of responsibility in the event that any eggs are reshipped to the U.S., which is currently the Puerto Rican Agriculture Department's position.

UEP, in cooperation with many state organizations, individual producers and departments of agriculture, is pursuing every available avenue to help solve the problem. They are working on both the immediate aspect of the disrupted flow of eggs and the longer-term consideration of trade restrictions.

Restrictions of imports are not a new problem with Puerto Rico, the importation of small eggs having been totally stopped many months ago. Of importance with respect to the import issue is the fact that attempts have been made over many years to stimulate increased production to Puerto Rico.

Importers in Puerto Rico have been encouraged by their Department of Agriculture to purchase the locally produced product.

It is esimated that the U.S. exports an average of about 15,000 cases per week to Puerto Rico.

In comments prepared for presentation to legislators pursuing the issue on industry's behalf, UEP pointed out that the Puerto Rican move represented an "arbitrary policy on U.S. egg imports," which denied producers "normal market opportunities."

UEP pointed out the injustice of allowing Puerto Rico to "unilaterally and without consultation ban a perfectly wholesome U.S product from their territory."

District sells 53,000 seedlings

LANCASTER — More than 53,000 tree seedlings were sold during the sixth annual Lancaster County Conservation District tree sale which ended last Friday.

Some 1168 property owners paid $19,000 for the seedlings, which will be delivered to Long's Park for pickup on the morning of April 12.

A spokesman for the district said the orders ranged all the way from a dollar for one hardwood seedling to one order for 1000 white pines.

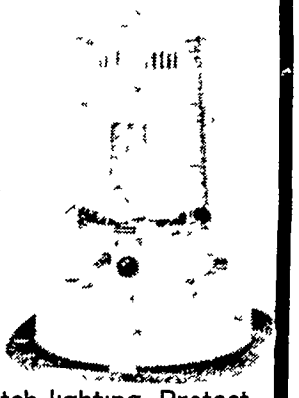
White pine, in fact, was the most popular variety in this year's sale with 11,000 trees ordered. Blue spruce was next with 10,400, followed by hemlock with 7700 orders. The most popular hardwood was red oak, with 2000 orders.

This year's dollar volume was up considerably over last year's $12,000, but the number of trees sold fell short of the highest year when over 100,000 seedlings were sold.

The seedlings were supplied by three nurseries in Indiana County, except for the hemlocks which came from York County. Most of the buyers were reportedly small property owners rather than farmers or landscapers.

Money from the sale of the seedlings will be used by the district for programs and office equipment. The funds will also be used to pay for a week-long conservation camp at Camp Mack, near Schaefferstown. Last year's camp had 20 youngsters between the ages of 13 and 16 participating.-DW.

KEROSUN PORTABLE HEATER
OMNI 15



The versatile personal, "take-me-anywhere" heater. The weight is only 11 lbs. Carry it along to the work shop, garage, cow barn to keep warm while you work. Great for camping.

Burning duration is over 18 hours. Built-in battery powered igniter for no-match lighting. Protected by automatic shutoff in case of tip-over. Dimensions: 14½ w (at base) x 18½" h. white baked-enamel finish. Clear View fuel gauge. Output: up to 9,024 BTU/hour.

LEGISLATIVE SCORECARD

©Lancaster Farming Newspaper
Week Ending March 19, 1980

The process by which bills are drafted, considered and enacted into laws is complex, lengthy and confusing even to the most attentive observer Each week on these pages we attempt to provide a roundup of legislative highlights, but in the process, we cannot call attention to the many other bills languishing or boiling in various stages of the legislative process

This scorecard, which we plan to update every week the legislature is in session, is an attempt to provide as complete a rundown of farm legislation as we can

HOUSE AGRICULTURE COMMITTEE:

Bills under consideration by the Pennsylvania House of Representatives Agriculture Committee, not yet placed on the calendar for consideration by the full House

Bill No.	Prime sponsor/ Party/District	Brief Description	Date Referred to Committee
HB 92	Goebel/R/Allegheny	A bill to abolish the milk marketing board	2-6-79
HB 228	George/D/Bucks	Amends clean and green legislation to spell out duties of county assessor, and to define forms and land split-offs	2-12-79
HB 317	Thomas/R/ Snyder-Union	Would amend food law to set nutritional requirements for imitation foods	2-14-79
HB 541	Cessar/R/Allegheny	Would abolish the Milk Marketing Board	3-6-79
HB 724	Thomas/R/ Snyder-Union	Increases salaries of chairman and members of the Milk Marketing Board	3-19-79
HB 738	Noye/R/Cumberland-Perry-Juniata	Would amend clean streams law to prohibit any agency from requiring fences to keep livestock out of streams	3-19-79
HB 758	Stuban/D/Columbia-Montour	Would give Pa Dept of Agriculture power to certify marketing and bargaining associations for certain commodities, and to regulate the marketing and bargaining process	3-20-79
HB 759	Stuban/D/Columbia Montour	Would authorize the creation of agricultural districts	3-20-79
HB 818	Thomas/R/ Snyder-Union	Would amend clean and green law to provide for recording of preferential assessment agreements and to continue preferential assessment on original tract in case of split-offs	11 13-79
HB 828	Sirianni/R/Sullivan-Susquehanna-Wyoming	Would set procedures for the termination of milk handling contracts, and would provide enforcement, penalties and remedies	3-26-79
HB 847	Yahner/D/Cambria	Amends clean and green to more clearly define "roll-back tax" and "split-off"	11-13-79
HB 995	Burns/R/Bucks	Dog law amendment	4-23-79
HB 1042	Stuban/D/Columbia-Montour	Restricts farmland ownership by certain corporations	4-24-79
HB 1092	Noye/R/Cumberland Perry-Juniata	Would require certain state institutions to make lands available for public agricultural programs	4-23 79
HB 1368	J Wright/R/Bucks	Amends clean and green to allow for continuation of preferential use assessment when a transfer, separation or split-off results in an estate subdivision	5-23 79

HB 2006	Piccola/R/Dauphin	Amends harness racing law to increase the amount of money paid into the Pennsylvania Fair Fund	11 27-79
HB 2007	Burns/R/Bucks	Would increase Pennsylvania Fair Fund and Sire Stakes incomes from harness racing funds	11-27-79
SB 414	Sen Howard/R/ Doylestown	Protects race horses from drug and other forms of abuse	10-15-79

Farm related bills under consideration by the House Appropriations Committee

HB 856	Wenger/R/Lancaster	Amends liquified petroleum gas act to provide for registration of farmers in some cases	10-9-79
HB 1002	Thomas/R/Snyder-Union	Provides a fee for purebred livestock auctions	10-9-79
HB 1176	Pitts/R/Chester	Would amend inheritance and estate tax law to provide for preferential valuation of land in farms, ag reserve or forest	2-12-80
HB 1535	Thomas/R/Snyder Union	Provides for land management commission to assume management and responsibility for farm farmland now under control of Department of Public Welfare	1-22-80
HB 1608	Wenger/R/Lancaster	Would amend tax code to exempt family farm corporations from captial stock tax	2-5-80
HB 1793	Thomas/R/Snyder-Union	Would authorize the creation of agricultural preserves	10-29-79
HB 1897	Yahner/D/Cambria	Would amend Pa liquor control laws to allow limited manufacture of liquid fuels for on-farm use	11-13-79

(Turn to Page D5)

How bills become laws...

At any one time, there may be 50 or more farm-related bills under consideration by the Pennsylvania House and Senate A bill can languish in committee for months, even years Or it can be introduced, passed by both the House and Senate and be on the Governor's desk in a matter of days

Bills must originate with either a Senator or a Representative With the help of their staffs, constituents and outside consultants, legislators state their intent in legal language, which is usually further refined as the measure is put into official form by the Legislative Reference Bureau

If a bill was originated by a House member, it will be referred to a House committee The committee will make its own determination of the bill's worthiness before sending it to the floor for consideration by the full House Each bill must be given three readings in the House before members can vote on it

If they pass the bill, it goes to the Senate, where it is referred to a committee, and follows the same procedure it underwent in the House For bills originating in the Senate, the procedure is reversed

If both the Senate and the House pass a bill, and the Governor signs it, it becomes a law

Edinburg, Scotland, is named for the 7th century King Edwin, around whom the settlement of Edwin's Burgh sprang up.

Field Cultivator . . . One of today's most versatile tools

This implement is the ideal tool for seedbed preparation. It may be used in conjunction with a planter in secondary tillage. Kills weeds, loosens soil for better moisture penetration. May also be used for renovating pastures After harvest, mixes trash and soil to minimize erosion. Both drawbar and mounted models (to 20'6") are designed so that extensions can be added to basic sections to increase working widths. Brillion builds in quality from the frame to the shank assembly using 2½" square tubing and 4" channels (on FC models). Both two and three bar frames available. Options include wing lifts, gauge wheels and hinge kits.

USDA to offer dairymen new brucellosis indemnity plan

WASHINGTON, D.C. — Cattle producers and farmers are being asked by the U.S. Department of Agriculture to comment on a proposal that would revise the amount of indemnity paid to owners for cattle destroyed because of brucellosis.

Paul Becton, director of brucellosis eradication for USDA's Animal and Plant Health Insepction Service, said the proposal would put indemnity payments on a sliding scale that would change according to the current market prices of replacement animals.

"This would greatly reduce the possibility of farmers or cattle producers receiving much less in total compensation than the replacement costs," he said.

Becton said the proposal is based on recommendations of the Brucellosis Technical Commission. These recommendations were aslo endorsed by the U.S. Animal Health Association, which represents state animal health agencies and the livestock industry.

Brucellosis, also called Bang's disease, affects cattle and other livestock. It causes losses due to abortion, decreased milk yields and the need to buy replacement cattle.

Cattle that react to brucellosis blood tests must be branded with the letter "B" and sold to slaughter within 15 days. In addition to the slaughter price, owners currently can receive federal indemnity payments up to $250 for registered cattle, $150 for grade dairy cattle and $50 for grade beef animals. Some states also pay indemnities in addition to the federal payments.

Under the proposed system, federal indemnity rates would be adjusted periodically to accommodate changes in cattle prices. The rates would be adjusted so cattle owners would receive approximately 90 percent of the cost of replacing infected animals when combining the slaughter price, state indemnity and federal indemnity.

"Market prices are subject to change," said Becton. "Having brucellosis indemnity rates tied to the cost of replacing breeding stock should go a long way toward preventing undue hardships now and in the future."

The proposal was published in the March 21 Federal Register. Written statements or comments may be filed until April 21 with: Deputy Administrator, USDA, APHIS, Veterinary Services, Federal Bldg., Room 805, Hyattsville, Md. 20782.

LEGISLATIVE SCORECARD

Virginville 4-H big winner at Berks dairy banquet

BY LAUREL SCHAEFFER
Staff Correspondent

BERNVILLE, Pa. — Members of the Virginville 4-H Dairy Club took home the majority of the awards presented last Friday at the Berks County 4-H Dairy Banquet held at the Bernville Grange Hall, here.

Awards were presented to individuals for county project books and blue forms in six age group categories. Of these twelve awards, Virginville 4-H Dairy Club members received a total of seven. The project books were judged on records, neatness, story and participation of the 4-H members submitting them. Criteria for selection of Blue Form winners included involvement in 4-H clubs, number of projects taken, leadership, county and state 4-H activities and the member's 4-H story.

Winning the project book contest were: 8-9 year olds - Michele Christman - Northern Berks 4-H Club; 10-11 year olds - Ginger Dietrich, Virginville; 12-13 year olds - Kari Bitting, Virginville; 14-15 year olds - Todd Miller, Virginville; 16-17 year olds - Gary Kurtz, Eastern Berks; 18-19 year olds - Cheryl Adam, Virginville.

Blue Form Winners were: 8-9 year olds - Brian Blatt, Virginville; 10-11 year olds - Tammy Miller, Virginville; 12-13 year olds - Patty Dreisbach, Northern Berks; 14-15 year olds - Connie Ohlinger, Northern Berks; 16-17 year olds - Allan Rohrbach, Virginville; 18-19 year olds - Karen Sattazahn, Stouchsburg.

Highlighting the evening was a dairy bowl contest in which four members from each club participated. Winning the contest was Northern Berks while Eastern Berks took second place. Members of the winning team were: Harold Dietrich, Patti Dreisbach, Connie Ohlinger, and Kathy Ohlinger. The second placed team consisted of: Jim Younker. Bill Zollers, Bruce Latshaw, and Ronald Kurtz.

Also recognized for their achievements in 1979 activities were judging teams and county dairy bowl members. Members of the State 4-H Dairy Judging Championship team were: Kevin Sattazahn, R1 Womelsdorf; Helen Seidel, R1 Kutztown; Wendy and Steve Shaw, R2 Oley. Steve was also named the top 4-H dairy judge in the state contest. Coaching the team was David Schuler, and Sue Seidel, both of R1 Kutztown.

The county dairy judging team which placed fifth at the All American Dairy Show included: Penny Bicksler, R1 Richland; Patty Dreisbach, R2 Hamburg; Scott Miller, R2 Hamburg; and Debbie Stump, R3 Bernville. Charles Seidel, R1 Lenhartsville, placed 5th in individual competition and Harold Dietrich, R1 Hamburg, placed 10th.

County Dairy Bowl team members were: Ronald Keiffer, R2 Hamburg; Karen Sattazahn, R1 Womelsdorf; Richard Savidge, R2 Mertztown; and Bill Zollers, R1 Mertztown. Coaching the team was Bill Zollers, Sr., Mertztown.

Clyde Myers, Berks County Extension Agent recognized the following 4-H club leaders: David Hauseman, R4 Boyertown; Marie Herbert, R1 Kutztown; Norman Kurtz, R4 Fleetwood; and William Zollers, all of Eastern Berks Dairy Club. Louis Moyer, Rehrersburg; Dennis Sattazahn, R1 Womelsdorf; and Robert Sattazahn, R1

(Turn to Page D7)

Blue form winners shown from left to right are: Brian Blatt, Tammy Miller, and Allan Rohrbach, all from Virginville. Back from left: Karen Sattazahn, Stouchburg; Patti Dreisbach, Northern Berks; and Connie Ohlinger, Northern Berks.

VANELLUS C EXTRA 15W-40 excels in API Service SE CD and exceeds the lubrication requirements for all gasoline and diesel engines in car and truck fleets of all types, and in farm, earth moving, mining and construction equipment.

55 Gallon Drums - $143.00
24 Quart Cans - $18.00

BP VANELLUS®MCS-3 is a universal type motor oil for use in all gasoline and diesel engines used to power car and truck fleets of all types, and in farm, earth moving, mining and construction equipment. It provides optimum engine protection for both heavy- and light-duty service. **Vanellus MCS-3** excels in API Service SE-CD and is available in SAE 10W, 20W-20, 30, 40 and 50 single grades.

55 Gallon Drums - $130.00
24 Quart Cans - $16.00

BP VANELLUS®SUPER D & F provides superior lubrication protection for gasoline and diesel engines used to power construction, earth moving and farm equipment, trucks and automobiles operating in light- or medium-duty service. **Vanellus Super D & F** exceeds most auto and truck makers' gasoline and diesel engine warranty requirements. **Vanellus Super D & F** is recommended for API Service SE-CC and it is available in SAE 10W-30 and 10W-40 multi grades plus SAE 10W, 20W-20, 30 and 40 single grades.

	Single Grade	10-30 10-40
55 Gallon Drum	$120.00	$139.00
24 Quart Cans	$15.00	$17.00

BP HYDRAULIC-TF-JD-303 is a hydraulic fluid designed to function effectively in the complex lubrication systems of modern tractors, including industrial models. In these systems the same lubricant may be called upon to serve the hydraulic system, torque converter, transmissions, power take off, differential, power steering, and hydrostatic systems. **BP Hydraulic TF-JD-303** is virtually a universal tractor hydraulic oil, and can be used for makeup or refill of above. Fluid is formulated for both low and high temperature operation, as well as anti wear, anti rust, oxidation stability, seal protection, etc.

55 Gallon Drums - $139.00
5 Gallon Cans - $16.00

The four heifers shown here with Gálen Crouse all have the same outstanding mother. They were born, though, to grade heifers that had been implanted with embryos flushed from the mother in her sixth day of pregnancy. Crouse has been one of the most active area dairymen in making the new embryo transplant technology a part of his business planning.

John Hasler, a reproductive physiologist, examines all the embryos he and EmTrain's two veterinarians bring back to Elizabethtown from throughout the Northeast. The embryos are flushed from top cows, then surgically implanted in recipient heifers that bear the embryos until they are born.

Flushing out the best of breed

ET: shortcut to super cows and super records

BY DICK WANNER

ELIZABETHTOWN — Embryo transplants are no longer a laboratory curiosity. ET firms are routinely providing dairy farmers with a management tool that is slowly changing the face of the dairy industry, and rapidly multiplying the dollar value of top dairy cows

One Lancaster County dairyman, Galen Crouse, has been putting the new technology to work. On his dairy farm near Schoeneck, Crouse so far has seen the birth of 20 ET calves on his farm, and has grade heifers carrying another 19 calves with outstanding genetic credentials.

The ET process takes two kinds of cows, a donor cow and a recipient. Most often, the recipient is a fairly average non-lactating heifer. When she is in the proper heat stage, she is cut open, her womb is pierced, and a microscopic six-day-old embryo from a donor cow is placed in her uterus.

Although the recipient cow actually contributes nothing to the genetic makeup of the calf in her body, she carries it as a foster mother until the calf is born.

While some farmers provide both the donor cows and the recipients, Crouse sees his recipient animals for the first time only after they've received embryos.

The embryos have been coming from a handful of top cows in the Crouse herd, including one 10-year-old who can't carry a fetus to term, but who has been a dependable supplier of fertilized eggs, or embryos.

Windy Mont Matt Kathy, a five-year-old, is an example of the kind of cow Crouse and other dairymen using the ET method are looking for. Her production records have been in the 22,000 to 24,000 pound range, she's earned an Ex-90 rating from the Holstein breed association, and her dam, grand-dam, and one daughter have all earned Excellent classifications.

For a donor cow, Crouse wants an animal with good type, production and pedigree. He has his donors bred to top AI bulls at least 1,000 pounds plus on production, and plus on type.

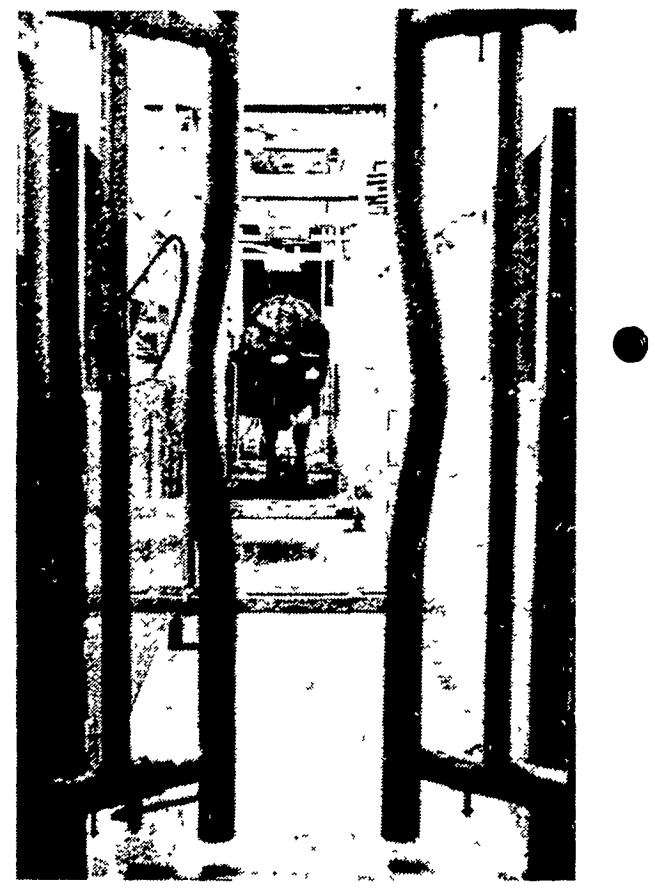
Crouse said he wants his ET calves - bulls or heifers - to have a value of $3000 the instant they hit the ground, but Kathy's calves have been doing quite a bit better than that.

With the full-time help of his son, Phillip, Crouse milks 115 head out of a herd of some 325 animals His animal numbers are high because he raises all his bulls, as well as his heifers. The bulls he raises for sale generally go into the herds of dairymen who don't use AI. Because he sells many of his top milkers, Crouses's DER herd average last year was a fairly modest 15,600 pounds of milk.

His aim is to make half his income from milk, the other half from the sale of breeding stock. The ET process, he feels, will help him meet that goal. In Crouse's case, embryo transfers have moved off the pages of the farming publications and into his management philosophy.

Crouse buys his ET service from EmTrain, an Elizabethtown firm with ET clients throughout the Northeast. The firm is owned by Dr. Alan McCauley, a DVM, and Dr. John Hasler, whose Ph.D. is in reproductive physiology.

(Turn to Page D10)



A recipient heifer makes her way through a series of stalls which will hold her and seven other animals while live embryos are implanted in their wombs. The animals suffer minimal stress during the operation, and almost no infections as a result of the brief procedure.

By performing the embryo transplants swiftly, the incisions in the recipients animals' sides are open only briefly. The short exposure helps to minimize the risks of infection.

Dr. Alan McCauley, nearest camera, Dr. Gregory Brooke, left, and animal technician Gary Bartlett can prepare eight heifers for surgery, implant live embryos in their wombs and have the animals sewed back up in less than half an hour. One day they performed this procedure on 47 different animals.

Drs. Gregory Brooke, left, and John Hasler work with swift intensity to implant an embryo into the womb of a young heifer. The embryo had been flushed earlier in the day from the womb of an outstanding milker in upstate New York.

Embryo transplants

(Continued from Page D8)

McCauley explained ET practice in the farmhouse office that serves as headquarters for the firm.

McCauley, who got his DVM from Cornell in 1969, opened his first ET business in early 1978 just outside Mount Joy. In the years between 1969 and 1978, he completed an internship in large animal obstetrics and surgery, taught bovine and equine reproduction at Cornell for three-and-a-half years and had a dairy practice for three years.

In the last four months, McCauley, Hasler and their helpers have completed 700 embryo transfers, and they're aiming for an eventual production of 300 ET's a month.

At first, McCauley said, they worked mostly with problem cows, good animals who couldn't be bred. ET can be a life-saver for problem breeders, because some 40-percent of them can produce good embryos when they're super-ovulated

But properly managed, ET is more than a tool for dealing with fertility problems. It can be used by the dairyman who wants to build a top herd in a hurry, and it can be used by the dairyman who wants to sell top breeding stock.

McCauley said they work with their clients in choosing animals and setting goals for an ET program.

"We look at type, pedigree and production, factors that Galen Crouse mentioned," McCauley noted. "Those numbers are pretty easy to get One of the big question marks in ET practice is whether or not a cow can transmit those superior genes to her offspring."

After an EmTrain client selects a cow for ET breeding, she receives a series of drugs which cause her to super ovulate. After her ovaries have been induced into releasing dozens of eggs at once, she is artificially inseminated.

Seven or eight days after she has been inseminated, McCauley, Hasler or Dr. Gregory Brooke, the other EmTrain veterarian, visits the cow, flushes the embryos from her and, usually, bring them back to Elizabethtown.

The embryos are carried simply in a small bottle containing a nutrient solution. At this stage, the embryos are about six days and still encased in a tough membrane which withstands a surprising amount of almost casual, even rough, treatment. McCauley carries the embryos in his shirt pocket, to help them stay warm.

At the E-town lab, the embryos must be separated from the bits and pieces that follow them out of the cow's uterus. Demonstrating the technique, Hasler dipped a syringe into a small bottle holding half-a-pint or so of fluid that has been added to the flushings from a cow's uterus.

He squeezed the bulb of the syringe a number of times, rapidly drawing the fluid up, then ejecting it back into the bottle. This helped to break up the solids in the fluid, but it didn't affect the embryo, Hasler said.

Using a .microscope, Hasler then looked for the embryos, then determined which were suitable candidates for transplantation and which weren't.

Those that were, he placed in a tiny dish on the microscope stage. When he finished, the dish held eight pinpoints of life, any one of which could now be on its way to becoming a $200,000

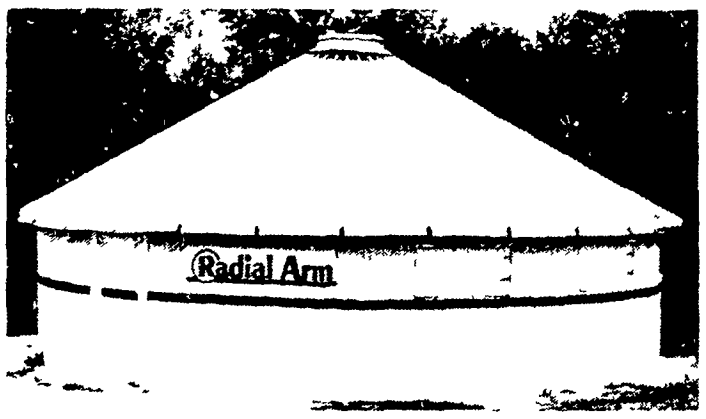
Introducing...

Radial Arm™
circular finishing
Automated Hog Confinement

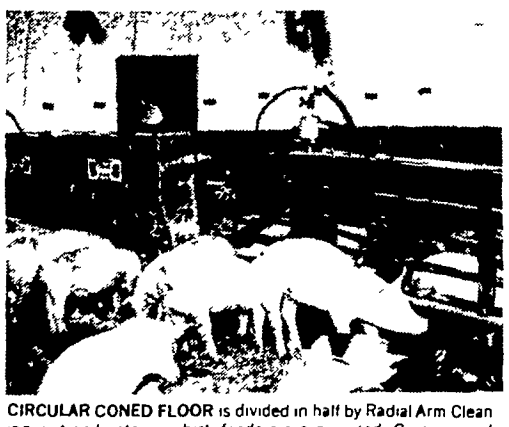


NEW
SELF CLEANING
HOG BARN
102 Head Capacity

NEW EASY TO CONSTRUCT ROUND BARN-

Base comes in 12 curved sidewall sections One section includes a dutch walk door The other 11 sections can be ordered with or without a 24 ' x 48" ventilation door, thus allowing you to set up a natural ventilation condition or a total environmentally controlled unit or a combination of the two

The unique circular design of the structure combined with vent doors that swing out (hinged on the **side** instead of at the **top**) provides a natural air scoop on one side and a natural air foil on the other side, thus causing air to cross ventilate regardless of wind direction Roof cap on the bin roof can also be manipulated to provide additional natural air movement



CIRCULAR CONED FLOOR is divided in half by Radial Arm Cleaning unit and gate on which feeders are mounted On command motor drives gate around pivot moving manure to gutter Material flows down gutter pushed by scraper paddle into pipe and out of building

The 12 sections can be assembled in about one hour Each section is complete with white painted strong panel steel on the exterior and fiberglass insulation in the wall A fiberglass pig barrier is provided for interior covering and comes in a roll for installation after sidewall sections are assembled thus providing for a seamless interior wall

The assembled sidewall sections are covered by a conventional grain bin roof which is insulated with white polystyrene 3½ inches thick The polystyrene comes in panels and is 100% moisture resistant The panels are installed using fasteners, and will not come down or sag with age It also enhances the appearance of the interior of the barn

Embryo transplants

(Continued from Page D10)

cow or a million-dollar bull.

While Hasler was working with his microscope, McCauley, Brooke and Carl Bartlett, a skilled animal technician, were readying eight recipient cows to receive the embryos.

In the early days of ET practice, both the donor and the recipient cow had to undergo surgery, and the procedures took place under operating room conditions.

Veterinarians and assistants, gowned, masked and rubber-gloved, performed those first operations at a cost of roughly twice the $900 to $1200 it costs today.

But for all the study, skill and technology involved, today's procedure looks more like an auto assembly line than a classic operating room scene.

Gowns and rubber gloves still are used, of course. So is sanitation. While the EmTrain operating theater looked a lot like a milking parlor, the room was scrupulously clean and the recipient cows were carefully prepared for the implementation of their foster sons and daughters.

The young heifers, carefully examined just minutes before to make sure they were ready to receive the embryos, were ushered into the room. Eight narrow stalls, four on each side of the room were ready to hold the animals in place. They had been tranquilized in the barnyard so they'd be calm for the operation.

After all eight animals were standing in their stalls with their heads clamped, their rear flanks were shaved and sterilized with iodine solution. A shot at the base of each tail kept them dangling harmlessly. A local anesthetic was administered to each heifer to block the pain of the incision through which the uterus would be brought outside the body cavity to receive the embryo.

Brooke worked swiftly, making a foot-long incision on the rear flank of each animal. With his gloved hand, he reached through the incision, parted the muscle tissue with his fingers, grabbed the uterus and pulled it into view.

As each animal was ready, Hasler appeared with a narrow, hollow rod bearing the embryo to be implanted. Brooke pierced each embryo with a pointed device about the size of a knitting needle, the embryo was inserted, and the animal was sewn back up. All eight heifers were ready to leave the operating room in less than half-an-hour.

The heifers are a real key to the success of the ET program, McCauley said later. They have to be healthy and well-grown and strong enough to withstand the stress — minimal though it is — of the operation.

EmTrain maintains a herd of some 400 non-lactating heifers, all with healthy appetites and all with a price-tag of about $800. About a third of EmTrain's customers supply their own heifers. The rest buy the heifers that come to the farm bearing implanted embryos.

Many farmers take advantage of the tax loss they can claim by paying $2,000 for a pregnant heifer, then selling her for $1000 after she delivers her calf. The recipient cows can also be milked before they're sold, adding some income to the herd operation.

McCauley said embryo transfers aren't for every dairyman, and certainly aren't indicated for every good cow. But he believes they are going to be an increasingly important factor in the dairy industry.

He sees a day coming when a dairyman can order ET bulls or heifers, depending on his particular planning. Frozen embryos, especially for the export market, should have a place in the future. And McCauley sees a definite possibility for herds in which the bottom prodcedures carry the offspring of the top producers, with the assistance of ET.

Pydrin gets temporary label to combat pear psylla

HARRISBURG — The Environmental Protection Agency has granted a specific exemption of a pesticide to be used in the control of pear psylla in pear orchards of Pennsylvania.

"At our request, the EPA has agreed to help orchardists save the state's 1500 acre pear crop which has an estimated value of $1 million," State Agriculture Secretary Penrose Hallowell said.

"The increase of pear psylla and decrease of effectiveness of pesticides presently being used led to the EPA's specific exemption which will terminate November 30, 1980."

Pear psylla is an insect which feeds on pear leaves, excreting honeydew (sugary waste) which serves as a source of food for a fungus and causes the fruit to turn black. Over the past several years, chemicals used to control pear psylla have not been effective at a rate of application allowed, and the state's pear crop has steadily declined. It was estimated that one-half of the state pear crop would be lost without this exemption.

The pesticide granted for use is fenvalerate sold under the Shell trade name Pydrin. The EPA has labeled the exemption product specificially for Pennsylvania.

Secretary Hallowell indicated that all applicable directions, restrictions and precautions on the EPA product label must be followed.

Orchardists and farmers should be cautious when using the exempted product. The feeding or grazing or growing of orchard crops is prohibited.

The application of Pydrin is limited to dormant through pre-bloom stages of pear tree development, and a single post-harvest application. The exempted pesticide has an effective life of less than one week, and when applied as directed, will not cause any environmental problems.

Any questions concerning the product and its use should be directed to the Pennsylvania Department of Agriculture's Division of Pesticides, Attn: Gerald J. Florentine, 717/787-4843.

"The increased control of pear psylla, and special pesticide exemption for the state is one of the many steps we are taking at the Department of Agriculture to insure that Pennsylvania agriculture is truly 'growing better,'" said Hallowell.

Fur and Feather to bowl

FLEMINGTON, N.J. — Members of the Fur & Feather 4-H club have planned a bowling party for April 19. They will meet at 6:30 p.m. at the extension building. The club will travel to the Frenchtown Lanes for their party.

The club is looking for new members and an additional leader. For more information call Mrs. Nief at 201/782-2526. Reported by Bryan Milz.

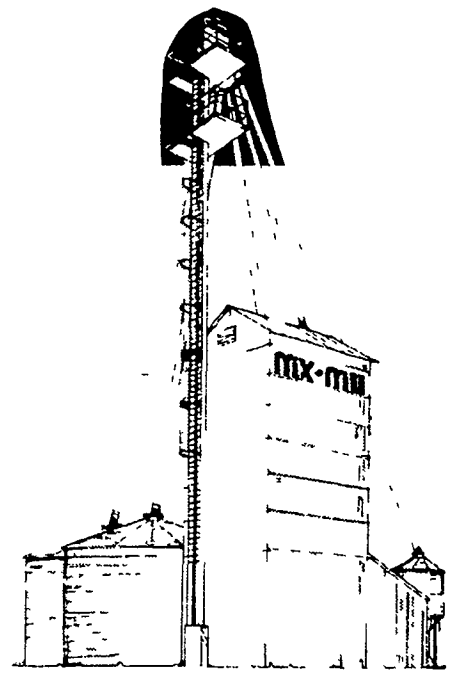
ARE YOUR FEED COSTS TOO HIGH?

Then you should compare the advantages of owning or leasing

FARM FEED MILLING SYSTEM

Custom designed to each individual need, using various quality brand name equipment.

★ FRESH FEED DAILY improves production, eliminates stale feed.
★ LOWER OPERATING COST grinds and mixes for only 10¢ per ton.
★ SAVE UP TO $30 PER TON by purchasing ingredients at wholesale prices.
★ HIGHER QUALITY FEED using only good wholesome ingredients.
★ LESS DUST full circular hammermill screen or roller mill produce a more granular feed which aids digestibility.
★ ACCURACY up to 99.9% accuracy with automatic individual ingredient weigh out.
★ BETTER DISEASE CONTROL by eliminating the possibility of feed trucks carrying in diseases from other farms.
★ COMPETELY AUTOMATIC systems are available that make up to four different rations and deliver each to the right feed tank as needed without anyone touching the system.
★ MEDICATION adjustable amounts added automatically by flipping a switch.
★ AUTOMATIC FEED DELIVERY up to 450 ft. from the mill.
★ SAVE ON LABOR requires no shoveling, bagging, connecting PTO shafts or working in rain and snow.
★ Grinds ear corn, shelled corn, or high moisture corn.
★ Various sizes available; no system too large or too small.



EXAMPLE OF SAVINGS POSSIBLE IF YOU ARE BUYING A COMPLETE FEED

10 Ton Per Week @ $195 =	$1950.00

Annual awards banquet held

Penn Manor FFA has its own Charlie Brown

BY PAT KAUFFMAN

MILLERSVILLE — Charlie Brown is alive and well and a member of the Penn Manor FFA. Brown along with a host of others, was attending the annual Manor Chapter banquet here, Tuesday and won several awards including the Red Rose Farmers degree.

Among those surprised and honored were thirteen lucky recipients of chain animals for the coming year. They were: Steve Kreider and Steve Appel, chain lambs; Jay Funk, Dan White, Theresa Luckenbill and Brian Ressler, chain capons; Scott Shertzer and Jim Musser, chain calf; Jeff Gerlach, chain gilt; Mike Nissley, chain steer; and Jay Funk, Steven Kreider and James Alecxih, chain bees.

Ronald Hunt became the fifth person from the Manor Chapter to win the American Farmer degree. Hunt won his degree in the Agribusiness category.

Receiving plaques for their Keystone Farmer degrees were: Fred Lefever, Nelson Breneman, Ramon Hunt, Tim Kreider, Gordon Long, Jay McMichael, Kay Shertzer, Jeff Risser, Chris Riggs, Dave Wiker, and Tim Frey.

Third year, Red Rose degrees, were presented to: Jim Harnish, Kevin Landis, Bob Musser, Aaron Ebersole, Gerald Frey, John Ressler, Charles Brown, George Garrett, Chris Riggs, Nancy Barley, Harry Witmer, Wayne Hess, Carl Miller and Dave Foutz.

Star Red Rose recipient was Wayne Hess, son of Mr. and Mrs. Abraham Hess, Conestoga.

Those receiving Chapter Farmer degrees included: Dale Almond, Todd Berry, Jay Frey, Gerald Hess, Tim Hess, Jim Musser, Jere Neff, Charlie Martin, Melvin Williams. Verlan Bauman, Fred Bare, Jeff Burkholder, Jim Binkle, Shawn Charles, Jim Drennen, Jeff Ebersole, Ken Greider, Todd Kemrer, Dale Neff, Mary Peiffer, Sally Rhineer, Dave Almond, Garry Appel, Dean Almond, Jim Brazil, Jim Handel, Robert Herr, Troy Jones, Greg Long, Kim Miller, Doug Ostberg, Cary Riggs, Irvin Swisher, Don Wissler, Mark Phillips, Eric Krug, Bob Porterfield, John Handel, Frank Hess, Dan Martin and Kurt Wagner.

Gerald Hess was chosen Star Chapter Farmer, with Jim Musser the runner-up.

Receiving Greenhand awards were: Don Bennett, Brian Consylman, Chuck Eichelberger, Kim Eichelberger, Jeff Gerlach, Tanya Green, Pat Harris, Diana Henrich, Jesse Haines, Wayne Huber, Chris Kelley, J.P. Kelley, Ann King, Jim Malone, Theresa Lukenbill, Leroy Miller, Mike Nissley, Charlie Martin, Butch Stevens, Brian Ressler, Rick Warner, Dan White, John Wiker, Ed Bomberger, Scott Shertzer, Jay Funk, Dave Shertzer, Merv Keagy, Dorothy Meyer, Dave Roberts, Steve Appel, Brian Miller, Steve Main, Pauline Nolt, Angie Booth, Dave Unruh, Clyde Mellinger, Perry Herr, Wayne Brubaker, Jim Floyd, Lynne Butzer, Paul Jenkins, Doug Owen, Scott Reams, Bob Walton, Jim Alecxih, Tim Breneman, Dan Cline, Troy Herr, Bill Weidman, Bob Ney, John Haines, Bill Rineer, Doug Grubb, Jeff Warner, Rick

(Turn to Page D13)

Officers for the coming year front from left are: Bob Musser, Lancaster, vice-president; Jim Harnish, Lancaster, advisor; Kim Miller, Conestoga, secretary; Harry Witmer, Millersville, sentinel; Jeff Burkholder, Washington Boro, chaplain; Mary Peiffer, Pequea, historian. Back row: Kevin Landis, Lancaster, parliamentarian; Aaron Ebersole, Willow Street, executive vice president; Wayne Hess, Conestoga, president; Jim Musser, Mountville, corresponding secretary; Jeff Ebersole, Willow Street, reporter; Gerald Frey, Washington Boro, program director. John Ressler, Pequea, treasurer was absent when picture was taken.

Steve Appel, Pequea, is shown with his creed and orange sales contest awards.

Merv Keagy was chosen Star Greenhand.

Certificates of appreciation were given to: Frank Barley, James Landis, Craig Harnish, Lewis Witmer, Robah Hess, Harry Frey, Greg Landis, Phil Shertzer and Mr. Bleacher.

Receiving Honorary Chapter Farmer degrees were: Ken Bleacher, and John McMichael.

Wilmer Kreider was selected Honorary Red Rose Farmer.

Foundation awards were presented to: Kim Miller, sheep production; Gerald Hess, sheep production; Jeff Burkholder, dairy farming; Jim Harnish, swine production; Kevin Landis, beef production; Nancy Barley, farm and home improvement; Dave Wiker, ag production; Kay Shertzer, crop farming and public speaking; Jeff Ebersole, forestry; Raymon Hunt, mechanics; Chris Riggs, outdoor recreation; Aaron Ebersole, fish and wildlife management; Carl Miller, farm and home electrification; Wayne Hess, livestock production and Nelson Breneman, poultry production.

Kay Shertzer was selected Most Improved Senior and also awarded the David Dombach Memorial Award and the Scholarship Award.

Lewis Witmer was awarded the State Proficiency Award.

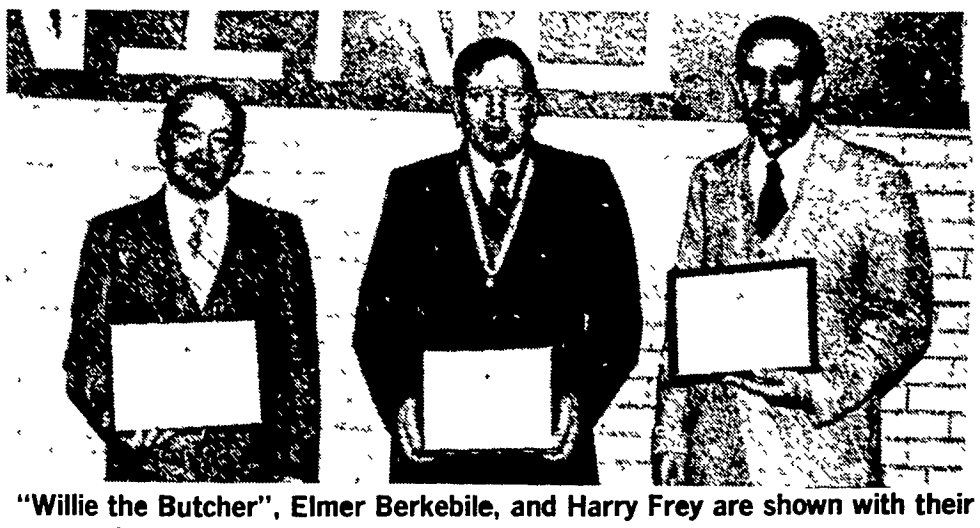
Elmer J. Berkebile was awarded an Honorary Keystone Farmer degree.

Receiving special parent recognition were: Clyde Hunt and Harold Long. Each had four sons win the Keystone Farmer degree.

Gordon Long won the highest award to a senior, the Dekalb Award. Raymon Hunt won the Bankers Award presented by the Lancaster County Bankers Association.

Shown with their awards from left are Kay Shertzer, Gordon Long, and Raymon Hunt.

From left: Gerald Hess, Conestoga; Mervin Keagy, Washington Boro and Wayne Hess, Conestoga, are shown with their awards.



"Willie the Butcher", Elmer Berkebile, and Harry Frey are shown with their honorary degrees.

Darryl Schafer urges youth to set goals

BY LAUREL SCHAEFFER
Staff Correspondent

ROBESONIA — Members of the Conrad Weiser FFA celebrated another year of achievements, Monday at Conrad Weiser High School during their annual parent and member banquet.

Highlighting the evening were two guest speakers: Darryl Schafer, Pennsylvania FFA Vice-President, and Donald Trimmer, National Eastern Region FFA Vice-President.

Schafer urged his fellow FFA members to choose a career goal and then plan an FFA program which will help them work toward that goal. "Plan a program which will familiarize you with the career you have chosen," he said. Let your employer be part of your plan and work with them, Schafer continued. Explaining, the state officer said that if their employer knows their intentions and goals, the employer will help train FFA members toward those goals.

"FFA is an asset when applying for a job," the state officer remarked. He also told the many FFA members present that the most valuable assets of the FFA are friends, and the more FFA activities a member participates in, the more friends he will have.

Trimmer discussed some of the many experiences and opportunities he has had since becoming a National FFA Officer, including a trip to Japan where he and other FFA members met with Japanese farmers.

The National officer explained why he felt the FFA should continue to develop leadership qualities among it's many members. "An army of young people will be taking over our country in years to come," he said, "and they should be good leaders." Trimmer told his audience that the FFA will help to build the qualities needed by these young people.

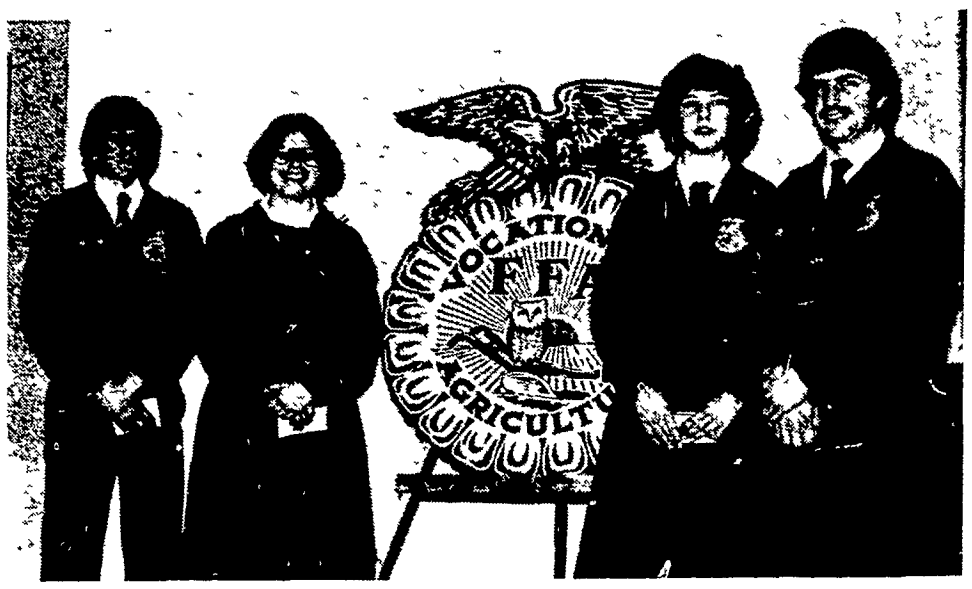
Steve Miller, FFA advisor presented awards to the many deserving FFA members attending the banquet, after commenting on the six main ingredients provided to the FFA organization. "FFA provides members with competition, recognition, and the right to fail," Miller began. "But it also provides an individual the right to try again and overcome his failures. It gives members a chance for leadership development and public speaking opportunities, and builds self confidence."

"The FFA also provides a member with employment preparation," Miller continued. The advisor also stressed that the FFA is not a club but an integral part of learning.

Receiving the coveting Chapter Star Greenhand award this year was fourteen year old Scout Troutman. Scott is the son of Mr. and Mrs. George Troutman, Myerstown.

The Chapter Star Farmer Award was bestowed upon Henry Noss, 16. Henry is the son of Mr. and Mrs. Henry Noss, Sinking Spring. Noss, the chapter secretary, also received an FFA foundation award for swine production and was first place in the

(Turn to Page D16)



Shown left to right are: Sue Gromis, scholarship award; David Schaeffer, leadership and foundation medal for farm and homestead improvement; Debbie Miller, leadership; placement in agricultural production and public speaking; Ernest Gelsinger, DeKalb Award, diversified livestock production.

ALL NATURAL PROTEIN

SAVE MONEY ON FEED COSTS
USE MORE HOME GROWN GRAIN

Increase production and feed intake with a more palatable ration made with liquid ProLasse on your own farm.

Now for the first time there is a liquid molasses that can be applied with inexpensive metering equipment and any P.T.O. mixer.

New ProLasse's exclusive patented formulation controls the dispersal and penetration of the liquid and assures uniform mixing with no particle segregation. ProLasse also helps prevent molding when using ear corn or other grain with too high a moisture content. Pro Lasse also contains a stable guaranteed vitamin and mineral package.

Only a small amount of liquid ProLasse is needed to make a sweet feed that is not sticky and will flow freely in Automatic Feeding Systems without bridging.

Sold and distributed by your local feed dealer, mobile grinder mixer operator or liquid supplement dealer.

Telephone collect for name of dealer nearest you.

The Milk Check

TOM JURCHAK
County Agent

Ditto Again

You were warned the last two months that your product prices—butter, powder and cheese— were sitting on their price supports and with your continued increases in production you couldn't expect any change in Class prices before April 1 when the new support price would be announced.

Even your blend price was exactly the same at $12.25 for December and January.

Well, now you're getting more of the same in the Minnesota-Wisconsin price for February which was $11.35 for 3.5 test milk. That's two cents less than January and one cent better than December.

This $11.35 is your Basic Formula Price that determines the Class I and II prices that handlers will pay.

For February, the Class I price will be seven cents better than January but the Class II price will be three cents less.

With increasing production, your Class I utilization has been dropping from 51.2 in November to 47.8 in December to 47.1 in January. If that continues you can expect five to ten cents less on your blend price for February.

After that, the Louisville Plan deductions start in March and the new price supports starts in April. But don't look for milk prices this Spring that are high enough to cover all your cost increases of the past year.

Some indication of the milk supply situation came with the announcement the third week of February that over 120 producers in the Cortland area of New York would be dropped by a proprietary handler with 30 days notice. Fortunately about a quarter of them were co-op members and the others were offered membership, so all the milk would find a home before the cut off date. It was just east of this same area in New York that nearly the same number of producers were dropped by a handler last November.

Juniata County DHIA Monthly Report

JUNIATA COUNTY DHIA
February 1980

The February 1980 Juniata County Dairy Herd Improvement Association had records calculated for 5048 cows in 95 herds

The five high herds in average butterfat production per cow per day are listed below Owner's name and address, number of cows, average daily pounds milk and butterfat per cow, are given in order

S F Metz, Mifflintown	92	52 3	2 13
F & Norman Love, E Waterford	49	59 3	2 12
Raymond & Gladys Long, Port Royal	42	53 5	2 01
Donald & Diane Apple, Richfield	60	48 4	2 00
Clyde D Moyer	49	51 6	2 00

Three hundred thirteen cows completed lactation records of 305 days or less Three of these cows produced over 900 lbs of butterfat, 11 produced over 800 lbs , 30 produced over 700 lbs , 55 produced over 600 lbs , and 72 produced over 500 lbs

The fifteen high cows are listed below The owner's name and address, cow's name, pounds milk and pounds butterfat are given in order

chapter project book contest for work experience of 1,000 hours and up. In other project book competition, this young man placed first for the chapter ag Production-multiple enterprises and in county competition was ranked 5th for work experience over 2,000 hours, and second in three enterprises.

Seventeen year old Ernest Gelsinger, chapter vice-president, received the DeKalb Award and was recognized as a Keystone Farmer. Ernest is the son of Mr. and Mrs Lester Gelsinger, Robesonia Other awards received by this young man included a foundation medal for diversified livestock production, and 2nd place for the chapter ag production-mulitple enterprise project book

The scholarship award was presented to Sue Gromis, Womelsdorf, chapter treasurer. Leadership awards were presented to David Schaeffer, Wernersville, and Debbie Wilson, also of Wernersville Debbie Miller, chapter reporter, also received foundation medals for placement in ag production and public speaking This young lady was also chosen as the outstanding supervised occupational experience program participant She placed first in work experience of up to 1,000 hours in the chapter project book contest and was first in the county contest for work experience of 600-1,000 hours

Chapter president, David Schaeffer received a foundation medal for home and farmstead improvement and was tied for second place in the chapter project book contest for work experience up to 1,000 hours He placed 4th in the county three enterprise contest

Other awards were given to the following. Kevin Sattazahn: Dairy Production foundation medal; 1st in chapter ag-production-single enterprise; 1st outstanding production book; and 1st place county dairy herd Tim Deamer, Womelsdorf, vegetable production. Russel Eckert, Wernersville, vegetable production. Charles Nolt, Womelsdorf, public speaking. Brian Schaeffer, Wernersville, swine production

The chapter bestowed honorary degrees upon: Mr. and Mrs. Adam Schaeffer, Mr. and Mrs. George Seidel, and Mr. and Mrs. Lester Gelsinger. Certificates of appreciation were given to Lester Gelsinger, Harold Gelsinger, Glenn and Jane Seidel, Mrs. Elaine Shartle, and Terry Kodiak.

Ask the VMD

Leon Riegel Tim Trayer Edgar Sheaffer

Herd Health in Hogs

Last column, in the first of a two-part series, Dr. Trayer responded to a reader who asked: "What considerations should I make when selecting my new breeding stock for my hog herd?"

This week, Dr. Trayer will comment on the treatment of the new breeding stock after they arrive at the home farm.

In your individual herd health program, it is important to remember to isolate all new stock for a minimum of 30 days, a total isolation from the rest of the herd.

During the 30 day isolation period, the hogs should be reblood tested for brucellosis, pseudorabies, and leptospirosis. They should also be treated from internal parasites, worms, and external parasites, lice and mange.

In the treatment of lice and mange, it is hard to make a recommendation as to what to use because of the constant problem of knowing what is going to be on the market. What has worked well in the past includes lindane, toxophene, and malathion.

The new stock should be checked daily for any evidence of disease. I recommend that the observation exercise be done last in the day, so that if there would be any disease, you would not be dragging it around to your other houses.

The vaccination program for the new additions, should incluce leptospirosis, using the 5-way bacterin, and erysipelas, again using the bacterin.

After the 30 day wait is over and you've gotten your blood tests back with negative results, if the hogs look healthy, it is time to start inter-mingling the new stock with the old herd. The co-mingling can be accomplished by either fenceline contact, or by putting the new stock into a pen that has the manure from the original herd.

This method of introduction builds up good immunity to enteroviruses, also known as the SMEDI syndrome, and also parovirus. The length of time recommended for this type of getting acquainted program is 30 days.

If the new stock includes a boar, I recommend that the boar be placed in a pen with mature gilts from your finishing floor to see whether he works properly. After this 30 day test period, the animal can be considered ready to add to your breeding herd.

From their day of arrival on the farm, the new stock should be provided with wholesome feed and water, and adequate housing.

Concerning feeding the new breeding stock, I recommend you increase the bulk in the ration and keep them off of a high energy diet their first week after stepping off the truck. This type of ration reduced the potenial problems with gut edema.

In actually selecting boar for your herd, you need to start looking at least 3 months in advance. Plan ahead and know what your needs are. You should identify your herd's weak points, such as bad legs, low performance on feed conversion, low carcass quality.

When looking at a herd with poor feed conversion, you have to be sure that it is not the result of a disease, like atrophic rhinitis, holding back the growth rate.

Remember that heredity, or the ability of the parent to transmit specific genes to their offspring, called heritability is not the whole story. Environment plays an important role.

Consider the heritability of the pig's birth weight, where 10 percent of it is only due to heredity and 90 percent is due to the environmental treatment of that animal.

In feedlot performance, or feed efficiency on weight gain, it appears to be influenced equally. That is 50 percent heredity and 50 percent environment.

Some of the traits you should be looking for in a boar are his behavorial characteristics, temperament and sexual behavior, along with his history of sow productivity, such as litter size, milking and mothering ability, and number of pigs weaned.

If you only had to look at one trait to influence your boar selection, his record of feedlot performance, his growth rate and daily gain and feed conversion, would be the one to spend the most time on and to study the closest. We know that 60 to 70 percent of the variable costs in the swine industry are feed costs.

Other considerations that might be made are the carcass merit, that is the back fat percentage; the soundness of the animal, whether he has a straight underline, good legs, straight bone, good teat spacing, and good mating ability.

The conformation and type of the boar is also important. Body length, height, muscle size, and testicle development are some of the criteria to note. Along with the boar's outward appearance, you should find out if there has been any genetic abnormalities in the boar's history, such as hernias or cryptorchids (retained testicles).

If there is any history in this individual's bloodline of any genetic abnormalities, this eliminates him from selection. You cannot take a chance of the possibilities of genetically passing this trait along to the offspring.

In summary, you need records, and if you only have one trait to look at, check feedlot performance. Identify problems in your herd that you want to correct.

My minimum criteria for boar selection is: 1. he should come from a litter size of ten at birth, weaning eight; 2. he should have twelve evenly spread teats with no inversions; 3. he should have obtained 230 pounds of body weight within 155 days or less; 4. his daily gain from 60 pounds and 230 pounds should be 2 pounds per day or more; and 5. his back fat should be less than one inch.

Do not over work your new boar, particularly if he is less than 12 months old. Under twelve months, you should not be using him more than once a day; over twelve months, you can use him twice a day.

Keep the boars cool in summer to keep the sperm count up when the temperatures reach 85 degrees Fahrenheit, and above. Otherwise, the sperm count will drop and your litters will start decreasing about three to four months later.

Replacement breeding stock in your females is usually done by selecting gilts from your own herd, unless you are just starting out. My recommendation is to pick the fastest growing, leanest gilts that are sound and from large litters.

To do this, you need on-farm records. If you only want to look at one trait

YOU'VE HEARD THE TALK.

There's a better way to dry grain. It's called CHILLCURING™ because it means CURING without heat. Here's what the talk is all about.

THE GRAIN

Every kernel of grain is alive when it comes out of the field It is a seed, able to grow because it has the ability to take on moisture Likewise, it can be kept in a state of preservation by removing the moisture already in it

But by heating the grain to dry it, the seed life is destroyed

By *removing* heat and moisture from the grain, it becomes dormant, and stays alive Then it can ripen to full weight, losing only water while keeping valuable protein, starches and sugar

THE SYSTEM

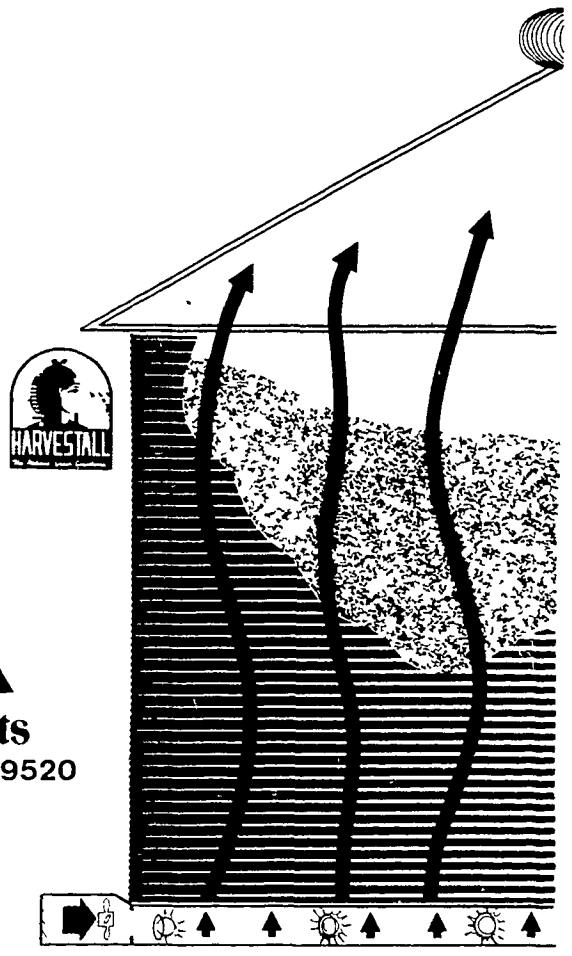
It's simple Grain goes from the field right to the bin With the unique AIRFRAME " and AIRFLOOR " the grain rests on a solid bed that allows maximum ventilation

Clean dry air is the best curing medium for the grain GRAINLAMPS " provide electric sunshine, cleaning and drying the air beneath the floor, before it passes through the grain

Fans force air under the floor Rising through the grain, this dry outside air carries away moisture and heat

At the peak of the bin a jumbo 40" turbine, the WHIRLCOOLER ", puts nature to work for you Wind and rising air keeps it turning, venting the system naturally

A special HARVESTAT " Control System monitors the curing process A simple setting controls the GRAINLAMPS " to make use of free, natural air



Advanced Ag Products
RD 2 Box 174 Elverson, Pa. 19520

THE FACTS

1. You can't beat Nature HARVESTALL GRAIN CHILLCURING™ uses the same elements that ripen and preserve grain if left to itself free flowing air and infra red rays (sunshine)

2. CHILLCURING™ has been tried and proven in 17 states on over 3000 farms. The research is in CHILLCURING™ WORKS!

3. The CHILLCURING™ system uses only the electricity to power fans and lights, using about 1½ KW hrs per bushel Compare that cost to other systems that use increasingly expensive fuels to get disappointing results

4. The grain goes from the field to the bin and stays there till you need it Save time and money at harvest with the one step HARVESTALL CHILLCURING™ and storage system

5. If you're in the market for grain storage, you owe it to yourself to look further into HARVESTALL GRAIN CHILLCURING "

NEMA members to weigh egg market outlook

LANCASTER — A post Easter evaluation of the egg market will have a key position on the agenda of NEMA's regional egg producers' conference set for 10:00 A.M. April 17 at the Continental Inn in Lancaster.

A three man panel chaired by Jay Irwin, Lancaster County Extension Agent as moderator, will present the market picture. NEMA's president, Al Wenger of Rheems, will cover the white egg sector while John Ricca of Billerica, Massachusetts, vice president of NEMA will report on market activity and outlook in brown egg territory. Cary Bradley, who heads U.E.P.'s statistical staff at Atlanta, Georgia will then wrap up the entire national egg scene.

In announcing the session, President Wenger emphasized that these are times of critical decision in the egg industry–a time when we can profit from a searching assessent of our market position.

Members will hear a report on a new service of U.E.P. that has drawn much attention from producers, the labor "hot-line."

This nationwide phone service offers the means to deal with problems involving labor relations or interpretation of wage and hour regulations. By lifting his phone a member can contact an expert on these matters for advice and guidance.

Attorney George Isaccson of Augusta, Maine, who heads this service for U.E.P. will be on the conference program for an update on current problems and an outline of the right moves to make in meeting them

Frank Koebrich, newly named president and manager of Egg Clearinghouse at Durham, New Hampshire has also been invited to visit with the NEMA group. The services of Clearinghouse are being used more broadly than every here in the Pennsylvania "egg basket."

Koebrich's message should be of much interest in view of the depth of experience in marketing that he brings to his new post.

U.E.P. has, in the last several years, centered much of its attention in providing cost-cutting insurance service for its members. Beginning with an all risk program of fire insurance coverage now including property values across the country totalling in excess of half a billion dollars, U.E.P has now moved into the fields of casualty and liability coverage as well as workmen's compensation and auto fleet coverage.

Jack Shuford, a key administrator in the UNEPRO insurance program is slated to review the new goals his service will be targeting in 1980.

NEMA members will be guests of the Association for luncheon. Any flock owner interested in more information about membership in NEMA and U.E.P. can write to C.A. O'Reilly, Secretary, Northeast Egg Marketing Association, 136 Harron Avenue, Hightstown, N.J., phone 609/443-3490.

Ask the VMD

(Continued from Page D17)

when selecting your gilts, you should study their weaning weights.

You should weigh the pigs at birth, and again, three weeks later when they are weaned. This tells you the sow's over-all ability to milk, which will be inherited by the gilt and should be selected for.

A good record-keeping system would identify: 1. the gilts of large litters, 8 to 10 or greater; 2. birth date; 3. abnormalities, such as hernias or cryptorchids; 4. sow's behavior; 5. sow's health, free from mastitis; 6. medications used; 7. farrowing duration, 2-4 hours or 6-8 hours; and 8. gilt's weaning weight.

When weaning the pigs at 3 to 5 weeks of age, the gilts should be screened, and those with any inversion of teats or less than twelve should be rejected. You should select two or three times the number of gilts you will need six to eight months later.

When gilts are at the 180 to 200 pound stage, they should be checked for back fat thickness, soundness, and the replacements should be thinned out so that you have 25 to 30 percent of the numbers needed for breeding.

These 25 to 30 percent will be removed from the fat pen and will be put on limited feed. Fenceline contact with a boar will allow you to observe these gilts for heat—the ones that come into heat first will be given top priority.

At breeding time, which can be anywhere from 6 to 8 months depending on the growth factor of your animals and how frequently they have come into heat, you should have a minimum of 10 percent more than you need for breeding replacements. You should cull all gilts that are open after 28 days exposure to the boar.

This breeding stock should be given a minimum of 30 days exposure to the feces of mature sows or boars to reduce the SMEDI syndrome.

The selection of the replacement gilt should not be taken lightly. It is just as important as selecting a boar, and you can make just as many gains in your genetic background with a good selection of females.

To summarize, you need to start early, have good records, blood test new arrivals, have a minimum vaccination program, worm as needed, and find a way to market the squeal of the pig.

If you have a question you would like answered by the team from Valley Animal Hospital, send it to Ask the VMD, Box 366, Lititz, PA 17543. Questions will be kept anonymous on request.

Goat Gang chooses council reps

FLEMINGTON, N.J. — The Goat Gang 4-H Club met recently at the home of Denise Robbi, Hopewell.

The change in the Flemington Fair 4-H Goat Show Rules was the main topic for discussion.

Representatives from the club for the upcoming Goat Council meeting are Chris Peck, Stockton and Margie Van Duyne, Sergeantsville. Reported by Margie Van Duyne.

Final ag structure hearings set for April 29-30

WASHINGTON, D.C. — The last of a series of public meetings on the structure of American agriculture and rural communities will be held in Washington, D.C., April 29 and 30, Acting Secretary of Agriculture Jim Williams announced Monday.

The sessions will begin at 9 a.m. in the Jefferson Auditorium of the U.S. Department of Agriculture, Washington, D C.

Secretary of agriculture Bob Bergland will chair the meeting and question invited representatives of national organizations and experts concerned about future farm and food policy.

Ten public meetings held in November and December in different regions of the United States drew 575 speakers and about 7000 spectators, primarily state and regional group representatives and individual producers.

The meetings were the opening phase of a national dialogue on the present and future of American agriculture that Bergland called for in March, 1979, speech in Kansas City, Mo.

"Farmers and other concerned citizens provided us with a wealth of information about their experiences, their insights, their frustrations and hopes during the regional meetings," Bergland said. "Our goal at this final meeting will be to advance the dialogue to the national perspective.

"We need to begin concentrating on major issues raised during those meetings, so we can better identify the basic questions that must be answered before policies are developed for the future," he said.

The invited panelists, drawn from a broad spectrum of interested groups, will present up to five minutes of oral testimony. In addition, written statements may by left for the hearing record

Written comments from organizations and individuals not scheduled to testify may be submitted for the public record until May 31. Such testimony should be mailed to: Structure of Agriculture Project, room 509-A, U.S. Department of Agriculture, Washington, D C 20250. The telephone number is 202 426-3964.

Summaries of the 10,000 page record from the 10 regional meetings will be available on request after April 1. Requests for this publication should be mailed to the same address.

Heifer committee approves four new projects

MANHEIM — At a recent meeting of the Southeastern Pennsylvania Heifer Project Committee four projects were approved for the Spring and Summer efforts of committee members and the growing corps of church and individual contributors.

The most immediate effort will be to secure four or more producing dairy cows, preferably Holstein, to contribute to the Long Stretch Youth Homes near Frostburg.

William Platter, Long Stretch Director, met with the local committee and described the highly-effective rehabilitation program for troubled boys For several years the program has included "taming" a boy by giving him a wild horse to care for; now, in cooperation with Heifer Project International and with the support of thoughtful neighbors, Long Stretch is adding a dairy herd to its training opportunities.

The SE Pa. Heifer Project Committee also plans to send six heifers to the Col-O-Cal cooperative at Camden, AR., to expand a five-year successful heifer "chain" that is in harmony with Heifer Project's "passing on the gift" idea.

This Summer 120 crossbred gilts and 12 purebred boars will be collected under the leadership of Barry Haldeman, Mark Nestleroth, and John Chapman to send to eleven "Black Belt" counties in south-central Alabama. They will be a contribution to a highly-successful service program supported by HPI among the small and part-time farmers of the area.

The local Heifer Project Committee will also lend support to Sam Williams, of Middletown, and other Heifer Project workers in Western Pennsylvania to send Jersey bulls and heifers to Dominica, a hurricane-ravaged Carribean island with plans to upgrade the dairy potential of "native" cattle.

Funds in support of these projects may be sent to Clifford Gibble, local Heifer Project treasurer, at 320 W. Gramby Street, Manheim, or to the HPI regional office at Box 188, New Windsor, MD 21776. Inquiries about dairy animal donations may be phoned to Clarence Keener, Daniel L. Martin, or Arthur Wenger of Manheim; Cassel Mummau of Mt. Joy; John E. Kreider of Lancaster; or Leon P. Kreider of Quarryville.

Later in the year the local Heifer Project Committee will meet to hear a report on current developments in a dairy-development program in Cameroon where additional heifers may be sent this Fall.

The SE PA committee appreciates the contribution of more than $26,000 by area groups and individuals in 1979 for similar efforts. It is their hope that the recently-chosen projects will also attract a generous response. Films, speakers, print literature, and exhibits to interpret the program are available by contacting the local chairman, Clarence L. Keener 717/665-2361, or the New Windsor, MD, regional office

County forest fire crew to run auction

SAFE HARBOR — Members of The Lancaster Forest Fire Crew will hold a public auction sale on Saturday, April 5 at the Fort Holbrook Fire Base and Training Center. Proceeds go to debt reduction and operating expenses of the Station and Crew.

Auctioneers for the event will be Raymond Miller of Mount Joy and Rufus Geib of Manheim.

The sale, starting at 9 a.m., will continue until everything is sold. Consignments for sale through the Auction are welcomed as well as donations for the Sale, and arrangements may be made by calling The Lancaster Forest Fire Crew at 872-7293.

Early listings for the Sale included iron toys, office equipment, old toy cannons, building supplies, guns and antique furniture, as well as farming implements, tools of all kinds with some quite old, and house hold furnishings.

The Fort Holbrook Fire Base & Training Center is located on Oak Road, just off River Road, in Manor Township, and between the villages of Highville and Safe Harbor. Direction signs will be posted at intersections nearby the Sale location.

How to prepare corn planters for accurate seed drop

LANCASTER — Of the many field operations involved with raising a crop, planting is the most important because you live with the results all season long.

With the planting season rapidly approaching, it is timely to get the machines ready to go before they GO.

It takes only a few minutes to be sure. Good crop yield is directly related to planter function and it deserves some inspection time before heading into the field. There is only one opportunity to do the job right.

Planters of modern design include basic features that provide for accuracy, speed and simplicity. Every manufacturer has tried to keep his planter simple in design - be it a plate-type or plateless or air-operated machine.

"All planters are designed to accurately put seed in the ground," says David Knopp, Crop Production Manager for International Harvester's Northeast Region.

"The operator needs a basic understanding of his planter function; and then, be sure to give proper care to the few critical areas of his machine. This is the only way to assure getting the accurate performance that was designed into it," Knopp said.

In the planting of any crop there are three key problem areas to consider, according to Knopp: tire sizes and pressure, seed openers, and seed selection mechanism.

He discussed them one at a time starting with the tires.

Plant population will vary depending upon your tire size, tire pressure and soil conditions that affect the tires' rotation; that is, slippage, soft ground and etc.

Tire sizes and sprocket settings must be coordinated when calculating desired plant populations.

In fact, the tires take such a critical part in determining population that some manufacturers are putting tires on planters at the factory level to assure proper coordination with charts on the machines.

A simple solution to calibrating your planter tires to the population charts requires a piece of rope about three feet long.

With your planter loaded with seed and fertilizer and ready-to-go to the field, wrap the piece of rope laterally around a planter tire through the wheel rim opening so that it makes a ground mark with each forward revolution, Knopp said.

If your chart guide is based on a tire size that travels 86 inches with each revolution, and you find the distance between the rope marks is 90 inches for example, your field will be under populated with seed.

To determine what your population is going to be simply divide the desired 86 inches of travel by the 90 inches of travel that your tire is making and multiply this by the desired population.

In this example, 26,000, the equation reads 86 x 26,000 — 90 = 24,844 actual plants per acre. The key factor is 86 over 90 or .955% of your desired population.

This is approximately five percent less than desired or some 1200 plants.

By referring to your plant population chart you will find a sprocket setting that is close to five percent higher (27,000 to 27,500) and using this new setting you will then know that you are planting at five percent less than this figure or close to 26,000 plants per acre that you desire.

If you then find that your population rate is still off; then there is a more complicated problem elsewhere in the system. But first, make the tire revolution measurement with your planter fully loaded as this will more than likely establish the correct setting for you.

One such calibration of the planter drive wheels to the charts should suffice for the planting of that entire crop.

The seed openers, whether runners or double disk, should be checked carefully for wear, obstructions, and proper function.

This is a very critical area which determines the proper placement of the seed in the row, and any stoppage or malfunction has a direct effect upon the desired plant population. Checking and corrections should be made.

The third critical area of all planters is the seed mechanism, according to Knopp. It should be checked for worn and broken parts and determined that all parts are functioning properly.

Land preservation first needs a good definition

BY DICK ANGLESTEIN

WEST CHESTER — There's a lot of difference between just rural land and farm land.

Likewise, there's as much difference in referring to it as merely land or as soil.

This became readily apparent at the Rural Preservation Conference held by the Chester County Historical Society on Friday and Saturday.

There was a sprinkling of farmer speakers before the predominantly non-farm conference audience. At times, they talked with each other and even questioned each other, but didn't appear to really get through to each other.

In all, five of the 48 scheduled speakers spread across the two-day conference were billed as having any fulltime active affiliation with production agriculture.

This attendance of invited agriculturalists amounted to slightly better than 10 percent of speaker representation, which admittedly is more than twice the four-percent minority role that farmers now hold in the country's total population.

Despite the conference's general misnomer as dealing with rural preservation and the sparse agricultural attendance, the program appeared to be centered primarily with soil, not merely land, largely owned by farmers and used by farmers to grow food and fibre as a means of their familys' livelihood.

The difference in the approach to the question of how rural preservation should be accomplished was illustrated by the farm and non-farm speakers.

Agricultural spokesmen stressed individual freedoms and the economic aspects of their enterprises, while non-farm speakers talked of such things as open space, scenic vistas and environmental protection.

Charles E. Wismer, Jr., Master, Pennsylvania State Grange, gave his farmer-oriented answer to the problem.

"Farmers need some governmental protection," he said, "but primarily they need to be left alone."

"With the right type of economy, you won't have to worry about land preservation because it will naturally remain in farming."

Wismer claimed that farmers are facing a 30 percent hike in the cost of inputs for the 1980 planting season due to inflation.

The state grange head also lashed out at the Soviet grain embargo.

"Just don't single out only the farmer," he said.

"Let's have a total embargo. All you're going to see is the big fellow get bigger and the little fellow forced out of business."

Ernest Miller, a dairy farmer from Perry Township, Berks County, called for an end to laws and studies on land preservation since any of them have yet to help find any answers.

He said that legislation such as those forming ag districts just play into the hands of the developers.

"Easements or deed restrictions are the only way to go to keep the land in agriculture," Miller said.

"Let the land be assessed at its real value and get rid of some of the nuisance laws that interfere with daily farming operations."

The beauty of this, he added, is that the government doesn't get involved.

"Or else, you'll just end up with some more studies," Miller said.

Marshall Haws, of the West Chester Conservation District, called for a return to the "private property ethic."

"Get the government out of the agricultural credit business," he said.

"The government only subsidizes mediocrity and hurts the farmers who are doing a good job."

Among the non-farm speakers at a workshop entitled "An Economically Viable Alternative for Rural Lands" was Darryl Caputo, Executive Director of the Upper Raritan Watershed.

He spoke on the topic of why open space is economically sound. He talked in terms of cluster design, construction on flood plains and protecting the dunes on the coastline of New Jersey.

Caputo said that residential development doesn't pay its own way. The only communities in New Jersey with lower taxes are those with nuclear power plants, he said.

An opening address was given by Robert Gray, Executive Director of the National Agricultural Lands Study.

This is an 18-month study into the impact of the accelerated loss of farmland. A report is scheduled in January, 1981.

"This is an in-depth look at the problem," Gray said.

"We expect to get something that will even be helpful to state and possibly local governments."

A question from the audience before Gray rushed back to Washington to testify at a hearing asked:

"Is there ever going to be a study that will be of use to the individual farmer?"

A non-commital answer followed.

A total of 15 workshops were held during the conference and were designed to look at rural preservation from the many different viewpoints. Sessions were held on the campus of West Chester State College.

The conference was sponsored by the Chester County Historical Society in association with the Pennsylvania Historical and Museum Commission.

The room containing the conference office had a varied display of preservation literature, including a number of Commission publications that were offered for sale. These covered diverse subjects from Blacksmithing and Homespun Textile Traditions of Pennsylvania Germans to Indian Paths of Pennsylvania and Regimental Organization and Operations 1776 - 1783.

GOOD COWS — GOOD MANAGEMENT
PLUS
PURINA'S #1 COMPLETE HI ENERGY DAIRY RATION
TEST COW B16 COARSE

Left to right, Dennis Rex, Paulette Rex, Charlene Miller, and Albert Miller displaying plaque and trophies awarded for top dairy herd in Schuylkill County for the past two years.

Dennis Rex and Albert Miller operate their family dairy farm with 34 Milking Holsteins. Their 250 acre farm is located in Schuylkill County just south-east of Tamaqua.

They grow 100 acres of corn, 100 acres of grass hay and 50 acres of pasture and woodland.

The feeding program for the milking cows is a 20# lb. hay, and 40# lb. corn silage. An ear corn mix is fed to low producing cows while all fresh and top producing cows receive Purina® Test Cow B16 Coarse Complete.

Dennis and Albert want top energy for their high producing cows, and they have been pleased with the results they have seen over the past 25 years on Purina® feed and Test Cow.

Congratulations

DENNIS REX and ALBERT MILLER

FOR BEING TOP DAIRY HERD IN SCHUYLKILL COUNTY FOR THE PAST TWO YEARS

	lbs. of Milk	lbs. of Fat
Dec. 1979	19,681	752
Dec. 1978	18,654	736
Dec. 1977	18,450	737
Dec. 1976	16,651	653

Shown above is Albert and Dennis with "Lucy" a Heather Stone Luckly Type Blazer Daughter a 7 year old Registered Holstein, 365 day, 28,506 lb., 4.0% fat, 1264 lb. fat. — 1st cow over 1000 lb. of fat in 305 days with 25,579 lb. milk, 4.3% fat with 1111 lb. of fat.
